Railroad Legislation.

Although biennial elections and biennial sessions of the Legislatures have been generally adopted in the United States, next week will witness the assembling of Legislatures in twenty-eight out of thirty-eight States and will acquaint us with many crude schemes for railroad legislation. Mr. Thurber's shriek for "regulation" and Judge Black's avowed intention to petition Congress for a National Railroad Act, will lead country members to introduce into their several Legislatures bills specially directed against Railroad corporations.

Both men have the same object of attack but the results sought to be obtained are widely different. Mr. Thurber is a freight shipper, Judge Black is a politician. Mr. Thurber by an appeal to popular prejudice seeks to raise a clamor against railroads for selfish ends; Judge Black by skillfully reasoning from erroneous assertions, strives to influence legislators for political ends. The utterances of the two men are not harmonious with each other. Mr. Thurber evidently had in mind his own State of New York, but Judge Black's letter, so ostentatiously paraded by the "Board of Trade and Transportation," assures him that no State "legislation" is needed. Both men know nothing practically of railroad management, but Judge Black's remarks are consistent with his earlier views upon the subject. He was a member of the "Pennsylvania Constitutional Convention," which amended and remodelled the present fundamental law of the State, and the article on Railroad corporations is for the most part his work. He declares that the laws of Pennsylvania, and by implication the laws of nearly, if not quite, all the other States of the Union, are sufficient, if properly enforced, to remedy all the evils that terrify Mr. Thurber. Judge Black, very shrewdly begins by gravely announcing as a fact, that all railroads belong to the State, and that the stockholders have no proprietary right whatever in their road-bed and rolling-stock, but he is very careful to say that State Legislatures have no furtber action to take in the matter.

It is not our purpose to discuss at present the "Reagan bill" to regulate interstate commerce, now pending in Congress, or to inquire why Judge Black is so anxious to have this matter discussed at Washington, but we believe him to be sincere when he virtually declares that the statutes in force in the several States are amply sufficient for the protection of the people against railroad abuses. This is about the only proposition in his letter that we can agree to but if it will be remembered that the author is the bitterest of partisans, we should be glad to see it in the hands of every legislator.

The difficulty of enforcing legitlative enactments arises from the fact that there are upon many statute books a mass of trashy and ill-considered laws, placed there in response to a cry for legislation of some kind against railroads. Nothing can be clearer than the doctrine as stated by Geo. Ticknor Curtis that, "a grant of a charter of incorporation is a contract" between the sovereign power and the grantee, and that "private property remains private property although held by a corporation and held by the terms of the charter," but railroads do sustain relations to the State which warrant an interference, in certain cases, by the sovereign power. This interference is justified not by Judge Black's doctrine that "the owners of railroads have no proprietary right, title, or claim to the roads themselves," but by the fact that railroads are common carriers. Railroads are amenable to the State as common carriers and, in the absence of stipulations in their charters, amenable only as common carriers. They are amenable in exactly the same degree as steamboats, ferries, horse-railroads, and other carriers. They do possess other proprietary rights than "a mere franchise" and the State cannot interfere with them in the exercise of these rights unless oppressive charges or unjust and injurious discrimination between individuals result.

The large number of statutes that have already been enacted in the several States, without opposition by the railroad corporations, show that railroad directors generally have been anxious to make concessions and to render the best possible service to the public. Many present methods of railroad management are unsatisfactory alike to the railroad managers and to their patrons, and railroad officials have taken one important step toward more satisfactory relations by the appointment of the "Trunk Line Commission."

It is manifestly unfair to railroad corporations, however, for legislators to decide arbitrarily what rates are unjust or what shall be deemed injurious discrimination. On adjusting a single complaint, many elements must be considered for which no statute could have provided. Circumstances, volume of traffic, operating expenses and the thousand and one complications continually occurring, make it impossible that a single statute passed in January should decide a question occurring in November. Matters of difference between "the railroads and the people," should be settled not by legislative enactments but by commissions, composed in part at least, of men acquainted with practical railroad management, and by the courts of common law, whose long series of decisions upon common carriers from Lord Raymond to the present time, selfish greed nor party clamor can reverse nor corporate wealth overthrow.

Legislation of the past year Concerning Railroads.

A concise summary of the important legislative enactments in the different States in 1880. concerning railroads, has been made by the New York *Tribune*, in substance as follows:

In California and Iowa there has been legislation in favor of companies chartered in other States, the California law permitting them to hire or buy roads, and generally to do any railroad business, and the Iowa law allowing them to extend their roads or construct branches. Mississippi roads have been enabled to change their gauge as they please, and Kentucky has established a Railroad Commission like that existing in this State and those recently created in California and Georgia. In New York reorganizing companies are permitted to increase their capital stock as may be needful; voting by proxy has been forbidden except when the person issuing the proxy has actual control and possession of the shares represented, as well as the ownership of them:

174177

and the provisions requiring the operations of the roads to be reported under five general classes, sub-divided into one hundred heads, has been so changed as to call for annual reports from the companies framed in twenty tables, embracing 232 distinct heads and sub-heads. Laws have been passed protecting railroads from malice and misconduct. Specific penalties have been imposed, in Kentucky and Massachusetts, for throwing missiles or shooting at a train. Maine has empowered conductors to arrest disorderly or profane persons, and New York has enabled the Governor to confer similar authority for arresting gamblers and to order people off the platform and steps. In Maine fine and imprisonment have been prescribed for combinations to stop or delay trains, for violence or intimidation in opposition to the service, and even refusal or gross neglect to do their duty, on the part of employes. In Connecticut a law passed for the examination of employes, for color-blindness, has been applied so severely that both political parties have combined to oppose its further enforcement. Maine has forbidden the leaving of detached cars on a main track, unless attended by employes with danger signals; Iowa has adopted a requirement obliging sleeping car companies to keep ticket offices at all termini; and Michigan has empowered companies to sell unclaimed freight or baggage after it has been kept one year.

New Iron Screw Steam Pilot Boat.

The Harlan & Hollingsworth Company, Wilmington, Del., have finished the iron screw steamer Pilot which has attracted so much attention while being constructed, as the first of its kind ever built for the pilot service, and it has just made a most successful trial trip, developing a speed of from 12 to 14 knots an hour. The Baltimore Sun gives the following description of the new steamer:

The Pilot is a model of a fine vessel. It is about 250 tons burthen, iron hull, with close iron bulwarks at each end, and with an iron siding, forming a flush quarterdeck, which extends about one-half the total length of the boat. Under this raised quarterdeck are the compound engines and boiler, the main cabin, dining room, kitchen, pantry, and the general accommodations for twenty-five pilots. Above the deck are the pilot-house and captain's room, the close companionways leading to the rooms below, and two heavily-built sky-lights for lighting the main cabin and engine compartments. There are two masts, with schooner rigging, and fitted with standing stays of galvanized wire. The general dimensions of hull are: Length from out to out of main posts, 113 feet; length over all, 122½ feet; beam molded, 23 feet; depth from base-line to top of quarterdeck beams, 16 feet. The iron hull is of stout construction, with bar-keel, angle iron frames and deck beams, and average thickness of three-eighths of an inch for outside plating. There are three athwartship iron bulkheads, two of which are made water-tight, and the coal bunkers are of plate iron and of 60 tons capacity. The machinery consists of an inverted direct-acting compound engine, with twenty-two and thirty-six inches diameters of cylinders, and twenty six inch stroke of piston, acting upon cranks placed at right-angles. The engine is fitted with a tubular surface-condenser, and the requisite air, feed, bilge and circulating pumps, and also an independent steam reversing engine for shifting the main valve links. The propeller-screw, which is wholly submerged, is 8½ feet diameter and has 15½ feet pitch. There is one cylindrical return-tube boiler, with three furnaces and an independent steam drum. The boiler is designed for a working steam pressure of 75 pounds per square inch. The draft of water, when the boat is loaded with sixty tons of coal and the fresh-water tanks filled and stores for a month's cruise is nine feet six inches forward and eleven feet aft. The upholstering will be placed in the vessel and the boat ready for service in three days. The service required is to cruise outside the capes, furnish vessels with pilots, assist vessels in distress, etc. The international code of signals will be used.

Lake Shore and Michigan Southern Railway.

The following statement was presented at the annual meeting of the directors held in this city on the 21st ult. It is for the year ending December 31, 1880, December being partly estimated:

	1879.	4880.
Gross earnings	$15,271,492	$18,720,000
Operating expenses and taxes	8,934,524	10,410,000
Net earnings	$6,336,968	$8,310,000
Interest, rental and dividends on guaranteed stock	2,754,988	2,750,000
Balance	$3,381,080	$5,560,000
Equals per share	7.24	11.24
Per centage of earnings	58.50	55.61

Balance for 1880 appropriated as follows:

Dividend, 4 per cent, August, 1880	$1,978,660
Dividend, 4 per cent, February, 1881	1,978,660
Total	$3,957,320
Sinking fund for 1880	250,000
Surplus	1,352,680
Total, as above	$5,560,000

Comparison with previous year:

		Equals per cent.
Increase in gross earnings	$3,448,508	32.58
Increase in operating expenses	1,475,476	16.51
Increase in net earnings	1,973,032	31.13

Nothing has been charged to construction or equipment accounts since 1878. Operating expenses include the cost of 1,500 new freight cars ($700,000) and also the cost of 7,000 tons steel rails, of several new iron bridges, new station-houses, &c. Excluding the cost of the new cars the operating expenses, including taxes, were but 51.87 per cent.

E. D. Worcester, Treasurer.

American Commerce.

The annual report of Joseph Nimmo, Jr., Chief of the Bureau of Statistics on the foreign commerce of the United States, is completed. In regard to our export trade, Mr. Nimmo says:

"The five leading articles of export during the year ended June 30, 1880, were as follows: bread and breadstuffs, $288,036,835; cotton, unmanufactured, $211,535,905; provisions, $127,043,242; mineral oils, $36,218,625; tobacco and manufacturers thereof, $18,442,293."

The tonnage of the New York State canals fell from 5,859,080 tons in 1869 to 5,362,372 in 1879, but the tonnage of the two railroads competing with the canal (the New York Central and New York, Lake Erie and Western Railroads) increased from 6,594,094 tons in 1869 to 17,228,394 tons in 1879. These facts, it is maintained, serve to illustrate the most striking commercial developments of the age, namely, the fact that the vehicle of commerce on wheels, has, in our domestic trade, to a great extent superseded the vehicle of commerce on the water. The same facts also indicate the cause of the decline of the shipping employed on internal water lines and in the coastwise trade of the United States.

The tonnage employed in the domestic trade of the United States (the ship ton being 100 cubic feet of space) on June 30, 1880, amounted to 2,637,685 tons. This embraces the vessels employed in the carriage of provisions and freight. But the capacity of railroad cars of all descriptions employed on the railroads of the United States amounted, according to the latest and most reliable information, to about 7,100,000 similar tons of 100 cubic feet of space. This railroad car tonnage, however, the report says, actually affords means of transport for a much larger amount of freight tonnage than is indicated by the foregoing comparison.

Michigan Central Railroad.

At a meeting of the directors of the Michigan Central Railroad Company, held in this city on the 21st ult., the following statement of the business of the road for the year ending December 31, 1880, (December being partially estimated) was presented:

	1879.	1880.
Gross earnings	$7,345,700	$9,100,000
Operating expenses & taxes.	4,624,600	5,730,000
Net earnings	$2,721,100	$3,370,000
Interest and rentals	1,620,000	1,605,000
Balance	$1,101,100	$1,765,000
Equals per share	5.87	9.42
Percentage of earnings	62.96	62.97

Balance for 1880, appropriated as follows:

Dividend, 4 per cent, August, 1880	$749,528
Dividend, 4 per cent, February, 1881	749,528
Total	$1,499 056
Construction	100,000
Jackson accident	70,000
Surplus	94,944
Total, as above	$1,765,000

Comparsion with previous year:

	Per cent.
Increase in gross earnings	$1,754,300 or 23.88
Increase in operating expenses	1,105,400 or 23.90
Increase in net earnings	648,900 or 23.84

Construction account has been charged with land $45,000, and 6⅛ miles of additional second track $55,000. The payment on Jackson accident settles all claims on that account. Operating expenses include the cost of 850 new freight cars, $400,000, and also the cost of 4,700 tons of steel rails; of new iron bridges, $15,000, and of new buildings and additions to old ones, $43,000.

C. Vanderbilt, Treasurer.

The Vermont Legislature, after the longest session on record, adjourned, without day, at eleven o'clock a. m. on the 24th ult. The bill taxing express and telegraph companies two per cent on their gross receipts passed both branches.

The sale of $250,000 worth of bonds of the Augusta and Knoxville Railroad was completed on the 24th ult. This, it is said, insures the building of the road. The work of construction will be pushed forward at once.

The controlling interest in the Nashua, Acton and Boston Railroad has been purchased by the Concord Railroad Company at the reported price of $250,000.

New York, Saturday, January 1, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

ONE of the practical subjects that is just now placed prominently before the public, and is creating much discussion both at Washington and in business and philanthropic circles at home and abroad is the adoption of improved sanitary measures for suppressing disease among cattle. The English consumers of American beef are thoroughly awake to the advisability of demanding the utmost caution in the treatment of live stock sent over to their market. The *London Times* has just had a correspondent over here writing up the matter, and he is now on his way to tell his people the result of his investigations in this direction. Our railroad managers are studying into the best ways of assisting in such sanitary measures, so far as the transportation of live stock is concerned, and will undoubtedly act promptly and in most hearty accord with the public in causing the cattle dealers to properly care for their stock in transit.

AN appreciation of the bird in the hand may be stimulated in no better way perhaps than by a retrospective glance at the days when the needy hand was reaching out toward the bush to grasp the blessing. Forty-nine years ago this holiday week thousands of barrels of flour and vast quantities of other produce were frozen up in canal boats and in sloops on the Hudson, while the New York market, dependent then upon such facilities as the sleighing might afford, had but little hope of having its wants supplied at anything like reasonable prices before spring. Salt was then selling at Albany at two dollars and fifty cents per bushel, and pork at two dollars per hundred, for want of salt to save it, while in New York pork was selling at from five to seven dollars per hundred. New York, in those days of abundant forests within what now would be a two hours ride from the city, was then paying for fuel as follows: coal, fifteen and sixteen dollars per ton; oakwood nine dollars per cord, hickory wood thirteen dollars and other kinds in proportion. On Jan. 2, 1832, the AMERICAN RAILROAD JOURNAL, in advocating the building of a railroad from "Lake Erie at some point between Cattaraugus Creek and the Pennsylvania line and terminating in this city," said: "with such a railroad, intersected at convenient distances by other railroads running from the Erie Canal and one from Ogdensburgh to Syracuse or Utica, almost every county in the State, would be brought within twenty-four hours' ride of New York. It would prevent the recurrence of the state of things which now exists in this city," (referring to the condition of the market.) "All kinds of business would move on regularly and be more equally divided throughout the year. Produce could come to market as well in January as in July; and the farmer would not be obliged, in order to get his crop to market in the fall, to neglect preparing for the next." This first argument by a railroad paper in favor of what has since grown to be the great Erie line, brings strongly to mind the benefits and conveniences that have accrued from our railroad development of the past fifty years.

Boston, Hoosac Tunnel and Western Railway.

The report of this recently opened connection with the Hoosac Tunnel, for the year ending Sept. 30, 1880, was sent to the State Engineer of New York on the 21st ult., and considering that the road was open for through traffic only a small portion of the year, the results of its operation make an excellent showing. The principal items of interest in the report were as follows:

	1879.	1880.
Capital stock authorized.	$10,000,000	$10,000,000
Capital stock subscribed.	2,160,000	2,160,000
Capital stock paid in	459,100	475 000
Unfunded debt.....	932 470	1,540,000
Length of road, miles, Massachusetts State line to Mechanicsville		39.03

	1880.
Total earnings.....	$192,418
Total transportation expenses.....	156,106
Surplus for the year.....	$36,312

The number of miles run by passenger trains was 259,546; by freight trains, 1 273,311. Number of through passengers, 52,427; number of way passengers, 53,744—total, 106,171. Number of passengers carried one mile, 1,664,111. Tons of through freight east 114,272, do. west 17,455; tons of way freight east 59,247, do. west 5,810—total east and west, 196,784. Number of tons carried one mile, 7,988,297.

This railway owns 8 locomotives, 6 passenger, 4 combination, 2 baggage and 88 other cars. It also controls 980 freight cars upon which partial payments have been made to the Trust Company formed for their purchase, and upon which some $420,000 remain to be paid before the railway comes into full ownership. This balance due should be taken into consideration in comparing this road with other Massachusetts corporations owning their rolling stock entire.

Corn for Fuel.

There are localities in the West and Northwest where scarcity of fuel has forced people to burn corn again this winter. The frequent recurrence of the fuel famine in those places leads a correspondent of the St. Paul Pioneer-Press to suggest what he calls a practical solution of the problem. Coal, he says cannot be found, and the use of wood will soon exhaust the available supply of that article; corn is the only substitute, and must be the fuel of the future. For stoves it is superior to any other substance, hard coal alone excepted, and it is cheaper than anything that is likely to be used for fuel. Two or three acres of corn will afford an ordinary family a year's supply of fuel; and this writer alleges that the same corn sold in the market, and the proceeds turned into either wood or coal will not begin to do it. Of course, he speaks of the far Northern prairies. Corn may be used in either a wood or coal stove without any change of grates,

and makes a steady hot fire, which can be regulated as readily as a coal fire. Two bushels of corn in the ear, it is estimated, will keep a comfortable fire the coldest day in winter. Regarding the squeamishness about burning an article that is used for food, the writer says pointedly: "I would sooner have an acre of corn that can be replaced in a single year, than to burn an acre of timber that takes years to replace, even on the score of sentiment." There is common sense in this. If it is cheaper for people on the fertile prairies to raise their fuel, as they do their food, and save what little timber they have for other purposes, sentimental squeamishness should not deter them from doing so. More cooked food is daily thrown away than would feed the hungry poor, and it is done without compunction. While there can be no excuse for this wastefulness, there is good reason for burning corn when it is of more value as fuel than the proceeds would be if used in the purchase of wood or coal.

OUR BOSTON LETTER.

(From our regular correspondent.)

BOSTON, Dec. 28, 1880.

Demanded loans rule from 6 to 8 per cent, some large lenders refusing to do anything less than 8 per cent. Time 6 per cent loans are sought for, however, with but little disposition on the part of borrowers to place them. Closing prices compared with those a week ago, show the following changes:

Advanced.

Atchison, Topeka and Santa Fe	142½	to	149
Chicago Burlington and Quincy	173½	to	179
Boston, Clinton & Fitchburg Pref.	108½	to	115
Boston, Clinton & Fitchburg Com.	22½	to	23
Central of Iowa	34½	to	36
Chicago and W. Michigan	76	to	77¾
Concord	95¾	to	96
Connecticut River	153¾	to	156
Connecticut and Passumpsic	87	to	88
Eastern	36½	to	38¼
Flint and Pere Marquette Pref.	81	to	82½
Fitchburg	140	to	144
Port Scott and Gulf, Com	71¾	to	74
Kansas City, Lawrence and S.	90	to	91
Little Rock and Ft. Smith	62	to	64
Louisiana and Missouri River	11⅛	to	12½
New York and New England	43	to	47
(Hartford and Erie 7s)	45⅜	to	49
Old Colony	125¼	to	127
Poresmouth, G. Falls and Conway	18½	to	20
Port., Saco and Ports	110	to	111
Pullman Palace Car Co.	122½	to	127½
Summit Branch	20⅞	to	21¾
Vermont and Canada	10	to	15
Wisconsin Central Com	15¼	to	18
Wisconsin Central	32	to	41½

Declined.

Cin., Sandusky and Cleveland	20	to	18¼
Detroit, Lans. and Northern Com.	89¾	to	85
Flint and Pere Marquette Com	25¾	to	24
Northern	107¼	to	100
Boston, Revere Beach and Lynn	107⅛	to	105
Worcester and Nashua	65½	to	62⅞

The decline in Northern is caused by the order of the Central Vermont withdrawing all through freight from the Northern road at White River Junction and sending it to Boston via the Cheshire, and Fitchburg. The purchase of the Sullivan road running from Windsor to Bellows Falls by the Connecticut River corporation compel the Central to deliver its through freight at Windsor directly into the hands of either the Northern or the Conn. River Road, the relations of these two corporations with the Central are friendly, and it is exceedingly disagreeable for the Central to be obliged to turn its large volume of profitable through business over to them. To obviate this it is proposed to build a road under the Forest line charter from Windsor to Greenfield, N. H., there connecting with the Nashua and Lowell (leased to the Boston and Lowell), and thence over the Boston and Lowell to Boston. Should this Forest line scheme be consummated these three roads: the Grand Trunk, Central Vermont, and Boston and Lowell, would have a complete line to Chicago, but the Northern road certainly would suffer seriously, and one or two other small roads would lose an amount of business that would materially lessen their receipts.

Atchison has been very strong, and $1,000 is bid for a call on a thousand shares at 200 any time during the year 1881. The road is absolutely unable to handle all the business that offers, and the supply of freight cars falls far short of the requirements of the traffic.

Wiscons on Central has been moved rapidly up on orders from N. Y., til it touched 20½ yesterday. To-day it drops quickly to 18 and is heavy.

Summit Branch has been active and strong on the publication of the earnings for eleven months ending Nov. 30, 1880, which show a gain of $189,000 over the operations of the twelve months ending Dec. 31, 1879.

Boston is anxiously awaiting news from Chicago concerning the Chicago, Burlington and Quincy watering.

Grand Trunk Railway of Canada.

The gross receipts, working expenses and net profit of the Grand Trunk Railway Company of Canada for the month of October, 1879 and 1880, were as follows:

	1880.	1879.
Gross receipts	£207,198	£193,435
Working expenses	131,760	126,766
Net profit	£75,438	£66,669

—showing an increase in gross receipts of £13,765, in working expenses of £4,994, and in net profit of £8,769.

The aggregate for four months from July 1, 1879 and 1880, was as follows:

	1880.	1879.
Gross receipts	£763,093	£641,358
Working expenses	505,166	470,098
Net profit	£257,927	£171,260

—showing an increase in gross receipts of £121,735, in working expenses of £35,068, and in net profit of £86,667.

Speed of Railroad Trains.

An Iowa court has recently decided that a city ordinance which imposes an unreasonable and unnecessary restraint on the speed of trains is void. The speed of trains is limited by city ordinance inside the limits of Council Bluffs to four miles per hour. Plaintiff sued the company for damages for the killing of a cow claiming that the train was traveling faster than the speed allowed by the ordinance at the time the bovine met its death on defendant's track. The case was tried before Judge Loofbourow in the Circuit Court at the August term. The railroad company raised objections to the validity of the ordinance, and Judge Loofbourow has just decided that the objection was good, and the ordinance is therefore invalid and void. The cow belonging to plaintiff was killed by the train five miles from the company's city depot, and if the ordinance was obeyed it would require over one hour for their trains to reach the depot from the point at which the accident occurred.

Great activity prevails at the shops of the Pascal Iron Works of Messrs. Morris, Tasker & Co., at Fifth and Tasker Streets, Philadelphia, Penn. At present between 450 and 500 hands are employed in manufacturing wrought iron pipe, the principal line of business at this establishment. They are very busy just now, and in some of the departments, notwithstanding they are running night and day, they have more orders than they can fill with promptness. The Light House constructed for the United States Government, to be placed at Cape Henry, on Chesapeake Bay, is about completed, and a part of it has been shipped to its destination. The main portion is now erected in the yard of the works, awaiting Government inspection and approval. The lighthouse is 155 feet high, its exterior shape being octagonal, its interior circular. It is 35 feet in diameter at the base, and 24 feet at the top. It contains 700 tons of iron. Among the recent special work done at this establishment was the construction of a large gas holder for Detroit, Michigan, of 500,000 cubic feet capacity.

Articles of association have been filed at Indianapolis, Ind., of the Indianapolis and Sullivan Railroad Company. The company proposes to build and operate a railroad from Indianapolis through Plainfield, Monrovia, Cloverdale, Bowling Green to Sullivan, about one hundred miles. The capital stock is placed at $700,000 in shares of $50 each. Thomas S. Sprague, of Detroit, Mich., is President; Amos D. Owen, of Plainfield, Ind., Vice-President; Benjamin F. Bush of Detroit, Secretary, and Henry S. Sprague of Detroit, Treasurer, who are also made the first Board of Directors.

Articles of incorporation were filed on the 22d ult. with the Secretary of State of Illinois by the Illinois River Railroad Company with a capital of $300,000, The proposed line of this road extends from the eastern limits of Pekin through said city to and through Peoria to the northern boundary thereof. The corporators and directors are Austin Corbin, Alfred Sully, New York; B. S. Henning, C. W. Fairbank, Indianapolis; Robert C. Grier, William Reynolds, J. J. Fletcher, Peoria.

Articles incorporating the Salamanca and Warren Railroad Company have been filed in the office of the Secretary of State at Albany. The capital is fixed at $220,000. The road is to run from Salamanca to a point where the Alleghany River crosses the line between New York and Pennsylvania.

The citizens of St. Thomas, Canada, have voted, 385 to 350, to contribute $50,000 towards the construction of the Credit Valley Railway. In return for this expenditure the directors promise that the road will be completed from Ingersoll to connect with the Canada Southern at St. Thomas.

Railroad Law.

NOTES FROM THIRTY-SECOND AMERICAN REPORTS

CARRIER.—A passenger on defendant's railway, finding no vacant seats in the ordinary coaches the seats being occupied either by passengers or their baggage, proceeded to a drawing-room car, owned by a private individual, but forming part of the train, and regularly run with it by contract with the defendant, and there took a seat. When called on for extra fare for that seat, he refused, announcing his readiness to go into the other cars if a seat were provided for him there. Thereupon the porter of the drawing-room car, employed by its owner, attempted to eject him. Held, that the defendant was liable for this assault. Thorpe vs. N. Y. C. & H. R. R. R. Co., 76 N. Y. 402; p. 825.

In an action against a common carrier for failure to receive and carry live stock in pursuance of its agreement, it is a good defense that it was prevented from fulfillment solely by the armed violence of its late employees, whose wages had been reduced, and who had quit work and struck for higher wages. Pittsburg, Cincinnati and St Louis Ry. Co. vs. Hollowell, 65 Ind. 188; p. 63.

NEGLIGENCE.—In an action against a railway company, by the owner of real estate adjoining the track, for the burning of his house by sparks from a locomotive, it being found that the fire was communicated by reason of a defective spark arrester, held, that the plaintiff might recover, although the sparks entered the house through an open window in an unoccupied room, the plaintiff not being aware of the defect in the locomotive. Louisville, New Albany and Chicago Ry. Co. vs. Richardson, 66 Ind. 43; p. 94.

A locomotive engineer, killed by remaining upon his engine when a collision was imminent, and taking measures to stop his train, is not chargeable with contributory negligence as matter of law, although he might have escaped injury by leaving his post. Cottrill vs. Chicago, Milwaukee and St. Paul Ry. Co., 47 Wis. 634; p. 796.

A common seaman is bound to obey orders, and if he receives an injury in obeying an order manifestly perilous he is not chargeable with contributory negligence. Thompson vs. Hermann, 47 Wis. 602; p. 784.

TAXATION.—The rights, franchises and interests of a street railway company, chartered by the Legislature and occupying a city street, by contract with the city, are liable to assessment for benefits in the widening of the street in which the track lies. Chicago City Railway Co. vs. City of Chicago, 90 Ill. 573; p. 54.

TELEGRAPH COMPANY.—An impostor, at Cincinnati, sent a dispatch in the name of B. over defendant's telegraph line, to C, at Selma, Alabama, requesting C. to send a telegraphic money order to B., at Cincinnati; C. complied, and defendant paid the money to the impostor at Cincinnati; held, that defendant was not liable for the mistake in the absence of any suspicious circumstances. Western Union Telegraph Co. vs. Meyer, 61 Ala. 158; p. 1.

FRANCHISE.—DOES NOT INCLUDE IMMUNITY FROM TAXATION—RAILROAD.—A decree in chancery ordered in case another sale should not be made that commissioners might sell "all the property and franchises" of a railroad company. M., for himself and others, made an offer for the railroad, in which he said, "I expect a full and perfect title to the road, including the State's interest, franchises and privileges." This proposition was accepted by the commissioners and the sale reported to the court, was confirmed by decree which treated the sale as one of the "property and franchises" of the company, and directed the commissioners, "in conformity with the previous decrees," to "make title to the purchasers according to the terms of the contract and former decrees of this court. Held, that the purchasers acquired title only to the property and franchises of the company, and that an immunity from taxation would not, under the rule in Morgan vs. Louisiana, 93 U. S. 217, pass to the purchasers. The term "franchises is not synonymous with "rights, privileges and franchises," rights, powers and privileges" and the like. This case is distinguishable from Humphrey vs. Pegues, 16 Wall, 244, where it was held that an immunity from taxation did pass under a transfer of "all the powers, rights and privileges" of a railway corporation. Judgment of Tennessee Sup. Ct. affirmed. East, Tennessee, Virginia and Georgia Railroad Co. Plaintiff in error, vs. Hamblin County. Opinion by Waite, C. J.

[Decided Nov. 29, 1880.)

Five new passenger coaches, differing in style from those at present in use, have been placed on the lines of the Baltimore and Ohio Railroad Company. They are shorter, and have the seats of the centre third of the car with stationary backs and facing both ways, so that persons sit face to face. The remaining spaces at both ends of the car have seats running lengthwise on both sides. The windows are large, extending from the arm-rests of the seats nearly to the roof. The interior, seats, window blinds, mullions—in fact, everything of wood—is light colored oak. The upholstery is in crimson plush. Each car will seat forty-three persons. The exterior is decorated with Eastlake designs, upona rich olive brown.

The engineers of the Shenandoah Valley Railroad have finished their preliminary survey from Waynesboro to South River on the North River branch of the Richmond and Allegheny Railroad, and the section between the two points will be placed under contract in the early spring. The North River branch of the Richmond and Allegheny Railroad has been ordered to contract, and a detachment of engineers began operations at Lexington last week.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

Canada Southern Railway.

At a meeting of the directors of the Canada Southern Railway Company, held in this city on the 21st ult., the following report of the operations of the road for the year ending December 31, 1880 (December being partly estimated) was presented :

	1879.	1880.
Gross earnings	$2,995,365 68	$3,717,277 54
Operating expenses & taxes	2,448,090 41	2,393 051 20
Net earnings	$547,275 27	$1,324,226 34
Receipts from other sources	3,479 61	13,034 87
Total receipts	$550 754 88	$1,337,261 21
Interest on bonds	391,452 50	420,000 00
Balance	$159,302 38	$917,261 21
Equals, per share of stock	$1 06	$6 12
Percentage of earnings	81.73	64.38

Application of above balance of..... $917,261 21

Construction expenditures :

New side-tracks	$38,870 37	
New buildings and permamanent replacement of bridges, etc	45,101 41	
New water-stations, reservoirs, &c	20,894 46	
New tools, machinery for shops, &c	14,986 31	
Lands at St. Thomas, Detroit, Toledo, &c., for side-tracks, water privileges, &c	24,106 20	
Settlements of old claims, town of Niagara's lien upon Erie and Niagara Railway, &c	45,712 89	
Applied to reduction of "Bills & Accounts payable," as they appeared on balance sheet of Dec. 1879, being principally for account of new equipment	315,256 60	
		504,928 24
Remainder applicable to stock		$412,332 97
Two and one-half per cent dividend on capital stock of $15,000,000 is.		375,000 00
Surplus		$37,332 79

The above statement compared with the year 1879, shows the following results :

		Per cent.
Increase in gross earnings	$721,911 86	24.10
Decrease in operating exp	55,039 81	2 25
Increase in net earnings	776,951 07	141.97

The road and property have been maintained in good and efficient condition during the year. The renewals of track alone have been as follows : 173,860 ties ; 65 86 miles laid ; 650 tons steel rails laid, $139,000.

Included in operating expenses, in addition to ordinary maintenance and repairs, are the following items : rebuilding old ferryboat, $50,000 ; new passenger and baggage cars, $18,000 ; renewing freight and passenger equipment, $65,000.

By the ownership of the 1,100 additional freight cars purchased in 1879, the expense of car mileage to this company has been reduced about $127,000.

After payment of operating expenses, interest on bonds and a dividend of 2½ per cent on the capital stock there will remain to the credit of income account a balance of about $425,000 representing assets mainly in the shape of materials and supplies on hand, including about 3,000 tons of steel rails fully paid for.

The above mentioned expenditures for construction and equipment and for renewals and repairs have very materially bettered the condition of the property, and were necessary to enable the company to successfully handle its largely growing business. The effect is seen in the actual decrease in operating expenses as well as in the increase in gross earnings.

State Legislatures.

The following table shows when the Legislature of each State in the Union will next convene, the length of the sessions if limited and whether the sessions thereof are held annually or biennially :

States.	Session.	Limit of session.	Next Legislature meets.
Arkansas	Biennial	60 days	Jan. 10, 1881
Alabama	Biennial	50 days	Nov. 7, 1882
California	Biennial	60 days	Jan. 5, 1882

West Virginia	Biennial	45 days	Jan. 12, 1881
Wisconsin	Annual	None	Jan. 12, 1881

Banks Liable for Special Deposits.

The following decision was rendered in the United States Supreme Court at Washington on the 20th ult. :

No. 125—Josiah D. Whitney, plaintiff in error, vs. The First National Bank of Brattleboro', Vt., in error to the Supreme Court of Vermont. This was a suit brought to recover the value of certain United States bonds left by Mr. Whitney with the bank as a special deposit and stolen from the bank by burglars. The State Supreme Court held that the bank could not be held liable for its negligence in keeping or refusing to return special deposits, because the liability grew out of a contract which the bank had no right to make. The judgment of the Supreme Court of Vermont, however, is here reversed, upon the authority of a National Bank vs. George A. Ham (100 U. S., 699), and the cause remanded, with instructions to reverse the judgment of the County Court and award a venire de novo. The opinion was by Chief Justice Waite.

The Baltimore Steam Packet Company, John M. Robinson, president, has contracted with the Harlan and Hollingsworth Company, of Wilmington, Del., for the construction of a new freight steamer. The new vessel will be a propeller of 900 tons burthen, hull and waist of iron, 205 feet long, 31 feet 6 inches beam, will be named the Gaston, and will be provided with a compound engine and surface condenser and all the modern improvements, and is expected to be on the route by the 1st of July.

New York Central and Hudson River R. R.

The following is the official statement of the operations of the New York Central and Hudson River Railroad Company for the fiscal year ending Sept. 30, 1880, and also the comparative figures for the previous year :

Gross earnings :	1879.	1880.
From passengers	$5,953,101 94	$6,611,159 51
From freight	18,270,250 88	22,199,965 94
From miscellaneo's	4,173,231 28	4,364,787 78
Total earnings	$28,396,583 60	$33,175,913 23
Expenses	16,123,072 88	17,849,894 88
Net earnings	$12,273 510 77	$15,826,018 85
Interest & rentals	4,679,024 81	7,745,158 50
State taxes on earnings, one month		11,640 84
Profit	$7,594,485 96	$10,569,219 51
Dividend, 8 per ct.	7,139,528 00	7,141,512 95
Surplus	$454,957 96	$3,427,706 56
Profit, per share	$8 49	$11 82
Expenses, per cent	56 77	53 80

There has been expended from the surplus for construction during the year as follows :

Grading for new tracks, Buffalo and East Buffalo,	$35,925 87
For new bridges	52,342 89
For superstructure for new tracks, Buffalo and East Buffalo, and new sidings	73,093 45
For depot freight house and yard improvements at Buffalo, East Buffalo and Sixty-fifth street, New York City	314,946 59
For 37 additional locomotives	252,050 00
For 2,909 new cars	1,467,165 50
For land purchased at Buffalo, Syracuse and Sixty-fifth street, New York City	1,085,915 08
Total	$3,281,439 38

Included in operating expenses is the cost of 6,335 tons of steel rails.

	1879.	1880.
Earnings per ton mile on freight	$0.78	$0 87
Expenses per ton mile on freight	0.54	0 54
Profit per ton mile on freight	$0.24	$0.33
Earnings per passenger mile on passengers	2.05	1.99
Expenses per passenger mile on passengers	1.20	1.23
Profit per passenger mile on passengers	$0.85	$0.74
Earnings per train mile on freight	1.52	1.92
Expenses per train mile on freight	1.05	1.18
Profit per train mile on freight	$0.47	$0.74
Earnings per train mile on passengers	1.23	1.30
Expenses per train mile on passengers	0.72	0.82
Profit per train mile on passengers	$0.51	$0.48
Average number tons freight hauled per train	194	218
Average number miles one ton freight hauled	248	238
Average number passengers hauled per train	60	65
Average number miles one passenger hauled	35	32

J. P. CHAMBERS, General Auditor

Personal.

—Col. Samuel R. Johnson has been appointed master of road of the Baltimore and Ohio Railroad, with headquarters at Baltimore.

—General McClellan resigns the presidency of the New York Underground Railroad Co., intending to go abroad next April with his family on an extended European trip.

—Miss Stone, of Chataqua, sister of General Stone, who has charge of the work of improving the Heli Gate channel, is to be married in this city next week to Governor-elect Porter, of Indiana.

—Hon. S. S. Cox is gradually recovering from his recent severe attack of pneumonia, but some doubt is expressed as to his being able to attend to his duties at Washington this winter.

—General Grant is said to be much interested in the inter-oceanic ship canal question, and it is announced that an article on that subject indicted by him will appear in the North American Review for February.

—Mr. George P. Johnson has recently been appointed paymaster of the Fitchburg Railroad Company; Mr. Thomas Whittemore, who formerly performed the duties of paymaster, devoting all his time now to the increasing business of his position in the president's office.

—The financial transactions of Mr. James C. Flood through the Stock Exchange during the past five years are said to amount to $300,000,000. Mr. Flood is described as an exact and punctual man of business, with qualities and habits placing him among the exemplary class of citizens.

—Among the prominent railroad men stopping in New York this week have been Mr. Robert Garrett, 3d vice-president of the Baltimore and Ohio Railroad Company, Mr. Dan'l Robinson, president of the Troy and Boston Railroad Co. and Gen. Jas S. Negley, of Pittsburg, Pa.

—Hon. Thos. Allen is both a western and New England man having a beautiful place in Pittsfield among the Berkshire Hills, and a western home and business headquarters in St. Louis. His profits from his connection with the Iron Mountain Railroad, recently purchased by Mr. Jay Gould, are said to amount to $3,000,000.

The New Enlarged Welland Canal.

If it is true that Oswego vessel owners are selling out, they are doubtless preparing to build the larger class of craft that the new enlarged Welland Canal will admit of. It is stated that the new canal will be ready by the middle of next summer, or, in any event, in time for the opening of navigation in 1882. When this new canal is finally completed, all the present canal size craft will be thrown on the market for sale, or will be compelled to seek short routes, as they certainly cannot compete with the larger craft on the long through route. Another important feature in the opening of this new canal will make itself felt at Buffalo unless the Erie Canal is made free—will make itself felt even then. Our large vessels can "go around" Buffalo. They can go directly to Kingston. The St. Lawrence River cannot be got through, as many people suppose, "to the ocean" by these large vessels, except in ballast, and indeed it does not seem to be the policy of the Canadians to furnish a through deep-water route from the lakes to the Atlantic. If such a route was furnished, grain and all sorts of freight would simply pass through Canada without paying terminal and other profitable charges. What the Canadians want is to make Kingston what Buffalo is to-day, and the completion of the new canal will, without doubt, go far toward that end. —[Chicago Inter-Ocean.

Interest and Dividends.

—The Hannibal and St. Joseph Railroad Company have declared a dividend of 3½ per cent upon the preferred stock, payable Tuesday, February 1, 1881, at the office of the company, No. 78 Broadway.

—The Lake Shore and Michigan Southern Railway Company have declared a dividend of 4 per cent, payable February 1, 1881, at the Treasurer's office, Grand Central Depot, New York. Hereafter dividends will be paid quarterly—on the first days of February, May, August and November—in each year.

—The Michigan Central Railroad Company have declared a dividend of 4 per cent, payable February 1, 1881. This company will also pay quarterly dividends in future.

—The Canada Southern Railway Company have declared a dividend of 2½ per cent, payable Feb. 1.

—The Naugatuck Railroad has declared a semi-annual dividend of 5 per cent. It is wholly free from debt.

—The Boston and Albany Railroad has declared a quarterly dividend of $2 per share, payable Dec. 31.

—The Norwich and Worcester Railroad Company will pay a dividend of $5 per share on the 10th inst.

—The Winnissimmet Railroad Company pay a dividend of 8 per cent on the 5th inst.

—The Fort Wayne and Jackson Railroad Company has declared a dividend of 4 per cent on the preferred capital stock, payable on demand.

—The semi-annual dividend of $3 50 per share on the stock of the Concord and Portsmouth Railroad Company will be paid Dec. 30.

—The Attleboro' Branch Railroad Co. has declared a dividend of 3½ per cent, payable Jan. 1.

—The Metropolitan Railroad Company (Boston) has declared a dividend of 4 per cent, payable Jan. 1.

—A dividend of 4 per cent will be paid on the capital stock of the New York and Harlem Railroad Co. on the 3d inst.

—The directors of the Lehigh Valley Railroad Company have declared a quarterly dividend of one per cent payable in January.

—The directors of the Georgia Railroad Company have declared a semi-annual dividend of 3½ per cent, payable in January.

—A dividend of 4 per cent will be paid on the capital stock of the Paterson and Hudson River and Paterson and Ramapo Railroad Companies on the 4th inst. at the office of the Rogers Locomotive and Machine Works, 44 Exchange Place, N. Y.

The St. Louis Republican says: "Operations will immediately be begun on the New Orleans and Pacific Road. The track-laying from both ends will begin by January 1. General Dodge also says that the track-laying on the Southeast extension of Missouri, Kansas and Texas Road from Greenville to Minola, will begin within thirty days, and trains will be run to Minola by May 1, 1881, at the latest. The track on the Texas Pacific Extension is being laid at the rate of a mile a day, and has almost reached the Taylor County line. The grade is now completed 300 miles west of Fort Worth."

—Plans are being considered for extending the Chicago, Milwaukee and St. Paul Railroad from Grand Rapids to Council Bluffs.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, December 30, 1880.

The ruling rate for call loans is 6 per cent. Time loans are 6 to 4 per cent. Prime mercantile paper is 5@6 per cent.

The posted rates for prime bankers' sterling are now 4.81½ and 4.84½. The actual rates are 4.80¾@4.81 and 4.83¼@4.84. Cable transfers are 4.84@½. Prime commercial bills are 4.79@½.

The gross earnings of the Philadelphia and Erie Railroad for the month of November, 1880, were $324,965 86, the expenses $189,112 05, and the earnings $135,853 81. The net earnings for the eleven months of 1880 were $1,255,971 25, against $845,081 82, an increase of $410,889 43.

A suit is now being tried before United States Judge Woods at Atlanta, involving the validity of the bill creating the Georgia Railroad commission, which has recently ordered a general reduction of freight and passenger fares over the railroads in that State. The suit is brought by a foreign stockholder in one of the roads. The most eminent counsel in Georgia appear in the case, and Gen. Robert Toombs, the author of the bill, in part represents the State. The progress of the case is watched with much interest.

Track laying was commenced on the 20th inst. on a railroad which is to connect Norfolk, Va., and Elizabeth City, N. C., and it is to be pushed to early completion. The distance is 45 miles, and the money to build the road was raised in the North, with the exception of $25,000 subscribed by Elizabeth City. Arrangements are

being made with steamboat companies and sailing crafts from all the adjacent waters (being rivers and sounds) to make Elizabeth City their point, and connect with the railroad, and perishable articles will have from 24 to 36 hours advantage from it.

The closing quotations on Thursday were: Adams Express, 120@121; American Express, 63½@64; American District Telegraph, 61@63; American Union Telegraph, 70½@70⅞; Canada Southern, 75@75¼; Central of New Jersey 83⅝@83¾; Central Pacific, 93⅛@93¾; Chicago and Northwestern, 126⅞@127; do. pref., 141@141½; Chicago, Burlington and Quincy, 179⅝@180; Chicago, Milwaukee and St. Paul, 114⅛@114⅜; do. pref., 124@124½; Chicago, Rock Island and Pacific, 138⅛@139⅛; Columbus, Chicago and Indiana Central, 21@21⅛; Cleveland, Columbus, Cincinnati and Indianapolis, 95¾@96; Hannibal and St. Joseph 48⅝@48⅞; do. pref., 104@104⅛; Illinois Central, 126¼@126¾; Lake Erie and Western, 41¾@42⅛; Lake Shore and Michigan Southern, 135⅝@135⅞; Michigan Central, 125⅜@125½; Metropolitan Elevated, 107@108; New York Elevated, 121¼@121¾; New York, Lake Erie and Western, 50⅛@50⅜; do. pref., 90¾@91; New York, Ontario and Western, 30¼@30½; Ohio and Miss., 38⅛@38⅜; do. pref., 100@—; Pacific Mail, 50¾@50⅞; St. Louis, Iron Mountain and Southern, 54¾@55; Union Pacific, 112⅛@112⅝; United States Express, 52@58⅛; Wells Fargo Express, 117@118; Western Union Telegraph, 81⅝@81¾.

Assignment of Registered Bonds.

Judge Lawrence, First Comptroller of the Treasury, has rendered a decision in regard to the assignment of registered government bonds, in which he holds :

First, that the owner of government registered bonds inscribed in a fictitious name, may, by such name, assign them to a bona fide purchaser ; second, the government as a matter of strict right, is under no obligation to pay the holder of bonds fraudulently caused by him to be registered (inscribed) in a fictitious name ; third, bonds inscribed in a given name are presumed to be owned by some person of that name, and purchasers under one assuming to be owner in a fictitious name must, to secure a transfer of registry or payment, first make clear proof of his ownership; second, of the good faith of the transaction ; third, by bond indemnify the United States against loss or expense, and to pay any lawful claimant ; and fourth, furnish such other evidence and do such acts as may, under the circumstance, be practicable and reasonable ; fifth, if bonds be inscribed in the name of one person, but purchased with the money of another, as between them a trust may arise, unless it be rebutted by relationship or other fact. In such cases questions may arise as to power of courts of equity to give relief ; fifth, the government is not bound, even on notice of latent equities in bonds to protect them, but may deal with the party holding in regular form the legal title ; sixth there may be cases in which bonds may so far disclose the character of a trust as to make it the duty of the government not to permit transfers in violation of it.

The Iron Steamboat Company.

The company recently organized in this city for the purpose of constructing iron steamboats especially adapted for carrying passengers with speed and safety, has its plans well underway and has already given out contracts for building several steamboats. The new Iron Steamboat Company has among its originators and stockholders many solid capitalists and practical men connected with prominent banking houses and transportation and building companies, among whom are Mr. Rufus Hatch, Mr. John Roach, Mr. Samuel Carpenter, General Eastern Passenger Agent of the Pennsylvania Railroad, and Mr. J. B. Houston, President of the Pacific Mail Steamship Co. The company propose to have ready for the opening of the next summer season a fleet of iron steamboats constructed in the most substantial manner, of great speed, non combustible and with numerous water tight compartments and other improvements for securing the highest conditions for safety obtainable. Arrangements have been made by which a large amount of the steamboat traffic between New York and adjacent seaside resorts will come to the boats of this company of necessity, while plans are being perfected with leading railroad companies insuring to the company a large excursion business. The first efforts being made are to secure locally for coast, sound and river service a fleet of vessels with which some of the horrors of last years excursion season would be impossibilities.

Extending beyond this the company have in view the construction of steamships of similar character for ocean traffic if suitable encouragement is offered by our Government, and it is but natural that such encouragement should be given since the needs of our shipping interests have been so clearly defined and are attracting so much careful consideration. Subscription for a limited amount of the capital stock of the company, not exceeding $2,000,000, will be received until Jan. 12, in shares of $100 each, and the investment promises to a very popular one, especially as it has for its basis considerations for the travelling public as well as some enterprising business plans. Enterprises looking to public safety and convenience as well as to making money have strong elements of popularity in them. The company have now seven iron steamboats under contract to be finished by the first of next June. They are to be built by Messrs. John Roach & Son of Chester, Pa. and Messrs. Cramp & Sons of Philadelphia. Their capacity is to be for about 2,000 passengers, with a speed of twenty miles an hour.

A dispatch dated Cincinnati, December 28, says that negotiations are pending and will probably soon be completed for the purchase by several Cincinnati capitalists, (among whom are Charles W. West and M. E. Ingalls,) of the Kentucky Central Railroad. The plan is to build a road to connect the Kentucky Central with the Knoxville and Ohio Railroad, and by combinations with existing roads to make a through line from the Northwest to the seaboard. It will be independent of the Louisville and Nashville Railroad.

Hannibal and St. Joseph Railroad Co.

The Hannibal and St. Joseph Railroad Company has issued the following brief statement of its business for the year ending December 31, 1880—December being partly estimated :

Gross earnings		$2,574,349
Operating expenses	$1,327,872	
Construction and equipment.	139,464	
		1,467,336
Net earnings		$1,107,013
Fixed charges	$654,640	
Dividend 3 per ct. Aug. 2, 1880	152,490	
		807,130

New York, Lake Erie and Western R R.

The following is a statement of the gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of October, 1879 and 1880—being the first month of the current fiscal year :

	1879.	1880.
Gross earnings	$1,713,697 67	$1,899,910 12
Working expenses	997,975 14	1,013,405 41
Net earnings	$715,722 53	$886 504 71

—showing an increase in gross earnings of $186,-212 45, in expenses of $15,430 27, and in net earnings of $170,782 18.

Northern Central Railway.

The following is a comparative statement of the gross earnings, operating expenses and net earnings of the Northern Central Railway Company for the month of November, 1879 and 1880 :

	1880.	1879.
Gross earnings	$159,053 68	$377,816 48
Operating expenses	802,450 79	226,273 45
Net earnings	$156,602 89	$151,043 03

For the eleven months ended November 30, 1879 and 1880, the earnings, expenses, etc., were :

	1880.	1879.
Gross earnings	$4,556,076 81	$3 693,849 84
Operating expenses.	2,984,864 09	2,637,132 09
Net earnings	$1,571 212 72	$1,056,217 75

The managers of the Chesapeake and Ohio Railway announce that during the first six months in 1881 the direct connection to Louisville via Lexington and Big Sandy Railroad will be completed ; also the connection to Columbus, Toledo and the Northwest via the Scioto Valley Railroad ; also the extension down the peninsula to Newport News, while other connections of great advantage are in process of arrangement.

The St. Paul and Duluth Railroad has been consolidated with the Chicago, St. Paul, Minneapolis and Omaha Railroad. President Ilsley of the former road has resigned, and is succeeded by H. H. Porter, who is likewise President of the Chicago, St. Paul, Minneapolis and Omaha Company.

The Erie Railway and McHenry Case.

The recent decision in London in the Erie Railway and McHenry case is of great interest to railroad men and negotiators, having important bearings upon the question and nature of commission and agency and the relations between negotiator and principals. We give many of the important facts in the case and points in the decision, as published in Herapath's Railway Journal, of Dec. 11th:

This appeal case has been decided during the week. The Master of the Rolls gave judgment against Mr. M'Henry, and in favor of the claims of Mr. Jewett as receiver of the Erie Railway, and this judgment has been confirmed by the Court of Appeal. The claim against Mr. M'Henry is stated to amount on the balance to about £400,000. He appealed against the decision of the Master of the Rolls. On the 6th inst. Lord Justice James delivered judgment in the appeal case, and said he was of opinion that the appeal ought to be dismissed.

The first question, he said, was as to the liability of the Erie Company to make good the losses which M'Henry had sustained in relation to the purchase of shares in the Cleveland, Columbus, Cincinnati, and Indianapolis Railway Company. His Lordship was of opinion that the defendant had totally failed to show any ground whatever in point of law for imposing any such liability on the Erie Company. In the first place, it must be assumed, in the absence of any evidence to the contrary, that the law with regard to such a body as a railway company was the same in New York as in this country, and that a company incorporated for the purpose of making a particular railway were not authorized or empowered to take shares in another railway constructed at some distance from, but immediately connected with, their own railway. If the Erie Company had even authorized this to be done under their own seal, it would have been ultra vires. There was, moreover, some evidence to show that the company had no such power. But, independently of this, it appeared to his Lordship, in point of fact, that there was nothing like any authorization or adoption of these transactions by the Erie Company.

M'Henry was not the agent or servant of that company; he was the great speculator. The Erie Company were not his masters; they were only one of the pawns which he was moving on his great chessboard. He was really the proprietor of the Atlantic and Great Western Railway, and it was very important to him to get a lease taken of that line by the Erie Company in order to make it a valuable instead of a comparatively valueless line. The Board of the Erie Company said that it was not worth their while to take a lease of the Atlantic and Great Western Line unless they could get the Cleveland line with it.

M'Henry was really not acting as an agent of the Erie Company; he was a great person who was dealing with them. He was a principal. But it was quite consistent with this that he should in the course of the transactions procure money for them, and to that extent be their agent, and be liable to account to them.

When did he change his position of a principal for that of a financial agent of the Company? He himself, in his correspondence, decided that he was in any sense a paid servant or agent of the Company. No person in the world had a greater interest in the Erie Company at the time when the transactions took place, for, if their credit failed, what would have been the value of a lease taken by them? This seemed to account for everything which M'Henry did. There was no express bargain that he should receive any commission, any salary or remuneration for what he was doing.

From what was a bargain for commission to be implied? M'Henry had entirely failed to show that he had ever filled a character which could entitle him to any commission. Anything like the bringing out of a loan was always a matter of special arrangement, and of that there was no trace to be found. This disposed of the main question of commission.

With regard to the claim for commission in respect of an indemnity which he gave to the Credit Foncier, his Lordship was not aware of any law or practice according to which a man was entitled to a remuneration for giving a guarantee; and there was no evidence that there was any trade or business of giving guarantees for which any commission was charged. But the money to free which from an attachment he gave the guarantee was really the money of his own Company, the Atlantic and Great Western—in other words, his own money, which he wanted to set free.

On the whole, his Lordship was of opinion that the Court could not dissent from the opinion of the official referee, which had been subsequently affirmed by the Master of the Rolls. Lord Justice Cotton and Justice Lush delivered judgments to the same effect.

WE ARE AUTHORIZED TO RECEIVE SUBSCRIPTIONS for a limited amount (not exceeding $2,000,000) of the capital stock of the

Iron Steamboat Company,

in shares of one hundred dollars each.

This Company is building, and will have in readiness for the coming Summer season, a large fleet of Iron Steam-boats, especially adapted for the requirements of passengers; of great speed, constructed in the most substantial manner, non-combustible, and with numerous water-tight compartments, which will render them incapable of sinking. Contrasted with the ordinary wooden steam-boats, they cannot fail to command, at highly remunerative rates, the patronage of the great majority of the traveling public.

The Company has entered into contracts extending over a term of years, under which it has acquired the exclusive right to convey passengers from New York and its vicinity to the Iron Pier at Coney Island, and a similar exclusive right to convey passengers to Coney Island in connection with one of the leading railroads to that place. In view of the vast number of people who visit this famous Summer resort, it is evident that a line of steam-boats possessing these exclusive privileges, constructed in such manner as to command the highest degree of public confidence, and furnished in response to an urgent public demand, must at once prove very profitable.

The contracts already entered into will insure to this company from the outset a business limited only by its capacity, and arrangements are in course of completion with the Erie and Pennsylvania Railroad Companies under which it will acquire, in addition, a large and profitable excursion business. The Company will extend its operations as rapidly as exclusive and profitable connections can be consummated.

During the Winter months it is the intention of the Company to utilize its boats in Southern waters, so far as they can be profitably employed.

The Company is organized under the Laws of New Jersey, and subscribers to the stock will incur no liability beyond the obligation to pay the amount of their subscriptions.

We recommend this investment as one promising large returns, and well worthy the attention and confidence of the most careful investors.

Each subscriber will receive for every $1,000 of stock allotted and paid for First Mortgage Bonds of the Company (bearing interest at 6 per cent) to the amount of $250.

The terms of the subscription are as follows:

Ten per cent. on allotment,
Ten per cent. Feb. 2, 1881,
Ten per cent. March 2, 1881,
Ten per cent. April 2, 1881,
Ten per cent. May 2, 1881,

and the remainder in installments of not exceeding 10 per cent. on 20 days' notice previously given. Receipts will be given for each payment, and the Bonds and Certificates of stock will be issued upon the payment of the final installment.

Subscriptions will be received at the offices of either of the undersigned from Dec. 28 inst. until Jan. 12, 1881.

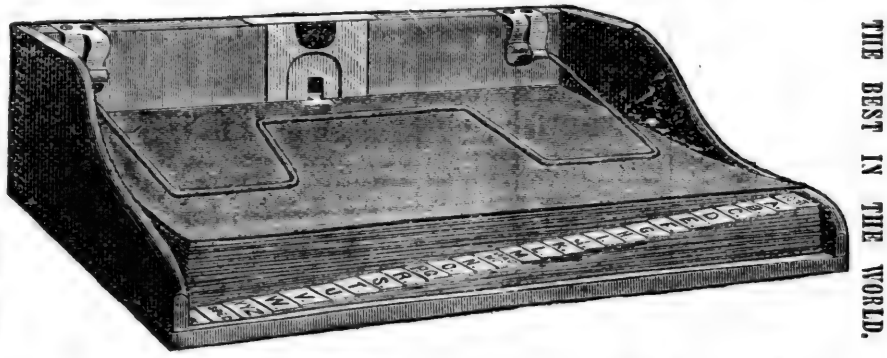
The Schuylkill Canal is closed for the season. The total tonnage of anthracite coal from all the regions for the week ending December 18, as reported by the several carrying companies, amounted to 371,467 tons, against 510,845 tons in the corresponding week last year, a decrease of 139,378 tons. The total amount of anthracite mined for the year is 22,958,893 tons, against 25,812,568 tons for the same period last year, a decrease of 2,853,675 tons. The quantity of bituminous coal sent to market for the week amounted to 89 033 tons against 51,255 tons in corresponding week last year, an increase of 34,778 tons. The total amount of bituminous mined for the year is 4 263,795 tons against 3,558,661 tons for the corresponding period last year, an increase of 705,134 tons. The total tonnage all kinds of coal for the week is 460,500 tons, against 565,100 tons in corresponding week last year, a decrease of 104,600 tons, and the total tonnage for the coal year is 27,222,688 tons against 29,371,229 tons to same date last year, a decrease of 2,148,551 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of December was 168,700 tons, of which 127,311 tons were coal and 41,399 tons coke. The total tonnage for the year thus far has been 6,787,551 tons of which 5,119,867 tons were coal and 1,668,184 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Dec. 18 were 36,255 tons, and for the year 2,027,274 tons—an increase of 382,165 tons as compared with the corresponding period of last year. The coal was carried as follows : Baltimore and Ohio Railroad —week 33,677 tons, year, 1,219,184 tons ; increase over 1879, 222,570 tons. Chesapeake and Ohio Canal—week, 118 tons ; year 601,534 tons ; increase over 1879, 102,482 tons. Pennsylvania Railroad—week 2,460 tons ; year, 206,576 tons ; increase over 1879, 57,113 tons. The Chesapeake and Ohio canal has been closed for the season.—Phil. Ledger, Dec. 27.

At a meeting of the stockholders of the Hartford and Connecticut Valley Railroad Company, held in Hartford, Conn., on the 14th ult., the directors were authorized to apply to the Legislature of Connecticut and Massachusetts for permission to extend the road on the west side of the Connecticut River to Holyoke. The cost of the new road will be about $800,000. The Valley road is to turn its bonds into stock ; and to raise means for building the new road, the idea is to issue about $400,000 of the additional stock, and bond the entire road from Saybrook to Holyoke for the remaining half of the cost. No action was taken on the proposal to rescind the vote with regard to the conversion of the first mortgage bonds of the Connecticut Valley Railroad Company into stock of this Company. The directors have the matter under consideration.

AMBERG'S PATENT

"PEERLESS" CABINET LETTER FILE.

(27-FILE CABINET WITH DOORS.)



675 Indexed Divisions, will hold 17,000 Letters.

These CABINET LETTER FILES are made in many sizes containing as few as 6, and as high as 100 or more files each, at prices ranging from $19 50 to $500 00. They are elegantly and substantially made, the wood-work being of the best seasoned Black Walnut, and the other parts of Brass and Steel, nickel-plated. They can be arranged for any class of correspondence and can be adapted to any requirement. **OVER 3,000 SOLD IN LAST THREE YEARS.**

AMBERG'S PATENT

"PEERLESS" LETTER FILE.

THE BEST IN THE WORLD.

THE BEST IN THE WORLD.

This cut shows a Single "Peerless File" which is complete in itself. This File forms the drawer part of Cabinet shown in above cut. The lettering of the index leaves of the Files in Cabinets is, however, very different, as each drawer or file has an index to correspond with the lettering shown on its front.

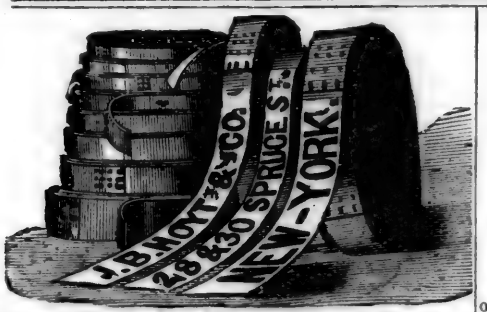
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

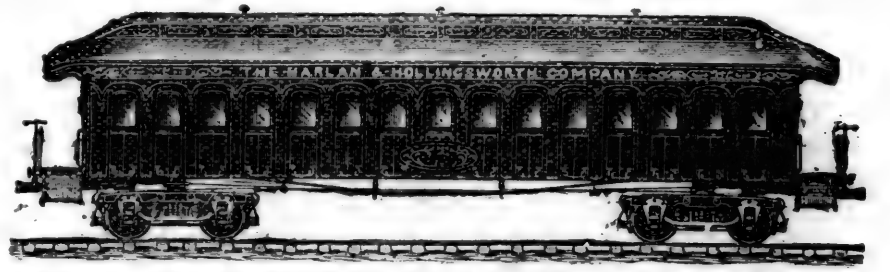
The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal th n any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.



From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

STEAM NAVIGATION, COMMERCE, FINANCE, BANKING, MACHINERY, MINING, MANUFACTURES.

SECOND QUARTO SERIES, VOL. XXXVII., No. 2.] NEW YORK, JANUARY 8, 1881. [WHOLE No. 2,333, VOL. LIV.

Hon. Samuel Sloan.

The men who have won for themselves positions of leadership in our important industries and have become prominently identified with the development of the resources of our country, have much in their careers of great interest to the reading as well as to the commercial public; and sketches of their lives, whether they contain much or little of the marvelous as they appear in type, are among the attractive features of modern journalism. The *Hour* has appreciated this feature and turned it most cleverly to account in its weekly pen and cartoon portraits of prominent men of the time. Hon. Samuel Sloan, the widely known railroad man and leader in the coal transportation and coal mining interests, was recently the subject of one of these sprightly sketches, of which we publish the larger part.

"Mr. Sloan was born in the north of Ireland, that borderland where Scotch shrewdness and Irish quickness have amalgamated. His parents, dissatisfied with their prospects in the little town of Lisburn, a few miles distant from Belfast, came to America when their now famous son had reached the immature age of two years. This was in 1819—for young Samuel was born on Christmas Day in 1817—but years before, when the troubles of 1798 were convulsing Ireland, several members of the Sloan family had emigrated to Kentucky, where they were distinguished for their intense love of liberty and republican institu tions. After a fair education at the first public school in New York, young Sloan was sent to the Grammar School of Columbia College. There he studied until his fifteenth year, when the sudden death of his father, William Sloan, obliged him to turn his attention to some practical method of helping his widowed mother, who was left poorly off and with a large family. At that time one of the largest and most respectable importing houses in New York was that of McBride & Company. For almost half a century James McBride, the founder of the house, had been engaged in the Irish and English trade and had acquired an enviable reputation for the integrity of his character and the honorable nature of his business transactions. It was in his counting-house that Mr. Sloan made his entry into business, and he remained there as a clerk until 1845, when his great business ability secured him a junior partnership in the firm under the name of George McBride, Jr., & Co. This firm was dissolved in 1857, but, two years previous, Mr. Sloan had retired from business. His principal reason for thus retiring was his election as a President of the Hudson River Railroad in 1855, and the necessity for applying his entire energies to the interests of that company. When he accepted the Presidency the stock was selling at seventeen dollars a share, and when, in 1867, he, and the directors associated with him, resigned, the stock was being eagerly bought at one hundred and forty dollars a share and paying a handsome dividend, notwithstanding the competition of the Harlem Road and the strong ill-will shown by the management of the New York Central Railway towards the Hudson River Road. His services as President of the road were so thoroughly appreciated that in 1864 the Board of Directors presented him with a magnificent silver service of plate worth $7,500.

"During these busy years, Mr. Sloan, although averse to entering political life, was mixed up in several important movements. In 1852 he was elected Supervisor of Kings County, and in the following year he was appointed one of the commissioners to draw up a charter for the consolidation of Brooklyn and Bushwick. It is needless to say that he discharged the duties of his office with entire satisfaction to his constituents. In 1852 he was persuaded to become a candidate for nomination in the Democratic Congressional Convention of his district, but, in spite of the favorable feeling of a majority of the delegates, he was defeated by two votes. In 1857 the Democrats of the Second Senatorial District urged him so strongly to oppose the Hon. Abijah Mann, Jr., who enjoyed a high reputation in a strong Republican district, that Mr. Sloan was induced to enter political life once more. He was elected State Senator by a large majority, and distinguished himself during his term by his sound common sense and thorough knowledge of business.

"Mr. Sloan's first connection with the Delaware, Lackawanna and Western Railway, of which he is now the able President, was in 1864, when he was elected a Director. When he accepted the Presidency in 1869, the Delaware, Lackawanna and Western had no outlet or connection, except by way of the New Jersey Central at the junction. Since then Mr. Sloan has not been idle, and by leasing the Morris and Essex Railroad from Washington, N. J., to New York City, the great coal road acquired a through connection with tide water. Several other important connections have been made—notably the acquisition of a controlling interest in the Syracuse and Binghampton Road and the leases of the Oswego and Syracuse and the Utica, Chenango and Susquehanna Railroads. His great capacity for railroad management has always made Mr. Sloan an acquisition on the boards of railroads. Many other roads—of some of which he is now president—in whose management he is and has been actively interested, are the Michigan Central, the International and Great Northern of Texas, the Rome, Watertown and Ogdensburgh, the Marquette, Houghton and Ontonagon, and the Fort Wayne and Jackson Roads. Outside of railroad enterprises, Mr. Sloan is in great demand as a director for banks and trust companies. He has been for many years upon the board of the United States and the Farmers Loan and Trust Companies, the City Bank, the Bank of the Metropolis, and he is the founder and is still a director of the Mechanics' Bank of Brooklyn and of the Mechanics' Insurance Company.

"Mr. Sloan married in the Spring of 1844 Miss Margaret Elmendorf, a member of one of the most prominent families of Somerset County, New Jersey. He is the father of eight children and four little ones call him grandfather. He is a member of the Dutch Reformed Church, and has always been actively connected with the various benevolent institutions of this city. Among other institutions in which he is interested is the Long Island College Hospital. This admirable institution owes its

organization as well as the beautiful property on which it is situated to Mr. Sloan's fostering care. He was the first President of this hospital, where the school or clinic practice which is now generally adopted was first introduced in this country."

Financial Law.

Negotiable Instrument—Payment of Debt by Check—Loss of Check—Certified Check—Payment on F rged Indorsement—Right and Liabilities of Parties.

Where a party pays his own debt by a check to the order of his creditor or of a party nominated by his creditor, he can be called upon to pay it again in case the creditor loses or is defrauded of the check and it is paid to the finder or fraudulent holder on a forged indorsement. And the case is not varied by the circumstance that the check was certified after delivery and before payment, it not being shown that such certification was procured by the creditor to whom the check was given or by the payee of the check. If the check had been lost and the finder had procured it to be certified and forged the indorsement, the certification would not be binding upon the bank nor affect the rights of the parties after it had been surrendered. It is only in case the true owner of the check has received the certification that recourse can be had upon it against the certifying bank notwithstanding the subsequent loss of the check and the payment upon the forged indorsement. In this case where plaintiff received a check to the order of H. from the defendants on the M. bank, and this check was certified by the M. bank and afterward paid upon a forged indorsement, the amount of the check having been charged by defendant against plaintiff and by them settled, held, that defendant was liable to plaintiffs for the amount of the check, it not appearing that the certification was obtained by plaintiffs or their agent, or that the claim of defendants upon the M. bank for the check had been barred by the statute of limitation. It is well settled that a bank paying upon a forged indorsement must bear the loss and cannot charge to a depositor. Judgment affirmed. Thompson et al. v. Bank of British North America, appellants. Opinion by Rapallo, J.

[Decided Sept. 21, 1880]

N. Y. Court of Appeals.

Public Policy—Money Paid by Third Person to Creditor to Induce Him to Join in Compromise not Recoverable.

Plaintiff, to induce defendants to unite with other creditors of the firm of N. & B., in the composition of its debts, gave to them his negotiable note for a portion of the debt due defendants, beyond the amount to be paid by the composition agreement. Defendants signed the agreement, transferred the note to a bona fide holder, and plaintiff having been compelled to pay it brought this action to recover the amount paid. The complaint alleged that plaintiff was a brother-in-law of N., a member of the firm named, had an affection for him and was solicitous to aid him, and that defendants, knowing of these facts, took an unfair advantage and extorted the giving of the note. Held, that the action was not maintainable. The composition agreement is an agreement between creditors; and a secret agreement by which a friend of the debtor undertakes to pay one creditor more than his pro rata share to induce him to join in the composition, is as much a fraud upon the other creditors as if the agreement was directly between the debtor and such creditor. If the defendants were plaintiffs seeking to enforce the note, it is clear that they could not recover. Cockshott v. Bennett, 2 Term Rep. 763; Leicester v. Rose, 4 East, 372. But if plaintiff has voluntarily paid the note he could not, according to the general principle applicable to executed contracts, void for illegality, have maintained an action to recover back the money paid. Nellis v. Clark, 4 Hill, 424. It was claimed that the general rule did not apply to money paid by the debtor or in his behalf, in pursuance of a secret agreement exacted by the creditor, in fraud of the composition, and the cases of Smith v. Bromley, 2 Doug. 696; Smith v. Cuff, 6 M. & S. 160, and Atkinson v. Denby, 7 H. & N. 934 were relied upon to sustain this claim. But these cases go no further than to hold that the debtor himself, or a near relative, who, out of compassion for him, pays the money upon the exaction of the creditor as a condition of his signing the composition, may be regarded as having paid under duress and as not equally criminal with the creditor. They cannot be upheld on the ground simply that such payment was against public policy. It was conceded by Lord-Mansfield, in Smith v. Bromley, that where both parties are equally criminal against the general laws of public policy the rule is potior est conditio defendentis. Lord Kenyon said, in Howson v. Hancock, 8 Term Rep. 575: "There is no case where money has been actually paid by one of two parties to the other upon an illegal contract, both being particeps criminis, where an action has been maintained to recover it back." It is said in Cro. Jac. 187, that "a man shall not avoid his deed by duress of a stranger." This rule was applied in Robinson v. Gould, 11 Cush. 57, where a surety sought to plead the duress of his principal. The rule has been modified so as to allow a father to plead the duress of his child, or a husband the duress of his wife, or a child that of his parent. Wayne v. Sands, 1 Freeman, 161; Bayley v. Clare, 2 Browne, 276; 1 Rolle's Abr. 687; Jacobs' L. Dict., "Duress." Plaintiff, in the case at bar, was in pari delicto with defendants, being only remotely related by marriage to the debtor. Plaintiff cannot complain that defendants negotiated the note so as to shut out the equities, as the words of negotiability therein show that its negotiation was contemplated when it was given. Judgment affirmed. Solinger, appellant, v. Earle. Opinion by Andrews, J.

[Decided Nov. 9, 1880.]

Indorsement—When Holder of Negotiable Instrument cannot Recover from Accommodation Indorser.

Weller & Son made a negotiable note payable to Callahan. Callahan indorsed his name on the back of the note and returned it to them, and they presented it at a bank and had it discounted for their own benefit. Held that the bank could not recover against Callahan. The law will not presume that he indorsed it for accommodation, but will presume that it was paid. Long v. Bank, 1 Litt. 290; Beebe v. Real Estate Bank, 4 Ark. 546; Bank v. Hammett, 50 N. Y. 158. The cases holding the indorser liable were so held upon facts being established, distinctly showing the indorsement was made for the accommodation of the person by whom it was delivered to the holder. Woolfork v. Bank, 10 Bush, 504; Young v. Harris, 14 B. Monr. 556; Rogers v. Paston, 1 Metc. 648. Kentucky Court of Appeals, October 12, 1880. Callahan v. First National Bank of Louisville. Opinion by Cofer, C. J.

When the Indorser of a Note after Maturity is not Liable.

The indorsement of a note after maturity is in effect the drawing of a new bill, payable on demand; and to hold the indorser, demand and notice of non-payment are essential. Stuart v. Redfield, 13 Kans. 550. After the indorsement of a note after maturity, J., the indorser, held the note in his care and custody for B., the indorsee, and at her instance, from March 1, 1874, to January 11, 1875, for safe keeping in a bank of which J. was the president and cashier. The indorsee took actual possession of the note on January 11, 1875, and brought an action thereon against the maker. Failing to collect all the judgment from the maker, or the mortgaged property, on May 11, 1878, an action was brought against J., as indorser. No other demand was made than the institution of the suit on January 11, 1875, no notice of non-payment was given, and such notice was not waived. Held, that the indorser was not liable. Braine v. Spaulding, 52 Penn. St. 247 distinguished. Kansas Supreme Court, July term, 1880. Shelby v. Judd. Opinion by Horton, C. J.

A very fine new locomotive from the Brooks Locomotive Works, Dunkirk, N. Y., has been put on the Columbus and Toledo Railroad. The same works are now building fourteen engines for the Ohio Central Railroad and have already furnished that road nine engines. They also have a large order for the Lake Erie and Western Railroad. It is stated that all the roads are in great want of power, and that no shops are kept more busy at present than the Locomotive works.

John King, Jr., receiver of the Ohio and Mississippi Railway Co., has filed his report for November with the United States Court, which shows: Cash on hand November 1, $521,861 33; receipts, $561,093 18; disbursements, $871,425 41; cash on hand December 1, $211,019 10.

—The Louisville and Nashville Railroad Company has declared a semi-annual dividend of 3 per cent, payable at the office of the company, 52 Wall street, N. Y., on and after the 1st of February. The transfer books will be closed on the 22d of January and reopened on the 3d of February.

—The Camden and Ruslington County Railroad Co. has declared a semi-annual dividend of 3 per cent., payable at the office of the Pennsylvania Railroad Co. on and after the 3d of January.

—The Housatonic Railroad Co. has declared a dividend of $2 per share on the preferred stock, payable at the office of the company in Bridgeport, Conn., on the 15th inst.

—The Portland (Me.) Horse Railroad Co. has declared an annual dividend of 5 per cent, payable on demand.

New York, Saturday, January 8, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

THE office of the AMERICAN RAILROAD JOURNAL is removed this week from 31 Park Row to 23 Liberty Street.

INVESTORS at home and abroad are seeking American railroad bonds and shares with an unabated eagerness; in fact, with an eagerness which increases as the year opens. The decrease in the interest of $600,000,000 United States bonds, perhaps, to three or three and one-half per cent has undoubtedly a strong influence on the market, but a stronger influence is found in the unprecedented prosperity of the last year with railroads, and the promising prospects ahead.

THE South Carolina railroads make an encouraging showing as to increase in business and earnings. The recent report of Railroad Commissioner Bonham states that there are seventeen railroads in operation in the State, with a total length, exclusive of sidings, of 1,407½ miles. The total expense for running these for 1880 was $3,585,766; the total income was $4,943,074; net earnings, $1,357,307. 'Last year the total expense was $3,098,346; gross income, $4,008,802; net earnings, $910,546; thus showing not only an increase or business amounting to nearly 25 per cent, but an increase of profit of nearly 50 per cent.

MR. THOMAS BAYLEY POTTER, a member of the British Parliament, has written a letter to an Ohio stock dealer concerning the importation of cattle into England, in which he says he is confident there is no intention on the part of Lord Spencer to check the importation of American cattle on protectionist grounds. He expresses his belief that the matter now rests upon the precautions taken to secure the health of the animals and to exempt them from risk of disease in transit to the coast, and says that he will be glad if due care and attention to these matters should justify him in giving to the British consumers the advantages of a cheap and healthy supply of so necessary a commodity.

THE YEAR just begun promises to be one of the most active periods of railroad construction our country has ever known. This is readily apparent when the number of projects started last year is considered, and when it is remembered that so many of them are already provided with capital and well under way. The prosperity of the country, our Governmental relations, the general good feeling, and all the conditions, point most clearly to the opening of spring as the commencement of a very busy season among railroad builders and projectors. In 1880, $175,000,000 was used in constructing railroads in this country, or $30,000 per mile for 5,839 miles of new railroad built last year. It would not be surprising to see these figures raised fifty per cent in 1881.

AN ILLUSTRATION of railroads and railroad tariffs regulating themselves in natural ways, is forcibly shown in the fact that within seven years two of our leading trunk lines have reduced their freight charges voluntarily about one-half. In 1873 the Erie Railway and the New York Central and Hudson River Railroad were receiving on an average about one cent and a half for carrying a ton of freight a mile. A gradual reduction from this rate was made year by year without any legislative demand, until, in 1879, it reached the low average of a little less than four-fifths of a cent per ton a mile. In 1880, with railroads having more than they could handle, and shippers in a mood to pay considerably advanced rates, if necessary, the average rate of these two lines was less than nine-tenths of a cent.

Personal.

—General Charles B. Stuart, a widely-known civil engineer, died at Cleveland, Ohio, Tuesday.

—Judge John Moses has been appointed Secretary of the Illinois Railroad Commission.

—Mr. George F. Brown has been appointed general superintendent of the Pullman Palace Car Company.

—President Billings, of the Northern Pacific Railroad Co., is stopping at the Brevoort House.

—Mr. Charles Hamilton succeeds Mr. L. M. Johnson as general superintendent of the Cairo and St. Louis Railroad.

—Mr. James A. Milholland is the recently-appointed general manager of the Georges Creek and Cumberland Railroad.

—Mr. Cornelius J. Vanderbilt celebrated his fiftieth birthday during the holidays with a dinner given to a number of friends.

—President Hagerty, in behalf of the Citizens' Railroad Co., of Baltimore, gave a New Year's dinner to all the employes of that company.

—Mr. Charles F. Mayer has been re-elected president, and Mr. Charles W. Keim secretary of the Cumberland and Pennsylvania Railroad Company.

—Mr. M. W. H. Caniff has been appointed superintendent of the Lansing division of the Lake Shore and Michigan Southern Railroad.

—Mr. J. C. Flood gave $6,000 to various charitable societies in San Francisco on Christmas Day. Protestants, Catholics and Hebrews shared alike.

—Mr. C. B. Parke has been appointed Secretary to Mr. C. H. Hudson, general manager of the trans-Ohio Division of the Baltimore and Ohio Railroad. Mr. Parke was formerly connected with the Pullman Palace Car Co.

—Mr. T. J. Anderson, upon resigning the position of general agent at Kansas City, of the Atchison, Topeka and Santa Fe Railroad, to take his seat in the legislature, received a very complimentary letter from the officers of the company.

—Messrs. Wm. T. Dixon, Eugene Levering, John E. Hurst, W. H. Baldwin and D. J. Joley have been appointed on the part of the Merchants and Manufacturers' Association of Baltimore to urge on Congress an appropriation for the Maryland and Delaware ship canal.

—Among the appointments on the Baltimore and Ohio Railroad taking effect January 1st were Mr. S. R.

Johnson as master of road of the main stem, Mr Joseph L. Kirk assistant auditor, at Camden Station, and Mr. W. B. Harrison as master mechanic at Newark.

—The death of Mr. Frederick Probst, of the well-known banking house of Frederick Probst & Co., left Mr. Henry Volckman the surviving member of the firm. He has taken Mr. Adolph Victor into partnership, and the business will be continued under the old firm name.

—Miss Betsey Roath, who died last week at Greeneville, Conn., at the age of one hundred years and four months, had never stepped upon a steam car, though she had three nephews who were conductors and three who were engineers, and she had lived for forty years, near the track of the Norwich and Worcester Railroad.

—Mr. Wm. P. Granger, a prominent Massachusetts civil engineer, has received the appointment of engineer to the Hoosac Tunnel Dock and Elevator Co., Boston. Mr. Granger has been conspicuously identified with several important railroad enterprises, including the Troy and Greenfield Railroad and Hoosac Tunnel, the Boston, Hoosac Tunnel and Western Railway, and the Massachusetts Central Railroad.

—Dr. T. S. Lambert is the inventor of a new track intended to be laid in crowded city streets to facilitate wagon travel by turning the wheels into wide-grooved rails, about half an inch deep, with edges flush with the pavement. The Groove Track Pavement Co. has been organized, with Mr. Jos. B. Brown as president, and permission has been asked of the Board of Aldermen of this city to lay a section on Broadway.

Organization.

—Messrs. Jay Gould, Russell Sage, Sidney Dillon and Frederick L. Ames, of Boston, are the newly-elected directors of the St. Louis, Iron Mountain and Southern Railroad Company.

—The following changes were announced among the officers of the Indianapolis and St. Louis Railroad, Jan. 1st: C. C. Gale, superintendent, vice E. B. McClure, resigned; H. W. Gays, general freight agent, vice J. Noyes, resigned; A. J. Smith, general passenger agent, vice B. M. Kendrick, resigned.

—The incorporators of the new Baltimore, Cincinnati and Western Railroad Company are Messrs. W. S. Carroll, Tellfair C. Marriott, Allen Bowie Davis, Edward D. McConkey, of Maryland, and William H. Schoenberger and Thomas L. Young, of Ohio. Governor Thomas L. Young is Chairman, and E. D. McConkey Secretary of the incorporators and stockholders.

—A meeting of the directors of the Long Island Railroad Company was held Dec. 31st, and the following members of the board were elected, in place of eight directors, resigned: Messrs. Austin Corbin, D. C. Corbin, B. S. Henning, William Bond, Demas Barnes, John P. Townsend, Alfred Sully, and Henry W. Maxwell. Mr. Austin Corbin was elected president, and Mr. B. S. Henning vice-president.

—A consolidation has been effected between the Evansville Local Trade, the Lake Erie, Evansville and Southwestern, reorganized, and the Cincinnati, Rockport and Southwestern Railroad companies under the name of the Evansville, Rockport and Eastern Railway Company. The new line embraces seventy-three miles of completed road, and connects Evansville with Rockport, Jasper, Huntingburg and intermediate towns.

—J. M. Culp is now general freight agent, and A. Broaddus, assistant general freight agent of the Louisville and Nashville R.R. B. F. Blue succeeds Broaddus as general freight agent of the St. Louis division. The duties of J. W. Thomas, general superintendent of the Nashville, Chattanooga and St. Louis Railway, requiring all his time, he has resigned the general superintendency of the Henderson and St. Louis divisions of the Louisville and Nashville Railroad. James Montgomery has been appointed superintendent in full charge of the above divisions.

—The passenger organization of the Union Pacific Railroad Company is as follows since January 1st:—J. W. Morse, general passenger agent, Omaha; D. W. Hitchcock, general western agent, San Francisco; M. T. Dennis, New England agent, Boston; F. Knowland, general eastern agent, New York; A. A. Knowles, Joseph S. Smith, traveling agents, Boston; G. W. Keelan, traveling agent, New York, H. D. Price, traveling agent, Montreal; F. M. Funk, traveling agent, Philadelphia; D. E. Burley, traveling agent, Baltimore; D. C. Blackman, traveling agent, Buffalo; J. S. Hodsdon, gen'l agent, Chicago; W. P. Cooley an D. B. Quinlan, traveling agents, Chicago; J. P. Griswold, traveling agent, Detroit; N. C. Treat, traveling agent, Quincy; D. Welsh, general agent, Cincinnati; James F. Aglar, general agent, and Thomas H. Workman, traveling agent, St. Louis; N. Haight, traveling agent, Louisville, Ky.; M. H. Judd, traveling agent, Omaha and Council Bluffs; A. O. Griswold, general agent, Cleveland, O.; J. H. Martin, traveling agent, Indianapolis; R. J. Shapley, traveling agent, Harrisburg, Pa.; J. B. Reese, Thos. A. Shaw, traveling agents, Kansas City; George Ady, general agent, Denver; D. E. Cornell, general agent passenger and ticket department, Kansas City; Jos. Hanson, general agent, St. Joseph; F. R. McConnell, general agent, Salt Lake; T. H. Russell, passenger agent, Deadwood, Dakota.

Construction.

—Two through passenger trains on the Ohio and West Virginia Railroad began running between Columbus and Pomeroy, Jan. 1st.

—As soon as the weather permits, it is planned to lay a second track on the Lake Shore and Michigan Southern Railroad, between Laporte and Chicago.

—A union depot and hotel has been completed at Logan, Ohio, by the Columbus and Hocking Valley Railroad Co.

—Work on the grading of the first eighteen miles, from San Diego, of the California Southern Railroad, was commenced December 20th.

—It is proposed to build another bridge across the Missouri at Omaha, to be used for railroad trains and foot passengers.

—It is said that the Texas, Santa Fe and Northern Railroad Company will push work at once upon the San Juan division to hasten a connection with the Denver and Rio Grande.

—Two engineers, three officers of the staff and a physician, have been ordered by the Mexican Government to accompany Captain Eads on his surveying tour over the Isthmus of Tehuantepec.

—Messrs. Houston & Neal have the contract for building the first seven miles of the Cincinnati Northern Railroad from Cincinnati to Lebanon, Ohio The road is to be continued to Dayton.

—Ground was broken at Reno, Nevada, Dec. 22, for the Nevada and Oregon Railroad, Governor Woods the vice-president, says the contracts are made and work will be pushed at once.

—Plans are under way for building a railroad from Elkton, Cecil Co., Md., to Middleton, Del., a distance of a little over 12 miles. The road is designed expressly for the interests of Baltimore, the Eastern shore, and the lower counties of Delaware.

—The Baltimore and Cumberland Valley Railroad, which is to be extended to Shippensburg, will very likely be further extended to Newville, Cumberland Co., Pa., and to Doubling Gap Springs, a summer resort which, with railroad facilities, would be expected to draw a liberal Eastern and Southern patronage.

—It is expected that the contracts for the construction of the Baltimore, Cincinnati and Western Railroad will be closed this month, and work begun in February. The road is to be 571 miles in length, crossing the Ohio river above Ironton, in the southeastern part of Ohio, and making a direct line to Portsmouth, on the Ohio river.

—It is said that the iron viaduct which the New Haven and Northampton Railroad Company propose to erect across South River in Conway, for the extension of the road, is the largest viaduct by far in New England. It is to be 550 feet long. The whole depth, from the top of the iron work to the bottom of the piers, is 146 feet, of which 120 feet is of iron. The iron is already shipped, and workmen will soon be erecting it.

—It is more than likely that Rochester and Fulton county, Indiana, will have an east and west railroad before the close of this year. The project has been talked of for twenty-five years. In fact, four or five lines have been run through the county during that time, but none seemed so promising as this one. This line is the Chicago branch of the New York, Pennsylvania and Ohio Railroad. It leaves the old line at a point somewhere east of Kenton, O. The engineers left Indianapolis for Chicago last Friday to locate the line.—[Pittsburgh Chronicle.

—The New Sharon, Coal Valley and Eastern Railroad, Iowa, project has its affairs now in promising shape, and it is expected that work on the construction of the road will be pushed in the spring. The road is to run southeast from New Sharon, in Milwaukee county, across Skunk River, a few miles below Indianapolis, thence to Delta, Xoka, Fairfield, Salem, to the Mississippi River at Keokuk. Northwest from New Sharon it will run to Lynville, cross the Chicago and Rock Island at Newton, the Chicago and Northwestern at Colo, thence into Dakota. It will run through valuable coal fields in Iowa, and into the regions of Dakota, where the coal supply of this section is now much needed. The officers of the company are: President, David Morgan, New Sharon; vice president, O. G. Drew; secretary, E. C. Ogg; Treasurer, S. L. Cook.

—The St. Louis and Texas Narrow Guage Railroad, being built from Texarkana to Waco, Texas, will probably be extended from the former point to Cairo., Ill., where it will connect with a narrow guage railroad to St. Louis. Other plans connected with this narrow guage system will include the extension of the road from Waco to the Rio Grande, to connect with the Palmer-Sullivan system, which is to be constructed to the City of Mexico, under concessions lately obtained by General Palmer, of the Denver and Rio Grande Railroad, from the Mexican Government. It is also in contemplation to ultimately build a narrow guage railroad from St. Louis or Cairo to New York, and thus have a continuous narrow gauge line from the latter place to the City of Mexico. The line between Cairo and Texarkana is expected to be finished in the course of the year, as the work of construction will be pushed from both ends.

—The St. Albans Rolling Mill, after running the whole of the past year for the manufacture of steel rails from English Bessemer steel blooms, is shut down for necessary repairs preparatory to resuming operations again.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

Manufacturing.

—A novelty in the way of a state-room car is being constructed by the Chicago, Burlington and Quincy Company at the Aurora shops, costing $15,000.

—The Central Vermont car and machine shops, which usually have run on short time during the winter season, have been crowded with work and running full time this season.

—Mr. J. A. Locke, agent for Reed's sectional covering for boilers, has admitted his son to partnership. The firm name is J. A. Locke & Son, and their new place of business is 40 Courtland street, this city.

—The last of sixty-four Class I engines is building at the Pennsylvania locomotive shops at Altoona. It is expected that a number of the Class K engines will be built early this year similar to the engine recently constructed, accredited with remarkable speed, having driving wheels five feet six inches in diameter.

—The first passenger cars ever built in this country for a Spanish railroad are now being constructed by the Harlan and Hollingsworth Co. They are of the same general style as American cars. Spanish engineers who were at the Centennial Exhibition have since sent to this country several orders for railroad equipment, including tools of American manufacture.

—Springfield, Mass., has received another important addition to its many manufacturing enterprises in the Seeger Manufacturing Co.'s Works, recently started. This company manufacture a great variety of screws of large size, under an improved method, which greatly reduces the cost of manufacture, enabling the company to place their goods upon the market at low prices. Mr. Edward Seeger, who has been connected with the Third National Bank of Springfield for the past twelve years, is the treasurer of the company.

—The Iron Age estimates the increase in the production of steel rails for this year at about 25 per cent, or 550,000 net tons, and locates its estimate among the different mills as follows: Edgar Thomson, 110,000; Cambria, 100,000; North Chicago, 85,000; Joliet, 85,000; Bethlehem, 85,000; Pennsylvania, 90,000; Scranton, 75,000; Troy, 70,000; Cleveland, 60,000; Union, 50,000; Vulcan, 40,000.

—The Consolidation Coal Co. of Maryland has declared a dividend of 2½ per cent.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "§."

1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

Kentucky Central Railroad.

The control of the Kentucky Central Railroad has passed into new hands, who propose to extend it so as to connect with the Chesapeake and Ohio Railway at Winchester, Ky., then south to Caseyville, Tenn, where it will meet the Knoxville and Ohio Railroad, already completed, giving this city a direct connection with the important railroad lines centering in Knoxville, and opening up trade with a rich country which has long sought such facilities, and upon which we have cast longing eyes for many years. Other connections and combinations are among the probabilities, including a trunk line to the Southern seaboard. It is understood that sufficient capital is at the command of the new owners of the Kentucky Central to carry out the project.

It is suggested that this new line to the South will antagonize the Cincinnati Southern Railroad, but there is little ground for such apprehensions. The two lines run parallel to each other, it is true, for some distance, but not near enough to interfere with local trade, and there will be through business enough for both. Trade grows as the facilities increase, and there is room for a third Southern Railroad, in the direction of Nashville.—[Cincinnati Price Current, Dec. 30.

Fitchburg Railroad.

The receipts of this road for the years ending September 30, 1879, and 1880, have been as follows:

	1879.	1880.
From passengers	$663,289 84	$749,169 66
" freight.....	1,205,953 76	1,496,459 11

The company have 81 locomotives, 83 tenders, 90 passenger, 25 mail and baggage, 1,677 eight wheel and 191 four wheel box freight, 631 eight wheel and 10 four wheel platform, 126 gravel and coal, and 20 saloon cars, and 9 snow plows.

Number of miles run by passenger trains, 741,134; by freight trains, 811,085; by switching and other trains, 825,552—total, 1,884,771.

Length of main road operated, 143 miles. Length of double track road, belonging to the company, 50.68 miles; length of Watertown Branch Railroad, belonging to the company, 6.60 miles; length of Lancaster and Sterling Branch Railroad, belonging to the company, 12.42 miles; length of Peterboro' and Shirley Railroad, belonging to the company, 23.62 miles; length of side and other tracks, belonging to the company, 58.75 miles—total length of tracks, belonging to the company, 197.75 miles. Length of Vermont and Massachusetts Railroad and branches, leased for 999 years, 58.80 miles; length of double track on Vermont and Massachusetts Railroad, 10.39 miles; length af side tracks on Vermont and Massachusetts Railroad, 25.35 miles; total length of tracks operated, 292.29 miles.

Total number of passengers carried, 2,461,603; do. carried one mile, 89,752,302. Number of tons carried, 1,546,950; do. carried one mile, 96,534,772. The report says:

The condition of the roadbed and track has been greatly improved since our last report, and will require large additions in the coming year to meet the demands of the increasing traffic.

Reference has been made in former reports to the constantly increasing Tunnel traffic, and to the corresponding provisions for the same. Hitherto we have been restricted in developing the facilities for the accommodation of this business, on account of the uncertainty of our arrangements with the State for operating the Tunnel road. Now, however, the policy of the State has been settled; and since the execution of a seven years' contract with the Commonwealth, we can more securely make outlays for improvements of an extensive and permanent character. The traffic has so increased as to test the capacity of the road to its utmost; and the assurance that we have of its permanency and additional increase demands the greatest haste practicable in developing our terminal facilities for both local and export business, in completing the double track to Greenfield, our western terminus, in increasing our motive and carrying capacity, and in improving and enlarging every facility necessary to do the business with despatch and economy.

Additional accommodations for our export business will be provided by the Hoosac Tunnel Dock and Elevator Company, which was incorporated April 29, 1879, and authorized to take the property at the terminus of our tracks below Charles river Bridge, or so much of it as they should deem advisable, from Tudor's Wharf to the Navy Yard, "and construct and maintain docks, wharves, elevators, warehouses, and other buildings and structures suitable for terminal facilities for the reception, storing, delivering, and forwarding of freight." This company is already organized, and it will very soon take possession of a portion of the property, and immediately begin work thereon.

At the last annual meeting you authorized your directors to subscribe for and take such portion of said company's stock as they should deem advisable. In accordance with the authority granted, the directors have taken $192,000 of the stock.

In November, 1879, we purchased Hittenger's Wharf, the first wharf east of Tudor's, for $113,701 86. This is a part of the property described in the charter of the Dock and Elevator Company, and they will undoubtedly soon avail themselves of their right to take or purchase it.

To provide more room for the constantly increasing freight business consigned to Boston, we have begun the construction of a four hundred foot extension of No. 1 freight house; have purchased of the Massachusetts General Hospital about twenty-five acres of land and flats in Somerville, and filled in a portion thereof; have largely extended the tracks in the Miller's river and Somerville freight yards; have been authorized to build a sea-wall 2 700 feet in length, and fill in certain flats south of the Miller's river freight yard; and have nearly completed the purchase of certain additional property adjacent to said yard, which, with the pieces before mentioned, will double our terminal facilities.

Additional tracks have been laid at Cambridge, Belmont, Concord, Maynard, Littleton, Ayer, Fitchburg, West Fitchburg, Baldwinville, Athol, Orange, Miller's Falls, Lake Pleasant, East Deerfield, and Turner's Falls, making, with the tracks laid in the yards before mentioned, an aggregate length of 10.6 miles.

Passenger-sheds have been built at Union Square, Somerville and Concord Junction.

The accommodations for cattle at Union Market have been increased, and a new freight house built there.

At Belmont a new passenger depot has been built, the old one removed, and changed into a dwelling-house, the grounds greatly improved, and Common street grade crossing discontinued, and its travel turned into Concord Avenue, the next crossing east.

The Weston Depot has been rebuilt.

The accommodations at Lake Walden picnic grounds have been materially increased.

The alignement of the road has been improved at South Acton by the removal of a reverse curve; and at several points between that place and Ayer the tracks have been raised, and the grades equalized.

At Maynard the construction of a new passenger depot has been begun; between Maynard and Rockbottom three pile bridges have been rebuilt; and the grades on the Lancaster and Sterling Branch have been improved.

At Littleton a new depot has been built, and the old depot removed and changed into a dwelling house.

The pile bridge over the Nashua River on the Peterborough and Shirley Branch has been rebuilt.

The old wooden stringers which crossed the canal at two points in Townsend Harbor have been replaced with substantial iron girders; and a new granite quarry, for the company's use, has been opened at Pratt's Station.

At Ayer a new tank-house has been built to contain two large tanks of forty thousand gallons' capacity.

At Diamond Rock, in Lunenburg, we have replaced the old wooden trusses with iron girders.

At Leominster we have finished the improvements to the passenger depot and its approaches, and greatly improved the roadbed and its tracks at this point.

At Fitchburg an extension of ten pits to the engine house has been built, and tracks laid into the Rollstone lumber yard and at the works of the Putnam Machine Company.

At West Fitchburg, to accommodate the local business, a coal shed of about eight hundred tons' capacity has been built, and the approaches thereto graded.

At Westminster the location of the freight tracks has been changed.

At Gardner the work of grading for the second track between there and Ashburnham has been begun.

At Athol the freight yard has been re-arrangad and enlarged, and the extension of the stone arch in the yard completed.

Considerable grading for the second track has been done between Athol and Pequoig.

At Orange a new passenger and a new freight depot have been built, the grounds around the former graded, and the freight yard re-arranged and enlarged.

Between Orange and Athol about three miles of the second track have been graded and built, a portion of the second ledge east of Orange removed for said track, two highway overhead bridges rebuilt, and a new pier put in and the abutments rebuilt for a new iron bridge in place of the first truss bridge west of Athol.

At Lake Pleasant a large water-tank and pumping-engine have been put in to supply the picnic grounds with water, a substantial foot-bridge over the railroad built, and the accommodations there otherwise increased.

At East Deerfield a new and extensive freight yard has been opened; a sixty foot iron turn-table put in; and we have also built there an engine house for eight pits, a freight transfer house, and two single and one double tenement house.

At Turner's Falls a new turn-table has been

put in; and, to reach it better, the tracks have been re-located.

At Cheapside, in Greenfield, the old wooden stringers over the highway have been replaced with iron girders.

The company have laid during the year, exclusive of construction, 1 952 tons of teel rails, 956 tons of iron rails, and 91,034 new sleepers.

Real estate has been purchased at Boston, Somerville, Belmont, Deerfield, and Montague.

During the year one switching and four consolidation freight locomotives have been purchased, one passenger engine built, one old locomotive sold, and eight new passenger cars and six hundred and eighty-five new freight cars added to our equipment, making our expenditures for additions to equipment $497,288 29.

There has been an increase in gross earnings from all sources of $384,625 45, or eighteen per cent; in operating expenses, inclusive of rents of roads, interest, and taxes, of $280,730 81, or fifteen per cent; and of net earnings, of $103,895 14, or thirty-seven per cent.

There has been an increase in interest paid of $15,754 61; a decrease in rents of road paid of $2,044 00; a decrease of income received from rent of roads of $20,000, and an increase of premiums received of $10,000 00.

There has been an increase in passengers carried of 234,598, or ten per cent; in total number tons freight carried, of 238,661, or seventeen per cent; and in total train mileage, of 121,516 or six per cent; and of the operating expenses including taxes, per total mile run, from eighty-three to ninety-one cents.

The passengers carried over the Troy and Greenfield Railroad have increased from 83,152 in 1879 to 114,664 in 1880; and the tolls paid the Commonwealth for passengers, expresses, and mails, have increased from $37,184 57 in 1879 to $46,154 69 in 1880.

The freight over the same road has increased from 624 083 tons in 1879 to 751,451 in 1880; and the tolls paid therefor have increased from $100,448 71 in 1879 to $131,782 95 in 1880.

The total tolls paid the Commonwealth on freight and passenger business have increased from $137,633 28 in 1879 to $177,937 64 in 1880, or $40,304 36.

The Vermont and Massachusetts Railroad Company, in its lease to us, and upon the written request of this company, covenanted and agreed to sell and convey to whomsoever may be designated in said request, provided such sale can lawfully be made, that portion of its railroad which lies between "Grout's Corner," now "Miller's Falls," and Brattleborough, Vt., and known as the Brattleborough Branch, which branch has never been operated by the Fitchburg Railroad Company. It was under lease to the Rutland Railroad Company, and formed a part of the New York line of the Central Vermont Railroad. In the struggle of the various roads competing for this business, there was a constant liability that the value of the most profitable portion of the same would be seriously impaired by the construction of a parallel road. Under these circumstances your directors, after obtaining the requisite legal authority, and in conformity with the vote passed at the last annual meeting, sold on May 1, 1880, said branch, with the real estate appertaining thereto, to the New London Northern Railroad Company for $630,500, which sum, by the terms of the lease of the Vermont and Massachusetts Railroad, has been applied to the payment for additions and improvements made by this company on that road.

In our last annual report we left the discussion of tolls on the State's road, with the agreement with the Commonwealth to determine by arbitration what rebate, if any, from the existing tolls, would enable this company to operate the Troy and Greenfield Railroad at cost.

The arbitrators appointed under said agreement were the Hon. Waldo Colburn, S. M. Felton, Esq., and E. B. Phillips, Esq., who met in January last, and, after a long and patient hearing of the parties, made their award, allowing the Fitchburg Railroad Company 52.491 per cent of the gross receipts of the Troy and Greenfield Railroad as the operating cost for the nine months ending December, 1879, and thereafter until one month's notice by either party, or until action in the matter by the Legislature.

By chap. 261, Laws of 1880, the Manager of the Troy and Greenfield Railroad by direction of the governor and council, was authorized to contract with any railroad corporation or corporations for the operation of said railroad for a term not exceeding seven years.

Under said Act the contract annexed to this report was made with this company.

The assetts and liabilities of the corporation, Sept. 30, 1880, were as follows:

ASSETS.

Cash and cash funds		$52 905 34
Real estate		305,478 91
Stock materials		423,134 01
Improvements Vt. and Mass. R. R.		70,286 44
Sinking fund		170,000 34
Construction accounts in excess of capital stock		1,617,397 91
Debit balances		18,600 61
		$2,657,803 56

LIABILITIES.

Funded debt	$1,500,000 00	
Notes payable	406,500 00	
Due connecting roads,	44,978 02	
Unclaimed dividends..	8,761 50	
Coupon No. 2, (due Oct. 1, 1880)	12 500 00	
Coupon No. 6, (due Oct. 1, 1880)	15 000 00	
Coupon No. 13, (due Oct. 1, 1880)	17,500 00	
Suspense account	35 643 01	
Renewal fund	25,187 77	
		2,066,015 30
		$591,788 26

By reference to the above statement it will be seen that the expenditures on account of construction exceed the amount of capital stock by $1,617,397 91: this, together with the sum of $70,286 44, represent the amount respectively expended in additions and improvements on the Fitchburg and Vermont and Massachusetts Railroads, and are not available assets until stock is issued to cover the amount expended in excess of the present capital, but stand as an investment until capitalized.

TRIAL BALANCE, September 30, 1880.

Financial and Commercial Review.

THURSDAY EVENING, January 6, 1881.

Six per cent. has been the full rate for call loans, while a good part of the business was done at 5 per cent. Time loans are 4@5 per cent., and prime mercantile paper 5@5½ per cent. The closing quotations at the Stock Exchange for call loans was 4@5 per cent. The posted rates for prime bankers sterling are 98⅝ and 99⅛, respectively; the actual rates are 98⅛@9-16 and 99@1-16. Cable transfers are 98⅛@8-16.

By referring to the statement given in another column, it will be seen that the total debt of the United States, December 31, 1880, was $1,121,481,475 20, less cash in the Treasury $222,299,739 41, leaving net $1,899,181,735 99. The debt has been reduced $5,699,430 76 since the 1st December, and $42,900,559 35 since the 1st of July last, an average of $7,165,100 per month. Of the bonded debt $202,266,550 bears 6 per cent. interest, $469,651,050 bears 5 per cent, $250,000,000 bears 4½ per cent., $739,347 800 bears 4 per cent, and $14,000,000 bears 3 per cent. Interest has ceased upon $11,484,395 26, and $413,185,301 12, being in the form of legal tenders, certificates of deposit, etc., bears no interest. In addition there are $64,623,512 bonds issued to Pacific Railroad Companies, which bear 6 per cent interest, known as currency sixes. The available cash in the Treasury amounts to $148,503,615 41.

The payments made from the United States Treasury in December (exclusive of interest or principal of the public debt) were as follows:—Civil and miscellaneous, $5,470,959 98; war,

$3,491,911 37; navy, $1,719,104 46; Interior, Indians, $643,018 17, and do. pensions $4,750,070 —total, $16,075,063 98.

The closing quotations on Thursday were: Adams Express, 123@125; American Express, 62½@63; American District Telegraph, 55@56½; American Union Telegraph, 71½@72; Canada Southern, 72¼@72⅝; Central of New Jersey 85⅝@85⅞; Central Pacific, 91¾@92; Chicago and Northwestern, 124⅞@125⅛; do. pref., 140½@140¾; Chicago, Burlington and Quincy, 181¾@182; Chicago, Milwaukee and St. Paul, 110¾@111; do. pref., 122⅞@123; Chicago, Rock Island and Pacific, 136⅛@136⅞; Columbus, Chicago and Indiana Central, 21⅝@21⅞; Cleveland, Columbus, Cincinnati and Indianapolis, 95⅛@95¾; Hannibal and St. Joseph 46⅞@47⅛; do. pref., 102¾@103; Illinois Central, 125¼@125¾; Lake Erie and Western, 40@40½; Lake Shore and Michigan Southern, 130⅝@130¾; Michigan Central, 121¾@122; Metropolitan Elevated, 108@108½; New York Elevated, 124½@125; New York, Lake Erie and Western, 48½@48⅝; do. pref., 90⅛@91; New York, Ontario and Western, 30⅜@30⅝; Ohio and Miss., 37@37⅛; do. pref., 98@99; Pacific Mail, 49⅝@49¾; St. Louis, Iron Mountain and Southern, 53⅛@53⅜; Union Pacific, 110⅝@110⅞; United States Express, 51⅛@52; Wells Fargo Express, 112@114; Western Union Telegraph, 86⅞@87; Wabash, 44⅛@44¼; do. pref., 85⅛@85⅝.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

New York.—Albany and Susq. 1st consol., 111½; Boston, Hartford and Erie 1st, 52⅜; Chicago and Alton, inc., 121½; Chicago, St. Louis and New Orleans, 40½; Chesapeake and Ohio 2d pref., 25; do. 1st pref., 84¾; do. cur. int., 50; do. 1st, Series B, 80⅞; Chicago, St. Paul, Minn. and Omaha, 45½; do. pref., 97; do. consol., 106½; Central Iowa, 78; Col., Chi. and Ind. Cent. Inc. 59; do. 1st Trust Co. certif. ass., sup., 106; Chicago, Milwaukee and St. Paul 1st, S. M. div., 107; Chicago, Burlington and Quincy 8s, 106¼; Clev., Col., Cin. and Ind. consol., 118; Chicago and Eastern Illinois 1st, 106; Chicago, St. Paul and Minn. 1st, 109⅛; Dubuque and Sioux City, 83; Denver and Rio Grande, 87; do. 1st, 115½; do. 1st consol., 113¾; Frankfort and Kokomo, 20; do., 1st, 100½; Galveston, Harrisburg and San Antonio, 1st, 102¾; Houston and Texas Central 2d, M. L., 120; Ind., Bloom. and Western, 52; do. 1st, 81; do. 2d, 70⅞; do. Inc., 65; Indianapolis, Decatur and Springfield 2d, 60; International and Gt. Northern 1st, 107½; do. 2d inc., 87¼; Joliet and Chicago, 130; Keokuk and Des Moines pref., 41; Kansas Pacific, 1st consol., 104⅛; do. 6s, Denver Div. ass., 107; Lake Erie and Western, 40¾; do. inc., 69; Lake Shore div. bonds, 123½; Louisville and Nashville Gen'l mort., 6s, 104; do, 2s, 106; Lehigh and Wilkesbarre consol. ass., 105¼; Marietta and Cincinnati 1st pref., 9; Mobile and Ohio, 21½; do. 1st deben., 87½; do. 2d deben., 51½; do. 4th deben., 40; do. 1st mort., 107; Missouri, Kansas and Texas, 42½; do. consol. ass., 112½; do. 2d, 77; Minneapolis and St. Louis 1st, Iowa Ext., 109½; Missouri Pacific 1st consol., 105⅝; Nashville, Chattanooga and St. Louis, 69¾; do. 6s, 119; New York, Ontario and Western, 30; New York, Pennsylvania and Ohio inc., 63; New York, Lake Erie and Western Inc., 91; Ohio Central, 23⅝; do. Terminal Trust 6s, 100; do. 1st, 103½; do. inc., 59½; Oregon River and Nav., 136; do. 1st, 105½; Peoria, Decatur and Evansville, 28; do. inc., 72; do. Evansville div., 68; Rome, Watertown and Ogdensburg 1st consol., 80; St. Louis, Kansas City and Northern, Omaha div. 1st, 106½; Southern Pacific of California, 1st, 103; St. Paul and Duluth, 36; do. pref., 72; St. Louis and Iron Mt., 2d pref. inc., 76; do. Cairo, Ark. and Texas 1st, 108; do. Arkansas Branch 1st 109½; St. Louis and San Francisco 2d, Class B, 88⅞; do. C, 87½; St. Paul and Sioux City 1st, 110½; Texas and Pacific, 43½; do. income L. G., 75; do. Rio Grande div. 1st, 98; Wabash Gen'l mort., 6s, 97½; Alabama, Class C, 88; Louisiana 7s, consol., 54; North Carolina 6s, new, issued Chatham R. R., 7½; do. issued N. C. R. R., 8½; do. 4s, consol. 83½; Tennessee 6s, new, 49½; do. old, 49½; American Union Tel., 72; Am. Dist. Tel., 55; Sutro Tunnel, 1¼; Colorado Coal and Iron, 38½; do. 6s, 97; Consolidation Coal, 39; New Central Coal, 30; Caribou Mining, 2¼; Central, 4¾; Deadwood, 14; Homestake, 29¼; Little Pittsburg, 2; La Plata, 9; Standard, 22½; Starmont, 1⅞.

Philadelphia.—Am. S. S. Co. 6s, 111; Central Transp., 49½; Cincinnati 7.30s, J. and J., 125; Catawissa new pref., 48; Huntingdon and Broad Top Mt. consol. 7s, 69; Hestonville R. R. 6s, 105¾; Nesquehoning Valley R. R., 57; Philadelphia and Reading R. R. scrip, 55; do. consol. mort. gold 6s, 112½; Pennsylvania Canal 6s, 97; Pennsylvania Company 6s, 107½; Shamokin, Hazleton and Wilkesbarre 5s, 91; Texas and Pacific 1st mort. 6s, 108¼; do. consol. mort. 6s, 99½; Union and Titusville 7s, 100½; West Jersey and Atlantic 6s, 105. St. Louis and San Francisco Railway.

The following is a summary of the statement submitted to the Board of Directors at their meeting held in this city on the 29th ult :

Capital stock	$25,000,000 00	
Bonded indebtedness	17,850,000 00	
Main track mileage (392 miles laid with steel)	633 55 miles	
Bonded indebtedness per mile	28,175 00	
Available assets owned by the company (cash value)	4,365,715 99	
In addition to the above assets the company owns $9,779,540 (at par) of the capital stock of the Atlantic & Pacific Railroad Co., now issued, and one-half interest in all future issue of the stock of that company. (Total authorized issue, $100,000,000.)		
Bonded indebtedness, less value of assets, stated at $4,365,715 99	$13,484,284 01	
Or at the rate per mile of	21,284 00	
Gross earnings for 1880	$2,694,060 15	
Operating and general expenses and taxes (including $356,455 expended during the year for steel rails)	1,319,550 56	
Net earnings for the year	$1,374,509 59	
Interest charges for 1880	865,746 83	
Remaining	$508,762 76	
Improvements in 1880, $90,000 00		
Paid on account new equipment	102,758 80	192,758 39
Net results for the year	$316,004 46	
EQUIPMENT.		
Locomotives	59	
Passenger coaches, &c	37	
Freight cars and cabooses	2,123	

A New Compressed Air Motor.

Notwithstanding the numerous failures to introduce compressed air as a motive power, the ingenuity of inventors and the new advances made in that direction recently afford more than a reasonable promise than it will eventually be put to a practicable use, if not as a substitute for steam in ocean navigation or on long lines of railroad, at least for short branch roads and in lieu of horse or steam power on city railways. The best results yet attained have been those accomplished by Col. Beaumont, of the royal arsenal at Woolwich, England. His newly invented air engine has been employed for some time at the arsenal in question, and has been found capable of drawing a load of sixteen tons for a distance of sixteen miles without recharging the air cylinders. The engine which weighs ten tons, has a reservoir in which one hundred cubic feet of air can be compressed to one thousand points to the square inch, and the machinery and wheels work in perfect silence. The difficulties experienced by former inventors have been overcome in the Beaumont engine by placing three cylinders of graduated size on each side of the engine and by applying warmth to counteract the cold produced in the expansion of compressed air.—[Balt. Sun.

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of December, were :

ENTERED FOR CONSUMPTION.

	1879.	1880.
Manufactures of wool	$869,921	$588,518
" cotton	1,176,038	1,582,716
" silk	1,297,807	1,283,844
" flax	797,847	630,436
Miscellaneous dry goods	483,887	512,262
Total	$4,625,500	$4,597,771

WITHDRAWN FROM WAREHOUSE.

	1879.	1880.
Manufactures of wool	$378,961	$384,889
" cotton	396 281	236,541
" silk	185,004	307,313
" flax	293,012	280 042
Miscellaneous dry goods	129,709	200,298
Total	$1,287,967	$1,408,083
Add entered for consump.	4,625,500	4,597,771
Thrown upon market	$5,913,467	$6,005,854

ENTERED FOR WAREHOUSING.

	1879.	1880.
Manufactures of wool	$275,712	$305,901
" cotton	365,180	530,733
" silk	290,775	368,124
" flax	316,398	291,059
Miscellaneous dry goods	145,897	242,151
Total	$1,893,962	$1,737,968
Add entered for consump	4,625,500	4,597,771
Total entered at the port.	$6,019,462	$5,335,739

The following will show the relative proportion of the different classes of fabrics :

	1879.	1880.
Manufactures of wool	$20,773,785	$28,176,532
" cotton	18,813,862	26,211,471
" silk	29,129,588	35,342 849
" flax	14,706,100	18,723,968
Miscellaneous dry goods	8,126,265	11,289,800
Total	$91,549,000	$119,844,120

The imports of foreign dry goods at New York for each month of the years 1879 and 1880, were as follows :

	1879.	1880.
January	$5,987,719	$10,714,881
February	12,589,363	15,691,575
March	8,613,592	12,238,350
April	6,037,243	10,076,286
May	4,487,202	7,470,789
June	4,846,955	8,158,500
July	7,985,348	11,070,161
August	11,817,521	15,267,941
September	9,781,789	10,112,286
October	6,876,626	8,129,985
November	6,506,680	5,577,627
December	6,019,462	6,335,739
Total	$91,549,600	$119,844,120

The value of foreign dry goods entered directly for consumption at the port of New York, is as follows :

	1879.	1880.
January	$4,761,995	$8,608,069
February	10,065.148	13,816,942
March	6,757,608	10,874,566
April	4,709.395	7,560,580
May	3,682,940	5,295,185
June	3,798,184	4 974,817
July	7,489,796	7,713,876
August	9,624,358	11,165,617
September	7,918,048	7,420,154
October	5,393,154	5,162,851
November	5,078 136	3,934,133
December	4,625,500	4,597,771
Total	$72,854,262	$90,124,801

The value of foreign dry goods withdrawn from warehouse at the port of New York, is as follows:

	1879.	1880.
January	$1,814,191	$2,012,601
February	2,863,842	2,603,637

November	1 428,544	1,643 494
December	1,593,962	1,737,968
Total	$18,695,338	$29 719,319

MR. JOHN H. HALL retired from the well-known paper house of Campbell, Hall & Co., January 1st, after many years of active business, in which he had earned a most enviable reputation among the trade, and in the business community generally. The copartnership of Campbell, Hall & Co. has existed more than a quarter of a century, and has maintained through these many years a leading position among the solid houses of the city. Mr. Augustine Smith and Mr. Richard L. Campbell continue the business under the firm name of Campbell & Smith. Mr. Smith has been identified with the paper trade of New York for nearly fifty years, and may truly be called one of the pioneers of the business in this section. There is probably no man in the trade who has a wider acquaintance with paper dealers and manufacturers throughout the country, or a more valuable knowledge of the business in which his life has been passed ; and certainly no man in the trade is held in higher esteem by all brought in contact with him. Mr. Richard L. Campbell has been brought up in the old house which has so long borne his family name, and is eminently fitted by business experience and qualities to be associated with his senior partner in this well-known establishment.

RAILROAD AND CANAL DIVIDEND STATEMENT.

Showing the amount of Stock Outstanding, the Dividend Periods and the date of last Dividend.

NEW YORK, LAKE ERIE WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

Central New Jersey..	53,979	3,735,609	4,064,968
United R. R. of New Jersey	21,884	1,160,190	979,866
Pennsylvania Coal ..	17,390	1,110,443	1 364,712
Delaware and Hudson	44,629	3,002,807	3,365,184
Huntingdon & Broad Top Mt.....	.....	403,556	301,411
Penn. and New York.	18,648	81,309	65,248
Clearfield, Pa.....	29,187	1,711,098	1,610,265

No report has been received from the Huntingdon and Broad Top Mountain Railroad for the week ending December 25th. The Schuylkill Canal is closed for the season. The total tonnage of anthracite coal from all the regions for the week ending December 25, as reported by the several carrying companies, amounted to 349,664 tons, against 328,855 tons in the corresponding week last year, an increase of 20,809 tons. The total amount of anthracite mined for the year is 23,308,549 tons, against 26,141,420 tons for the same period last year, a decrease of 2,832,871 tons. The quantity of bituminous coal sent to market for the week amounted to 36,018 tons against 90,758 tons in corresponding week last year, a decrease of 54,740 tons. The total amount of bituminous mined for the year is 4 299,813 tons against 3,704,383 tons for the corresponding period last year, an increase of 595,430 tons. The total tonnage all kinds of coal for the week is 385,682 tons, against 419,613 tons in corresponding week last year, a decrease of 33,931 tons, and the total tonnage for the coal year is 27,608,362 tons against 29,846,803 tons to same date last year, a decrease of 2,237,441 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of December was 143,197 tons, of which 104,014 tons were coal and 39,183 tons coke. The total tonnage for the year thus far has been 6,986,748 tons of which 5,223,881 tons were coal and 1,707,867 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region have not been reported since December 18, and amount for the year to 2,041,274 tons, the shipments having about ceased. This is an increase of 882,165 tons over last year. Yearly reports from the office of the Chesapeake and Ohio Canal Company, just made up, show that during the past year 615,423 tons of coal were shipped. Of this amount 160,593 tons were shipped by the Consolidation Company, 100,449 tons by the Borden, 87,276 tons by the American, 92,146 tons by the Maryland, 68,067 tons by the New Central 38,116 tons by the George's Creek, 45,996 tons by the Blaen Avon Company, and the balance by smaller companies. The railroads during the year carried the following coal tonnage from the Cumberland region : Baltimore and Ohio Railroad, 1.219,184 tons ; increase over 1879, 222,570 tons. Pennsylvania Railroad, 206,576 tons ; increase over 1879, 57,113 tons. Shipments have ceased from Port Richmond.—[Phila. Ledger, Jan. 3.

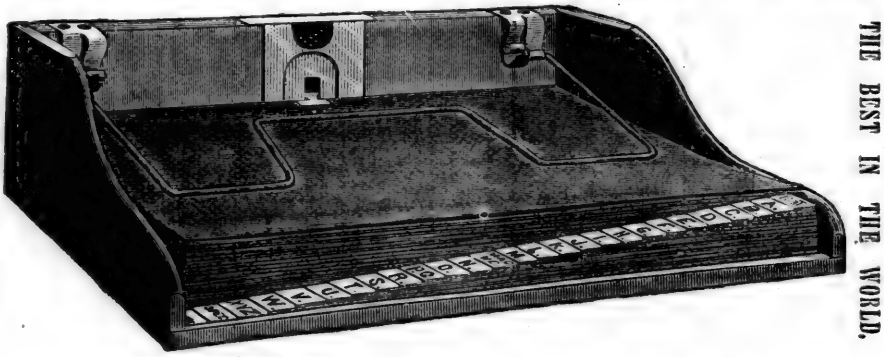
—The Central Ohio Railroad Company has declared a dividend of 3 per cent on the preferred and 3½ per cent. on the common stock, both payable at the office of the Treasurer of the Baltimore and Ohio Railroad Co., Baltimore.

—The Ontario Silver Mining Company has declared its regular monthly dividend of 50 cents per share for December, payable at the office of Wells, Fargo & Co., 65 Broadway, on the 15th inst.

AMBERG'S PATENT

"PEERLESS" CABINET LETTER FILE.

(27-FILE CABINET WITH DOORS.)



675 Indexed Divisions, will hold 17,000 Letters.

These CABINET LETTER FILES are made in many sizes containing as few as 6, and as high as 100 or more files each, at prices ranging from $19 50 to $500 00. They are elegantly and substantially made, the wood-work being of the best seasoned Black Walnut, and the other parts of Brass and Steel, nickel-plated. They can be arranged for any class of correspondence and can be adapted to any requirement. **OVER 2,000 SOLD IN LAST THREE YEARS.**

AMBERG'S PATENT

"PEERLESS" LETTER FILE.

THE BEST IN THE WORLD.

THE BEST IN THE WORLD.

This cut shows a Single "Peerless File" which is complete in itself. This File forms the drawer part of Cabinet shown in above cut. The lettering of the index leaves of the Files in Cabinets is, however, very different, as each drawer or file has an index to correspond with the lettering shown on its front.

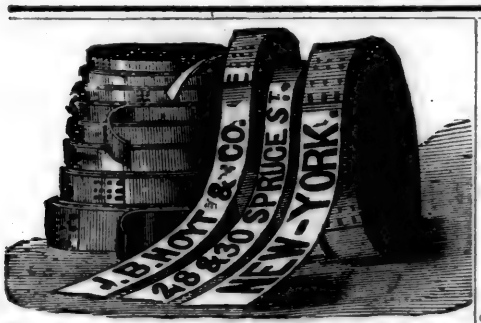
Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISH

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

AMERICAN Railroad Journal.

ESTABLISHED 1831.

STEAM NAVIGATION, COMMERCE, FINANCE, BANKING, MACHINERY, MINING, MANUFACTURES.

SECOND QUARTO SERIES, VOL. XXXVII., No. 3.] NEW YORK, JANUARY 15, 1881. [WHOLE No. 2,334, VOL. LIV.

CHICAGO.

THE OPENING OF THE YEAR AT CHICAGO—CONDITION OF MONEY MARKET JAN. 1ST.—RAILROAD ORGANIZATION AND REPORTS—INTERESTING STATISTICS OF THE CITY'S BUSINESS LAST YEAR.

(From our Chicago correspondent.)

As usual during the holiday season the movement in financial circles has been uneventful and confined strictly to ordinary channels. The sale of $85,000 municipal four per cent refunding bonds, within two days from the opening of the books, indicates very clearly the abundance of money to be had here when satisfactory security is offered. The entire amount was taken by less than two hundred persons and the market quotation to-day is 102.

The supply of foreign bills during the past fortnight has been fair, with rates somewhat higher. Actual rates December 30th were 480½ for 60 day Bankers' bills, and 483½ for demand. Sixty day commercial bills were 477¾@478¾ for sterling; 531¼@530 for francs Havre and Marseilles; 532½@531½ for francs Antwerp; and 93¾@93½ for marks.

The demand for currency from the country has entirely ceased. New York exchange has ranged between par and 80 c. per M. discount. Loans on call are 6 to 6½ per cent; time loans 6 to 7 per cent. Clearings of the associated banks for the year just closed were $1,725,684,894, against $1,257,756,000 for 1879, and $967,184,000 for 1878.

Quotations on the Chicago Stock Board Dec. 30th, were:

Chicago, Mil. & St. Paul Railway 7s, Dakota Extension	121
Chi., Mil. & St. Paul 7s Hastings & Dakota	117
Chi., Mil. & St. Paul 6s, Chicago & Pacific	109⅛
Chi. & Northwestern R'y sinking fund	111½
Chi., Burlington and Quincy 4s, due 1919	93¾
" " " 5s, "	105½
Jacksonville and Southeastern Railway 6s	101
Wabash, St. Louis and Pacific 1st mortgage 5s, C. D	93⅝

Articles of incorporation of the St. Louis and Indiana Railway Company were filed with the Secretary of State December 18th. The proposed road will be from East St. Louis to a point on the boundary line between Illinois and Indiana at the Western terminus of the Lake Erie and St. Louis Railway, a distance of 160 miles.

The special meeting of the stockholders of the Chicago, Burlington and Quincy Railroad was held at the general offices in this city December 28th. The attendance was small, and most of the stock was voted by proxies. It was decided unanimously to adopt articles of consolidation of the following roads with the main line: Kansas City, St. Joseph and Council Bluffs; Nodaway Valley; Chillicothe and Chariton; Red Oak and Atlantic; Moulton and Albia, Keokuk and St. Paul, and Hastings and Avoca. A resolution was adopted authorizing the board of directors to increase the capital stock to cover the costs of the new lines thus taken.

The report of the Illinois Central Railroad Company as filed with the Auditor of the State, for the six months ending October 31st, 1880, shows gross earnings:

Freight	$1,994,586 82
Passenger	600,477 34
Mail	53,009 94
Express	60,012 87
Miscellaneous	185,641 80
Total	$2,893,728 27

Seven per cent upon this amount is due to the State of Illinois under the term of its charter, $202,560 98—as compared with $175,841 96 for same period in 1879.

The statement of the earnings of the Chicago and Alton Railroad for the week ending December 28, shows earnings from all sources of $151,542 48 against $141,654 05 for corresponding week last year, an increase of $9,888 43. The earnings for the month of December up to the 23d, amount to $443,521 77, against $427,956 47 in 1879—an increase of $15,565 30. From January 1st, 1880, to December 23d, 1880, the earnings were $7,572 127 84, against $5,630,619 25 for 1879—showing an increase of $1,941,508 59.

The semi annual meeting of the Chicago and Grand Trunk Railway stockholders, held last week, evolved nothing of public interest, beyond the ratification of the lease with the Chicago and Western Indiana for using the latter's track into Chicago. In this connection it is purposed to join the Wabash, St. Louis and Pacific, and the Chicago and Eastern Illinois Railways in the occupation of a Union depot to be erected on Van Buren street, when the numerous condemnation suits incidental to the right of way have been decided.

The present terminus at Twelfth street may, however, prove to be permanent, and in view of the tendency of the city to grow and expand southwardly, it would within a few years undoubtedly prove to be the most desirable solution of the question of a convenient and accessible station, to rest there.

The Railways interested in the Lake front project, anticipate no opposition to the bills offered in Congress, authorizing the sale of the two blocks they require. The officials promise to commence the erection of the new buildings early in the spring, and will make them handsome and commodious enough to satisfy all concerned.

With the close of the year we are favored with the usual statistical tables relating to the business and trade of the city for the past year.

The following items are compiled from the Board of Trade returns, as received from Railroads, Custom House officials, the various grain, and flour inspectors, Registrars of Provisions, &c., and the Union Stock Yard Company, values being obtained from the Chicago Tribune review, &c., &c.

BREADSTUFFS MOVEMENT.

Receipts:	1880.	1879.
Flour, brls	8,377,333	8,369,968
Wheat, bu	23,318,680	34,106,109

Total trade of the city for 1880, estimated at $900,000,000 an increase of 17½ over 1879.

—Gen. John M. Corse and Mr. George W. Ballou, of New York, and Messrs. George Hafer, J. N. Kinney, Henry Lewis, Benj. Eggleston, O. W. Dodds, Albert Netter, A. D. Bullock, C. T. Dickson, M. S. Forbus, of Cincinnati, are the directors of the Cincinnati Northern Railroad Co., narrow guage. The officers are: General Corse, president; Henry Lewis, vice-president; George Hafer, treasurer; and W. V. McCracken, secretary. The executive committee is composed of the president, vice-president, and treasurer.

[From the Railway Age.]

Railway Construction in 1880.

We present herewith a summary, as complete as it is possible at this date to make it, showing the mileage of track actually laid down in the United States during the year 1880. Much of this information has been obtained directly from the railway companies and from railway commissioners and other state officials. Quite a number of companies, however, have thus far failed to respond to our circular asking information, and we have been obliged to make up our figures from the best available sources, so that our table doubtless falls short of the actual total. The footings, however, incomplete as they may be, are sufficiently astonishing, showing as they do, that not less than 7,207 miles of new track were laid during the past twelve months on at least 234 different lines. These figures are far greater than those for any year since 1871, and the mileage is more than 54 per cent greater than that built in 1879. We have no doubt that the final figures will increase it to at least 7,500 miles, which is a greater mileage than has been constructed in any previous year in the United States or, of course, in any other country. Our table shows that the work of construction has been prosecuted in 42 of the states and territories, the only state not included in the list being Mississippi, and the only territories not given being Idaho, Wyoming, Indian territory—from which railways, eager to enter, are still forcibly kept out—and ice-bound Alaska, which is at present beyond the reach even of the enterprising railway builder. Work is now actively in progress in both Idaho and Wyoming, and another year will see large additions in these territories also, while the Indian country will doubtless be opened to several new enterprises.

Referring to the summary it will be seen that Dakota leads the country with over 680 miles of new track, Texas coming next with 659; Ohio with 525; the new territory of Mexico, with 519 miles; Iowa with 445; young Colorado with 401; Nebraska with 395; Illinois and Kansas with over 340 each, and so on, the new west beyond the Mississippi river contributing the greatest share of the additions for the year.

It should also be borne in mind that the figures show only the track reported laid, and do not include the vast mileage upon which grading has been in progress, and which will be ironed in the coming year. It is not unlikely that ten thousand miles of road will be added in 1881!

If we assume the cost of building and equipping the 7,207 miles here reported, we find that the enormous amount of over seventy two million dollars has been expended on these completed roads. How much more has been spent in surveys and construction on other new lines, it is of course, impossible to say.

The figures here given considerably exceed any estimate hitherto made, and are an astonishing exhibition of enterprise and faith on the part of the capitalists of the country. As a general thing, these roads have been built by money furnished by non-residents of the states and territories whose facilities of transportation have been thus vastly increased, and whose people certainly ought to feel some gratitude to the "foreign capitalists" who are so obnoxious to some of the politicians of the country.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

New Route from the Hudson to the Delaware.

The through route that has been so much talked of between Newburg on the Hudson and the Delaware River will in all probability be fully completed and in running order by next Fall. It will necessitate the building of about 23 miles of railroad between Andover, N. J., and Belvidere. The route will be by way of the New York, Lake Erie and Western's Newburg branch to Greycourt, thence to McAfee by the Warwick Valley Railroad and by either the Sussex Railroad or the building of an independent line from McAfee to Andover, the remainder of the route to consist of the 23 miles which it has just been decided to build at once. The line will have most valuable connections, including to the eastward the New York, Lake Erie and Western, New York and New England, Newburg, Dutchess and Connecticut, and Wallkill Valley Railroads, and the Hudson River boats. At the western terminus, at Belvidere, the road will connect with the Belvidere Delaware Division of the Pennsylvania Railroad, giving by that line a connection at Easton with the Lehigh Valley, Central of New Jersey, and Morris and Essex, with connections by the Belvidere, Delaware Division with Philadelphia. It will also cross the New Jersey Midland at Franklin, and the Delaware, Lackawanna and Western at Buttsville, about six miles north of Belvidere.

The new route will bring Easton and Newburg 50 miles nearer together than they now are by the Delaware, Lackawanna and Western, and 41 miles nearer than by the Central Railroad of New Jersey, the distance from Easton to Newburg by the new route being 95 miles. Harrisburg which is now 263 miles from the Hudson by the New York Central and Hudson River and Pennsylvania roads, will be 202 miles by the new route. Surveying has been going on for some time, for the portion of the line to be constructed, and contracts for parts of the work will probably be given out this month. Proposals are being received now for ties to be delivered in the spring.

The new enterprise is one of great importance, as is readily seen from the new transportation facilities it will afford, and from the great shortening of distances it will make between important inland points as well as river shipping stations. It appears to be the shortest possible route between the Delaware and Hudson Rivers. The plan is a very popular one and awakens much interest in its favor, especially as it will be carried out by experienced and able men in whose ability and character the interested public has the utmost confidence. The company recently formed is a very strong one and includes a number of practical railroad men and solid capitalists. It is called the Lehigh and Hudson River Railroad Co. Its officers were elected last week and form a very energetic board. The President is Grinnell Burt, of Warwick, who is also the President of the Warwick Valley Railroad. The Vice-President is George R. Blanchard, who is the Vice-President of the New York, Lake Erie and Western. The Secretary is Alfred Ely, of Newark, N. J., and the Treasurer is D. B. Halstead, of the National Exchange Bank, New York. The other Directors are the Hon. Thomas C. Platt, William C. Sheldon, John S. Martin, G. A. Hobart, D. F. Merritt, James B. Pixman, the Hon. Frederic A. Potts, late Republican candidate for Governor of New Jersey; the Hon. Bird W. Spencer, Mayor of Passaic, N. J., and Charles Scranton, of Oxford, N J. The list of incorporators also includes Richard Smith, of Morristown, N. J.; Thomas P. Fowler, A. W. Humphreys, Joseph H. Converse, of Boston; R. C. Vilas, of New York; C. F. Hoffman, the Hon. Titus Sheard, of Little Falls, N. Y.; A. V. D. Pratt, of Elmira, and other gentlemen well known in railroad circles and of prominence in public life.

A Much Quoted Man.

General Francis A. Walker who obtains such wonderfully satisfactory results in compiling the full statistical reports connected with his census work, is a skillful systematizer of business machinery as well as an able and original employer of figures, in telling what people want to know about themselves and their country, and in giving facts for history. He comes naturally enough by these qualifications, being of the Adams family and a son of Amasa Walker, an eminent Massachusetts statistician. In his professorship at Williston Seminary, as in Yale College, General Walker enjoyed an enviable reputation as a sketcher of classical history by the use of systems of skillfully prepared tables of dates of historical events, etc., which under his method assumed an impressiveness and clearly defined portraiture of great value.

An amusing incident is remembered by the writer as occuring one day in General Walker's class in English composition at Williston. Among the students was one who was counted as something of a bore among his associates on account of his inveterate habit of begging compositions from his less indolent friends, to be read by himself as specimens of his own literary powers. This could easily be done in a large seminary where the students read their compositions in different departments before different professors, and it not infrequently happened that a composition which took pretty well in one department would be passed around among the boys of a set whose scruples against plagiarism were not paramount to their convictions against over-mental exertion. The professional composition borrower arose one day in class and with the

utmost complacency began reading a really fine production on "The Horse." The triteness of the subject when announced caused the boys to settle down for five minute contemplations of class room miseries, but after the first few lines were read the historical research and statistical knowledge displayed aroused an unwonted animation and interest among the drowsy listeners, who looked with wonder and incredulity upon the proud reader and the masterly effort. A loud, sharp rap and a "that's sufficient" from the General's desk broke the spell, and the reader sat down having given the boys but a glimpse of his borrowed plumage. The composition was one that General Walker himself wrote early in his college days, and it had been published in an Amherst College paper at the time, where one of the persecuted students at Williston, who had tired of furnishing the borrower with his compositions, found it. He had copied it and passed it off upon the unwitting and indolent reader, and so General Walker had the pleasure of detecting his pupil and witnessing the resurrection of one of his early historical productions under somewhat peculiar circumstances. Since that, though, he has undoubtedly become accustomed to seeing his work used by others, for probably few men have their work more quoted just now and used fairly or unfairly than General Walker at the head of the census department.

The Inter-State Improvement and Construction Co. intends to have its line of railroad between Indianapolis, Ind., and Springfield, Ohio, completed by October next. The new road will connect the Indiana, Bloomington and Western Railway with the lines of the Cincinnati, Sandusky and Cleveland Railroad Co. The Inter-State Improvement and Construction Co., whose offices are at 115 Broadway, give the stockholders of Indiana, Bloomington and Western the privilege of subscribing for $1,500,000 of the stock of the former company in the proportion of six shares for every ten shares of the latter company, between the 1st and 5th of February, during which time the books will be open.

Central Pacific and Leased Lines.

The gross earnings of the Central Pacific Railroad Co., for the year 1880, estimating for the month of December, as is shown in our tables, will amount to $20,410,424, against $17,153,163 for 1879. There has been a slight increase of mileage operated of from 2 450 to 2,580 miles, but as this consists of new leased line in New Mexico and Arizona, the amount of new business can be but small, and the increase is due mainly to additions upon the older roads. In a few weeks the connection with the Santa Fe road to the east will be made when fresh business, both through and local, will be thrown upon the Southern Pacific leased line; it would not be surprising therefore if the gross earnings upon the whole 2,750 miles of road operated should reach $27,500,000 or $10,000 per mile. By reference to the annual report it will be seen that the company besides its earnings from transportation derives about $1,250,000 per annum from other sources such as investments, sinking funds and land sales. The following shows in round numbers the state of the income account for the six months just closed, and is, though in part an estimate by the financial agents, Fisk & Hatch, entirely trustworthy:

Revenues:		
Earnings from transportation		$11,905,730
Earnings from river steamers		12,500
Received for interest on sinking fund		200,000
Received for interest on investments		90,000
Received from sales of lands		220,000
Received from miscellaneous sources		138,000
Total income from all sources for the six months		$12,566,230
Disbursements:		
Operating expenses, including rentals and repairs		$3,300,000
General expenses, legal and engineering expenses, and taxes		460,000
Expenses of land department		40,000
Interest on funded debt		1,700,000
Discount and interest		150,000
New construction, equipment and surveys		500,000
Total expenses, interest, and improvements, for the six months		$9,150,000
Surplus		$3,416,230
Applicable to—		
Company's sinking funds—		
From earnings	$330,000	
From interest received	200,000	
	$530,000	
United States sinking fund	450,000	
Redemption of land bonds	220,000	
		1,200,000
Surplus over all expenses, fixed charges, and sinking fund requirements		$2,216 230
Dividend No. 11, payable Feb. 1, 1881		1,778,265
Surplus for the six months after payment of dividend		$437,965

The latest official General Ledger Balance accessible is of June 30, 1880, is as follows: No great changes can have occurred since that date except the calling in and payment of the only 7 per cent loan of $1,500,000.

Liabilities.		
United States Subsidy bonds		$27,855,680 00
Interest on Subsidy bonds (accrued but not due)	$20,106,781 81	
Less Government transportation acc't and sinking fund applicable to the above	4,929,229 82	
		$15 177,541 99
Other bonded debt		56,830,000 00
Interest due and accrued		1,481,345 00
Bills payable		790 807 19
Accounts payable		4,926,200 76
Dividends unpaid		2,311 00
Capital stock, subscribed	$62,608,800 00	
Less held in trust for the company	3,333,300 00	
		59,275,500 00
		$166,342,885 94
Trustees land grant mortgage		224,164 59
Total liabilities		$166,567,050 53

Assets.		
Road & fixtures		$136,558,752 45
Equipment		8,045.262 10
Real estate		2 560,896 81
Cash		1,855,857 31
Material, etc		1,932,696 76
Company's bonds and stocks		7,259 29
Other bonds, stocks and investments		2,326 763 11
Bills receivable		1,877,773 56
Sinking fund with trustees		4,187,176 65
Accounts receivable		786,795 65
Trustees for land grant mortgage—a sinking fund for redemption of land grant bonds		224,164 59
Land contracts—deferred payments on time sales		1,820,353 42
Farming lands—11,000,000 A. at the very low valuation of $1 25 per acre		†13,750,000 00
Undivided half 60 acres land in Mission Bay, San Francisco; 500 acres water front at Oakland; about 140 acres and water front at Sacramento:		
Estimated value, independent of improvements		7,750,000 00
Total assets		$183,682,751 70
Surplus, assets over liabilities		$17,115,701 17

*As this sum is not payable (except by the operation of the sinking fund and by transportation services to the Government) until the maturity of the bonds in from 1895 to 1899, and as it bears no interest, the real present liability of the company on this account would be its present equivalent, i. e., a sum which, set aside, would produce the amount at the time of its maturity. The sum of $8,000,000, invested at 4 per cent, would be more than sufficient. This reduces the real liabilities of the company, and increases the surplus, to the extent of $7,000,000 and over.

† It will be noticed that in the foregoing statement, the immense and valuable land grant of the company is put down at the very low price of $1 25 per acre the minimum Government rate for wild lands everywhere without regard to railroad facilities.

The average price per acre realized from the company's sales of lands from 1870 to 1879 inclusive, was $7 18; and while all the lands are not of equal value, there are very large areas quite as desirable as any that have been sold; and they are constantly increasing in value as the country becomes more thickly populated.

The board of directors estimate the present value of their remaining lands at $30 000,000—a valuation not made at random, but as the result of careful estimates.

At this valuation of the lands, the surplus of assets over liabilities would be increased to $?8,365,701 17, equal to over 55 per cent on the capital stock outstanding.

The Canada Central Railway is in operation a distance of 152 miles, and it will soon be extended to Callander station, the eastern terminus of the Canada Pacific.

Personal.

—Mr. Thomas Ross, the inventor of the Howe scale, was killed at Rutland, Vt., last week, by the bursting of an emery wheel.

—Mr. Henry Crossman, who died in Brooklyn last week, was a director of the New York Ferry Company, the Brooklyn and Coney Island Railroad Company, the New York and Dry Dock Railroad Company, and the United States Warehouse Company and one of the original subscribers to the Brooklyn Academy of Music.

—Captain Jas. B. Eads, having returned from Mexico, is about presenting to Congress his plan for the ship railway across the Isthmus of Tehauntepec.

—Among the prominent railroad men stopping in New York during the past week have been President M. E. Ingalls, of the Cincinnati, Indianapolis, St. Louis and Chicago Railway; Vice-President R. B. Angus, of the St. Paul, Minneapolis and Manitoba; and Sir Hugh Allan, of Montreal.

—Mr. Adolph Sutro gave $1,000 to the public library of San Francisco as a New Year's gift, to be used in purchasing books on mining, geology, assaying and kindred sciences.

—Mr. James R. Keene, whose beautiful residence at Newport was recently destroyed by fire, pays $50 for passage across the bay once a week, as the regular running time does not accommodate him. His family remain in Newport through the winter.

—Colonel J. A. Hill, the recently-appointed general superintendent of the Vandalia line, earned his military title by faithful service with an Ohio regiment during the war. For twelve years he has been connected with the Columbus, Chicago and Indiana Central Railroad.

—Mr. Robert H. Garrett has been appointed general agent of the Alabama Great Southern Railroad, with headquarters at New Orleans.

—Mr. E. P. Lyman i the newly appointed assistant superintendent of the Dubuque division of the Chicago, Milwaukee & S Paul Railroad.

—The superintendency of the Illinois division of the Chicago, Rock Island and Pacific Railroad, has been given to Mr. R. H. Chamberlain, formerly train master of that road.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

Fond du Lac, Amboy & Peoria (N. G.): Extended North..... 1.00
Milwaukee, Lake Shore & Western:
Oshkosh branch completed..... 11.60
1 mile North of Tigerton to Wausau..... 34.10
Eland Junction to Aniwa..... 11.10
Wisconsin Central:
Menasha Junction to Appleton 2.50
(Wisconsin & Minnesota): Abbottsford to Chippewa Falls..... 54.00

We summarize the foregoing detailed statement, by States, as follows:

RECAPITULATION.

States.	No. Lines.	Mileage.
Arkansas	4	70.00
Alabama	1	20 00
Arizona	1	200.00
California	1	3.00
Colorado	13	401.50
Connecticut	1	35.70
Dakota	13	680 85
Delaware	1	1.00
Florida	2	35.00
Georgia	5	56.50
Illinois	12	342.06
Indiana	8	161.00
Iowa	19	445,39
Kansas	10	343.50
Kentucky	1	17.00
Louisiana	2	97.20
Maine	1	3.00
Maryland	2	41 11
Massachusetts	5	46.44
Michigan	10	288.75
Minnesota	6	119.60
Missouri	8	257.75
Montana Territory	1	65 50
Nebraska	10	385.40
Nevada	2	60.00
New Jersey	4	56.90
New Mexico	5	519.65
New York	3	41.34
North Carolina	3	42.00
Ohio	13	525.00
Oregon	4	206 50
Pennsylvania	16	205.72
Rhode Island	1	7 00
South Carolina	3	31.00
Tennessee	3	24.00
Texas	13	658.80
Utah	3	85 22
Vermont	1	36 00
Virginia	4	247.00
Washington Territory	2	81.00
West Virginia	3	26.00
Wisconsin	15	235.84
Totals	234	7,207.31

To compare the progress made from year to year, we append the figures of Poor's Manual, showing the mileage from 1871 to 1879, adding our own figures for 1880, and repeating that these figures are still incomplete, and will be supplemented by later returns:

RECAPITULATION FOR TEN YEARS.

Years.	Mileage added.	Total in U. S.
1871	7,379	60,283
1872	5,878	66,171
1873	3,107	70,278
1874	2,105	72,283
1875	1,712	74,096
1876	2,712	76 808
1877	2,281	79,089
1878	2,687	81,776
1879	4,721	86,497
1880	7,207	93,704

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, January 13, 1881.

The money market is easy at 5@6 per cent on call, 4@5 per cent or time, and 5@5½ per cent on prime mercantile paper.

The posted rate for 60 day sterling is 98¾. The actual rates are 98⅝@11-16 for 60-day, and 99 5-16@⅜ for demand. Cable transfers are 99⅜@7-16. Prime commercial bills according to the old method are 4.78½@4.79.

The earnings of the Central Pacific Railroad Co. show an increase of $517,130 for December, and $3,357,261 for the year. The actual earnings for 1880 are an excess of the estimates and the largest in the history of the road, being for the month of December $1,853,000, against $1,285,670 for the same month in 1879. Earnings for the year 1880, $20,410,421; earnings for the year 1879, $17,153,163—increase, $3,257,261.

The total receipts of the North Pennsylvania R. R. Co. from the Philadelphia and Reading Railroad Company, lessees, for the twelve months ending October 31st, 1880, were $755,568 33. The charges against rental account were: Four quarterly dividends of 1½ per cent cash, interest on bonded and floating debt, expenses of organization, &c., $754,921 33. Balance, $645 85.

The earnings of thirty-eight railroads in the month of December amounted to $14,569,788, showing an increase of $2,204,790 or 17 per cent over same month last year. Traffic was seriously interfered with on many of the lines by bad weather, but the exhibit is nevertheless a gratifying one. With three comparatively unimportant

exceptions there is an uniform increase throughout the list, the gains being the most marked in the grain carriers of the Northwest. The earnings of the same roads for the year show an increase of 27 per cent.

It is said that the St. Johnsbury and Lake Champlain Railroad has effected a loan of $600,000, giving a mortgage upon the road to Emmons Raymond, President of the Connecticut and Passumpsic Rivers Railroad, and Bradley Barlow, owner of the Southeastern Railway.

The earnings of the Union Pacific Railway for the year ending Dec. 31, 1880, were $25,494,106, being an increase of $4,884,491 over 1879.

The annual report of the Cleveland and Pittsburg Railroad shows that for the year ending November 30, 1880, the receipts from lessee were $1,219,465, of which $786,887 was paid in dividends, $343,380 for mortgage interest, $58,081 for consolidated mortgage, $19,945 for construction and equipment bonds, and $9,246 for maintenance of organization, leaving a balance of $1,926 on hand.

The debt of the State of Illinois on the 1st of January amounted to $281,000. This has all been called in and is now being paid at the American Exchange National Bank, New York. When all the bonds are paid, about $100,000 will remain in the State Treasury of the fund paid byt he Illinois Central Railroad Co. to the State, besides a fund of over $1,000,000 derived from other sources, which is in the Treasury. Many of the bonds now being paid were negotiated for 17 cents on the dollar. The local indebtedness in the State is about $50,000,000, of which $16,000,000 are registered and paid through the State Treasurer's office.

The subscriptions to the Iron Steamboat Company's stock, the books for which closed on the 12th inst., amounted in this city to $3,290,000, or $1,290,000 more than the amount offered.

The Governors of the Stock Exchange have admitted to dealings at the Board the following securities:

Burlington, Cedar Rapids and Northern Railroad—Cedar Rapids, Iowa Falls and Northwestern Railroad Company's first mortgage 6 per cent gold bonds, due in 1920, but subject to redemption at 105 after September, 1890. The road extends from Holland, Iowa, on the Pacific Division of the Burlington, Cedar Rapids and Northern Railway, to Clarion, Iowa, a distance of about fifty-five miles. Nearly the entire capital stock of the company is owned by the Burlington, Cedar Rapids and Northern Railway Company, which leases the road for the term of its chartered existence, and guarantees the payment of the principal and interest of each bond by a special indorsement.

Utah Southern Railroad—Additional general mortgage 7 per cent bond, due July 1, 1879, $1,500,000 issued to take up same amount of prior lien bonds. The application to the Exchange says: "Under the terms of the Utah Southern Railroad Company's general mortgage there have been issued 375 bonds in exchange for the same number of prior lien bonds. These bonds are being exchanged day by day as presented, and the company ask that all the remaining issue be placed on the regular list of the Stock Exchange." The total issue of the general mortgage bonds is $1,950,000. The $150,000 issued in excess of the prior lien bonds were admitted October 20, 1880.

Wabash, St. Louis and Pacific Railroad—First mortgage 7 per cent bonds of the Toledo, Peoria and Western Railway, $4,500,000, due October 1, 1879.—First mortgage 6 per cent bonds of Havana Division due in 1910.

Dubuque and Dakota Railroad—Additional first mortgage 6 per cent gold bonds, $80,000 due in 1919, principal and interest guaranteed by the Dubuque and Sioux City Railroad Company and redeemable before maturity at the option of the company at 105 and interest.

Interest and Dividends.

—The Central Pacific Railroad Company will pay, at its offices in New York or San Francisco, Three Dollars per share, on presentation of dividend warrant No. 11, on or after Feb. 1.

—A quarterly dividend of 1½ per cent has been declared by the Wabash, St. Louis and Pacific Railway Co., on the preferred stock, payable February 10, at the office of the company, 80 Broadway.

—The Cleveland, Columbus, Cincinnati and Indianapolis Railway Company has declared a dividend of 5 per cent out of the net earnings for the year ending Dec. 31, 1880, payable Feb. 1, at the United States Trust Company, No. 49 Wall street, N. Y., and at the Treasurer's office in Cleveland.

—The East Mahanoy Railroad has declared a dividend of 8 per cent payable January 15.

—The Mill Creek and Mine Hill Navigation and R. R. Co. have declared a dividend of five per cent, payable 17th instant, clear of tax.

—The Schuylkill Valley Navigation and Railroad Co., have declared a dividend of 2½ per cent, payable 17th instant, clear of tax.

—The Mount Carbon and Port Carbon Railroad Co., have declared a dividend of six per cent, payable 17th inst., clear of tax.

—The Mine Hill and Schuylkill Haven Railroad Company have declared a dividend of three and one-half per cent payable on and after the 14th inst. The transfer books will be re-opened on the 15th inst.

—The Terre Haute and Indianapolis Railroad Company has declared a dividend of 4 per cent payable Feb. 1.

The Homestake Mining Co. has declared its usual monthly dividend for December of 80 cents per share, payable at the office of Wells, Fargo & Co., 65 Broadway, on the 25th inst.

The Rochester and State Line Railroad was sold by auction at Rochester under orders of the court, on the 8th inst., and was purchased by Watson H. Brown, of this city, for $600,000. Some time ago a majority of the bondholders signed an agreement whereby Mr. Brown, Adrian Iselin, and A. Phelps Stokes of New York, were appointed a committee to represent the bondholders and buy the property. Mr. Brown bid for the committee. This committee has a plan for reorganization by which they give, as new securities of the road, which will be issued to those who are entitled to them by the agreement, absolute first mortgage bonds and income bonds, and also the option to get capital stock by paying $10 a share for shares which represent $100 par value. The capital stock of the old company was $2,500,000. Officers recently elected in New York do not hold now. New officers will be elected soon.

Engineers of the International and Great Northern Railroad left Palestine, Texas, on the 10th inst. to make a preliminary survey of the road from Laredo to the City of Mexico. The road will be rapidly constructed from San Antonio to the Rio Grande, most of which is now under contract.

Organization.

—The directors of the new Southern Maryland Railroad Co. are Messrs. John M. Broom, St Mary, Md.; Charles E. Coates, Baltimore; W. W. W. Wood, Washington; W. H. Lafferty, Camden, N. J.; Thos. T. Butcher, George H. Fairman, B. F. Folsom, W. P Henszey, J. H. Linville, D. B. McKibben, Joseph Trimble, Philadelphia. The officers are: Messrs. J. H. Linville, president; M. H. Hoffman, secretary; B. F. Folsom, treasurer. The offices are in Philadelphia.

—The following directors of the Hoosac Tunnel Dock and Elevator Co. were recently elected at Boston: Messrs. F. L. Ames, J. R. Brewer, Robert Codman, C. W. Cotting, W. H. Lincoln. The board elected F. L. Ames, president; Charles K. Cobb, clerk; C. W. Cotting, treasurer.

—The recently-elected directors of the Presidio Railroad Co, California, are: Messrs. A. S. Hallidie, Albert Miller, J. G. Kittle, A. W. Bowman, Robert Watt, N. J. Brittan, and James Moffit. The work of construction is to be recommenced at once.

—The annual meeting of the stockholders of the Terre Haute and Indianapolis Railroad, known as the Vandalia line, was held at Terre Haute, Ind., Jan. 3. The following directors were elected: Messrs. Wm. R. McKeen, Alex. McGregor, Henry Ross, D. W. Minshall, Jos. Collett, F. C. Crawford, and Geo. E. Farrington. The new board elected Mr. Wm. R. McKeen, President; Mr. Geo. E. Farrington, Secretary; Mr. J. W. Cruft, Treasurer.

—On the 5th inst. the annual meeting of the Cleveland and Pittsburg Railway was held, and the following directors were elected: Messrs. J. N. McCullough and B. F. Jones, of Pittsburg; G. B. Roberts and Wm. Bucknell, of Philadelphia; Fred. Sturges, S. J. Tilden, Chas. Lanier and Francis Walker, of New York; A. Ferguson, of Cincinnati; and J. V. Painter, James F. Clark and R. P. Ranney, of Cleveland.

—The Wooten's, Mooresville and Dallas Railroad Company has been organized at Dallas, N. C., to build a railroad from the Cross roads, a point on the Piedmont Air Line near Wooten's, via Dallas and Brevard's Station, on the Carolina Central, to Mooresville, to connect with the North Carolina Midland. The capital stock is fixed at $510,000, in shares of $100. The following are the directors: Messrs. Wm. Jenkins, Jonas Hoffman, Geo. F. Bason, B. F. Carpenter, Alexander Brevard, and Joseph G. Morrison. A number of liberal subscriptions were made.

—A number of railroad companies held their annual elections in Philadelphia, Monday, with the following results:

Reading and Columbia Railroad Company—President, G. A. Nicolls. Directors—H. P. McKean, J. B. Lippincott, John Ashhurst, F. B. Gowen, Henry Lewis, I. V. Williamson, John N. Hutchinson, Fred. Lauer, Thos. Baumgardner, Sam'l Small, Francis W. Christ, Philip Arndt. Secretary, Howard Hancock; Treasurer John Welch.

Riverfront Railroad Company—President, Strickland Kneass; directors, George B. Roberts, J. N. Du Barry, Wistar Morris, S. M. Felton, Josiah Bacon, N. P. Shortridge, Edmund Smith, A. J. Cassatt. Secretary and Treasurer, James R. McClure.

Germantown and Chestnut Hill—President, G. B. Roberts; directors, Josiah Bacon, A. J. Cassatt, G. Morris Dorrance, John P. Greene, Strickland Kneass, N. P. Shortridge.

Philadelphia and Merrion—President, G. B. Roberts; directors, Josiah Bacon, R. D. Barclay, J. N. Du Barry. John P. Green, Strickland Kneass, Joseph Lesley, Wistar Morris, Henry M. Phillips, Thomas A. Scott, N. P. Shortridge, Edmund Smith, Wm. M. Speckman.

Lockhaven and Clearfield—President, J. N. Du Barry; directors, John P. Green, Strickland Kneass, Wistar Morris, J. B. Roberts, N. P. Shortridge, Edmund Smith.

Moshannon and Clearfield—President, J. N. Du Barry; directors, John P. Green, Strickland Kneass, Wistar Morris, G. B. Roberts, N. P. Shortridge, Edmund Smith.

Susquehanna and Clearfield—President, J. N. Du Barry; directors, John P. Green, Strickland Kneass, Wistar Morris, G. B. Roberts, N. P. Shortridge, Edmund Smith.

Chester and Delaware River Railroad Co.—President, G. A. Nicolls; directors, H. P McKean; J. B. Lippincott, John Ashhurst, F. B. Gowen, Henry Lewis, William Ward; Secretary, Howard Hancock; Treasurer, John Welch.

Allentown Railroad Company—President, G. A Nicolls; directors, H. P. McKean, J. B. Lippincott, John Ashhurst, F. B. Gowen, H'y Lewis, I.V. Williamson; Secretary, Howard Hancock; Treasurer, John Welch.

East Mahanoy Railroad Company—Same officers as the Allentown Railroad Company.

East Pennsylvania Railroad Company—President, G. A. Nicolls; directors, J. B. Lippincott, F. B. Gowen, I. V. Williamson, Thomas Hart, Jr.; Beauvean Borie, Hiester Clymer, George D. Stetzel, J. L. Stichter; Secretary, Howard Hancock; Treasurer, John Welch.

North Pennsylvania Railroad Company—President, Franklin A. Comly; directers, John Jordan, Jr., William C. Ludwig, Edward C. Knight, Alfred Hunt, Thomas Smith, Ario Pardee, James H Stevenson, Richard J. Dobbins, Charles A. Sparks, Edwin H. Fitler, Thomas P. Stotesbury, Thomas Cochran.

—The South Cairo and East Durham Railroad Extension Company of the Catskill Mountain Railroad was organized Jan. 8th. Judge Osborn, Isaac Pruyn, M. B. Mattice, K. H. Bagley, A. P. Jones, Wm. Donahue, Hiram Van Steenburgh, H. A. Person, John Avery, Wm. W. Rider, A. J. Martin, J. F. Gaylord, and Joshua Fiero were elected directors.

—The officers of the recently organized Lehigh and Hudson River Railroad Co. are: Grinnell Burt, President; George R. Blanchard, Vice-President; Alfred Ely, Secretary; D. B. Halsted, Treasurer. The other directors are Thomas C. Platt, Wm. C. Sheldon, John S. Martin, G. A. Hobart, D. F. Merritt, James B. Titman, Frederick A. Potts, B. W. Spencer and Charles Scranton.

—The following directors of the New York Elevated Railroad Co. were elected Tuesday: Cyrus W. Field, David Dows, Ashbel H. Barney, John H. Hall, Josiah M. Fiske, Jesse Hoyt, Alfred S. Barner, John D. Mars, Heber R. Bishop, Benjamin Brewster, Daniel A. Lindley, Edward M. Field, and James A. Cowing.

—The directors of the Troy and Greenfield Railroad Co., elected at the recent annual meeting, are Edward Appleton, Francis L. Chapman, Henry B. Rice, Asa P. Morse, Henry L. Sabin, F. H. Forbes, Otis Clapp, D. W. Goochaud, Herman Haupt. The board elected Edward Appleton president and F. L. Chapman, clerk and treasurer.

—The St. Louis, Vandalia and Terra Haute Railroad Co., elected the following directors Tuesday.—Thomas D. Messler, J. N. McCullough, Wm. T. How, W. R. McKeen, R. L. Dulaney, W. S. Smith, A. G. Henry, Charles H. Seybt and J. S. Peers. The board of directors subsequently organized by re-electing Thomas D. Messler president, W. H. Barnes treasurer, and Williamson Plant secretary.

The Pittsburg Iron World says that 60,000 tons of steel rails have recently been placed, through agents in Philadelphia, with domestic and foreign works, and the heavy demand continues. Quotations are $58 per ton at mill. Several quite large orders for bar iron have also been placed at 2.40 cents per pound, some of the orders amounting to as much as 1000 tons.

OFFICE CENTRAL PACIFIC RAILROAD COMPANY,
No. 9 Nassau st.,
NEW YORK, Jan. 5, 1881.

THREE DOLLARS PER SHARE WILL BE paid on presentation of Dividend Warrant No. 11, on or after February 1, at this office, or at the office of the Company in San Francisco. Transfer books will be closed from January fifteen (15) to February first (1), both inclusive, as per order of Board of Directors.

C. P. HUNTINGTON, Vice-President.

THE WABASH, ST. LOUIS AND PACIFIC RAILROAD CO.,
No. 80 Broadway, Jan. 11, 1881.

A QUARTERLY DIVIDEND OF ONE AND one-half per cent. has this day been declared by the directors on the Preferred stock of the company, payable February 10 at this office. The transfer books for both Preferred and Common stock will close January 31, and remain closed until after the annual meeting of stockholders, March 8.

O. D. ASHLEY, Second Secretary.

OFFICE OF THE HOMESTAKE MINING COMPANY,

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

Huntingdon & Broad Top Mt.....	18 774	417,330	313,525
Penn. and New York.	17.496	98,805	78 200
Clearfield, Pa.....	28,774	1,739,872	1,631,120

No reports of the Delaware, Lackawanna and Western Railroad, Lehigh and Susquehanna Division of the Central Railroad of New Jersey, the Pennsylvania Coal Company, the Delaware and Hudson Canal, the Huntingdon and Broad Top Mountain Railroad, the Tyrone and Clearfield Division of the Pennsylvania Railroad, the United Railroads of New Jersey, and the Shamokin Division of the Northern Central Railroad are to December 31st, and complete the fiscal years of those companies. The Schuylkill Canal is closed for the season. The total tonnage of anthracite coal from all the regions for the week ending December 31, as reported by the several carrying companies, amounted to 330,317 tons, against 190,002 tons in the corresponding week last year, an increase of 140,315 tons. The total amount of anthracite mined for the year is 28,638,866 tons, against 26,309,736 tons for the same period last year, a decrease of 2,670,870 tons. The quantity of bituminous coal sent to market for the week amounted to 41,639 tons, against 28,133 tons in corresponding week last year, an increase of 13,506 tons. The total amount of bituminous mined for the year is 4 341,452 tons against 3,732,216 tons for the corresponding period last year, an increase of 609,236 tons. The total tonnage all kinds of coal for the week is 371,956 tons, against 218,135 tons in corresponding week last year, a increase of 153,821 tons, and the total tonnage for the coal year is 27,980,318 tons against 30,041,952 tons to same date last year, a decrease of 2,061,634 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of December was 174,029 tons, of which 128,281 tons were coal and 45,748 tons coke. The total tonnage for the year thus far has been 7,104,777 tons of which 5,351,662 tons were coal and 1,753,115 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region have ceased for the season. There is nothing doing at Port Richmond.—[Phila. Ledger, Jan. 10.

The engineer of the Pittsburgh, Virginia and Charleston Railroad has advertised for the grading, masonry and ballasting of the extension of the road from Brownsville to Uniontown. The road is now nearly completed to Brownsville, and it is the intention to push the road through to Uniontown as soon as possible.

The Hudson River Tunnel, at Jersey City is progressing at the rate of about five feet a day. Three gangs of twenty-five men each, are employed, and the work is prosecuted unremittingly night and day. It is believed that new arrangements render the workmen entirely secure.

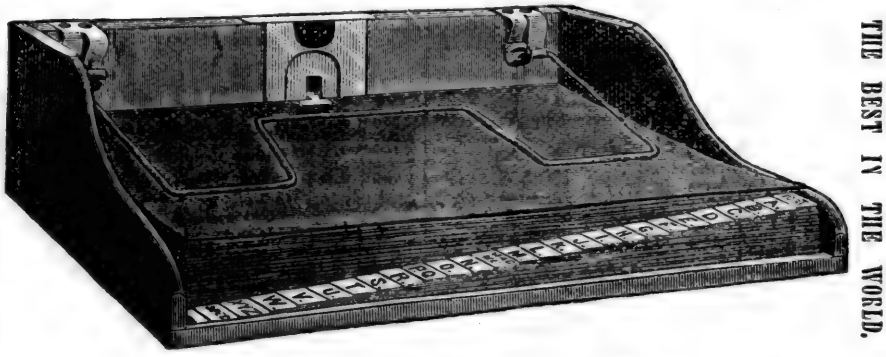
The San Juan (Cal.) Times says that there is a prospect of a railroad being built from Marysville to that place.

AMBERG'S PATENT

"PEERLESS" CABINET LETTER FILE.

(27-FILE CABINET WITH DOORS.)

675 Indexed Divisions, will hold 17,000 Letters.



These CABINET LETTER FILES are made in many sizes containing as few as 6, and as high as 100 or more files each, at prices ranging from $19 50 to $500 00. They are elegantly and substantially made, the wood-work being of the best seasoned Black Walnut, and the other parts of Brass and Steel, nickel-plated. They can be arranged for any class of correspondence and can be adapted to any requirement. **OVER 2,000 SOLD IN LAST THREE YEARS.**

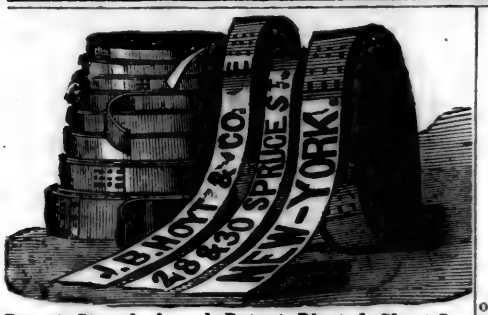
VALENTINES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinnest parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

STEAM NAVIGATION, COMMERCE, FINANCE, BANKING, MACHINERY, MINING, MANUFACTURES.

SECOND QUARTO SERIES, VOL. XXXVII., No. 4.] NEW YORK, JANUARY 22, 1881. [WHOLE No. 2,335, VOL. LIV.

Steam Indicators.

At a meeting of the Society of Arts in Boston on the 13th inst. Mr. Hamilton Alonzo Hill spoke of "Steam Engine Indicators and their Lessons." The first indicator, he said, was invented by Watts, but his machine was practically valueless when the strokes of the piston exceeded thirty per minute. This indicator fell into disuse, to be revived by McNought. Richards followed with an indicator whose limit was five times that of Watts's. Thompson still further improved it. Crosby and Taber have added other modifications. The best of all for light running engines is that known as the English standard. Upon these indicators the structure and running of engines is to be based, together with a knowledge of the coal consumed for a given amount of production. Mr. Hill explained the manner in which indicators are adjusted and that in which they are operated, illustrating the results obtained by them from engines now in use by a number of diagrams. All these engines, he said, are built on the Corliss "cut off" plan, the adoption of which brought about a great saving of steam over that of the "throttle" method, which it replaced, and made the reputation of Mr. Corliss.

Railroads of Iowa.

From the report of the Railroad Commissioners of Iowa for the year 1880, we learn that over 5,000 miles of road are in operation, or 581 miles more than the previous year. The earnings in 1880 were $24,837,545, or $3,496,835 more than the year before; the net earnings were $2,419,603. The net earnings of seventeen roads were more than their expenses, and nine gave a deficit. The stock of the railroads is estimated at $106,719,000, or $21,442 per mile, while their debts are $82,164,000, or $18,719 per mile. Total stock and debt per mile, $40,363.

The quantity of grain transported by the roads was 6,064,000 tons, or 28 4 per cent. of their total freight traffic. Merchandise, 8,475,000 tons, or 16.3 per cent. The earnings from freight were about three times as much as from passengers.

The Commissioners present a very strong plea in favor of the further continuance of their board, by the statement that since its establishment, not a suit at law has been had in the courts against a railroad company to recover overcharges or damages on transportation account. Every complaint was satisfactorily arbitrated by the board, thus avoiding a vast amount of expensive litigation to the people.

St. Louis, Vandalia and Terre Haute Railroad Company.

The annual meeting of the St. Louis, Vandalia and Terre Haute Railroad Co. was held at Greenville, Ills., on the 11th inst. The report of the President shows the gross earnings for the fiscal year ending October 31, 1880, to have been $1,552,801 68 and the expenses $1,106,783 60, leaving net earnings $446,018 08. The rental being 30 per cent of the gross earnings amounted to $465,840 50, to which add $80 from miscellaneous sources, makes a total net income to the company of $465,920 50. From this sum was paid the year's interest on 1st and 2nd Mortgage Bonds $314,930, taxes $28,572 81, and general expenses $3,482 10 leaving a surplus of $118,935 59 from the year's operations, which was applied to the re-payment to the lessee of advances heretofore made. Included in the expenses is the sum of $105,103 94 for permanent improvements and additions to the property. An election was held thereafter for a new board of directors, which resulted as follows: Thomas D. Messler, J. N. McCullough, William Thaw, W. R. McKeen, R. L. Dulaney, W. S. Smith, A. H. Henry, Chas. H. Seybt and J. S. Piers. The board subsequently organized by re-electing Thomas D. Messler, President, W. H. Barnes, Treasurer, and Williamson Plant, Secretary.

Foreign Iron Ores.

The Chief of the Bureau of Statistics at Washington has prepared a table of imports of foreign iron ores, from which we learn that for the fiscal year ended June 30, 1879, the total was 150,821 tons, value $343,034; for the same period of 1880, 425,012 tons, value $1,193,961; and for five months ending November 30, 1880, 232,284 tons, value $636,219.

In the list of countries Spain stands at the head, having in 1879 shipped to the United States 80,044 tons of iron ores, valued at $154,211; 1880, 134,807 tons, valued at $314,074; and for the five months ended November 30, 1880, 91,858 tons, valued at $199,534.

The second largest importations of iron ores into the United States are from the French possessions in Africa and adjacent islands, as follows: 1879, 31,727 tons, value $88,159; 1880, 113,222 tons, value $336,758; and five months to November 30, 1880, 47,224 tons, value $146,445. These are the well known Algerian ores.

Of English ores there were imported into the United States in 1879, 18,828 tons, value $54,789; 1880, 79,319 tons, value $285 313; five months to November 30, 1880, 20,260 tons, value $96,509.

The fourth on the list are the Italian ores, and the fifth those from Quebec, Ontario, Manitoba and the northwestern territory.

It will be observed that although the demand for Spanish ores is largely on the increase, as indicated by the returns for the five months of 1880, and the entire year from July 1, 1879, to June 30, 1880. For the same period in French and English ores there has been a decline, especially in the latter.

The Railway Clearing House.

The principal railroads of the New England States find the Clearing House, under the charge of Mr. Hill, at the Lowell station on Causeway street, where upwards of 50 clerks are employed, of great and increasing benefit to them in keeping track of their equipment. Nearly 40, or a very large proportion of all the roads in the New England States, now send daily statements to this Clearing House of the movement of freight cars upon their lines, consequently the Clearing House is able to trace the movements of all the cars, while in the New England States, from station to station, and the roads have sent to them statements from which their mileage accounts are made up and collected.

Upon a recent occasion, one of our principal railroads—the Boston and Albany—was enabled to turn the tables upon a prominent trunk line and show up the manner in which the trunk line was keeping its car accounts, through the instrumentality of the Clearing House. It seems that the New York Central claimed that the Boston and Albany had upward of 2100 of their cars east of Albany, while the Boston and Albany claimed that the number of New York Central cars upon their road was but a comparatively small portion of 2100—a statement which the Clearing House was able to substantiate, as through their reports, which show the number and owners of nearly every car east of the Hudson, at any given time, they were able to establish the fact that the total number of cars in all New England at that time which belonged to the New York Central did not exceed 700 in number, including those coming

here via the Boston and Albany, the Tunnel, or over the Central Vermont via Whiteball; while, upon the other hand, upward of 800 of the cars of the Boston and Albany were upon the tracks of the Central Road. Mr. Hill has recently established a Clearing House in Albany, with a staff of clerks who are to keep the car movement of the Delaware and Hudson Company's 700 miles of railroads. There is great probability that, as the merits of the Clearing House system are demonstrated, it will be adopted throughout the whole country.—[Boston Journal.

The Wheat Crop of 1880.

The statistics of the Department of Agriculture show that the total yield of the wheat crop in 1880 was 480,849,723 bushels as compared with 448,755,118 bushels in 1879, a gain of 32,094,605 bushels. The comparative yield in the several sections of the country are indicated in the following statement:

	1880.	1879.
New England States	1,167,092	1,196,843
Middle States	39,073 341	35,850,605
Southern States	49,256,960	51,473,703
Western States	314,667,290	297,145,167
California and Oregon	58,680,000	43,188,800
Other States and Territories	18,005,000	16,900,000

The following table shows the annual production of wheat in the United States; the exports, including flour, and the supply remaining for domestic uses, for five years, each ending June 30:

	Production, bushels:	Exports, bushels.	Remaining, bushels.
1875-'76	292,136,000	74,750 082	217,385 318
1876-'77	289,356 500	57,043,935	232,312,564
1877-'78	364,194,146	92 139 236	272,054,910
1878-'79	420 122,400	147,687,649	472,434,751
1879-'80	448,755,118	180,304,168	268,450,950

Estimating the requirements for domestic uses for the current year at 275,000,000 bushels, or about six and a half million more than was consumed in the home markets last year, the amount left for export would be 205,000,000, or 25,000,000 more than in 1879.

Grand Trunk Railway of Canada.

The gross receipts, working expenses and net profit of the Grand Trunk Railway of Canada for the month of November, 1879 and 1880, were:

	1880.	1879.
Gross receipts	£196 726	£174,088
Working expenses	135,720	122,671
Net profit	£61,006	£51,417

—showing an increase in gross receipts of £22,638, in working expenses of £13,049, and in net profit of £9,589.

The aggregate for five months from July 1 to November 30, was as follows:

	1880.	1879.
Gross receipts	£959,819	$815,446
Working expenses	640,886	592,769
Net profit	£318,933	£222,677

—showing an increase in gross receipts of £144,373, in working expenses of £48,117, and in net profit of £96,256.

Finances of the District of Columbia.

The report of the Treasurer of the United States to the Secretary of the Treasury on the sinking fund and funded debt of the District of Columbia states that the principal of the bonded debt has been reduced $200,423 33, and the annual interest $8,827 66. The estimate for the service of the fiscal year, 1882, for sinking fund and interest, is $1,213,947 97, and exceeds that for the past two and current years, $58,364 42. By the provisions of the act of June 16, 1880, an increase in the bonded debt to the amount of $1,256,750 was authorized, $656 600 of which in bonds of the 3.65 loan, under section 9 of the above article, have been already issued in redemption of certificates of the late Board of Audit, with the probability that the amount authorized will be issued either in redemption of the certificates mentioned or in payment of judgments of the Court of Claims.

Land Grant Railroads.

The following table shows the amount of bonds issued under grants to subsidized railroads:

Union Pacific	$27,236 512
Kansas Pacific	6,303,000
Central Pacific	25,885,120
Western Pacific	1,970,560
Sioux City and Pacific	1,628,320
Central Branch Union Pacific	1,600,000
Total bonds	$64,623,512

The number of acres of land certified to railroads up to June 30, 1880, is as follows:

	Acres.
Union Pacific	1,859,474
Kansas Pacific	828,830
Denver Pacific	49,811
St. Joseph and Denver Pacific	461,818
Central Pacific	708,862
Western Pacific	424,727
California and Oregon	1,338,089
Southern Pacific	1,048,090
Sioux City and Pacific	41,328
Central Branch Union Pacific	187,607
S. W. Branch Pacific, of Missouri	1,161 204
Atlantic and Pacific	504,536
Northern Pacific and branches (300 miles, 12,000 acres, since above)	1,405,854
Oregon and California	323,148
Hannibal and St. Joseph	603,506
Burlington and Missouri River (in Nebraska)	2,374,090
Burlington and Missouri River (in Iowa)	388,817
St. Louis and Iron Mountain	207,681
Cairo and Fulton	1,178,702
Memphis and Little Rock	141,844
Little Rock and Fort Smith	916 716
Missouri, Kansas and Texas	897,642
Atchison, Topeka and Santa Fe	2,474,326
Leavenworth, Lawrence and Galveston	69,344
Mississippi and Missouri River	643,307
Cedar Rapids and Missouri River	1,140,493
Winona and St. Peter	1,668,007
Dubuque and Sioux City	550,467
Iowa Falls and Sioux City	683,023
St. Paul and Sioux City	1,200,358
Sioux City and St. Paul	396,998
West Wisconsin	802,816
North Wisconsin	243,497
Lake Superior and Mississippi River and Stillwater and St. Paul	860,564
St. Paul and Pacific (St. Paul, Minneapolis and Manitoba)	2,031,337
Minnesota Central	179,736
Southern Minnesota	454,956
McGregor and Missouri River	251,063
Hastings and Dakota	225,178
Portage, Winona and Lake Superior (Wisconsin Central)	575,844
North Louisiana and Texas (Vicksburg, Shreveport and Pacific)	854,211
Total acres	31,956,857

Mining.

The Ontario Silver Mine of Utah was worked about nine months of the year 1880, during which time the production of bullion amounted to $1,613,627. The loss of three months' time was occasioned by the suspension of the mills, and not on account of want of ore. The mine is now reported to be in good condition, with large reserves in the 400, 500 and 600 foot levels, and with sufficient prospecting done down to the 900 foot level to ensure the usual production of ore for a long time to come. The yield for December was $185,205.

The product of the Homestake Gold Mine of Dakota for December was $108,000. Cold weather in that section has somewhat retarded mining operations there.

Railroads of Missouri.

The biennial report of the Missouri State Railroad Commissioner for the years 1879 and 1880 contains the following general information:

	1879.	1880.
Number of main branch lines in Missouri	55	73
Number of corporations owning the lines	36	40
Number of companies operthe lines	25	25
Number of miles of road, exclusive of sidings, in operation in the State	3,617	4,007
Number of miles constructed and put in operation	308	391
Number of miles of track with steel rails	1,500	2,000
Number of miles of side track	—	270
Number of miles of double track	—	12½
Number of counties with railroads	87	92
Number of counties without railroads	27	22
Counties south of the Missouri River without railroads in them	25	22
Counties north of the Missouri River without railroads in them	2	None.
Gross earnings on mileage in Missouri	$19,374,126	—
Gross earnings on mileage in Missouri, estimated	—	$21,000,000
Population of Missouri	—	2,169,091
Inhabitants per mile of railroad	608	542
Square miles of area in Missouri	—	65,350
Number of square miles per mile of railroad	18	16¼
Inhabitants per mile of railroad north of the Missouri River	—	400
Square miles per mile of railroad north of the Missouri River	—	12

In Missouri there are 195 miles of railroad having a gauge of 3 feet, and nearly all the rest of the railroads have the standard gauge of 4 feet 9 inches, the few exceptions being a gauge of 4 feet 8½ inches, arranged so as to accommodate standard-gauge trucks.

The number of miles of railroad in operation in Missouri in 1877 was 3,150; in 1878, 3,205: in 1879, 3,617, and in 1880, 4,007. Missouri is now the seventh State in railroad rank.

The Nevada Southern Railroad Company have increased their capital stock, and it is all subscribed and paid in. The line of the road on the first division will be from Ledlie, on the Nevada Central to Cloverdale, 74 miles. A branch from this division will be run to Grantsville, a distance of from 6 to 8 miles. The second division is from Cloverdale south to Silver Peak and Gold Mountain, 100 miles. A branch will leave this division for Candelaria, starting from the main line 40 miles south of Cloverdale. The third or eastern division will be run from Silver Peak to Bullionville to meet the Utah Southern.

AMERICAN Railroad Journal. ESTABLISHED 1831.

PUBLISHED WEEKLY BY THE
AMERICAN RAILROAD JOURNAL COMPANY,
No. 23 LIBERTY STREET, NEW YORK.

JOHN H. SCHULTZ - - - - President.

Subscription, per annum, in advance.....$5 00
Foreign Subscription, including postage..... 6 00

BRANCH OFFICE:

New York, Saturday, January 22, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

ALTERATIONS and improvements being made in the tables, which are weekly features of the JOURNAL, necessitate the temporary withdrawal of part of them. In the Bond List alterations are desirable, owing to changes among the roads, consolidations, etc., since our tables were revised. The Share List is naturally corrected at this season of the year, and as this is the time when much of the necessary information comes to us from our correspondents and from the railroads, the table, if published now, could not be as symmetrical and complete as we would wish. On these accounts we withhold these two tables until they are perfected and made of greater value than ever before, to accomplish which no efforts will be spared. We have added several important features to the JOURNAL recently and it seems desirable now that some of our tables should appear semi-monthly, monthly and quarterly instead of weekly, thus giving us an opportunity to lay before our readers more information and a greater variety each week. We shall announce the tables as they are to appear from week to week. The table of contents always gives those in the current number, and in future by referring to the files of the JOURNAL any of its tables desired can readily be found, and they will contain as late information as though appearing in each number, as we do not intend to withhold any tables that are of weekly interest. While adding new features to the JOURNAL, our aim is to retain and improve the old ones.

THE bill introduced in the Senate this week by Mr. Williams proposes the appropriation $1,500,000 in aid of American shipping, It authorizes the Postmaster-General to make contracts for the transportation of the United States mails to such West Indian, South American, Central American, Mexican, Asiatic and European ports, as in his judgmsnt will best subserve and promote the postal and commercial interests of the United States, the annual rate of compensation for the service not to exceed $50 per mile one way per annum.

EMIGRANTS flocked to this port last year at the average rate of more than 1000 daily for every working day in the year. As great as was the increase of immigration last year, the total volume being larger than that of any previous year since the establishment of the New York Emigration Commission, thirty-three years ago, the figures are likely to be largely increased this year, on account of dissatisfaction among foreign laboring classes and on account of the inducements offered to them here by our almost unlimited agricultural resources, which are being so rapidly opened up by our old and new railroad enterprises. It would not be surprising to see important colonization schemes undertaken and pushed this year to provide for this inflowing tide to our shores.

INQUIRING persons who are carefully weighing the relative merits of the proposed ship canal enterprises will be much influenced by General Grant's letter in the *North American Review*, which presents the strong claims for consideration, especially among American investors, which the Nicaragua projects holds as compared with the other. Among the points brought out in favor of the Nicaragua are the comparative ease and economy of its construction, the shortening of distances. its favorable approaches from the sea, the conditions of the concession guarding against excessive rates and the national character of the organization, which appeals to a powerful class of investors at home and abroad who have strong faith in the enterprise and ability of American projectors and managers. The highest estimate of the cost of construction of the Nicaragua canal is $100,000,000, about $20,000,000 less than the lowest estimate for the Panama, while estimates made after the last survey of the former reduced the number of miles and brought down the estimated cost to less than $42,000,000. There is certainly something very reassuring in the facts and estimates that are being presented to the public concerning the American project.

THE numerous inquiries that are being made of us from various sources at home and abroad concerning the organization and workings of the more important European railroads illustrate the demand that exists for authoritative information concerning foreign transportation companies. Statistics concerning these matters have been wofully defective in the past and as a rule information only of the most meagre kind on these topics has been obtainable heretofore from American publications. Believing that it would be of great value to our subscribers, many of whom are Europeans, and with a view of extending the field of usefulness of the JOURNAL, we have specially deputed a gentleman thoroughly competent and of wide experience in such matters, Mr. C. H. Harding, to obtain for our columns accurate information of this character. Mr. Harding will reach England early in the ensuing month and we are confident that the results of his investigations, coming as they will from one of known integrity and ability, will be appreciated by our readers. Statistics such as we expect to obtain through our representative cannot fail to be especially interesting for purpose of comparison at a time like the present when the unexampled prosperity of our American railroads is attracting the attention of the entire civilized world.

Anthracite Coal Tonnage.

John H. Jones, accountant for all the several coal companies, furnishes the following statement of anthracite coal tonnage for the month of December, 1880, compared with the same period last year:

	Dec. 1880.	Dec. 1879.
Reading Railroad.....	407,089	559,549
Lehigh Valley Railroad.....	869,553	866,155
Central R. R. of New Jersey.	276,888	307,337
Del. Lack. and Western R. R.	310,150	339,713
Delaware and Hudson Canal.	213,099	270,219
Pennsylvania Railroad.....	149,675	119,624
Pennsylvania Coal.....	*166,018	89,562
New York, Lake Erie and Western Railroad.....	46,173	31,243
Total.....	1,878,859	2,074,404

—showing a decrease of 195,546.

	1880.	1879.
Reading Railroad.....	5,933,922	7,412,617
Lehigh Valley Railroad.....	4,394,582	4,405,957
Central R. R. of New Jersey	3,470,141	3,825,553
Del. Lack. and Western R. R.	3,550,348	3,867,404
Delaware & Hudson Canal.	2,074,704	3,014,117
Pennsylvania Railroad.....	1,864 031	1,682,106
Pennsylvania Canal.....	1,138,466	1,427,150
New York, Lake Erie and Western Railroad.....	†411,094	†477,782
Total.....	23,437,242	26,142,689

—showing a decrease of 2,705,447.

*13,250 tons included in this amount erroneously omitted in November statement.

† These amounts include the following items which should have been reported in Delaware and Hudson Canal Company's tonnage, viz: 1879, 40,272 tons; 1880, 38,205 tons.

The stock of coal on hand at tide-water shipping points, December 31, 1880, was 500,273 tons; on November 30, 609,833 tons; decrease, 109,560 tons. The amount on hand December 31, 1879, was 618,512 tons, and on December 31, 1878, 501,377 tons. Of the total production in 1880, 11,419,279 tons, or 48.72 per cent was from the Wyoming Region; 4,463 221 tons, or 19.05 per cent from Lehigh Region, and 7,554,742 tons or 32 23 per cent from Schuylkill Region. Competitive tonnage, including all coal which for final consumption or in transit reaches any point on Hudson river or Bay of New York, or which

passes out of the Capes of the Delaware, except pea and dust; 1879, 11,813,798 tons; 1880, 10,088,159 tons.

Construction.

The Scioto Valley Railroad Extension has reached Hanging Rock.

The Texas and St. Louis Railroad has reached Corsicana, which is 203 miles from Texarkana. New stations are being located, and trains will soon run regularly.

The Springfield Southern Railroad Company has been incorporated in Ohio for the purpose of building branch lines to the different coal mines in Jackson and Vinton counties.

The Culross (Ca.) bonus of $8,000, in favor of the Toronto, Grey and Bruce Railway having been carried, ensures the construction of the branch line to the town of Wingham.

A company has been organized under the name of the Cincinnati and Southeastern Railroad Company, for the purpose of constructing a railroad from Covington to Pound Gap, Kentucky.

Work is progressing on the Cleveland, Canton, Coshocton and Straitsville Railroad, and the contractor says that by May 1, the road will be in running order.

The construction train on the Pittsburg, Virginia and Charleston is now running into Washington, Pa. Freight, express and passengers have been sent through on the road ever since the river closed.

The track of the Pine Bluff Railroad has been laid to and across Fourche Bayou to a point three miles south of Little Rock. The gap between the two track laying gangs is now only fifteen miles, and the connection will be completed in two weeks if the weather admits.

A new railroad company was organized in Evansville, Ind., on the 12th inst., to build a road from Evansville to Dayton, Ohio, to be called the Evansville, Dayton and Eastern Railroad. It will be 240 miles long. The capital is fixed at $6,500,000, and $50,000 have been subscribed.

The Lebanon Springs Railroad is now opened from Chatham Village, N. Y., through to Bennington, Vt., and trains now run regularly to the latter place. At Bennington ample terminal facilities have been provided for in connection with the Bennington and Rutland Railway.

The Wisconsin Peninsular Railroad Company has been organized for the purpose of building a narrow gauge railroad from Green Bay to the northern extremity of Door County. The line will be about eighty miles in length, and work will be commenced as soon as the weather permits.

The Bald Eagle Valley Railroad Company has purchased the Snowshoe Railroad, and has acquired, also, some 50,000 acres of bituminous coal lands. The Pennsylvania Railroad Company has been operating the Bald Eagle Valley Railroad, and will continue to do so, thus putting it in possession of rich bituminous coal lands nearer than others to the seaboard.

Work was commenced on the 17th inst. on the Redstone branch of the P., V. and C. Railroad, from Brownsville to Uniontown. It will connect with the Southwest Railroad at Hoggsett's cut, one mile below Uniontown, and with the P. V. and C. road by bridge over the Monongahela river at the mouth of Redstone creek, near Brownsville. This branch will be about twelve miles in length, and will open up a large coal field between Uniontown and Brownsville.

The stockholders of the Baltimore and Chicago Railroad Company held a meeting at Wooster, Ohio, on the 12th inst., and by an almost unanimous vote transferred the road to the Baltimore, Pittsburgh and Chicago Company, composed principally of Pittsburgh capitalists. The new company agree to commence operations within six months, to have the line completed by July 4, 1882, and to maintain it independent of all other lines. It will ultimately be finished to Fort Wayne and there connect with the Wabash system.

Gen. Wm. M. Burt, who represents a syndicate of Boston capitalists, proposes to build a new line from Troy to Oswego, using the Syracuse and Chenango Road as a connecting link. Engineers are now surveying the line from the eastern terminus of the Chenango Valley Road to Schenectady. The road from that city to Troy is now in process of construction. It is supposed that the line from Oswego to Troy is to be run in connection with the Housatonic Road to Boston. Gen. Burt proposes to purchase the Syracuse, Phœnix and Oswego Road from Syracuse to Oswego and complete the construction of it.

Among the many improvements contemplated by the new management of the Long Island Railroad is the laying of a double track, with steel rails, the entire length of the Southern, or Montauk Railroad. From Patchogue the Montauk Railroad will be extended to Manor on the Long Island Railroad. All passenger trains are to be run over the Montauk Railroad as far as Jamaica, and the old Long Island Railroad will be used for freight trains. It is understood that South Side capitalists are ready to contribute liberally for the extension of the road from Patchogue to Manor, a distance of fifteen miles.

Delaware Railroad.

The earnings of the Delaware Railroad for the year ending October 31, 1880, were:

From passengers	$146,358 77
From freight	249,647 98
From mails and miscellaneous	10,258 28
Total	$426,265 03
Operating expenses, as per agreement with the lessee, 70 per cent of the gross earnings	298,385 52
Balance	$127,879 51

Interest on bonds and dividends on stock paid by lessee, $129,773 74, showing a deficiency of $1,894 23. This deficiency will be charged as heretofore to future surplus earnings.

The results of the business as compared with last year, show a loss in freight receipts of $27,306 13; a gain in passenger receipts of $5 200 45; a gain in mails and miscellaneous receipts of $8 00. The President in his report says:

The loss in freight is due to the smallness of the peach crop, and to the fact that the greater part of the crop being this year in the upper portion of the State, the haul over your line of road was short.

Your property has been kept in its usual good condition by the lessee. In accomplishing this 304 tons of steel, 445½ tons of iron 292 tons of mended iron rails, and 88,540 cross ties, with a due proportion of other materials have been used.

Passenger trains have been run over 145,593 miles; freight trains over 183,318 miles; construction and wood trains over 2,855 miles; total of all trains, 331,766 miles.

The appropriations to the sinking fund for the last year were sufficient to pay off the first note for $7,000, referred to in our last annual report, and leaving a surplus of $1,498 38.

The construction account increased during the past year by the consent of the lessor and lessee to the amount of $8,641 67, upon which the lessee is to pay six per cent per annum to the lessor.

The main items making up this amount consist of the difference in cost between steel and iron rails and the additional weight of the new rails over the old ones taken up, the substitution of iron fish joints in place of wooden ones, the extention of side tracks, new fencing and the cost of the Dover and Milford survey.

Balance Sheet, Oct. 31, 1880.

Railroad	$1,748,950	66
Smyrna branch	33,847	14
Dorchester branch	109,993	75
Townsend branch	223,641	00
Sundries	3,532	65
Cash and cash items	47,930	70
Trustees of sinking fund	42,429	48
	$2,210,325	38
Capital stock	$1,468,994	41
Bonds, mortgage July 1875	1,000	00
Guaranteed mortgage, (convertible) July 1895	650,000	00
Interest on bonds and loans	20,174	11
Dividends	26,639	49
Expenses	1,087	89
	$2,210,825	88

President.—S. M. Felton.

Directors.—S. M. Felton, Isaac Hinckley, Andrew C. Gray, Charles Warner, Christian Febiger, Edward Bringhurst, Jr., Isaac Jump, H. B. Fiddeman, Manlove Hayes, Alexander Johnson, James J. Rors, Albert Curry, J. Turpin Moore.

Treasurer.—Manlove Hayes.

Great Western Railway of Canada.

The revenue statement of this company for the month of November, 1879 and 1880, (excluding leased lines) is as follows:

	1880.	1879.
Gross receipts	$418,600	$379,500
Working expenses	261,500	228,800
Net	$157,100	$150,700

—showing an increase in gross receipts of $39,100 in working expenses of $32,700, and in net profit of $6,400. The working expenses are inclusive of transfer funds.

The aggregate for four months from July 31 to November 30, was as follows:

	1880.	1879.
Gross receipts	$1,712,800	$1,497,100
Working expenses	1,044,700	912,900
Net	$668,100	$584,200

—showing an increase in gross receipts of $215,700, in working expenses of $131,800, and in net profit of $33,900. The above is subject to interest on bonds, etc.

The Chicago and Northwestern Railway Company, on 2,763¼ miles of road owned and operated, earned from June 1 to December 31 (seven months) $12,610,266 81, against $10,531,121 80 for the corresponding time in 1879—an increase of $2,079,079 01.

Interest and Dividends.

The Quincy Mining Company has declared a dividend of $5 per share, payable Feb. 15.

The Oregon Railroad and Navigation Company has declared its usual quarterly dividend of 2 per cent on its capital stock, payable at the Farmers' Loan and Trust Company.

The directors of the St. Louis and San Francisco Railway Company have declared a dividend of 8½ per cent upon its First preferred stock, payable Feb. 1, at the New York office.

The Quincy Mining Company has declared a dividend of $5 per share, payable February 15th to holders of record 20th inst.

The Calumet and Hecla Mining Company has declared a dividend of $5 per share, payable Feb. 15.

The directors of the Panama Railroad Company have declared a quarterly dividend of 5 per cent payable on and after Feb. 1. The transfer books will close on the 20th inst. and will be reopened on Feb. 2.

From the annual message of the Governor of Wisconsin, which was read to the Legislature at Madison on the 13th inst., we learn that the total Trust funds of the State, which includes School, University, Agricultural College and Normal School funds, amounted to $4,812,809 87. The public indebtedness of the people of the State is somewhat less than $12,050,000. The State debt proper is $2,252,057. The given value of the taxable property of the State is $445,582,720.

The trustees for the associated bondholders and creditors give notice that there will be a meeting of the stockholders of the newly organized Virginia Midland Railway Company on Tuesday the first day of February, 1881, at noon, at the general office of the company in Alexandria, Va., for the purpose of electing the president and directors of the company, and authorizing the issue of the mortgage bonds provided by the scheme of reorganization and transacting any other corporate business.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

Eastern Farmers and Western Transportation.

No one doubts that the inhabitants of the cities of the Eastern and Middle States derive great benefit from the low rates at which wheat, corn and other staple agricultural products are transported by rail to the Atlantic coast. This cheap transportation insures for the population of these cities plenty of food, even if the crop in any particular section proves an utter failure, and protects them from extortion on the part of local producers. But many argue that to the farmers of the Eastern and Middle States the introduction of so much western produce at low rates is a serious injury; the New York legislative investigating committee, last year, were told by one witness that the railroads had "virtually transferred his farm 1,000 miles west;" and by another witness that they had carried his farm "to the banks of the Mississippi river." The only portion of such complaints, however, that may be considered to hold good, relates to the comparatively lower prices for wheat, corn and other staple products which the farmer has to accept because of the extensive competition of western growers. Striking evidence can be educed to show that the farmers of the Eastern and Middle States, on the whole, are becoming more prosperous, and that this very prosperity is due to changes in cultivation made desirable, if not necessary, by the cheap transportation so much decried.—[The Manufacturer and Industrial Gazette.

Railroad Law.

1. Carriers—Negligence—Limiting Liability—Degree of Care. Whilst a common carrier may make a special contract to protect itself against accidents and casualties, it cannot stipulate for a degree of care only.

2. Ibid.—Ibid.—Unfit Machinery and Appliances. The failure to provide all due, safe, and necessary machinery or appliances for transportation will render a common carrier liable for any injury or loss resulting from the use of unfit machinery or appliances.

3. Ibid.—Ibid.—Carrying Cotton Bales on Open Cars. The transportation of cotton in bales on platform or open cars is negligence. Such carriage exposes the goods to destruction by fire, and is gross negligence.

Error to Circuit Court of Copiah County.

The facts will be found in the opinion.

SIMRALL, J. In October, 1874, Faler & Co. shipped by the New Orleans, St. Louis and Chicago Railroad Company from Hazelhurst, thirty-five bales of cotton consigned to their factors at New Orleans. Written across the face of the bill of lading are the words, "Not responsible for loss or damage by fire or water." The cotton was consumed by fire while in transition. This is an effort by a public common carrier to limit its common law responsibility by special contract. The privileges which were granted by the State to the railroad companies which lately consolidated into the great corporation known as the Chicago, St. Louis and New Orleans Railroad Company were to bring into existence public carriers with the capacity and facilities to transport passengers and property promptly, safely, and at reasonable rates. All the powers, adequate and necessary to appropriate the property of private owners for the use of the line of the road, to build, equip, and operate it, have been conferred in consideration of the benefits of speedy, safe, and cheap transportation. These corporations owe to the community duties which are quasi public; and all questions which arise in individual cases, affecting their duties and obligations as public carriers, assume the importance of public questions. The corporation might justly complain of any interference by the State which would cripple it in the full exercise of its legitimate franchises in the conduct of its business. On the other hand, the corporation ought to be held to a full and fair performance of its duties as public carrier. These duties were well defined at the time its charters were granted. Of them are these: That goods received for transportation should be safely carried and delivered at the point of destination; and nothing excuses except the act of God (inevitable accident), or of the public enemy. But it was, and is, permissible to limit this almost absolute responsibility by an exception from liability for those losses which are the result of casualties or accidents, against which the most prudent cannot always provide, such as fire, tempests, etc., etc. A railroad company may stipulate against loss by fire, but such an exception does not discharge or abate one "jot or tittle" the prudence, skill, and care which the nature of the business imposes. When we use the words "prudence," "skill," "care," it is always in reference to some subject-matter, and the "degree" is measured by the nature of the thing to be done and the instrumentalities employed. A railroad company must employ men educated to the business to manage its locomotives; it must use cars suitable to the character of property which it transports. If one class of goods would be damaged by exposure to the weather they must be carried under cover. The duty is to use the cars and other appliances usual and suitable to its business, nor can it by special contract relieve itself from that duty. The law demands that the railroad company shall use safe machinery, properly constructed vehicles, employ competent agents, and manage the whole with that degree of skill and prudence necessary to the successful prosecution of the business. M. & C. R. R. Co. v. Weiner, 49 Miss. 732. In Smith v. R. R. Co. 12 Allen, 533, 534, the defendant offered as an excuse, that the car door, which was broken by the cattle (causing the loss of some of them), was reasonably strong. But to that the court responded "that it was in the power of the railroad company to secure a car sufficiently strong to resist the struggles of the animals, however unruly." The company "is bound to have one absolutely and actually sufficient." Welsh v. R. R. Co. 10 Ohio St. 69. In Steinweg v. R. R. Co. 43 N. Y. 126, the goods were destroyed by fire communicated by sparks from the chimney of the locomotive (as in this case there was an exemption from loss by fire). The point considered was whether the company was culpable for not using the safest apparatus to prevent the escape of sparks. It was laid down as the rule: "That if there was anything lacking in the construction of the engine which sound rules required it should have, it was negligence." The company must adopt the most approved modes of construction and machinery in known use, and also the "best precautions in practical use for securing safety." So in Jackson v. R. R. Co. 31 Iowa, 176, it is said "that ordinary care and prudence required the use of the best appliances known." Whatever special contract of exemption the carrier may make, he must provide, if the transportation be by water, a seaworthy vessel properly equipped and furnished; or, if by land, vehicles safely and properly constructed. Angell on Carriers, § 265. And more than that, there must be no blame or fault imputable to the carrier in reference to the storage of the goods on the vessel, as in N. J. S. N. Co. v. Merchants' Bank, 6 How. 385, where the goods were placed too near the chimney over the boiler deck and took fire. Angell on Carriers, § 265, lays down the rule to be: That there can be no exemption for losses occurring from defect in the vehicle or mode of conveyance. The courts have not been uniform in defining the degree of "negligence" whether gross or slight, for which the carrier will be liable, when the loss occurs from a cause excepted by special contract. One class of cases holds that the effect of such contract is to relieve the carrier from his public character and responsibility as such, and place [him] on the footing of a private carrier under a special agreement with the shipper, and he is only liable for gross negligence. Another class, looking with jealousy upon anything which relaxes the common law responsibility of the public carrier, declines to give any larger effect to the special contract than to relieve the carrier from liability as an insurer for safe delivery. The point made in R. R. Co. v. Heaton, 27 Ind. 448, was as to the degree of negligence, which would charge a carrier for a loss by fire (when that risk was exempted by the bill of lading). The court held that the carrier could no more contract "for a slight degree of negligence than for gross negligence." In Graham v. Davis, 4 Ohio St. 362, it was held that negligence, whether gross or slight, could not be the subject of a contract. So Steinweg v. R. R. Co. supra, holds the common carrier liable, if there was any negligence on his part, "without any regard to any supposed distinctions or degrees of negligence." These adjudications are of the class of cases which, we think, declares the sound and salutary rule, that while the railroad company may, by special agreement with the shipper, stipulate against liability for losses which sometimes happen by casualty or accident to the most prudent men (such as fire), nevertheless as public carriers the company is held to the performance of all the duties incident to the employment. Fidelity, prudence, and care are exacted. Safe motive power, with all the best constructed appliances in practical use, to arrest the escape of sparks from the chimney, should be used. Cars should be so constructed as to afford the greatest protection to goods liable to damage from rains, or easy to ignite from sparks. At this day, the great railroad companies are the chief arteries of the interior commerce of the country. They were incorporated with their extensive franchises for the very purpose of subserving the needs of commerce and travel, as public carriers. They cannot, in consonance with the great object had in view in their charters, surrender their character of public carriers, and, by contract

with individual shippers, assume that of private carriers. They are bound by the law of their creation to accept goods and passengers offered for transportation. They are public carriers and nothing else, nor can they abdicate that character without a violation of their fundamental law.

It appears that the train on which the plaintiff's cotton was shipped was made up of both box and flat carr, five or six of the former and two of the latter. It was also in evidence that the plaintiff remonstrated with the depot and shipping agent of the company about putting his cotton on the flat cars. It was not disclosed how the cotton was ignited—most probably by sparks from the locomotive. No other cotton was burned except that on flat cars. Cotton is very inflammable, easy to ignite, and hard to extinguish when on fire. Ordinary prudence would suggest that it should be stored in cars of such construction as would give the largest measure of security. It is almost certain that if the plaintiff's cotton had been placed in a box car it would not have been consumed. The company had box cars which were more secure against fire. Its duty was to provide the safest cars in use for the transportation of goods, according to their quality and liability to special perils. In holding, therefore, that it was negligence to carry cotton bales on flat cars, when the defendant had in use safer cars, we follow the doctrines and analogies of those authorities which we approved in P. R. Co. v. Weiner, supra, and others hereinbefore cited. If it be negligence not to use the most approved apparatus known to the defendant, to prevent the escape of sparks from the chimney of the locomotive, as held in the case reported in 43 N. Y., it cannot be prudence to omit any other precaution (in its control) which it can take for the safety of inflammable goods. The company must be free from negligence. There is no blame or negligence in carrying lumber, many sorts of barrel freight, and other goods of like character (not apt to take fire from sparks) on flat cars, whilst it is not prudent to store cotton bales or such inflammable material on them. The duty under the law is to carry and deliver safely. That duty is not performed if the carrier adopts a vehicle or car for inflammable goods less safe than another in known common use. Whatever improvements science and skill have made and experience has attested and approved in machinery and vehicles, which contributes to the safety of passengers and property, must, if known to the railroad company, be adopted. The vast interests of commerce and travel which are intrusted to these public carriers require that much of them. The large powers and franchises (including that of eminent domain in appropriating private property to their use) have been granted in consideration of the corresponding benefits and advantages which they afford to the public. It is not exacting too much of them nor imposing a new burden [to hold] that they shall employ care, skill, and prudence proportioned to the magnitude of the interests confided to them, and the perils and dangers peculiar to that mode of transportation. If the effect of a special contract, limiting their liability under the law, shall be permitted to relax their duty to the public and to abate that measure of care, skill, and prudence incident to the employment, then will the door be opened to relieve them from these obligations to ship which the wisdom of the common law has imposed, and then will the owners of property be subjected to risks which the public good requires should rest upon the company The question in every case should be and is: Has the public carrier acquitted himself of all blame? Can the loss be referred to omission to provide the safest vehicle in use for the particular property? If the loss can be ascribed to a failure to do what diligence and care would suggest was feasible to have been done, then the public carrier cannot shield himself behind an exemption in the bill of lading. In the case of R. R. Co. v. Weiner, supra, allusion was made to the great relaxation of the responsibility of the common carrier induced by a recognition of the British courts of the validity of notices to shippers, which were treated as special contracts. To such mischiefs did the practice lead that Parliament interposed to arrest the evil. The American courts after some [dissension] have almost uniformly denied that his liabili y can be limited in that mode. Whilst tolerating a reasonable restriction by special contract fairly and deliberately assented to, the courts whose judgments are supported by the soundest reasons and wisest policy declare also the doctrine that they cannot by contract bargain for an abatement of that degree of care, skill, and prudence.

Judgment affirmed.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending January 8th, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad ...	96,382	614,613	762,610
Schuylkill Canal....	.....	.....	38,041
Lehigh Valley	70,168	460,541	468,576
Del., Lack. & Western.	51,254	51,254	21,858
Shamokin Valley	13,165	13,165	18,915
Central New Jersey..	46,045	46,045	50,703
United R. R. of New Jersey	22,068	22,068	14,801
Pennsylvania Coal ..	14,844	14,844	16,082
Delaware and Hudson	39,934	39,934	70,535
Huntingdon & Broad Top Mt.....	11,199	11,199	11,005
Penn. and New York.	18,793	117,598	101,492
Clearfield, Pa.....	32,395	32,395	57,013

The total tonnage of anthracite coal from all the regions for the opening week of the year, the week ending January 8, as reported by the several carrying companies, amounted to 318,664 tons, against 329,093 tons in the corresponding week last year, a decrease of 10,429 tons. No reports of bituminous tonnage have been received. The quantity of coal and coke carried over the Pennsylvania Railroad during the first eight days of January was 165,800 tons, of which 114,047 tons were coal and 51,753 tons coke. The shipments over the Reading Railroad during the week ending last Saturday were 100,500 tons, of which 3,539 tons were sent to and 7,500 tons shipped from Port Richmond, and 14,710 tons sent to and 14,000 tons shipped from Elizabeth port.—[Phila. Ledger Jan. 15.

Two construction trains are now running each way daily over the Carson and Colorado railroad from the Mound House to the end of the track, a distance of twenty-two miles. Two sections have been established—one at Dayton, which extends about six miles each way, and another near Dutch Nick's, about twelve miles from Dayton.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, January 20, 1881.

The quotations for call loans at the Stock Exchange is 5@6 per cent; the time loan quotation 4@6 per cent according to collateral and date of loans, and the quotation for prime mercantile paper is 5@5½ per cent.

The market for foreign exchange is steady to firm and the leading drawers of sterling have marked their posted rates up to 99@99⅝, while other prime drawers still adhere to 98⅞@99⅛; the actual rates are 98⅝@¾ and 99 5-16@⅜; cables 99⅛@9-16 and prime commercial 98⅜@½. By the old method of quoting the posted rates for prime bankers' sterling are 4.81@4.84½, and the actual rates 4.80¼@¾ and 4.83½@¾; cables 4.84¼@½, and prime commercial 4.78¾@4.79¼.

At a meeting of the directors of the Union Pacific Railroad Company, on the 19th inst., it was unanimously agreed to increase the capital stock $10,000,000 to be offered the stockholders of record February 6 at par in the proportion of one share of new to five of old stock. The increased capital is to be spent in extending the road and in adding to the facilities to meet increased business.

The Governors of the Stock Exchange have admitted to dealings at the Board the following securities:

International and Great Northern Railroad.—Additional issue of $1,175,000 stock for construction of road from Austin to San Antonio, Texas.

Lake Erie and Western Railroad—First mort-

gage 6 per cent bonds of the Sandusky Division, twenty-one miles, $327,000, due August 1, 1919, and not accumulative; 7 per cent income bonds on same division, $300,000 due August 1, 1920.

Louisville and Nashville Railroad.—Additional amount of general mortgage 6 per cent gold bonds, $5,284,000 making total issue $20,000,000, less $9,716,000 reserved for the funding and discharge of prior lien bonds on the company's old lines.

The earnings of the Chesapeake and Ohio Railway Co. for the month of December, 1880 were $218,009 63; for the month of December, 1879, $179,161 32—increase in 1880, $38,848 31. For the year 1880 the earnings were $2,657,700 15; for the year 1879, $1,935,049 56—increase in 1880, $722,650 59. The earnings for 1880 were derived from the operation of the same number of miles of road and from the same sources of traffic as in 1879, and exhibit mainly the increase in the local business of the road in the transportation of coal, iron ore, manufactured iron, lumber and other products of the region traversed by the Chesapeake and Ohio Railway.

Advices from Ottawa state that $1,350,000 has been deposited with the Dominion Government by members of the new syndicate, who offer better terms than the syndicate the Government are dealing with; but as the first and chief stage of the great contract discussion has closed with the passage in the House of Commons by a majority for the Government of over 80 votes of resolutions approving the agreement to give the old syndicate $25,000,000 in cash and 25,000,000 acres of land to complete, as described in the contract, the Pacific Railway and to operate it forever, there does not seem to be a great chance for the new syndicate to effect their purpose.

The sale of the Virginia Midland Railroad for $6,500,000 to the syndicate of bondholders of the road, was confirmed on the 14th inst. by Judge Keith, of the Circuit Court, all objections being overruled. An appeal, it is said, may be taken to the Court of Appeals.

The closing quotations on Thursday were: Adams Express, 130@134; American Express, 64½@65; American District Telegraph, 66@67; American Union Telegraph, 85⅛@85¾; Canada Southern, 87@77¼; Central of New Jersey 91@91¼; Central Pacific, 95⅛@95¼; Chicago and Northwestern, 135@135¼; do. pref., 145½@146; Chicago, Burlington and Quincy, 171@172; Chicago, Milwaukee and St. Paul, 124⅛@124¼; do. pref., 128½@129; Chicago, Rock Island and Pacific, 140¾@141; Columbus, Chicago and Indiana Central, 23¾@24; Cleveland, Columbus, Cincinnati and Indianapolis, 92@92⅜; Hannibal and St. Joseph 55⅛@56¼; do. pref., 108¼@108½; Illinois Central, 133@133¾; Lake Erie and Western, 41⅛@41⅛; Lake Shore and Michigan Southern, 133⅞@134; Michigan Central, 124¾@125; Metropolitan Elevated, 108@109; Manhattan Elevated, 36@36¼; New York, Lake Erie and Western, 51¼@51⅜; do. pref., 93¾@94¼; New York, Ontario and Western, 36¼@36¼; New York Central and Hudson River, 152¼@152⅞; Ohio and Miss., 43½@44¾; do. pref., 105@109; Pacific Mail, 55¾@55⅞; St. Louis, Iron Mountain and Southern, 60¾@61; Union Pacific 121⅝@121¾; United States Express, 54½@57½; Wells Fargo Express, 116@—; Western Union Telegraph, 114⅛@114⅝; Wabash, 48¼@48⅛; do. pref., 92⅝@92¾.

Memoranda Concerning Government Bonds.

The new edition for 1881 of the book entitled "Memoranda Concerning Government Bonds," just issued by the well known banking house of Messrs. Fisk & Hatch, is a work of great convenience and value not only to investors but to others as well desirous of familiarizing themselves with the methods of making investments in desirable securities and wishing to obtain reliable information concerning the same. The previous editions of a similar work issued by this house have been much sought after by the public ; so much so that nearly 50,000 copies of them have been published. The present edition contains several valuable features in addition to those usually given in previous editions, including an article on the routine of Wall street business and a glossary of terms used on the street, together with carefully prepared tables, showing the growth and progress of the United States in population, production, etc. The book is very attractive in its make up and unique and comprehensive in its contents. Coming from a house of such long established reputation at home and abroad it will be much sought after and widely utilized, especially as it appears at a time of so much activity among investors, who are eager to obtain information from sources in which they can place the utmost confidence.

The Treasury Department at Washington has revoked Circular No. 103 of Sept. 24, '78, requiring that the charges for the transportation of national bank notes to the Treasury of the United States for redemption under act of June 20, 1874, be paid by the senders. The effect of this order is to permit holders of national bank notes to forward them to the Treasury for redemption in even thousands of dollars without any expense for express charges. It is issued for the purpose of improving bank circulation, to the impaired condition of which the Treasurer called attention in his annual report.

Time Detectors for Watchmen.

The importance of using the most reliable time detectors for watchmen is recognized in all departments of business where so much has of necessity to be entrusted to custodians of property, which without the most unrelaxed vigilance stimulated by artificial checks must be considered as in constant peril. The most faithful watchmen are the ones most willing to use such reasonable checks as may have been proved absolutely trustworthy ; the time detector then becomes the watchman's best friend, proving his faithfulness and establishing his employers confidence in him. There is no check of the kind more popular both with employers and employees than the well known detector invented by Mr. E. Imhauser. The article needs no description here as its merits and peculiar features are widely known and inquiries can so easily be made of the many establishments where they have been in use for many years, or at Mr. Imhauser's office, 212 Broadway. It is only necessary to say that some important improvements in the detector have been made of late by the patentee who has made the perfection of this safe guard a study of years ; and it is well for buyers to see that the very latest improvements are included in their purchases.

New York, Lake Erie and Western R. R.

The following is a comparative statement of the gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of November, 1879 and 1880 :

	1879.	1880.
Gross earnings	$1,515 834 84	$1,799,887 62
Working expenses ..	957,637 53	1,051,782 90
Net earnings...	$558,197 31	$745,604 72

—showing an increase in gross earnings of $281,502 78, in working expenses of $94,095 87, and in net earnings of $187,407 41,

For the month of October and November, 1879 and 1880, the gross earnings, working expenses and net earnings were :

	1879.	1880.
Gross earnings	$3,229,532 51	$3,697,247 74
Working expenses ..	1,955,612 67	2,065,138 31
Net earnings...	$1,278,919 84	$1,632,109 43

—showing an increase in gross earnings of $467,715 23, in working expenses of $109,525 64, and in net earnings of $358,189 59.

Col. Wm. M. Wadley, president of the Georgia Central Railroad, has purchased the Columbus and Western, formerly the Memphis and Savannah railroad, for $700,000. The road extends from Opelika to Goodwater, Alabama. The new purchasers propose making Columbus, Ga., the eastern terminus, and will run trains from that point to Goodwater.

The Iron Steamboat Company have made contracts with the Sea Beach Railroad Company and the Coney Island Iron Pier whereby they are to receive 60 per cent of the gross receipts of both in consideration of carrying passengers to and from both.

Personal.

—M. Siemens expects to have the much talked of electric railroad open for traffic this month.

—Mr. Jacob Henvici has been elected President of the Pittsburg and Lake Erie Railroad Company.

—General Garfield and family are to be carried to Washington in a $17,000 palace car, the property of Mr. W. D. Washburn.

—Mr. S. B. Liggett has been elected Secretary of the Pennsylvania Company, Mr. Clifford Stanley Sims having resigned, and Mr. Stephen W. White has been appointed Assistant Secretary.

—Senator Dawes is said to have been offered a seat on the Supreme Bench of Massachusetts by Govs. Washburne and Claflin, both of which offers were declined.

—Mr. A. Pardee, Jr., of Philadelphia, is the recently-elected president, and Mr. Thos. E. Watson, of Elizabethtown, Tenn, chief engineer of the East Tennessee and Western North Carolina Railroad Co.

—Mr. William Stevenson has been appointed Superintendent of the Pennsylvania and New York Division of the Lehigh Valley Railroad. He has for many years been Superintendent of Construction of the Amboy Division.

—Mr. C. H. Harding, prominently identified with leading American journals as correspondent, and well known in railroad, financial and journalistic circles here and abroad, sailed for Europe from Philadelphia, Wednesday, on an extended business and professional trip.

—Mr. C. L. Hartwell has been appointed freight auditor of the Fitchburg Railroad Company, and Mr. J. E. Tucker has been appointed general freight agent, the position vacated by Mr. Hartwell. Mr. Tucker has been connected with several important western railroads, and was for some time located at Kansas City as agent for the Erie Railways Fast Freight Lines.

—An unusual honor has recently been conferred on the distinguished Philadelphia lawyer, Mr. Stephen A. Remak, so well known in connection with the prolonged Pistorius trial as well as through his book "La Paix en Amerique." Mr. Remak has received from the Emperor William the order of the Golden Crown of Prussia together with a flattering letter signed by His Majesty. So long ago as 1854 Mr. Remak acted on behalf of the Prussian Government and he still acts as Counsel in special cases for the Empire, besides being the regularly appointed advocate for the German Consulets in Philadelphia. Some of our older readers will remember Mr. Remak's celebrated defence of the English emissaries accused in 1855 of enlisting soldiers against Russia, subsequently to which he was for 4 years U. S. Consul at Trieste. Mr. Remak is now frequently consulted in important Railroad and law suits especially those arising out of the interests assumed in recent years by foreigners making investments in this country. This latest special honor to Mr. Remak is an additional proof of the esteem in which he is held both in the old world and the new.

The Baldwin Locomotive Company is now engaged filling an order for thirty-two locomotives for the Denver and Rio Grande Narrow Gauge Railroad Company, to be delivered in the spring and summer of this year, and have just contracted with the same railroad company to deliver one hundred and forty-four locomotives next fall and winter, the whole order being for one hundred and seventy-six engines, to be delivered in the space of fourteen months. The works are now being run at their utmost capacity, there being twenty-seven hundred men employed. The above-mentioned large contract will not in any way interfere with the regular orders of the firm, and several other large orders will be filled in the meantime.

Finances of Massachusetts.

The following is an extract from the report of the Massachusetts State Auditor for the year ending January 1, 1881:

Cash in the treasury Jan. 1, 1880..		$1,833,733 13
Receipts:		
On acc't of revenue..	$7,631 141 60	
On acc't of funds....	4,532,742 12	
		12,163,883 72
Total....		$13,497,616 85
Payments:		
From revenue..... ..	$6,992,451 61	
From funds....	3,322,362 19	
		10,314,813 05
Total cash on hand Jan. 1, 1881 ..		$3,182,803 80

The expenses of 1880, compared with those of 1879, show the following aggregates:

	1880.	1879.
Ordinary expenses..	$1,565,399 50	$1,562,712 98
Exceptional exp....	4 520,974 15	4,040,687 66
Total....	$6,086 373 65	$5,603,400 61

The excess of expenses of 1880 is due, in part, to the large increase of receipts, $531,000 of said expenses being the amount of the corporation and bank tax refunded in 1880 over the amount refunded by the Commonwealth to the cities and towns in the previous year.

HOOSAC TUNNEL.

The total expenses of the Hoosac Tunnel and Troy and Greenfield Railroad for the year were $986,257 23, of which $709,627 78 was for interest. The receipts were from earnings, $239,295 69, from rents, etc., $28,699 17, total, $267,994 86, leaving net payments in 1880, $718,262 37. The total cost of the tunnel to date is $20,241,842 31.

THE PUBLIC DEBT.

The following is a statement of the amount and character of the funded debt:

Aggregate debt Jan. 1, 1880.....		$33,020,464
Reduced by payments during the year as follows:		
Bay Bay loan....	$220,000	
Six per cent scrip of 1856...	1,000	
		221,000
Aggregate debt Jan. 1, 1881		$32,799,464
Classified under these heads:		
Railroad loans	$17,738,996	
War loans	10,468,188	
Public buildings, &c.....	4,592,280	
		$32,799 464

The maturity of the remaining portions of the debt is shown in the following table: 1883, $1,088,000; 1888, $3,061,300; 1889, $3,142,128; 1890, $503,468; 1891, $3,815,040; 1893, $209,000; 1894, $10,921,244; 1895, $1,840,260; 1896, $1,100,000; 1897, $520,000; 1900, $3,599,024.

The city of Natchez, Miss., by a four-fifths vote has decided to issue $225,000 of bonds for the benefit of the Natchez, Jackson and Columbus road. This secures the completion of the road to Jackson. The road passes through a section of the country which promises great development in the next few years.

In the United States Supreme Court at Washington on the 17th inst., in the so-called Florida Railroad cases, viz.: The Florida Central Railroad Company v. J. Fred Schutte et al.; The Jacksonville, Pensacola and Mobile Railroad Company v. the Same, and The Western North Carolina Railroad Company v. George F. Drew, Governor, &c., it was decided that the bonds in question are valid and subsisting obligations of the railroad companies, and the decrees in all three cases are affirmed.

The Supreme Court of the United States on Monday last rendered a decision affirming the constitutionality of the compulsory pilot laws of New York, declaring that the pilot on board a schooner fifty miles off the coast has the same authority from the laws of New York to tender and demand employment, and the same legal consequences follow the refusal of the master of a vessel to take a pilot, as if the vessel had been at a point where the local jurisdiction had been complete and exclusive.

The capital stock of the New York and Lake Champlain Transportation Company subscribed and paid in, is $45,000. Boats owned—one steamboat, five propellers, and eight canal boats. Gross receipts—from freights, $529,457 11; from other sources, $158,287 58. Cash dividends of 15 per cent on 450 shares of capital stock, $6,750; paid on account of freight lost, $287 for moving stock and equipment, $11,760 42.

The capital stock of the Rockaway Beach Pier Company is $15,000; floating debt, $23,391 04; gross receipts—from freight, $88 15; other sources, $10 939; paid on account of freight lost, $6 65. The operations of this company have as yet been confined to the preparation of terminal facilities, and to the use of boats under charter parties.

The Missouri, Kansas and Texas Railway Company gives notice that a special meeting of the stockholders held Nov. 17, 1880, an increase of $25,000,000 in the capital stock was duly authorized, at a rate not to exceed $20,000 per mile for each mile of newly constructed or acquired road.

Three able lawyers of Cincinnati to whom the trustees of the Cincinnati Southern Railroad referred the question, have decided that the trustees have no power to sell the road, but that additional legislation will be necessary for that purpose.

The Sixth Avenue (N. Y.) Railroad Company reports to the Controller that the receipts of the road during the month of December last were $64,106, as against $64,811 08 for the corresponding month of 1879.

The Vera Cruz and City of Mexico Railway Company has declared a dividend of 16s. per share on obligations of priority of its first issue, and 12s. on those of its second issue.

The Lehigh Valley Railroad Company will uniform their conductors, baggage masters and brakemen after February 1. The first suits will be given the men as presents.

The aggregate earnings of the leading railroads of Great Britain for the last half of 1880, upon a mileage of 9,009 miles, or an increase of 123 miles, was $113,500,000, showing an increase of nearly seven per cent over the same period in 1879. There has been a considerable advance in the prices for the ordinary stocks of English roads recently.

The Central Pacific Railroad Company are now taking out 700 tons of coal per day from their Almy mines, Utah, and besides supplying their own road, are sending coal to Arizona to supply the Southern Pacific locomotives.

OFFICE CENTRAL PACIFIC RAILROAD COMPANY, No. 9 Nassau st., NEW YORK, Jan. 5, 1881.

THREE DOLLARS PER SHARE WILL BE paid on presentation of Dividend Warrant No. 11, on or after February 1, at this office, or at the office of the Company in San Francisco. Transfer books will be closed from January fifteen (15) to February first (1), both inclusive, as per order of Board of Directors.

C. P. HUNTINGTON, Vice-President

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY, TREASURER'S OFFICE, GRAND CENTRAL DEPOT, NEW YORK, Dec. 21, 1880.

THE BOARD OF DIRECTORS OF THIS COMPANY have this day declared a DIVIDEND of FOUR PER CENT upon its capital stock, payable on the FIRST day of FEBRUARY next at this office.

The Transfer Books will be closed at 3 o'clock p. m. on THURSDAY, the 30th inst., and will be reopened on the morning of Saturday, the 5th day of February next. E. D. WORCESTER, Treasurer.

NOTICE.

The Louisville and Nashville Railroad Company declared this day a semi-annual dividend of 3 per cent upon the stock of the company, payable on and after the 1st of February. Dividends on stock registered in New York will be paid at the office of the company, No. 52 Wall st. The transfer books will be closed on the 22d January and reopen on the 3d February.

E. H. GREEN, President.

NEW YORK, Jan. 5, 1881.

CAPITAL $3,000,000.—OFFICE OF THE INTER STATE IMPROVEMENT AND CONSTRUCTION CO., Room 17, No. 115 Broadway, New York, January 13, 1881.

This company proposes to construct a railroad between Indianapolis, Ind., and Springfield, Ohio, connecting the Indiana, Bloomington and Western Railway with the lines of the Cincinnati, Sandusky and Cleveland R. R. Co., to be completed by October 1, 1881.

Stockholders of the I., B. & W. R. R. Co. have the privilege of subscribing until February 5 for $1,500,000 of INTER STATE IMPROVEMENT AND CONSTRUCTION COMPANY stock in the proportion of six shares for every ten shares of I., B. & W. stock standing in their names on the books of the Railway Co., but no fractional share will be issued. The books will be open at this office for such subscriptions from February 1 to February 5

Twenty per cent must be paid upon all subscriptions, for which receipts will be given, and the balance in instalments as required.

J. R. MAXWELL, President.

ALFRED SULLY, Treasurer.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

OFFICE OF

FISK & HATCH,

BANKERS,

No. 5 Nassau Street,

NEW YORK, January 17th, 1881.

As good interest paying securities, selling at moderate prices, are very scarce in the market, we deem it a service to the investing public to call their attention to the following list; full particulars of which can be obtained at our office.

Southern Pacific of California Six per cent Bonds, interest payable April and October; present market price, 103¼. These bonds should take rank with the Central and Western Pacific, selling at 12 to 15 per cent premium.

Chesapeake and Ohio Railway Purchase Money Funding Bonds; interest six per cent, payable January and July. Present price, 110 and accrued interest. These bonds amounting to only $2,350,000, are a first lien on the whole property of the Company, valued at $50,000,000.

Chesapeake and Ohio Railway Bonds, Series "A"; interest six per cent, payable April and October. These bonds amount to only $2,000,000, and with the Purchase Money Funding Bonds, comprise the only cash interest obligations of the Company at present. The net earnings are largely in excess of all present interest requirements. Price, at present, 104 and accrued interest.

The Elizabethtown, Lexington and Big Sandy Six per Cent First Mortgage Bonds, interest payable March and September. This road will be the connecting link between the Chesapeake and Ohio and the West and South West, and therefore must enjoy a large traffic, It is all under contract, and will be completed within six months, when the bonds should command a much higher price. Price of the bonds at present, 100 and interest.

We regard all the above as desirable for investment.

The Chesapeake and Ohio Railway Bonds, Series "B," and the Currency Bonds, at present paying their coupons in Preferred Stocks, the former selling at 83¼, the latter at 51, both quoted at the Stock Exchange, we believe to be very attractive at present quotations, as securities rapidly growing in value, in view of the great improvement of the property on which they are based. We look for a large advance in both of them during this year, as two, and perhaps three of the Western connections of the Chesapeake and Ohio Railway will be completed during that time, as well as the extension to Newport News.

We have just published the eighth edition of our MEMORANDA CONCERNING GOVERNMENT BONDS, containing much valuable information which is free to all investors. We continue to deal in Government Bonds, and execute cash orders at the Stock Exchange for all securities dealt in there.

We also receive deposits, on which we allow interest at the rate of three per cent per annum.

Very truly,

FISK & HATCH.

ESTABLISHED IN 1831.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.

The First Railroads.

THE RUSTIC CARTS AND WOODEN STRUCTURES OF 1650—INTRODUCTION OF IRON RAILS—THE EARLIEST RAILROADS IN ENGLAND—BIRTH OF THE "IRON HORSE"—A CAR PROPELLED BY SAILS—RAILROADING IN AMERICA FIFTY YEARS AGO.

"A thousand times as many!" It is familiarly known as a careless form of off-hand, exaggerated expression, and when used seriously its significance as a power of measurement is so vast as to seem almost intended only as words uttered with a mental reservation that the allowance of liberal discounts will be made by a reasonable incredulity, born of hearing the measure so frequently used in a mystical way. But when it is used in comparing the extent of the enterprises of our country to-day with those of fifty years ago, it may make the results of the comparison seem incredible, but in the purpose for which we use it the measure is literally truthful and the impression made in no degree exaggerated. There are one thousand times as many miles of railroad in the United States to-day as there were in 1831. Fifty years ago in the first issue of the AMERICAN RAILROAD JOURNAL a list of the railroads then partially constructed, some of which had small portions in actual operation, was given. The roads could have been numbered by one's fingers and thumbs, and the total length of railroad then in operation was about ninety-five miles. Many elaborate estimates have been made during the opening weeks of 1881 concerning the extent of our present railroad system, and though differing somewhat, as it is not an easy matter to keep the record of the rapid railroad extension of the day, some of them are in the main authentic and correct, and a still further estimate could probably be safely made that the first quarter of 1881 will find the ninety-five miles of railroad of 1831 to have grown into about ninety-five thousand miles in this country, with the rapidity of extension increasing as the year advances.

In commencing a sketch of the growth of our railroads, including outlines of the history of several old and new lines and incidents connected with their development, the lives of their projectors, the earnings of the road, etc., and in continuing in various forms the presentation of such and kindred information which the JOURNAL is now giving more completely than ever before, it will not be uninteresting to glance back at the first attempts at introducing railroads in England. There is much in the early history of those primitive structures to prove that their origin was from the most rational causes and that the growth of the railroad has been as natural as that of any of the powerful elements in the development of hidden resources and the progress of civilization.

Three hundred years ago, in Great Britain, the transportation facilities for the coal and other important trades consisted mainly of such as were furnished by pack horses and the clumsy carts of the time over ordinary roads, excepting in the few localities where the road ways famous in classical history had been copied from Rome and had left on the people some imprint of the ideas of the venturesome invaders. But the roadways in the main had become neglected, and at their best, limited as they were in number and direction, had been of comparatively slight value to the people generally in times of peace. As the transportation needs of the people increased with the increase of their manufactures and productions, and especially with the development of their coal trade, the lines of traffic became more defined, and measures for improving them came to be considered. It was not until the inhabitants began to locate in villages and certain sections had come to be considered central, that the lines of traffic or the directions for transporting their merchandise assumed something of a uniform or established character and the people could be led to work conjointly for improving roads for common use and mutual benefit. Among the first improvements made on the ordinary road was the placing of sleepers side by side, making a wooden road-bed, similar to that in common use now in many countries and well-known here as the corduroy road. At New Castle-upon-Tyne a man named Beaumont, a heavy coal dealer, sometime before 1650, constructed a wooden roadway at his mines; at least, twenty-five years later, a roadway was described which is supposed to be like that built by Mr. Beaumont. It consisted simply of wooden rails six or seven inches wide fastened to sleepers, five or six feet apart, by wooden pegs. On these the heavy carts with clumsy wheels were pushed or drawn along. A horse would draw a load of about two tons on one of these railroads, under favorable circumstances. As a rule the collieries were situated at a higher level than the depots, so that the grade was generally favorable to the loaded cart. As the rails were found to bend and to offer a corresponding resistance to the wheels, the plan was adopted, in some cases of nailing plates of iron to the surface of the wooden rails. Canals at this time were receiving the most attention from those interested in improving the means of internal communication, and but little interest was expended on the railroads through a period of many years, the attention of scientific men being turned in other directions.

An idea of the little attention that was given to the railroad in those early days of its history is seen from the fact that about a century passed after the time of nailing strips of iron to the rails before the next important improvement was made, that of substituting cast iron for wooden rails. Mr. Stephenson puts the first manufacture of iron rails as occurring in 1767, at the extensive iron works of Colebrook-dale in Shropshire. Iron wheels were used to some extent ten or fifteen years before. The first railroad with iron rails is said to have been constructed at the Duke of Norfolk's colliery, Sheffield. About the year 1810 malleable iron rails were first introduced at the coal works of Lord Carlisle, on Tindale Fell, Cumberland. Mr. John Birkinshaw obtained a patent in 1820 for a new form of malleable iron rails, one feature of which was their increased length over those formerly used; the first malleable iron rails being made in the form of bars about two or three feet long, while those improved by Mr. Birkinshaw were made from twelve to fifteen feet in length. In 1817 a queer invention was patented by

Mr. John Hawks, of Gateshead, consisting of a rail made of both cast and malleable iron. The rail was made of a bar of malleable iron having cast iron run upon its grooved surface in a state of fusion. The difficulty found in manufacturing them prevented the general use of the rails, though there were undoubtedly good ideas embodied in the principle.

The cars, or "waggons" as they were called, of those early days of the railroad, were as crude and clumsy in their form as the rough play carts of children portrayed in pictures of ancient rural life. Being intended for the carrying of coal, the cars of that time were adapted in form for that purpose, and were made of roughly joined wood in the shape of hoppers. Previous to about 1750 only wooden wheels were used. The front wheels were made of larger diameter than the rear wheels to keep the body of the car horizontal on the downward grade, the roads being intended chiefly to bring loads down from the mines to the coal yards and depots. These wheels were sometimes made of one piece, but oftener of several pieces fastened together by woodon pins. The surface was hewn out to fit to the rail. About the middle of the eighteenth century cast iron wheels began to appear, and for a time it was customary to have two of the wheels on a car of iron and the other two of wood. There was a strong prejudice against the use of iron wheels on account of their injury to the rails, the danger of their cracking and the rude brakes not working on them satisfactorily, and it was for the latter reason, probably, that during the introduction of the cast iron wheels, wooden wheels were used with them on the same car. The adoption of iron rails did away with the use of wooden wheels.

The first railroad constructed in England for carrying passengers, was the Stockton and Darlington, which was opened in the fall of 1825, though for the transportation of general merchandise there were several wooden railroads of short length in use, which had grown up from the proven utility of the railroad for carrying coal. The coaches were drawn by horses (one horse to each coach, the coach accommodating half a dozen passengers inside and twenty outside) at a speed of about ten miles per hour. The question of building the Liverpool and Manchester Railroad was agitated three or four years before, but the road was not put into operation until five years later, in 1830. With the conception of the Liverpool and Manchester Railroad the idea of using other power than horse power was actively considered. Mr. Oliver Evans, of Philadelphia, had nearly fifty years before conceived the idea of using steam carriages on ordinary roads, and about the year 1800 was at work upon an engine intended for a railroad, but he met with little encouragement. The proprietors of the Liverpool and Manchester Railroad, however, took up the idea, and offered a prize of $2,500 for the best locomotive that should be produced for them. Mr. George Stephenson built the successful engine, the wonderful feats of his "Novelty" and "Rocket" soon establishing the supremacy of steam on railroads, and from this point the construction of railroads took its greatest impetus.

In this country railroad projects, which seem like toy work in comparison with the gigantic enterprises of to-day, were well underway, or "on paper," as the saying is, now, before the opening of the first railroad for passengers on the other side of the water. The Quincy Railroad, in Mass., was in operation soon after the opening of the Stockton and Darlington, and before the Liverpool and Manchester was constructed, and there had been at some time previous a very crude semblance of a railroad in use in Pennsylvania, though the Quincy, constructed for the marble quarry, has generally been mentioned as the first railroad in this country. The first division of the Baltimore and Ohio Railroad was opened in May, 1830, about four months before the formal opening of the Liverpool and Manchester, and within the next two years the locomotives built by Peter Cooper, Davis and Gartner, and Matthias W. Baldwin, were brought out under the encouragement offered by this company, which did a most valuable service in encouraging improvements connected with railroads at that time, and stimulating inventors and mechanics. Among the novel inventions brought out in 1830 was a car for which the propelling power was furnished by sails. It was successfully used on the Baltimore and Ohio Railroad on several occasions during the first few months of the road, when the only other power used was furnished by horses. This car was called the Eolus, and it was propelled wholly by the action of wind upon the sails. France was not slow in adopting the new means of inland communication just springing into such popularity in England and America, and in the spring of 1832 a road was opened from St. Etienne to the Loire, which may be called the first passenger-carrying railroad constructed on the continent.

A statement has been published of the railroads sold under foreclosure in 1880, together with their mileage, debts and capital stock. The aggregate is large in view of the fact that the era of railroad bankruptcy was supposed to have ended two or three years ago. It must be understood, however, that many of the roads sold last year became bankrupt years ago, and all of them have been for some time dragging through the slow progress of the courts. But very few cases of bankruptcy have occurred during the past year, and a comparatively small number of roads now remain in the hands of receivers, so that the record for the present and succeeding years should be much more encouraging. It appears that in the past five years no less than 228 roads, with a mileage of over 20,000 miles, or nearly 28 per cent. of the present total mileage, and a nominal capital investment of about $1,236,000,000 (which is more than 20 per cent of the total reported railroad capital in the country) passed through the ruinous experience of bankruptcy.

Sir Edward Thornton on the Care of Live Stock in Transit.

Much discussion and planning concerning the adoption of measures tending to the better care of live stock while in transit have arisen lately both in this country and abroad, and interest in the subject is increasing as its importance becomes more and more apparent. Mr. Tingley's device, a full description of which was recently given in the JOURNAL, for feeding and watering live stock in the cars, is attracting much attention, and seems to be received as a very popular method, both by transportation companies and dealers (to whom alike it includes profit and saving), as well as by people generally, who have investigated the device. It has elicited many expressions of approval and encouragement from prominent persons regarding it from sanitary and humanitarian standpoints. Among the letters received by Mr. Tingley on the subject, is the following from Minister Thornton:

BRITISH LEGATION
WASHINGTON, June 15, 1881.

DEAR SIR: I am much obliged to you for your letter of the 12th inst., showing what is being done by you for the welfare of cattle making long journeys through the United States. It is a work of real charity and humanity; for, while it conduces to saving the poor animals from an immense deal of suffering, it contributes to the wholesomeness of the food of which we so largely partake. I have always been of opinion that the number of diseases which are found among cattle arriving in England are very frequently due to the hardships they suffer in the long land journeys to the ports of the United States, and to the inclemency of the weather, sometimes so intensely cold, and at others so hot. I sincerely hope that farmers and all owners of cattle will give you every encouragement in carrying out your benevolent intentions.

(Signed.) EDWD. THORNTON.

Canals of Canada.

The amount expended by the Canadian Department of Railways and Canals during the fiscal year ending June 30, 1880, on the Lachine, Beauharnois, Cornwall, Williamsburg, St. Lawrence, Welland, St. Anne's, Burlington Bay, Granville, Carillon, Culbute, Rideau, Trent, St. Ours, St. Chambly and St. Peter's Canals were: For Construction and Miscellaneous Surveys, $2,125,455.29; for repairs, $150,121.32; and for staff and maintenance, $195,039.33—total, $2,470,615.94.

The expenditures during the same time for construction, staff and maintenance of railways, were as follows:

	Construction.	Staff and Maintenance.
Pacific.....	$3,893,598.54	$78,892.01
Pacific Surveys.	150,973.68	—
Intercolonial...	2,048,014.60	1,608,429.71
Prince Ed. Isle.	16,539.32	140,640.55
Windsor Branch.	—	4,526.99
Total.....	$6,109,126.64	$1,851,489.26

A grand total of $10,481,231.84.

New York, Saturday, January 29, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

THE matter of the Central Pacific dividend has been settled, the government consenting to its payment, and requiring of the company a bond of indemnity to await the result of an amicable suit to be brought before Circuit Judge Blatchford to test the right of the company to declare dividends from the accumulated surplus on hand, regardless of the earnings of any particular period. The officers of the company express their confidence at the result. Meantime the road is understood to be earning more largely than ever before in its history.

Inter-Oceanic Communication.

Since the starting of our great trans-continental railroad system, which has proved of such unquestioned value to our country, nothing in the interest of navigation and international communication has attracted such universal attention as have the plans for connecting the Atlantic and Pacific by way of the Isthmus, through means which the wonderful advances in engineering, aided by capital and American enterprise make possible.

While numerous other schemes have been worked up and placed before the public for consideration, developing more or less discussion and theorizing, the projectors of the Tehuantepec Inter-Ocean Railroad, having obtained most liberal concessions from the Mexican government, have gone ahead, and with an energy that indicates their own confidence in the enterprise, have already got underway one of the plans which is among the most practicable and probable of speedy accomplishment of any placed before the public. The company, of which Hon. Edward Learned, of Massachusetts, prominent in railroad and financial circles of New York and New England, is president, was organized in Massachusetts, and in its organization, as well as in the standing of persons interested in it in various ways, is a strong corporation. The company is to build the railroad across the Isthmus from Coatzacoalcos to the vicinity of La Ventosa, making a line of about 150 miles. Five thousand tons of steel rails have been purchased, and the work of construction already underway gives promise of being vigorously pushed.

The idea of utilizing this part of the Isthmus for special commercial and transportation purposes is by no means a new one; in fact, three hundred and fifty years ago Hernando Cortez was exploring this section for the purpose of improving navigation facilities. The choice of locality by the Tehuantepec Inter-Ocean Railroad Company is a peculiarly fortunate one from several standpoints of consideration. A special advantage possessed by this route over that of the proposed Panama canal is found in the salubrity of the climate. The locality has been pronounced by eminent physicians visiting it as well as by the inhabitants as being exceedingly healthful and agreeable. Surgeon Spear, of the U. S. Navy, who visited this locality with a scientific party about ten yearr years ago, says the inhabitants boast that yellow fever has never visited them. The temperature in the summer is said to never rise very high, rarely above ninety degrees, and in winter frost is never seen.

Of course the main demand for an Isthmian passage, and the benefits to be derived from it, arise from the vast amount of through freight seeking access from ocean to ocean, but in this particular locality the 150 miles of railroad will open up a large local freight traffic from rich agricultural and mineral resources, which include a wonderfully varied number of products. Coffee of a superior quality grows in great abundance and in a wild state on the banks of the Coatzacoalcos, and a vast revenue could be derived from its cultivation, which the inhabitants are accustomed to neglect, on account of their general preference for chocolate. Of the quality of the coffee raised in this locality, Hon. J. W. Foster, late United States minister to Mexico, says that it is equal to the best known in any country, and the same authority considers that Mexico, in coffee, posses a far greater source of wealth and prosperity even than in her rich silver mines.

The location of the different proposed routes across the Isthmus in relation to the commerce of this country is the first thing of course that Americans will take into consideration, and the relative merits of the different routes will be judged here accordingly, since all the routes have their special claims in regard to the saving of distances to the commerce of the world. The gain of the Tehuantepec route over Panama between New York and Hong Kong is 1,350 miles; between San Francisco and Liverpool, England, 887 miles; and between San Francisco and Havana, Cuba, 1,430 miles.

Discrimination in Freight Rates.

Mr. Leland Stanford, President of the Central Pacific Railroad Company, has written one of the most detailed and explicit answers to the questions propounded by the New York Board of Trade and Transportation and the opinions promulgated by Judge Black concerning legislative regulation of railroads, that has yet been published. The letter will attract wide attention coming as it does from an authority holding such a prominent position among the leading railroad men of the country, and we shall at some future time quote more at length from it. We give at this time an extract from one of its most important parts, that concerning discrimination, in regard to which so many wild and vague ideas are being industriously circulated.

Mr. Stanford cites various things that of necessity enter into the determination of rates, the character and quantity of the article, climatic influence and other difficulties to be encountered in transportation, and says:

"I shall not say anything to justify discrimination against individuals and communities, but content myself on this head by simply stating that such has never been practised by railroad companies with which I am connected. So far as they are concerned, they practise the same business principles that govern and regulate individuals in the management of their affairs. The primary consideration with railroad managers under the observance of the golden rule is their treasury. With this idea in view and to meet competition they often carry freight at less rates for a longer than for a shorter distance, and they accept the less rate because they cannot do better, and because a small profit is better than none. This is only in accordance with the principles of industry, thrift and economy, which should ever be encouraged. To deny the companies the privileges of working for a small profit would be on a par with saying to an individual, 'Better be idle than take small earnings when larger cannot be had.' It is the policy of the Central Pacific, and I believe of railroad companies of the United States generally, to accept a small profit where a larger cannot be obtained, as it is also its policy to encourage the development of the resources of the country. In doing so it practices no unjust discrimination; it charges nobody else more because of the rate it is compelled to accept from others, but it puts into practice a common and economic principle in fixing the charge for service by railroad companies. * Under this rule the company obtains a development, homes for the people are possible at remote

distances from markets, and every industry finds encouragement. Under the substantially unlimited control of their own affairs which railroad companies have enjoyed rates of transportation have been steadily reduced, until at present their general rates are far below what even your committee would ten years ago have deemed possible."

Prince Edward Island Railway.

The report of the Canadian Minister of Railways for the year 1879–'80 contains the following information concerning the Prince Edward Island Railway:

The total length of the railway, including extensions, is 198½ miles. The capital account at the close of the fiscal year amounted to $3,466,588.57, as against $3,450,048.75 for the preceding year. The gross earnings for the year amounted to $113,851.11, being a decrease of $12,004.80 as compared with last year's receipts of $125,855.91. The passenger traffic returns show a decrease in receipts of $6,787.92, and the returns of the freight traffic show a decrease in receipts of $3,216.48. The cost of working the line for the year was $164,640.55, as against $223,818.12 for the preceding year, showing a decrease of $58,672.57. The working expenses and receipts for the year ending June 30, 1880, were:

Total cost of working	$164,640.55
Total receipts	113,851.11
Loss on the year's operations	$50,789 44

The working expenses per mile of railway were:

1878–79	$1,125.00
1879–80	829.42
Decrease	$295.44

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of the Main Stem, Southern Division and Port Deposit Branch for the years ending October 31, 1879 and 1880, were as follows:

	1879.	1880.
From passengers	$1,541,049 95	$1,767,219 20
" freight	1,176,081 15	1,339,369 47
" express	64,834 64	70,006 67
" mail	49,043 83	58,257 43
" rents	18,910 71	28,257 73
	$2,849,919 78	$3,263,110 50
Add gain from Delaware Railroad	2,169 36

Interest, ground rents, etc., paid and accrued	$219,934 22	
Less dividends and interest received and accrued	88,688 22	131,246 00
Receipts less operating expenses, taxes and interest		$1,284,977 13
Dividends were paid: No. 65 4 per cent, Jan., 1880,	$462,900 00	
Dividends were paid, No. 66 4 per cent, July, 1880	463,170 00	926,080 00
Leaving a surplus to credit of Revenue Account for the year of		$308,097 13
Transferred to Renewal Fund		150,000 00
		$158,897 13
Balance to credit of Revenue Account, October 31, 1879, was	$738,690 16	
Charged to revenue as follows, viz:		
Depreciation D. & D. R. R. account	$100,000 00	
Depreciation tug & barges Canton ferry	24,185 57	
Depreciation of Wilmington Steamboat Line acc't	15,000 00	
Deficiency Delaware R. R. earnings to pay rent	1,894 23	
Bad debts	268 00	
	141,842 80	
		597,347 36
Balance to credit of revenue, Oct. 31, 1880		$756,244 49
Add balance to credit of Renewal Fund		199,663 59
Total surplus Oct. 31, 1880		$955,909 08

Compared with the year 1879, the receipts from passengers in 1880 show an increase of 14.68 per cent, and the receipts from freight an increase of 13.57 per cent. Gross earnings increased 14.50 per cent, operating expenses 22.96 per cent, and net earnings 5.64 per cent. Taxes were less by 9.79 per cent, and interest, etc., (less interest, etc., received) was more by 17.33 per cent. The report says:

A comparison of operating expenses with gross earnings for the past four years shows that during the past year those expenses were relatively much larger than those of the preceding year, but not so large as those of 1877 or 1878.

During the past year it was found necessary to accept lower rates for transportation than those of previous years, and also to accommodate the public with many more trains; the mileage of passenger and freight trains being thirteen per cent in excess of that of the previous year.

Much was done to enhance the value of the equipment. There were two locomotives added to the stock, and several new ones substituted for old ones. Many new passenger cars were built to fill the place of old cars sold, and besides replacing worn-out freight cars with new cars, there were added to the stock 68 new ones of all kinds. Over $9,000 of outlay was made in the fitting of passenger cars with Automatic Brakes, which it was found necessary to adopt upon such of our cars as pass over connecting roads, instead of the Westinghouse and Vacuum Brakes so long used on your road.

For fuel, the cost was in excess of the same item during the preceding year by more than $47,000. This excess was due in part to increased mileage, and part to an average rise in price of coal of 78 cents per ton.

The outlay in "Road" department was larger than that during the preceding year by over $80,000, and larger than that of any year since 1874. Of this excess, about $30,000 was caused by the unusual number of cross-ties renewed during the year, and over $38,000 was paid for the labor required to lay the 55,000 extra cross-ties and to keep the track in a good condition under the increased mileage.

Table "B" shows the disbursements charged during the year to the Renewal Fund, and the amount thereof unexpended at the close of the year. To this amount it was deemed well to add the sum of $150,000 from the net earnings of the year ending October 31, 1880, as it will soon be necessary to build new station houses at Wilmington and at two or three other way stations; and it is desirable to continue the substitution of stone ballast for gravel, and iron bridges for wooden ones.

The work of substituting an iron bridge for the wooden one built in 1836 over the Susquehanna River at Havre de Grace, and of building a new pier to take the place of No. 8, which was found to be insecure, has been finished. The whole cost of this work, commenced in 1874, has been charged to the earnings of the road in Renewal Fund account.

There were 25 miles of your road laid with stone ballast at close of fiscal year ending October 31, 1879. During the year ending October 31, 1880, stone ballast was laid upon 6½ miles more.

Table "C" gives a comparative statement of the fruit transported annually for 14 years ending October 31, 1880. It shows that the earnings from this source during the past season were less than those of the previous year by the sum of $78,577 73, which accounts for the diminished revenue of the Delaware Railroad, and its failure to earn its entire rent.

The net earnings of the Delaware Railroad were insufficient by the sum of $1,894 23 to pay the rent thereof; and that sum has been charged to Revenue account, to be recovered however, under the conditions of our lease, so soon as the net earnings of that road are in excess of the rent.

Table "D" shows the state of the Sinking Fund, which has been increased by the sum of $16 000 since our last Report.

The charge to "Ferry Steamer 'Canton,'" was for one-half of the cost to date of that steamer, owned jointly by this company and the Baltimore and Ohio Railroad Company, and used to transfer all joint traffic of the two companies at Baltimore, while avoiding the former very objectionable mode of transfer through Baltimore by horse-power. Since June last the "Canton" has been in constant use, and does her work most satisfactorily, while shortening the time between Philadelphia and Washington.

Table "E" also shows a large expenditure for the purchase of the stock of the West Chester and Philadelphia Railroad Company, all of which has been bought, excepting 44 shares of $50 par. This road furnishes a direct connection between Philadelphia and the Philadelphia and Baltimore Central Railroad, thus completing a second road from Philadelphia to the Susquehanna, practically in the ownership of this company, and giving to the latter a second desirable entrance into Philadelphia, which will prove, it is believed, very valuable to this company, as great difficulties must be overcome in bringing any new railroad into the city from the Southwest.

This company on assuming the direction of the management of the West Chester and Philadelphia Railroad found it in bad condition in respect to repair, and much in need of new equipment and permanent improvements to bring it up to the standard of your road. To meet such

wants, it will be seen by Table "E" that this company has loaned nearly $280,000 to the West Chester and Philadelphia Railroad Company.

It is expected that the latter road, once placed in a good condition, and running 27 miles from Philadelphia, through a remarkably healthy and attractive country, will of itself prove a safe investment.

Table "E" also shows that your directors now, as heretofore, charge freely to revenue account all items of depreciation or loss which are suffered by this company, while in no instance has any increase in the value of your assets been followed by any addition to their valuation in the books of the company. The principal item of this nature is the amount of $100,000 charged to revenue on account of depreciation in value of our account against the Dorchester and Delaware Railroad Company.

That company in 1869 leased the Dorchester and Delaware branch of the Delaware Railroad, agreeing to pay therefor the same rent as this company pays as lessee of the Delaware Railroad and branches; but have been unable to pay any rent. They have also been unable to repair their equipment from time to time, and this company, rather than have work stop on a tributary road, have repaired their rolling stock.

In addition to allowing the Dorchester and Delaware Railroad Company to become our debt or for these accounts, your directors thought it advisable nine years since to advance $50,000 to the Dorchester and Delaware Railroad Company, to enable them to finish their road. As security for these debts this company holds, as collateral, $119,000 of the six per cent. bonds from out of the whole issue of $250,000 by that company, but none of the coupons have yet been paid.

We have now, therefore, due this company from the Dorchester and Delaware Railroad Company,

For Rent of Dorchester and Delaware Branch		$83,780 88
For Balance due for bills of work, etc.,		18,874 45
" Money loaned		50,000 00
" Interest on these several accounts		19,289 85
		$171,945 18
Less credited them for drawbacks		15,171 18
		$156,774 05
Charged to Revenue for depreciation		100,000 00
Leaving charged to this account		$56,774 05

with $119,000 of bonds, with attached coupons, as security.

The amount credited that company for drawbacks, which were a small percentage of this company's receipts from traffic interchanged with that company, shows that this company has derived very considerable profits from the connection, which go far to offset this charge to revenue.

Another item charged in Revenue Account is the difference between the cost of tug and barges used from 1872 until last June at the Canton and Locust Point Ferry, for which we have substituted the steamer "Canton," and the proceeds resulting from their sale.

During the year the Wilmington Steamboat Company spent nearly $30,000 upon repairs of the steamer "Felton," and the sum of $15,000 has been charged to revenue on this account, to prevent that company's debt to this company exceeding the value of that company's assets.

To provide a part of the funds for the purchases and expenditures above described, your board deemed it advisable to borrow $1,000,000. Accordingly, they caused to be issued and sold at a small premium the bonds of this company, bearing five per cent. interest, and payable at the end of thirty years, for that amount, and protected by a sinking fund.

The condition of the road and its equipment was never better than at present, as your directors know from personal observation,

The company have 78 locomotives. The car equipment consists of 108 passenger, 4 parlor, 18 smoking and baggage, 17 baggage, 8 baggage and mail, 18 express, 5 milk, 1 pay, 766 house, 79 stock, 371 platform, 65 lime, 4 dump, 28 lumber, 8 refrigerator and 15 tool, construction, etc., cars.

The number of miles run by engines over the Philadelphia, Wilmington and Baltimore Railroad, including service on Port Deposit Branch, was 1,874,822. Miles run on Delaware Division, between Wilmington and Delmar, 411,464.

President.—ISAAC HINCKLEY.

Vice President.—ENOCH PRATT.

Directors.—Samuel M. Felton, William Sellers, Isaac Hinckley, Joseph Bringhurst, Samuel Harlan, Jr., Charles Warner, Enoch Pratt, Thomas Whitridge, Samuel M. Shoemaker, Jacob Tome, Nathaniel Thayer, William Minot, Charles P. Bowditch, Edward Hooper, Richard Olney.

Secretary and Treasurer.—ALFRED HORNER.

Assistant Treasurer.—ROBERT CRAVEN.

Personal.

—Mr. L. E. Chittenden delivered an address before the Bullion Club, of this city, Tuesday evening, on the need of railroads in Nevada.

—A telegram from Mr. Cyrus W. Field announced on Wednesday his arrival in Calcutta. It is now thought that his return to New York may be expected early in May.

—Mr. R. G. Hervey has gone to Europe for the purpose of raising funds for the construction of the proposed railroad, to be known as the Indianapolis and Evansville Straight Line.

—Mr. Barclay Haines, a prominent resident of Burlington County, N.Y., died at his home in Hainesport Sunday night, aged seventy years. He was one of the projectors of the Camden and Amboy Railroad, and had been connected with several other roads.

—Mr. J. M. Walker, whose death from heart disease occurred in Chicago on the 22d, was the General Solicitor of the Chicago, Burlington and Quincy Railroad Company, of which he was formerly president. He had a large acquaintance in the city, and generally throughout the East, in railroad circles.

—In our mention last week of the conferring of the order of the Golden Crown of Prussia by Emperor William upon a distinguished Philadelphia lawyer through a printer's error the name of the recipient of the honor was given as Mr. Stephen A. Remak; it should have been Stephen S. Remak.

—Among the prominent railroad men who have been in New York within the past few days are the following: Mr. H. B. Ledyard, General Manager of the Michigan Central Railroad; Mr. George M. Pullman, of Chicago; Mr. J. W. McCullough, of Pittsburg, Vice-President of the Pennsylvania Co.; Mr. John Newall, General Manager of the Lake Shore and Michigan Southern Railroad; Mr. George B. Spriggs, Traffic Manager of the Great Western Railway of Canada; and Mr. Robert Garrett, of Baltimore.

—In a warm tribute to the memory of Mr. F. P. Mosely, the recently deceased purchasing agent of the Old Colony Railroad Company, the Boston Transcript says: "With the sagacity of the merchant and the executive power of a man of affairs he combined a lofty personal integrity with a kindly, genial flow of life which gave it an indefinable flavor to all were privileged to know him. In the purchasing department of the railroad of which he was the head, meeting all sorts of men, subject to every form of pressure in the selling competitions of business, there was one star only for him—his duty. And this was done with such fidelity, yet with such gentleness and courtesy, as to make friends of those whom he was forced to deny."

—Mr. Hinton R. Helper, a wealthy resident of St. Louis, and well known throughout the country as the author of "The Impending Crisis," sometime ago offered $5,000 in prizes for three prose articles and two poems in favor of the construction of a double track steel railroad through the centers of North and South America. The prizes have been recently awarded as follows: First prize, $1,300, to F. R. Hilder, of St. Louis; second prize, $1,200, to Fred A. Beelen, Courtland, on Hudson, N. Y.; third prize, $1,000, Wm. W. Archer, Richmond, Va.; fourth prize, $1,000, F. D. Carpenter, Washington, D. C.; fifth prize, $500, F. A. Deekens, Norwich, Canada. The first three were in prose and the last two in poetry. They are to be published in pamphlet form.

At the annual meeting of the Fitchburg Railroad Company, held in Boston on the 25th inst., the former Board of Directors was elected, as fol-

lows: Wm. B. Stearns of Boston, Seth Bemis of Newton, Robert Codman of Boston, Rodney Wallace of Fitchburg, and Charles U. Cotting of Brookline.

Commerce of New York.

We give below, from the New York Journal of Commerce, a statement of the Commerce of New York for 1880, in comparison with that for the five preceding years. The following is a comparative table showing the relative totals imported at New York in each year since 1850:

Year.	Merchandise.—Dutiable.	Free Goods.	Specie & Bullion.	Total Imports.
1851.	$119,592,264	$9,719,771	$2,049,543	$131,361,578
1852.	115,336,052	12,105,342	2,408,225	129,849,619
1853.	179,512,412	12,156,387	2,429,083	194,097,652
1854.	163,494,984	15,768,916	2,107,572	181,371,472
1855.	142,900,661	14,103,946	855,631	157,860,238
1856.	193,839,646	17,902,578	1,814,425	213,556,649
1857.	196,279,362	21,440,794	12,898,033	230,618,129
1858.	128,578,256	22,024,691	2,264,120	152,867,067
1859.	213,640,363	28,708,732	2,816,421	245,165,516
1860.	201,401,683	28,006,447	8,852,330	238,260,460
1861.	95,326,459	30,353,918	37,088,413	162,768,790
1862.	149,970,415	23,291,625	1,390,277	174,652,317
1863.	174,521,766	11,567,000	1,525,811	187,614,577
1864.	204,128,236	11,731,902	2 265,622	218,125,760
1865.	212,208,301	10,410,837	2,123,281	224,742,419
1866.	284,033,567	13,001,588	9,578,029	306,613,184
1867.	238,297,955	11,044,181	3,306,339	252,648,475
1868.	232,344,418	11,764,027	7,085,389	251,193,834
1869.	275,779,976	14,789,235	15,788,462	306,357,673
1870.	289,618,878	13.716,500	11,864,644	315,200,022
1871.	349,635,398	28,878,294	6,348,608	384,862,300
1872.	369,083,458	57,429,020	5,594,208	432,106,686
1873.	293,035,348	86,924,877	18,605,611	398,565,836
1874.	278,677,532	108,598,631	6,407,571	393,683,734
1875.	235,398,509	91,791,853	13,438,557	340,628,919
1876.	202,486,773	76,659,977	26,217,888	305,364,638
1877.	221,401,649	92,686,992	15,000,227	329,088,868
1878.	201,540,213	82,495,681	19,150,973	303,186,867
1879.	234,775,206	105,217,808	84,196,109	424,189,123
1880.	337,250,149	126,926,531	75,210,096	539,386,776

Under the head of dutiable are included the goods entered directly for consumption, and also those entered in bond for warehousing. These, with the free goods and the specie, make the total landed at the port. Including the specie, the imports for 1880 are $115,197,653 above the total in 1879; but deducting the specie in both years, the merchandise imports for the twelve months are $124,183,666 more.

The following table will show the classification of imports at New York for the years—

	1878.	1879.	1880.
Dry goods.	$74,863,197	$91,549,600	$119,844,120
Gen. mdse.	209,172,697	248,443,414	344,332,560
Specie....	19,150,973	84,196,109	75,210,096
Total ...	$303,186,867	$424,189,123	$539,386,776

The cash duties are collected on the goods entered directly for consumption, and also on those which having been entered in bond, are afterward withdrawn for consumption. The imports thus marketed in 1880 amounted to $317,928,466 on which $140,692,065 96 in duties were collected, making an average of about 44¼ per cent on the entire dutiable imports of the year, against 46¾ in 1879, 45⅜ in 1878, and 42¼ in 1877.

The following is a quarterly statement of the exports from New York to foreign ports, exclusive of specie, for the years named:

Quarter.	1878.	1879.	1880.
1st	$87,621,214	$78,474,748	$82,984,178
2d	84,287,028	79,983,231	112,049,304
3d	91,978,437	96,423,052	118,106,665
4th	85,577,621	101,887,534	107,732,685
Total	$349,414,800	$356,218,565	$415,822,827

Foreign imports entered at New York during the years 1875, 1876, 1877, 1878, 1879 and 1880:

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending January 15th, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad	108,004	722,618	893,966
Schuylkill Canal	.....	.....	38,041
Lehigh Valley	76,248	526,789	524,899
Del., Lack. & Western.	53,075	104,330	87,764
Shamokin Valley	19,398	32,563	35,561
Central New Jersey	46,554	92,399	134,920
United R. R. of New Jersey	25,045	47,131	33,956
Pennsylvania Coal	17,026	31,871	26,619
Delaware and Hudson	43,478	83,413	158,257
Huntingdon & Broad Top Mt	7,899	19,099	16,389
Penn. and New York.	20,705	138,304	128,122
Clearfield, Pa.	32,958	65,253	100,362

The Schuylkill Canal is closed for the season. The total tonnage of anthracite coal from all the regions for the week ending Jan. 15, as reported by the several carrying companies, amounted to 358,498 tons, against 421,555 tons in the corresponding week last year, a decrease of 68,057 tons. The total amount of anthracite mined for the year is 676,408 tons, against 782,621 tons for the same period of last year, a decrease of 106,218 tons. The quantity of bituminous coal sent to market for the week amounted to 71,630 tons, against 57,184 tons in corresponding week last year, an increase of 14,446 tons. The total amount of bituminous mined for the year is 169,896 tons, against 176,224 tons for the corresponding period last year, a decrease of 6,328 tons. The total tonnage of all kinds of coal for the week is 425,128 tons, against 478,739 tons in corresponding week last year, a decrease of 53,611 tons, and the total tonnage for the coal year is 846,299 tons, against 958,845 tons to same date last year, a decrease of 112,546 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first eight days of January was 165,860 tons, of which 114,047 tons were coal and 51,753 tons coke. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended Jan. 15 were 26,177 tons, and for the year 58,897 tons—a decrease of 19,394 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 22,772 tons, year, 51,312 tons; decrease as compared with 1880, 19,669 tons. Chesapeake and Ohio Canal, none; decrease as compared with 1880, 2,584 tons. Pennsylvania Railroad—week, 3,405 tons; year, 7,582 tons; incaease over 1880, 2,858 tons. Vessels are very scarce at Port Richmond, and freights are quoted at $2 to Boston and $1 75 to Providence. There is considerable coal shipped from the ports in New York harbor, with freights quoted at $1 70 @ $1 75 to Boston.—[Phila. Ledger, Jan. 24.

Nine railroads were chartered in Massachusetts in 1880 under the general law, with an average capital of $426,888. There were also legally constituted two street railways, one with a capital of $100,000, the other with a capital of $40,000. Since the enactment of the first general railroad law in 1872 there have been twenty-five incorporations under it and similar measures, their average capital having been $220,000.

The Grand Rapids, Newaygo and Lake Shore Railroad has been leased to the Chicago and West Michigan Company for 99 years, the latter guaranteeing two per cent on the Newaygo property.

The Indiana, Bloomington and Western and Cincinnati, Sandusky and Cleveland roads when consolidated in March will assume the title of Ohio, Indiana and Pacific Railroad.

Just twelve months from the date of the order given for its construction the first division—23 miles—of the railroad in Yeso, the northern island of Japan, was opened to traffic, and trains are now run daily. This is the first American railroad in Asia, and was constructed under the direction of Joseph M. Crawford, a Pennsylvanian, all of whose assistants are Americans.

The Commissioners of Emigration have submitted their annual report, from which it appears that the total arrivals at Castle Garden during 1880 were 327,371, of whom 104,264 were from Germany, 66,399 Ireland, 33,768 England, 35,217 Sweden, and 11,190 Italy.

News has been received in Ottawa of the ratification by the Brazilian Government of the contract for a subsidized line of steamers between Canada and Brazil. The first steamer is expected to leave Rio Janeiro next month.

The first train of freight cars on the line of the Somerset and Cambria Railroad arrived at Johnstown, Penn., on the 23d inst., consisting of ten truck loads of ore, consigned to the Cambria Iron Company, and shipped from Locust Point, near Baltimore, to Mineral Point, from whence it was transferred from the main line to the former road.

The capital stock of the New York and Hudson Steamboat Company is $150,000; floating debt, $25,000. Gross receipts—from freight, $13,894 79; from rents, $587 50; paid on account of freight lost, $81 33.

The total earnings of the Denver and Rio Grande Railway Company for the month of December, 1880, were $349.195 86; earnings same month, 1879, $131,112 75. Miles operated, 1879, 337; miles operated, 1880, 551.

Articles of incorporation have been filed for the Potsdam and Montreal Railway. The road will extend from the Rome, Watertown, and Ogdensburg Railway at Norwood to the boundary line of New York State. The capital is $500,000. This will be an extension of the South Shore Air Tunnel Company.

The Chief of the Bureau of Statistics reports that the total values of exports of domestic breadstuffs from the United States for the month of December, 1880, were $18,214,746, and during December, 1879, $19,155,236. For the twelve months ended December, 1880, $268,295,859, and for the same period in 1879, $239,201,889.

Railroad Law.

SUPREME COURT, PENNSYLVANIA — PASSENGER RAILWAY COMPANY V. GIBSON.

Plaintiff sat by an open car window with his arm so exposed that it was struck and injured by the hay on a passing wagon. Held, that although the plaintiff was without fault he could not recover from the passenger railway unless he proved affirmatively negligence on its part.

Error to the Court of Common Pleas No. 1 of Allegheny County.

Opinion by MERCUR, J. January 3d, 1881.

This action was by a passenger to recover damages which he sustained while in a car of a Street Railway Company, in being struck by a passing load of hay. The defendant in error sat by an open window, with his arm so exposed that it was struck and injured by the hay on a passing wagon. Thus the proximate cause of injury, at least in part, was caused by the act of a third party over which the railroad company had no control. If the injury was caused by contributory negligence of the passenger, or by the sole negligence of the driver of the wagon, there should be no recovery against the company. The jury has found the passenger was without fault on his part. To enable him to recover he must also prove that the company was guilty of negligence, and its negligence was a cause of the injury. It is just here that the errors covered by the first, fourth, and fifth assignments, appear. The learned judge substantially charged, if the defendant in error was without fault, the company must prove that it was guilty of no negligence, thus shifting the burden of proof resting on the passenger, and throwing it on the company to disprove negligence. This was error. The duty rested on the defendant in error to prove negligence of the company. Without this he established no cause of action against it: McCully v. Clark, 4 Wright, 399; Allen v. Willard, 7 P. F. Smith, 374; Waters v. Wing, 9 Id. 211. It is true in many cases the mere fact of injury to a passenger raises the presumption of a want of care on the part of a railway company. Such is the case when the injury results from defective tracks, cars, machinery or motive power. Here there was no privity between the company and the driver of the wagon, it was not then liable for the act of the wagon on the principle of respondeat superior: Railroad Company v. Hinds, 8 Id. 512. The car did not leave its track. It is not alleged that any of the property of the company was improperly constructed, or out of repair. If we correctly understand the complaint, it is as to the speed of the car. We see nothing in the case which relieved the defendant in error from proving negligence, or that threw on the company the burden of disproving it. It is not sufficient that he be free from fault, he must prove other facts creating a presumption, at least, of negligence in the company, producing injury. The question then is on this branch of the case, whether under the whole evidence the jury is satisfied that the company did not use all just and proper care and diligence to prevent the injury?

It was urged on the argument, that the first assignment was improperly made, as the point covered thereby was withdrawn. It is, however, duly certified as a part of the record, showing that it was affirmed and bill sealed for defendant below; this creates a presumption it was read and answered in the hearing of the jury. It then had an effect not removed by its subsequent withdrawal, and may be reviewed. That question is of no practical importance now, inasmuch as substantially the same instructions are contained in the portions of the charge covered by the fourth and fifth assignments, the second and third assignments are not sustained.

Judgment reversed and a venire facias de novo awarded.

LIABILITY BEYOND ROUTE.

In the absence of a special contract the liability of a common carrier does not extend beyond the terminus of his own route. Such contract is not established, however, by proof that the carrier accepted the goods with knowledge of their destination, and named the through rate for the same. Railroad Co. v. Manufacturing Co., 16 Wall. 318; Railroad Co. v. Pratt, 22 id. 123; Darling v. Railroad Co., 11 Allen, 295; Nutting v. Railroad Co., 1 Gray, 502; Burroughs v. Railroad Co., 88 Mo. 451; Coates v. Express Co., 45 id. 238. United States Circuit Court, E. D. Missouri, Oct. 1, 1880. Stewart v. Terre Haute & Indianapolis Railroad Co. Opinion by McCrary, C. J.

NEGLIGENCE—ACT OF GOD—UNPRECEDENTED RAINFALL.

It was stated for the opinion of the court by an official referee that upon the occasion of an universal rainfall, unprecedented in duration and quantity for many years in the district, there was imminent peril of the defendants' canal bursting; and the defendants, in order to prevent it, raised a sluice by which a large quantity of water escaped into a neighboring brook and thence into a colliery. The water, having filled up this colliery, flowed into some collieries of the plaintiffs and destroyed their works. It was found that if relief had not been afforded to the canal banks at this time, an inundation must have very shortly ensued, which would equally have destroyed the plaintiffs' works and also caused far greater devastation to property and probably loss of life throughout a very wide area; that the course adopted by the defendants was prudent and proper, and the only effectual measure which was possible in the emergency. The plaintiffs claimed in this action alternatively damage for the defendants' wrongful acts, or compensation under the Defendants' Acts of Parliament which provided for satisfaction to be made for injury or damage alleged to be sustained by reason of carrying into effect any of the provisions of that act. Held, that the plaintiffs' injury was by the finding due not to the defendants' wrongful acts nor to the effect of any of the provisions of the Defendants' Acts of Parliament, but to vis major or an act of God, and that as in any event the plaintiffs' works would have been equally destroyed, the immediate damage caused by the defendants' own act in raising the sluice was injuria absque damno and irrecoverable. Nicholas v. Marsland, L. R., 2 Ex. Div. 1: Q. B. Div., June 28, 1879. Thomas v. Birmingham Canal Navigation Proprietors' Co. Opinion by Lush, J., 43 L. T. Rep. (N. S.) 435.

KANSAS SUPREME COURT ABSTRACT—DECEMBER, 1880—NEGLIGENCE—ANIMALS KILLED BY RAILROAD TRAINS.

Where a railroad company is not guilty of negligence in failing to protect its track from swine in a township where they are not permitted to run at large, and it appears from an agreed statement of facts that a hog was killed by the negligence of the railroad company in such township; and it further appears that the negligence of the owner in permitting the animal to run at large in violation of section 46, chapter 105, Comp. Laws of 1879, contributed directly to the injury, held, the negligence of the defendant was offset by the negligence of the plaintiff, and the owner of the animal could not recover for his loss. Kansas City, Fort Scott & Gulf Railroad Co. v. McHenry. Opinion by Horton, J.

Music and Suspension Bridges.

Bands of music are forbidden to play on most of the large bridges of the world. A constant succession of sound waves, especially such as come from the playing of a band, will excite the wires to vibration. At first the vibrations are very slight, but they will increase as the sound waves continue to come. The principal reason why bands are not allowed to play when crossing certain bridges, the Suspension Bridge at Niagara for instance, is that if followed by processions of any kind they will keep step with the music, and this regular step would cause the wires to vibrate. At suspension bridges military companies are not allowed to march across in regular step, but break ranks. The regular trotting gait of a large dog across a Suspension Bridge is more dangerous to the bridge than a heavy loaded wagon drawn by a team of large horses.—[London, Ont., Free Press.

Bradley Barlow, president of the Southeastern Railway, has secured a perpetual lease of the Champlain and St. Lawrence Junction, extending from Stanbridge to Nicolet, Quebec, 65 miles. The line heretofore has been an important feeder of the Vermont Central. The Southeastern Railroad Company guarantee the interest on the bonded debt of $378,000.

The Chicago City Council has passed an ordinance permitting the Southside Street Railway Company to use an endless cable (underground) for a motive power for their lines. The company will begin laying a cable early in the spring. The cost will be over $2,000,000.

The Lake Erie, Alliance and Ohio River Railroad Company was incorporated on the 22d inst. The termini are to be Alliance and some point in Belmont county. The capital stock is $50,000. by Alfred Wright and others.

There are 42 railroad corporations in Michigan, owning 5,358¼ miles of road, and operating 6,166.71 miles. Within the State January 1, 1880, there were 3,657.74 miles of road, and 260 miles have since been built.

It is said that the Atchison, Topeka and Santa Fe has let contracts for 75 locomotives, distributed among the following-named locomotive works: Brooks, 10; Pittsburgh, 25; Manchester, 13; Hinkley, 17; Baldwin, 10.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

Virginia Consol. Coupons not Taxable.

In the United S ates Supreme Court at Washington on the 24th inst., a decision was rendered in the case of H. C. G. Hartman, plaintiff in error, vs. Samuel C. Greenhow, Treasurer of the city of Richmond, Va. In error to the Virginia Supreme Court of Appeals.

On the 30th of March, 1871, the Legislature of Virginia passed an act entitled "An act to provide for the funding and payment of the public debt." By the provisions of this act the State agreed that if her creditors would come forward and surrender to her her old bonds she would issue to them new coupon bonds for two-thirds of the amounts due upon the old bonds, payable at the expiration of thirty-four years, with interest at 6 per cent., payable semi-annually, the semi-annual interest to be represented by coupons attached to the bonds, which coupons should be "receivable at and after maturity in payment of all taxes, debts, dues and demands due to the State, which shall be so expressed on their face." For the other third the Commonwealth was to give the bondholder a certificate setting forth that "payment of the amount will be provided for in accordance with such a settlement as shall hereafter be had between the States of Virginia and West Virginia in regard to the public debt of the State of Virginia existing at the time of its dismemberment." Under this act the holders of bonds of the Commonwealth amounting to about $30,000,000, had funded their bonds by March, 1872, so that at that time there were out bonds of the State for about $20,000,000 bearing 6 per cent. interest, with tax-receivable coupons attached.

On the 7th of March, 1872, the Legislature of Virginia passed an act declaring that nothing should be received in payment of taxes except gold or silver coin, United States Treasury notes or notes of United States national banks. In the case of Antoni vs. Wright the Virginia Court of Appeals held that this last-mentioned act was unconstitutional and void in that it impaired the obligation of the State's contract with her bond and coupon holders.

On the 25th of March, 1873, the State Legislature passed an act providing that there should be deducted from the coupons of the funding bonds issued under the act of 1871, when such coupons were presented in payment of any dues to the State, a sum equal to a tax of one-half of 1 per cent. on the market value of the bonds from which said coupons had been cut. This act was slightly modified in 1874, but was re-enacted in its original form in 1876.

Shortly subsequent to that time the plaintiff in error, Hartman, a citizen and property-holder of Richmond, Va., tendered to Greenhow, the tax collector of the city, in payment of taxes, $24 in coupons cut from the aforesaid funding bonds and $2 53 in money—that being the amount of taxes due by him to the State. The tax collector refused to receive the coupons at their face value in payment of Hartman's taxes, on the ground that the act of 1876 required him to deduct from the coupons the State tax of one-half of 1 per cent. Hartman thereupon applied to the Supreme Court of Appeals for a writ of mandamus to compel the tax collector to receive the said coupons and money in payment of his taxes. By an equally divided court the mandamus was refused. Hartman thereupon appealed to this court. In a long and carefully written opinion Justice Field, after reviewing the history of the debt of Virginia and the legislation of the State in reference thereto, expresses the opinion of this Court in substance as follows:

The power of the State to impose a tax upon her own obligations is a subject upon which there has been a difference of opinion among jurists and statesmen. But whatever may be the wisest rule as to the taxibility of public securities it is settled that any tax levied upon them cannot be withheld from the interest payable thereon. This was the judgment in the case of Murray vs. Charleston (96 U. S., 445), where the Court held that by the legislation of the city its obligation to its creditors was impaired, and however great its power of taxation, it must be exercised, being a political agency of the State, in subordination to the inhibition of the Federal Constitution against legislation impairing the obligation of a contract. This decision would be decisive in the present case, but the present case is still stronger for the creditor. The Funding act made the bonds issued under it payable to order or bearer and made the coupons payable to bearer. The bonds and coupons were so far distinct and independent contracts that they could be separated from each other and transferred to different hands. This Court has repeatedly held that such coupons have all the essential attributes of commercial paper, that they are separate claims against the State and may be used to support separate and independent actions.

The coupons held by Hartman, the petitioner, were distinct contracts, imposing their own separate obligations upon the State. Hartman was not the owner of the bonds to which they had been originally attached. In his hands they were as free and discharged from all liability on those bonds as though they had never been connected with them. And argument is hardly necessary to prove that an act which requires the holder of one contract to pay the taxes levied upon an other contract held by a stranger cannot be sustained. Such an act is not a legitimate exercise of the taxing power. It undertakes to impose upon one the burdens which should fall, if at all, upon another.

The Funding act stipulated that the coupons should be receivable for all taxes and dues to the State for their full amount, and upon this pledge the holders of the bonds of the State surrendered them and took new bonds for two-thirds of their amount. The act of 1876 declares that the coupons shall not be thus received for taxes for their full amount, but only for such portion as may remain after a tax subsequently levied upon the bonds to which they were originally attached is deducted. If this act does not impair the contract with the bondholder—who was authorized to transfer to others the coupons, with the quality of receivability for taxes annexed—it is difficult to see in what way it would be impaired even though the tax on the bond should equal the whole face of the coupon. If against the express terms of its contract the State can take a portion of the interest in the shape of a tax on the bond it may at its pleasure take the whole.

This Court is clear, therefore, that the act of the Legislature of the State of Virginia of 1876 requiring the tax on her bonds issued under the Funding act of March 30, 1871, to be deducted from the coupons originally attached to them when tendered in payment of taxes or other dues to the State, is in face of the previous contract with such bondholders contained in the Funding act, a law impairing the obligation of a contract, and that it is therefore void. It follows that the petitioner was entitled to his mandamus to compel the Treasurer of the city of Richmond to receive the coupons tendered to him in payment of taxes for their full amount. The judgment of the Supreme Court of Appeals of Virginia denying the writ is, therefore, reversed and the cause remanded for further proceedings in accordance with this opinion.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, January 27, 1881.

Five per cent is the ruling rate for call loans, the exceptional rates being 4 and 6 per cent. Time loans are 4@5 per cent on good collateral. Prime mercantile paper is 5@5½ per cent.

The posted rates for prime bankers sterling are 98⅞ and 99¼@⅝; the actual rates are 98¾@98 18-16 and 99⅜@99 7-16; cable transfers are 99½ @99 5-16, and prime commercial 98 7-16@½. By the old method the posted rates for prime bankers sterling are 4.81 and 4.84½; the actual rates 4.80⅛@¾ and 4.83¾@4.84; cable transfers 4.84¼@½, and prime commercial 4.79@¼.

The Governors of the New York Stock Exchange have admitted to dealings at the Board the following securities:

New Jersey Southern Railway Company—guaranteed 6 per cent bonds to the amount of $1,-44d,600 secured by a mortgage subject to prior liens of $320,000 on all the railroads of the company, and the interest is guaranteed by the New York and Long Branch Railroad Company, which is a branch of the Central of New Jersey.

St. Paul, Minneapolis and Manitoba Railway Company—Dakota extension, first mortgage 6 per cent bonds, to the amount of $2,400,000 being an issue of $12,000 per mile on road completed or nearly completed.

Ogdensburg and Lake Champlain Railroad Company, first consolidated mortgage 6 per cent bonds, due April 1920, $3,500,000 and $1,000 000. 5 per cent income bonds due in 1920, interest payable if earned and not accumulative.

Northern Pacific Railroad Company, first mortgage railroad and land grant sinking fund 6 per cent gold bonds, $20,000,000, due January, 1921. Of the total issue $6,480,300 is held in trust, to retire $3,995,100 bonds issued on the Pend-'d-Orille division and $2,485,200 issued on the Missouri division.

The closing quotations on Thursday were: Adams Express, 129½@130; American Express, 68½@69½; American District Telegraph, 62@62¼; American Union Telegraph, 83⅛@84½; Canada Southern, 86⅜@86⅞; Central of New Jersey 93⅜@93½; Central Pacific, 89⅛@89⅝; Chicago and Northwestern, 130¾@130⅞; do. pref., 141½@142; Chicago, Burlington and Quincy, 168½@170; Chicago, Milwaukee and St. Paul, 119¼@119½; do. pref., 126¾@127¼; Chicago, Rock Island and Pacific, 138@138¾; Columbus, Chicago and Indiana Central, 25¼@25⅝; Cleveland, Columbus, Cincinnati and Indianapolis, 89¾@90; Hannibal and St. Joseph 54⅞@55; do. pref., 107@107½; Illinois Central, 133⅛@133⅜; Lake Erie and Western, 53½@54; Lake Shore and Michigan Southern, 131⅞@132; Michigan Central, 122@123; Metropolitan Elevated, 110@111; Manhattan Elevated, 86⅝@86⅞; New York, Lake Erie and Western, 50¼@50⅜; do. pref., 93@93¼; New York, Ontario and Western, 38⅝@38¾; New York Central and Hudson River, 151@151½; Ohio and Miss., 43¼@43½; do. pref., —@106; Pacific Mail, 53¾@54; St. Louis, Iron Mountain and Southern, 60¼@60¾; Union Pacific 121⅛@121⅝; United States Express, 57⅛@58½; Wells Fargo Express, 119½@120½; Western Union Telegraph, 116@116¼; Wabash, 48⅜@48½; do. pref., 90⅝@90⅞.

Population of the United States.

The following statement was submitted to Congress on the 18th inst.:

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE,
WASHINGTON, January 18, 1881.

Hon. Carl Schurz, Secretary of the Interior:

SIR—I have the honor to report that on Saturday, the 15th inst., the last returns of population were received at the Secretary's office, completing the tenth census of the United States. Carefully revised, the computation gives the following as the population of each State and Territory on June 1, 1880. Very respectfully,

Your obedient servant,
FRANCIS A. WALKER,
Superintendent of Census.

States.	Population.	States.	Population.
Alabama	1,262,794	Tennessee	1,542,463
Mississippi	1,131,592	Maryland	648,946
Arkansas	802,564	Texas	1,192,575
Missouri	2,168,804	Massachusetts	1,783,602
California	864,686	Virginia	1,512,800
Nebraska	452,433	Michigan	1,627,331
Colorado	194,649	West Virginia	618,448
Nevada	62,265	Minnesota	780,806
Illinois	3,078 769	Wisconsin	1,315,480
Ohio	3,198,239	Connecticut	622,688
Indiana	1,978,300	New Hampsh'e	346,984
Oregon	1,747,672	Delaware	146,654
Iowa	1,624,620	New Jersey	1,130 983
Pennsylvania	4,282,786	Florida	267,851
Kentucky	995,966	New York	5,083,010
Rhode Island	276,528	Georgia	1,589,048
Louisiana	1,648,708	North Carolina	1,400,000
South Carolina	995,622	Kansas	995,966
Maine	940,103	Vermont	332,286

Total States	49,369,595

Territories.	Population.	Territories.	Population.
Arizona	40,441	Washington	75,120
New Mexico	118,430	Idaho	32,611
Dakota	135,180	Wyoming	20,788
Utah	143,906	Montana	39,157
Dist. of Col'bia	176,638		

Total Territories	783,272
Grand total	50,152,866

Interest and Dividends.

The Connecticut and Passumpsic Rivers and Massawippi Valley Railroad Companies have declared a dividend of 2 per cent., payable Feb. 1.

The Cedar Rapids and Missouri River Railroad Company has declared a dividend of $1 per share on the common stock and $3 50 on the preferred stock, payable Feb. 1.

The Iowa Railroad Land Company has declared a dividend of $1 50 per share to stockholders of record on the 15th inst., payable Feb. 1.

The Car Trust of Pennsylvania has declared a quarterly dividend of 1½ per cent. on series A and B stock; and the Railway Equipment Trust of Pennsylvania a quarterly dividend of 2 per cent. on series A stock—both payable at the office of the Pennsylvania Annuity Company, Philadelphia, on the 1st of February.

At the annual meeting of the Woodstock (Vt.) Railroad Company, held on the 19th inst., the report of the Treasurer was presented, showing the total receipts for the fiscal year to have been $20,687.96; the expenses, $20,679.18, and the net $8.78. The increased business of the road for 1880 over 1879, amounted to $1,941.53.

Annual Report of Cooper Union.

The annual report of the trustees of the Cooper Union has been prepared for presentation to the Legislature of the State and to the Common Council of the city of New York. It shows that the receipts for the year ending December 31, 1880, amounted to $60,379 27 and the expenditures for carrying on the various schools, etc., were $45,454 24. The balance January 1, 1880, was $4,218 77. Money was borrowed during the year amounting to $1,852 54, which increased the income to $65,945 98. The loans paid off during the year amounted to $16,786 25. There is now a balance in the treasury of $3,705 09, and there is due for rents $2,280 83. The current indebtedness is as follows: loans, $12,348 56; accounts audited, $5,319 56—making a total of $17,668 12. The report is signed by Peter Cooper, Wilson G. Hunt, F. Tiemann, Edward Cooper, John E. Parsons and Abram S. Hewitt.

At the annual election of the Pittsburg and Chicago Railway Company, held on the 10th inst., the following directors were elected: Genl. James S. Negley, D. E. Culver, H. R. Low, Grinnell Burt, Hon. J. S. Robinson, Hon. L. F. Mansfield, Jas. S. Negley, jr., Gen. Saml. K. Scwenk, and W. N. Riddle. The officers are: Jas. S. Negley, President; D. E. Culver, Vice-president; Wm. N. Riddle, Treasurer; and Jas. S. Negley, jr., Secretary.

The Directors of the Pittsburgh, Newcastle and Lake Erie Railroad Company for the year 1881 are: Hon. John R. McPherson, Genl. James S. Negley, Hon. H. R. Low, Genl. Saml. K. Schwenk, Hon. Grinnell Burt, Wm. B. Scott, W. N. Riddle, Hon. Charles Siedler, and Delos E. Culver. The officers are: Delos E. Culver, President; Gen. Jas. S. Negley, Vice president; W. N. Riddle, Treasurer; and Jas. S. Negley, jr., Secretary.

On the 15th inst. the directors of the Island Creek and Richmond Mineral Railroad Company, appointed Genl. Jas. S. Negley of Pittsburg, Pa., general manager and financial agent of their company. It is the intention of the company to extend their line to Canton. A permanent location of the proposed extension will be made immediately after the return of Genl. Negley, who is now out on the line.

At a meeting of the directors of the New York and New England Railroad Company on the 25th inst., the resignation of President Hart was accepted, and Vice-President J. H. Wilson was elected his successor. Messrs. Jonas H. French and W. O. Taylor were also made members of the directory for the ensuing year. Mr. Taylor takes Mr. Hart's place in the Board and represents the State, and Mr. French succeeds Mr. James Sturgis, who has resigned.

The Texas and Pacific Railway is completed to Abilene, Taylor County, 195 miles west of Dallas and 22 miles from Beard, the present operating terminus. Passenger trains will run to Abilene by the middle of next week, it is stated. Abilene has been selected by cattle and railroad men as a site for a large and important place. It is expected that the Texas and Pacific will be finished to El Paso within twelve months.

OFFICE CENTRAL PACIFIC RAILROAD COMPANY,
No. 9 Nassau st.,
NEW YORK, Jan. 5, 1881.

THREE DOLLARS PER SHARE WILL BE paid on presentation of Dividend Warrant No. 11, on or after February 1, at this office, or at the office of the Company in San Francisco. Transfer books will be closed from January fifteen (15) to February first (1), both inclusive, as per order of Board of Directors.

C. P. HUNTINGTON, Vice-President.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY,
TREASURER'S OFFICE, GRAND CENTRAL DEPOT,
NEW YORK, Dec. 21, 1880.

THE BOARD OF DIRECTORS OF THIS COMPANY have this day declared a DIVIDEND of FOUR PER CENT upon its capital stock, payable on the FIRST day of FEBRUARY next at this office.

The Transfer Books will be closed at 3 o'clock p. m. on THURSDAY, the 30th inst., and will be reopened on the morning of Saturday, the 5th day of February next.

E. D. WORCESTER, Treasurer.

NOTICE.

The Louisville and Nashville Railroad Company declared this day a semi-annual dividend of 3 per cent upon the stock of the company, payable on and after the 1st of February. Dividends on stock registered in New York will be paid at the office of the company, No. 52 Wall st. The transfer books will be closed on the 22d January and reopen on the 3d February.

E. H. GREEN, President.

NEW YORK, Jan. 5, 1881.

CAPITAL $3,000,000.—OFFICE OF THE INTER STATE IMPROVEMENT AND CONSTRUCTION CO., Room 17, No. 115 Broadway, New York, January 13, 1881.

This company proposes to construct a railroad between Indianapolis, Ind., and Springfield, Ohio, connecting the Indiana, Bloomington and Western Railway with the lines of the Cincinnati, Sandusky and Cleveland R. R. Co., to be completed by October 1, 1881.

Stockholders of the I., B. & W. R. R. Co. have the privilege of subscribing until February 5 for $1,500,000 of INTER-STATE IMPROVEMENT AND CONSTRUCTION COMPANY stock in the proportion of six shares for every ten shares of I., B. & W. stock standing in their names on the books of the Railway Co., but no fractional share will be issued. The books will be open at this office for such subscriptions from February 1 to February 5.

Twenty per cent must be paid upon all subscriptions, for which receipts will be given, and the balance in instalments as required.

J. R. MAXWELL, President.

ALFRED SULLY, Treasurer.

ESTABLISHED IN 1831.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,

NEW YORK, LAKE ERIE & WESTERN RAILWAY:

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

SECOND QUARTO SERIES, VOL. XXXVII., No. 6.] NEW YORK, FEBRUARY 5, 1881. [WHOLE No. 2,337, VOL. LIV.

State Encouragement of Agricultural and Commercial Development.

THE VAST IMMIGRATION OF 1880—ITS CHARACTER AND UTILIZATION—INDUCEMENTS TO CAPITAL—SYSTEMATIC DISTRIBUTION AND ENCOURAGEMENT OF IMMIGRANT LABOR NEEDED—STATE BUREAUS OF IMMIGRATION.

There are few ways in which the people of a growing State can show more enterprise just now than in adopting measures for the encouragement of immigration and the turning of the channel for the same in the right way for the best utilization of it in the development of public and private resources. The immigration of 1880 exceeded by over 125,000 that of any previous year in the history of our country, and the tide is not slacking only so far as it is temporarily affected by the danger and hardship of winter travel. It is a noticeable fact also that the immigrants who have sought this country during the past year have been of a more than usually desirable class, estimated by what they brought with them, both of nationality and money. Great Britain and Germany furnish by far the largest proportion of the immigrants coming here, more than one-half of the total number, in fact, coming from Canada and the British Isles. There has been a current supposition that one great reason for the increase in immigration in 1880 was to be found in the troubled condition of Ireland, but the official returns show that out of 296,025 coming from British dominions considerably less than one-third came from Ireland direct, while nearly one-half came from Canada.

The amount of money brought by each immigrant is estimated as considerably larger on an average than usual. The total number of immigrants in 1880 was 586,068, and an estimate has been made by those most conversant with the matter that the average sum of money brought by each person can be put at fifty dollars. These facts, concerning the character of the people coming here now, indicate an acquirement of positive value in two conspicuously direct sources of utility, while there are other less easily estimated features of this immigration that will prove of greater or less value to the country, as they may be wisely or carelessly directed and employed.

It is evident that the majority of the immigrants coming now are in good condition to make themselves of service in devoloping our resources, and they give encouraging promise of being valuable additions to our working and producing population. They are not refugees, and they are not driven by plague or pestilence to seek a more friendly and a healthier land. This vast increase in immigration is not caused by the poverty and needs of any famine-stricken country, or by the devastation of war or the alarms of political revolution. The immigrants come as a rule bringing some little property with them, and in many cases the property being of that description which indicates the purpose of their coming to be the establishment of homes and permanent settlement. This is strikingly obvious when it is remembered that nearly one-fourth of the entire immigration last year was from Canada; and though many of these have probably landed at Canadian ports, and simply come through Canada to the United States, still a large number of them are people who have lived and worked in Canada for years at farming, manufacturing, mining and building, and they cross over into the States, bringing with them habits and training peculiarly adapted to the requirements of their new home, so similar in many respects to those of the locality they leave.

The distribution of the benefits to be derived from this immigration will depend largely upon the enterprise and wisdom shown by the different States in encouraging settlers to seek certain domains. A careful study of the undeveloped resources of a State, its manufacturing, agricultural, mineral and commercial needs and prospects, should be made by practical and unprejudiced men. If it is found that there is a promising field for the starting of certain branches of manufacturing or the developing of special departments of agriculture, or the working of mines, or the construction of railroads, then let especial attention and legislative action be turned toward utilizing and encouraging immigration for the specific purposes which offer the strongest prospects of return to the State and to individuals. Judicious exemption from taxation for a certain period of years, adjusted to the actual amount of capital used in selected enterprises, and to the employment furnished to labor, is an inducement which is but natural and just, and which increasing enterprise and local rivalry will make more and more of a necessity. Encouragement can be wisely given to immigrant labor direct, in addition to the inducements offered foreign and local capital, by provisions looking especially to the establishing of homesteads, or at least for providing economical and comfortable quarters, where important works are being pushed, or manufactories started; immigrants in these respects not being obliged to depend wholly upon the varying ideas of employers or speculative changes, but instead being enabled to rely upon substantial provision being made for them on an economical and permanent basis by the State. This would involve the establishment of a State commission or bureau of immigration. The importance of such a department in each State can hardly be overestimated when a glance is taken at the vast number of immigrants seeking our shores with such a diversity of pursuits in view, and at the widely differing character of the resources of the various States, which, well understood in regard to their approaches and special attractions, could be so advantageously presented to the world under a wise systematized management.

Why the Firth of Forth is not to be Bridged.

There is something novel in these days in recording the abandonment of a vast scheme of railway engineering. This, however, is the fate of the scheme for bridging the Firth of Forth. The bridge, as originally designed, was to have been one of the new wonders of the world. It would have surpassed the Tay bridge almost as far as that unfortunate structure surpassed similar works. It has been given up solely on the ground of expense. The Board of Trade has very properly insisted on applying the lessons taught by the fall of the Tay bridge; and the Directors think the new

requirements as to strength and solidity are too costly to be complied with. The advantage to be derived from shortening the route from the capital along the east coast af Scotland is, in fact, not of sufficient value to pay for the vast works it would require. Railway companies have been too ready to lavish capital on undertakings which are more striking as engineering works than profitable as investments, and the disaster to the Tay bridge has checked the disposition to combine boldness of design with cheapness of execution. Cheap bridges, such as those which cross the Mississippi at Quincy or Hannibal, are not in accordance with English habits. We believe that there are no great river bridges in the United States over which a train runs at full speed. Just as every train stops where one railroad crosses another, so it lowers it speed to almost the slowest possible movement in crossing a bridge. If this had been the rule in this country the Tay bridge might have been standing, and the Forth bridge might have been built on the original scheme. But bridges made for full speed must be made as solid as engineering skill can make them.—[London News.

Bridges.

Mr. B. F. Bowen at the Convention of Surveyors and Civil Engineers, recently held at Columbus, O., read an interesting paper on bridges from which we give the following extracts: Convenience in trade and general intercourse prompted men at a very rude stage in society to construct bridges, the most rudimentary of which consisted of trees or timber fallen from bank to bank, or stepping stones at the shallow places in the stream. Then the laying of hewed logs from stone to stone was probably the next advance in this important branch of improvement. Since the dawn of civilization all conceivable plans, fixed and movable, have served their time and temporary purposes—the "Corduroy" bridge, "Floating" bridge, "Flying" bridge, "Sliding" bridge, "Girder" bridge, "Lattice" bridge, "Swing" bridge, "Suspension" bridge, "Arches," "Trusses," "Tubes," "Pontoons" and "Draws." Of all these the Truss bridge is most generally used in this country; of these there are a great variety.

Some of the principal ones were designed by Town, Burr, Howe, Pratt, Whipple, Post, Fink, Bollman, Warren, Linville and others, all of whom have graciously acknowledged the paternity. These trusses all have their distinctive features, and many points of merit, as claimed by these authors or inventors; and some are admirably adapted, in point of construction, to do the work for which they were intended, but when first introduced, the designers of some did not seem to properly understand the mechanical principles of their own plans, and consequently there was no scientific distribution of the materials in the different members to meet the resultant strains that came upon them. In many cases, the different members were all made uniformly of the same size from end to end of truss. It then remained for modern and more skilled engineers to improve and perfect, from such as these, some of the best plans in use at the present day. A man who has the boldness to discard old plans and the genius to contrive better ones is certainly entitled to a great deal of credit. But [when a patent is issued for a plan it does not necessarily follow that the patentee knows all about the bridge he has designed. The most eminent engineers of the present day file but few caveats.

To give a detailed description of all the different kinds of bridges, or discuss their merits or demerits, is beyond my purpose. It is, however, a well conceded fact that the science of bridge construction did not keep pace with the art of house building or science of architecture. It has been said that in ancient times "men builded better than they knew." Solomon's temple may have been built by inspiration, but that source of knowledge has never been successfully applied in bridge construction. Semiramis, Darius and Xerxes were the bridge builders of ancient times. At least the most important works were credited to them. While Greece boasted of her architectural grandeur, and was even at the summit of her magnificence, there was not a bridge in the country worthy the name. This condition of things may be accounted for on the very probable theory that the country was divided into small provinces, and the rivers taken for their natural boundaries; that the provinces had but little social or commercial intercourse, and were frequently at war with each other. Therefore the necessity for permanent bridges under such circumstances was not very great, and hence the slow progress made in the science of bridge construction during these early ages. * *

There are many things in connection with bridge building that cannot be determined by any mathematical formula, but must depend on the intelligence and well-directed judgment of the engineer in charge of the work. First, an accurate survey of the site should be made, to determine the horizontal distances and vertical heights; the mean and extreme high water should be determined. Then the particular kind of bridge best adapted to the site and locality; whether it should be over grade, under grade or middle grade; level or inclined, covered or open. Then the work to be done or the load to be carried, whether the traffic will be heavy or light, should all be taken into account. Then the kind of materials to be used; the ratio of the strength of the bridge to the imposed load or the "factor of safety;" the strength or value of the materials to be used, should be well considered. These matters can only be determined by experiments which have been so frequently made, and so generally published, that the subject is reasonably well understood by the profession. Authors, however, sometimes differ, through a wide range; hence the necessity of having the "factor" well on the side of safety. All these things should be considered and determined upon. Then comes the application of the exact science of force and resistance, which is the distinguishing feature of civil engineering, and determines the distribution of the load assumed, and the measure of the resultant forces in the direction of the various members of the structure; also designates the positive from the negative forces, and determines the size and shape of the different members best calculated to resist the applied force.

The importance of having a plan well matured in all its details, is obvious, and it is equally important to have an impartial and intelligent supervision during the construction of the work; as avarice and cupidity have spoiled many well designed bridges. The county commissioners are undoubtedly the proper officials to determine when and where highway bridges should be built, their general features and the approximate amount of money to be expended. The supervision of the work, in all its details, should then devolve upon some county official, who by reason of his education and experience, is qualified to discharge this important duty. If this was the law and the rule, instead of the exception, every county in the State would have better bridges for the same money.

Every man engaged in surveying and civil engineering should seek to elevate the profession and attain a high degree of proficiency, because in this way only can the business be made respectable and fairly remunerative. It is well to keep in mind the fact that the profession is to some extent one of arbitration, to determine what is equal and exact justice between conflicting interests. And in all work we should never lose sight of good faith, fair dealing and strict integrity, as they are the bright jewels and the main anchor in the profession.

Debt and Resources of Minnesota.

The State Auditor of Minnesota in his biennial report to the Legislature estimates the increase of taxable property in the State during 1880 at $15,283,828, a total in two years of $28,264,501. The total taxable value of all property is placed at $258,055,543. Of the bonded debt he says:

The recognized bonded debt has been reduced during the last two years from the constitutional limit of $500,000 to $290,000 of which amount $175,000 pertains to the State building loan of 1873 and $115,000 to the temporary seed-grain loan for grasshopper sufferers. Taxes have been levied in the several counties against the parties receiving the benefit of the seed-grain loan and will be collected the present year, sufficient to redeem the balance of the bonds of the temporary loan. The receipts of the sinking fund and the surplus accumulations of the interest fund from taxes already levied, with the ordinary levy for one more year, will be sufficient to redeem the outstanding bonds of the building loan and pay the entire regular State debt during the ensuing two years.

Referring to the unrecognized State debt the Auditor says:

In the year 1858, under authority of a constitutional amendment providing for a loan of the State credit to the extent of $5,000,000 for railroad purposes, bonds to the amount of $2,275,000 were issued, running twenty-five years, bearing 7 per cent interest, no part of which has ever been paid. The principal and accumulated interest now amount to about $5,850,000.

The Utah Northern Railroad has 21 locomotives actively employed and 15 new ones ordered. As each locomotive requires ten box and two flat cars, the total rolling stock for 1881 will be 720 cars and 36 locomotives.

The New South Wales Parliament has passed bills authorizing the construction of 471 miles of railway. Harvest prospects in that country and Australia are excellent.

The narrow gauge railroad running from Eureka to Ruby Hill, in Nevada, is about six miles long and pays 100 per cent per annum.

New York, Saturday, February 5, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

WITH the streets of New York in an almost impassable condition, the reported statement of Mr. Austin Corbin that he would be willing to give bonds for cleaning the streets at $100,000 a year less than the average cost for the last four years, is refreshing. His plan would be to use the sweepings as fertilizers for farm-lands suburban to New York, the sweepings to be distributed at certain points to farmers at the cost of transportation. In addition to the transportation business given directly in this way, a source of revenue to the carrier would be expected in the increased product of lands along the line of the road.

IN ANSWER to the insinuation concerning large corporations being provocative of communism, Hon. Leland Stanford pointedly says to the Board of Trade and Transportation: "Leave the railroad industry uncrippled, leave the control of railroad property as you leave that of other property, and you will never have reason to ask such a question. It seems to me that communism does not come from the people who seek to control only their own property, but rather from those who wish not only to control and regulate properties in the creation of which they had no part or ownership, but also the labor of others bestowed in their management. What you propose in regard to railroad property is to my mind on a par with the principles contended for by the communists, and the agitator Kearney advocated no doctrine in regard to property more atrocious than the principles embodied in the 'Granger cases' and the laws which they sustain."

A PLAN is under way, it is said, for raising $5,000,000 abroad for the development of farms on Long Island. The main incentive to this will be found in the improved railroad facilities which are now promised to the much-abused and long-suffering property owners of the Island. There is an evident intention on the part of those interested in the Long Island Railroad to do as much as is practicable in improving the land along their line, but it would appear from this proposed plan of farm improvement that other resources for providing means are to be employed outside of the application of direct railroad earnings, any unwise appropriation of which must necessarily weaken the very source from which stimulus for this local improvement arises. The theory that successful railroad management must first of all see that fair returns are made for service in its primary duties before taking upon itself the burden of broader work, is a solid one; and Long Island is likely to see it illustrated.

HON. JOHN H. STARIN, of New York, received a marked compliment in Washington last week, when, during the consideration of the Post Office Appropriation Bill in the House of Representatives, and in the midst of an unusual pressure of business, the floor was yielded to him, and the passage of his Saratoga Monument Bill secured, by unanimous consent. Mr. Starin has been untiring in his efforts in behalf of this measure, which secures the appropriation of $30,000 for the erection of a suitable monument to commemorate the decisive victory of the Revolution, the battle of Schuylerville and General Burgoyne's surrender. His services and brilliant success in this, and the advocacy of other well-chosen measures, will be appreciated not only by his immediate constituency, of the Twentieth New York District, but by the people generally throughout the State. Since 1856 Mr. Starin has been largely interested in transportation business in and about New York, especially in river and Long Island Sound transportation, where his enterprise has secured results of great value to the public. The improvement of Starin's Glen Island, off New Rochelle, and its development into one of the most select and best managed Summer resorts adjacent to New York, is an illustration of this. He is a native of Fulton county, where he is personally identified with important agricultural and commercial interests; he is also connected with two or three prominent banking institutions of this State. Few men, having such important and varied interests in charge, particularly the exacting interests pertaining to large transportation enterprises, have given to the public the benefit of such extended practical experience as Mr. Starin has been enabled to give in his political and congressional career. During the last campaign his party was the constant recipient of the benefits of his enterprising liberality and his strong executive abilities.

A Promising Outlook for Southern Transportation Interests.

The renewed activity in railroad interests in the Southern States, which has been very apparent during the past few months, indicates some important changes that are not unlikely to occur in regard to Southern shipping and commerce. With the opening of new railroads in the Southwest, and the completion of additional connecting lines to the grain-producing sections, fresh incentives are given for turning more of a current of grain transportation toward the southern Atlantic seaports than has heretofore gone in that direction. An illustration of this is seen in the fact that the first grain elevator on the south Atlantic coast was opened last week at Port Royal, South Carolina. It is a fact of no slight significance.

The railroads of the South, notwithstanding the years of depression through which they have passed, form very important and strong parts of our railroad system, and some of them are in a much more prosperous and healthy condition than may have been generally supposed. Their managers have been for years putting into practice the utmost economy in all departments of transportation, a result of which will be readily apparent in a position as competitors where so much must be dependent upon economical management.

The lines which have been forced to reduce operating expenses to a minimum are prepared to place freight rates on the same basis, at least so far as the exercise of economical habits and ways of management affects the matter. A possibility of turning even a small part of the grain current toward south Atlantic seaports will stimulate into action many ideas of railroad improvement and enterprises pertaining to the extension of railroad facilities in the southern section which have existed for years, though perhaps of necessity in a dormant state.

Southern transportation will receive great benefit from the rapid opening up of the extreme Southwest by the great lines hurrying on to make outlets for the abundant agricultural and mineral wealth of Mexico. These great lines of the Southwest will prove liberal feeders to certain favorably situated roads running to southern ports. Many of the agricultural products of Mexico will naturally seek these routes for climatic reasons, while for somewhat similar and other reasons a considerable passenger traffic will be created

across the Gulf States *en route* for Europe and the Atlantic coast. These influences will stimulate enterprises looking to the providing of better ocean shipping facilities from ports in the South; indications of this are seen in the starting of such works as the new grain elevator at Port Royal, and other plans under consideration for the benefit of shipping interests of that coast. With the turning of a fair amount of traffic through this channel, a general impetus will be given to industries along the lines of the transportation companies, and the South will begin to feel the benefits of a long-needed condition of traffic and commerce.

Illinois Central Railroad.

REPORT OF THE DIRECTORS TO THE SHAREHOLDERS

The directors are gratified in reporting an increase in traffic for 1880—both gross and net—as compared with that of the previous year. The gross earnings for the past year were $8,304,811 81, against $7,234,464 06 for 1879. The tonnage has largely increased. The gain in net was $282,-091 76. In the accompanying abstracts net returns for 1880 are shown as below:

From traffic	$8,479,012 61
" land	156,520 86
" interest on bonds	112,000 00
	$8,747,532 97

From this sum, besides paying interest on debt and dividends on shares, permanent improvements were made to the extent of $842,823 56, including the relaying of 115 miles of track in steel, the construction of 3 iron bridges, 9 heavy freight engines and 227 cars, also additional double tracks at the entrance to Chicago, and a new dock. There was still a balance from the year's operations, of $501,641 14.

In 1877-1878 the permanent expenditure account was reduced $3,816,675 40, leaving the charge to this account at $33,000,000, at which point it has stood for two years, the capital expenses being taken from current income.

The Branch Line, running south-west and west from Otto, has been extended to a junction with the Northern Division at Minonk, giving us a second independent connection between that Division and the Chicago Branch. As yet, the new line is not represented by bonds or other obligations beyond the $200,000 shown in the last annual statement.

16,000 tons, additional, of steel rails have been purchased, and, when laid, will complete in steel the entire original line.

The pressure of the business for the past year has made it necessary to order at least 500 more cars, and it will be the aim of the management to avoid restriction of traffic from want of rolling stock.

The operation of the New Orleans Line has been attended with absolute success. The 550 miles, from East Cairo to New Orleans, will have been entirely rebuilt the coming Autumn, the grades reduced to a maximum of 35 feet, the important bridges replaced with iron, the superstructure thoroughly renewed. Since the present management took possession, 49,000 tons of steel rails have been purchased, and the last of these will be laid the coming summer, following which, the running time from Chicago to New Orleans can be reduced to 36 hours. The renewals of this line have been chiefly derived from its surplus income, after paying current interest on all bonds prior to those issued under the new second mortgage. The interest on these last does not become a mortgage obligation until after December, 1882. No floating debt has been created in the course of thoroughly equipping this line for business. The traffic has greatly improved, amounting last year to $3,711,000. This year's income will supply the means necessary to make it a first class railway. Through traffic has increased so rapidly that, in view of delays occurring at East Cairo in the transfer to the Southern gauge, the management has several times reported the necessity of suspending the shipment of freight altogether. A change of gauge to correspond to that of the Illinois Central is imperative, and will be made this year.

The board has decided to enter into a plan reducing the fixed interest charge on the New Orleans Line, and offering to holders of all classes of bonds thereon a new 5 per cent Bond, to be dated the 15th of June next, and made payable in 1951; the Illinois Central holding of First and Second Mortgage Bonds to be exchanged into the new security. The like even exchange will doubtless be accepted by the holders of, say $5,-000,000 of 8 per cent Bonds to mature within the next five years, as well as by holders of the new Second Mortgage Bonds. Ultimately it is likely to be accepted by the old bondholders generally even before the maturity of their bonds, for the new security promises to command a premium beyond the current value of the early maturing 8 per cents. The Illinois Central Company remains the owner of $6,661,000 Bonds of undoubted security, and holds, also $6,670,000 in shares of the New Orleans Line, that is, two-thirds of the whole capital. The present traffic points to a return on the share capital which will be helped by the reduction of the interest charge.

The directors request the shareholders to note the fact that the investment in the New Orleans Line, valued on the books at $9,299,522 43, is the unincumbered property of this company. At some future day it may be deemed advisable to sell part of the bonds of that line, proportionately discharging the Illinois Central debt, which has already been reduced to $12,000,000. The accounts show the absorption, into a fund designated as the "Investment Fund," of the net Income surplus of 1880 and previous years, leaving the credit to that fund $5,395,089 50.

The board has under consideration the construction of a bridge across the Ohio River at Cairo.

Coupling Cars.

The business of making up railroad trains, and especially freight trains, where the old fashioned link and pins are used to connect two cars, is dangerous, and results in numerous accidents whereby the life and limb of brakemen and yardmen are placed in jeopardy. In fact, a large per centage of the railroad accidents that occur happen to the men engaged in coupling cars. It has been time and again suggested that measures could be taken that would avert most of these casualties, and several devices looking to this object have been originated. One of these, which has been found to be of practical value, has just been adopted by the Kansas Pacific Railroad, the Superintendent of which issues an order, that is to be stringently enforced, stating that "a supply of sticks for coupling cars, and belts for carrying the same, have been furnished, and all trainmen, yardmen, and others required to make couplings, must forthwith provide themselves with the same, and use them at all times when making couplings, in accordance with rule 28. Employes must be furnished with belts and sticks before put to work, and will be required to return them on leaving the service of the company. Failing to do so, the sum of $1 will be deducted from their pay." This is a humane movement on the part of the railroad that should be followed by every other railroad in the country. The cost to the railroads for supplying the necessary number of these coupling devices would be comparatively small, while the benefits derived would be very great. The present system of coupling freight cars is dangerous and disgraceful, especially in view of the fact that a safer mode is entirely practicable as well as inexpensive. The number of railroad employes annually maimed or killed while coupling cars is very large, and common humanity demands an immediate change to be made for the better protection of the life and limb of these employes.—[Rochester (N. Y.) Union and Advertiser.

Styles in Railroad Passenger Cars.

There is as much change in the style of railroad passenger cars as in house architecture or ladies, bonnets, and constant improvement in the fashion and quality of the work is insisted upon by managers of roads. At present the change of taste seems to be in the direction of inside finish. In the best passenger cars now made the old-fashioned elliptic window heads are replaced by a square finish—lighter woods like cherry and silver gray being substituted for black walnut, which is regarded as too heavy, and the old gilt mouldings are done away with, the natural grain of the wood being the only ornament. The baskets above are also made square, the metal being as nearly as possible of the same color as the wood finish around them. These improvements do away with the showy appearance of the interior of the old cars, but give an exceedingly rich and elegant effect. The head linings of canvas are also being to a great extent replaced by wood.—[Hartford (Conn.) Evening Post.

Ohio Central Railroad.

The Ohio State Journal says that it is proposed to extend the Ohio Central railroad from Corning to McConnellsville, a distance of seventeen miles, which will put Columbus in direct communication with the Muskingum Valley and a great district of valuable trade, and then adds:

The Ohio Central Railroad Company has proposed to extend its line to Malta, opposite McConnellsville, if the people of that place will raise a donation of $65,000, or a subscription to the stock of the company amounting to $85,000, and free right of way. If this is raised by the first of March they agree to put the road in operation by the first of October. The company is able to do just what they agree to do. This extension will put Columbus within three hours' ride of McConnellsville. The outlook is that the stock of the Ohio Central, already valuable, will be as valuable as that of any other road in the State, as the resources along its line are almost inexhaustible.

Northern Central Railway.

The following is a comparative statement of the gross earnings, operating expenses and net earnings of the Northern Central Railway for the month of December, 1879 and 1880:

	1880.	1879.
Gross earnings	$494,310 48	$414,598 98
Operating expenses	270,404 86	224,809 88
Net earnings	$223,906 12	$189,789 10

For the twelve months ending December 31, 1879 and 1880, the gross earnings, operating expenses and net earnings were:

	1880.	1879.
Gross earnings	$5,050,387 29	$4,107,948 82
Operating expenses	3,255,268 45	2,861,941 97
Net earnings	$1,795,118 84	$1,246,006 85

New York Canals.

The Annual Report of Hon. Silas B. Dutcher, Superintendent of Public Works, recently submitted to the Legislature, contains the following statement of the tolls and tonnage of the Canals during the past four seasons of navigation :

	Tolls.	Tonnage.
1877	$880,896	4,955,963
1878	993,848	5,171,320
1879	941,574	5,362,372
1880	1,155,257	6,462,290

The above statement shows an increase in the tonnage of 1880 over 1879 of 20½ per cent, and an increase in tolls over the same year of 22.7 per cent (a greater increase in tolls than tonnage) notwithstanding a greater free list, and a reduction of tolls on a few articles. Regarding the reduction of tolls the Superintendent says :

The reduction in tolls has reached a point beyond which it is not prudent to go much, if any, further. Any further reduction should be confined to merchandise from tide-water, giving every encouragement possible to the carrying of west bound freights, every ton of which secures a return of at least two tons by the same route, and every ton of westward bound freight driven to other routes carries with it two tons of eastward bound freight, to the detriment of our commercial interests.

The report states that the cost of ordinary repairs and operating expenses amounts to $740,366 12, and the total expenses, including extraordinary repairs, to $747,394 39, and then adds :

Owing to the condition of the banks and prism, locks, bridges, and other structures, the higher prices of material and labor, and the larger volume of business, the necessary repairs and the efficient operating of the canals have required a larger expenditure than during the previous year ; but it is pleasing to notice that while the total expenditures of this office for ordinary repairs have increased from $620,827 61 for the fiscal year ending Sept. 30, 1879, to $740,366 12 for the fiscal year ending Sept. 30, 1880, or about 19 per cent, the increase from tolls has increased from $907,479 96 to $1,183,352 74, or 30 per cent.

Of the $280,793, estimated by the State Engineer and Surveyor in March last to be necessary to put the canals in good navigable order, $115,000 was expended. On the subject of future competition with the Canadian Canals, Mr. Dutcher says :

With the completion of the Canadian canals at an early day, the competing power of the Erie Canal will be fully tested. Every improvement that can be made to add to its capacity and usefulness should be made promptly, and the revenues carefully husbanded and devoted to such improvement. The larger vessels on Lake Erie and the ocean, with such improvements as can be made in the Erie Canal and the best possible terminal facilities at Buffalo and New York for loading and unloading boats, coupled with a low fixed rate of harbor and commission charges at those ports, will help New York to maintain her commercial supremacy. The extraordinary increase in the productions of the country, and the still more extraordinary demand for our agricultural products abroad, coupled with the inability of the railroads to afford sufficient carrying facilities, demonstrate to our people more clearly than ever before the value of this great waterway.

The Superintendent recommends, as did his predecessors, that the Oneida Lake Canal be abandoned, as it is worthless for any practical purpose.

He calls attention to delays to navigation caused by the boats of the New York Steam Cable Towing Co., and recommends that the act permitting the introduction of this system of towing be repealed. He submits a report from R. D. Ford of Buffalo, and E. P. Roberts of New London, in which they refer as follows to the Steam Canal Boats :

We have watched with satisfaction the rapid growth into favor of the steam canal boats. Their increase in number is the best guarantee of their success. During the past year very many new ones have been added to the list, and from the whole number we can only mention one that is an injury to the canal. Great improvements have been made in the machinery of these boats, and they are rapidly becoming cheaper and better and must eventually supersede all other modes of transportation on the canals. It is our opinion that the State should, for the good of the canals, give them all the advantages possible to develop their abilities.

It is recommended by the superintendent that the provisions of law should be so amended by the Legislature that "in the advertising and letting of contracts for bridge work, all parties interested in the erection of bridges on different plans may have opportunity to propose for the same, to be afterward reported to, and subjected to, the approval of the Canal Board, thus encouraging competition and resulting in the construction of these structures at a large saving to the State."

Referring to the improvements which should be made in the canals, the Superintendent says :

With the average volume of business of the last few years, a little can be done each year under ordinary repairs to secure this desired result. Additional facilities of whatever character needed to maintain our commercial supremacy should be granted. We should strive not only to keep New York City the commercial metropolis of this great Nation, but to make her the metropolis of the world.

Personal.

Mr. M. E. Ingalls is the newly elected president of the Kentucky Railroad Company.

Mr. Gowen is reported as having left London for Naples to meet Mr. John W. Garrett, President of the Baltimore and Ohio Railroad Company.

Mr. Walter Kalte, Chief-Engineer of the New York, Ontario and Western Railroad, is arranging to put the entire uncompleted part of the line under contract.

President Evans says the lines of the Mutual Union Telegraph Company to Boston and to Philadelphia will be completed this month, and to Washington within sixty days.

Mr. Amos G. Hull, a prominent member of the New York Bar, read a valuable paper before the Medico-Legal Society, of this city, on Wednesday evening, on the legal interpretation of "Undue Influence."

Mr. F. W. Baldwin, for many years connected with the Central Vermont Railroad at St. Albans, Vt., has received the appointment of assistant superintendent on the Denver and Rio Grande Railroad.

Mr. Charles Crocker and party, upon their recent return from the terminus of the track of the Southern Pacific Railroad, were entertained by the City Council of Tucson, Arizona, during their stay at that city.

Mr. J. T. Dodge, civil engineer, in charge of the Yellowstone Divisiot of the Northern Pacific Railroad, is soon to make a report of his surveys in the Yellowstone Valley, which cover a distance of 800 miles, including preliminary and located lines.

Col. S. T. Suit is president of the new Washington City and Point Lookout Railroad Company. Construction work on this road was commenced last week, the constructors for which are Messrs. P. P. Dickerson & Co. of this city.

Mr. George L. Bliss is said to have negotiated a right of way for the Northwestern Railroad to the Black Hills, arrangements having been made with the Indians at Spotted Tail and Red Cloud Agencies. For a right of way 200 feet wide the price reported is $110 per mile.

Mr. Lewis E. Skinner, who has recently been appointed superintendent of the Little Miami division of Cincinnati and St. Louis Railroad, has been connected with that division in various capacities for more than twenty years, and his promotion is considered a well deserved recognition of merit.

Mr. Jas. E. Childs has been appointed general superintendent of the Ontario and Western Railroad, with headquarters at Middletown, N. Y. Mr. Theodore Houston is vice president and general manager, Mr, N. R. Hankins superintendent of the middle division and Mr. C. W. Lampher of the northern division.

Among the prominent railroad men stopping in New York during the past few days have been, Mr. H. Victor Newcomb, of Louisville, Ky., Mr. J. H Devereux president of the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company, and Mr. L. J. Seargeant of the Grand Trunk Railway of Canada.

Mr. W. S. Nell, who died in Selma, Ala., January 15th, in his seventy-eighth year, is said to have been the first railroad conductor in this country, having been one of the first employees of the Charleston and Hamburg (S. C.) Railroad. He was rigidly abstemious in his ideas and habits, it being said of him that he never touched tobacco in any form, tasted coffee or tea, nor drank a drop of spirituous, vinous or malt liquors until on his death-bed.

It is said of Messrs. W. H. & C. B. Stevens, owners of the Eastern Ohio Railroad, a little road eight miles long in Guernsey County, O., that in building the road they involved themselves financially, and that during the three years depression in business from 1874 to 1877, in order to prevent themselves from being sold out or making an assignment, they performed all the work necessary in operating and maintaining the road—one of them acting as engineer, the other as conductor, and both assisting in handling freight and repairing the road. They are now reported out of debt, with their road in good condition.

Imports and Exports of the United States.

From the report of the Chief of the Bureau of Statistics at Washington of the imports and exports of the United States, we learn that the excess of exports of merchandise, stated in specie values, was as follows: Month ending December 31, 1880, $51,483,844; month ending December 31, 1879, $21,277,042; the twelve months ending December 31, 1880, $192,846,407; the twelve months ending December 31, 1879, $251,557,029. The excess of imports of gold and silver coin and bullion was as follows: Month ending December 31, 1880, $75,764,154; month ending December 31, 1879, $5,877,822; twelve months ending December 31, 1880, $69,229,822; twelve months ending December 31, 1879, $67,375,960. The excess of the value of exports over imports of merchandise during the first six months of the current fiscal year amounted to $161,682,913.

20s Portrait of Alex. Hamilton.
50s Portrait of Benjamen Franklin.
100s Portrait of Abraham Lincoln.
500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

Counterfeit Note List.

HOW TO USE THE LIST.

All paper money in the United States is printed in sheets of four notes of one denomination on each sheet. Each bill bears a letter called the check letter, usually A, B, C or D, which appears on its upper left hand, and lower right hand corner. The notes are always numbered in their order on the sheets; thus all notes lettered A, will bear the number 1 or a number which divided by 4 will leave 1 remainder; the number accompanying B divided by 4 will leave 2 remainder, C, 3 remainder, D, no remainder. All genuine notes with letters A and C will have odd numbers, and all with B and D even numbers.

The counterfeiter makes his plate commonly from one bill and rarely prints more than one of the four letters. As soon as a spurious bill is discovered measures are taken to redeem all good bills of that denomination, bearing the same letter. This leaves the counterfeit alone in the field.

All bills bearing the letters given in the foregoing list should be refused by all non-experts.

We can assure our subscribers that there are no counterfeit bills on paper currency of the United States, which are known to the Secret Service Division at Washington at this date.

The National Bank notes printed in Italics are stolen and are worthless.

Banks starred do not exist, and the whole issue is fraudulent.

Kentucky Central Railroad.

At the annual meeting of the stockholders of the Kentucky Central Railroad Company, held at Covington, Ky., on the 25th ult., the report of the President was presented, from which we learn that the earnings of the road for the eight months ending with December, 1880, were:

From freights	$278,853 63
From passengers	143,105 28
From express	12,400 00
From United States mail	9,430 84
From other sources	3,288 96
	$447,078 21

The expenses for the same period were:

Road expenses	$82,317 62
Train expenses	79,952 01
Station & office expenses	51,490 68
Taxes	8,716 60
Loss and damage	1,954 48
Repairs	43,702 16
Renewals	35,328 21
	303,461 76
Net earnings	$143,616 45

In consequence of a change in the time for holding the meetings the report covers only a period of eight months, from May 1 to December 31, 1880. During five months of the time embraced in the report rates for transportation of freights and passengers were greatly demoralized, owing to the action of others over whom we had no control. This seriously affected the earnings, especially from freights. Another cause operated to lessen the freight earnings. Owing to an extensive failure of the wheat crop in the South, the crop in Central Kentucky was mostly sent South instead of North as heretofore. Yet, notwithstanding these unfavorable conditions, the books show an increase in the freight earnings compared with the earnings during the corresponding month of the preceding year of $6,737 67 and in the passenger earnings of $9,075 15.

Concerning the extension of the road South the President says:

The Louisville and Nashville Railroad Company has agreed to extend its Knoxville branch from Livingston, its present terminus, to the Tennessee State line, in the direction of Knoxville, and the Knoxville and Ohio road, which is now in operation from Knoxville to Caryville, has agreed to extend its line to a connection with the branch of the Louisville and Nashville Railroad. And the Kentucky Central has secured the privilege of connection and the right of traffic, substantially which it sought. To secure therefore, to the Kentucky Central the advantages of a direct connection with Knoxville, Tenn., and thence with Southwest Virginia, North Carolina and South Carolina systems of railroads, also with Atlanta, Ga., and all points in the South connected by rail with that important railroad centre, it is only necessary to extend its road to a connection with the Knoxville branch of the Louisville and Nashville road.

Dividend-Paying Mines.

The following table shows the number of dividend-paying gold and silver mines, dealt in at the New York Mining Exchanges, together with the amount of dividends paid, the date of the last dividend, etc.:

	Dividends paid.	Last Dividend.	Shares in Mine.	Last Div. p. c.

Tombstone, silver, Arizona	500,000	Jan. 1881	500,000	10

The California Northern Railroad, 28 miles in length, uniting Marysville with Oroville, was sold on the 22d ult. to N. D. Rideout for $40,000, under a decree of foreclosure issued from Department 7 of the Superior Court in San Francisco, September 6, 1880.

Organization.

The directors of the Columbus and Xenia Railroad Company, elected on the 27th ult., are: J. R. Swan, William Dennison, Henry C. Noble, Robert Neil, George M. Parsons, P. W. Huntington, Alfred Thomas, John W. Andrews, Henry Hanna, Charles P. Cassilly, R. A. Harrison and Thomas D. Messler.

The Rochester and State Line Railway Company has filed articles of reorganization to be known as the Rochester and Pittsburg Railroad, with a capital of $2,500 000.

Mr. Thomas D. Messler, of Pittsburg, has been elected a director of the Cincinnati and Newport Bridge Company to fill the vacancy in the Board caused by the death of Alfred Gaither. Mr. Messler was also elected President of the Company pro tem.

The Cincinnati, Van Wert and Michigan Railroad Company has been incorporated with a capital of $2,000,000. The office of the company is at Van Wert, Ohio.

The directors of the Grand Railway Company, recently elected, are: Wm. B. Sewall, John F. Osgood, John W. Leighton, George F. Williams, George Lewis. The officers are: President, John C. Pratt; Vice President, John D. Parker; Clerk and Treasurer, George Lewis. H. E. Sheldon was appointed agent by the board of directors.

Articles of incorporation were filed with the Secretary of State of Colorado on the 22d ult., of the New Mexico and Rio Grande Railway Company, with a capital of $1,000,000. The base of operations will be in Arapahoe County, Col., and in Socorro County, N. M. The principal office will be in Denver. The trustees of the company are A. P. W. Skinner, Joseph W. Riggs, B. S. Knowlton, Frank A. Robertson and Theodore F. Brown. On the same day articles were filed incorporating the Denver, Grand River and Utah, a company with a capital of $2,000,000 in $100 shares.

The Evansville and Seymour, and the Evansville, Seymour and Bellefontaine Railroad Companies have been consolidated. The new company will be known as the Evansville, Seymour and Bellefontaine Railway Company. The office of the company is at Seymour, Ind.

Amended articles of association of the Mitchel, French Lick and Duboise Railroad Company were filed in the office of the Secretary of State of Indiana on the 25th ult.

The directors of the Little Miami Railroad Company, elected on the 27th ult., are: A. D. Bullock, C. R. Cassilly, W. H. Clement, Julius Dexter, Henry Hanna, L. B. Harrison, H. J. Jewett, Joseph Longworth, Thomas D. Messler, Joseph H. Rogers, J. R. Swan, Louis Ballauf.

The Cincinnati Central Railroad Company—an organization which proposes to build a belt railway for connecting railways and also an elevated railway for rapid transit to the suburbs—opened its books on the 29th ult., and the stock was subscribed on the spot and 10 per cent paid in. The total capital is to be $1,000,000. Theodore Cook is President of the company.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (–) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

During the year ending January 25, 1881, 340 miles of track were laid on the Southern Pacific Railroad of California from Clara Grande, Arizona, to 35 miles east of Denning station, New Mexico. The junction with the Atchison, Topeka & Santa Fe Railroad at Denning will be effected about the 1st of March. The Southern Pacific Railroad is now built 50 miles southeast of this proposed connection, and the Atchison, Topeka & Santa Fe Railroad 100 miles southwest from San Marcial.

Statement of the Public Debt of the United States, February 1, 1881.

DEBT BEARING INTEREST.

Totals	$64,623,512 00	$323,117 56

Interest paid by United States, $49,528,566 66; interest repaid by transportation of mails, &c., $14,052,966 26; interest repaid by cash payments: 5 per cent net earnings, $658,198 87; balance of interest paid by United States, $34,820,401 53.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, January 31, 1881.

JOHN SHERMAN,
Secretary of the Treasury.

Blast Furnace Industry.

The relative condition of the blast furnace industry for the past five years is shown in the following condensed table of the furnaces in and out of blast on the 1st of January, 1877-'81:

Number of Furnaces in blast:

	1877.	1878.	1879.	1880.	1881.
Charcoal	73	79	79	93	160
Anthracite	87	98	96	165	162
Bituminous	84	86	82	126	151
Total	244	263	257	384	473

Number of Furnaces out of blast:

	1877.	1878.	1879.	1880.	1881.
Charcoal	209	189	180	146	112
Anthracite	136	128	130	67	76
Bituminous	123	132	123	80	68
Total	468	449	433	293	256

The Little Miami Railroad Company received from all sources during the year 1880, including rental from lessee, $686,875, paid 8 per cent dividends on its stock, and other items amounting to $668,816; and had a cash balance of $77,977 January 1, 1881. From the surplus fund $100,000 of bonds which matured January 1 have been paid.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, February 3, 1881.

The quotations for call loans in the money market is 5@6 per cent secured by stock collateral, and 3@4 per cent when the collateral consists of United States bonds. Time loans are 3½@4½ per cent, and prime mercantile paper is 4½@5 per cent.

The posted rates for prime bankers' sterling are 4.83 and 4.86; the actual rates are 4.82@½ and 4.85@½; cable transfers 4.85¾@4.86¼. Prime commercial bills are held at 4.80¾@4.81.

The Chicago and Alton Railroad Company have declared a semi annual dividend of 4 per cent on the preferred and common stock, payable March 1.

The St. Louis, Alton and Terre Haute Railroad Company have declared a dividend of 3 per cent on the preferred stock, payable February 19.

The following decision in reference to the assignment of registered Government bonds has just been rendered by the First Comptroller of the Treasury:

First—The owner of Government registered bonds inscribed in a fictitious name may by such name assign them to a bona fide purchaser.

Second—The Government, as a matter of strict right, is under no obligation to pay the holder of bonds fraudulently caused by him to be registered (inscribed) in a fictitious name.

Third—Bonds inscribed in a given name are presumed to be owned by some person of that name, and purchasers under one assuming to be owner under a fictitious name must, to secure a

transfer of registry or payment, first make clear proof of his ownership; second, of the good faith of the transaction; third, by bond indemnify the United States against loss or expense, and to pay any awful claimant; and fourth, furnish such other evidence and do such acts as may, under the circumstances, be practicable and reasonable.

Fourth—If bonds be inscribed in the name of one person, but purchased with the money of another, as between them a trust may arise, unless it be rebutted, by relationship or any other fact, in such cases questions may arise as to the power of courts of equity to give relief.

Fifth—The Government is not bound, even on notice of latent equities in bonds, to protect them, but may deal with the party holding in regular form the legal title.

Sixth—There may be cases in which bonds may so far disclose the character of a trust as to make it the duty of the Government not to permit transfers in violation of it.

Canadian Pacific Railway.

The annual report of the Canadian Minister of Railways states in reference to the Canadian Pacific that the line from the terminal point of the Canada Pacific Railway, near the eastern end of Lake Nipissing and Fort William, 650 miles in length, has been surveyed and measured for its entire distance. Between Prince Arthur's Landing and Fort William, a distance of six miles, communication has been obtained by the purchase of a line owned by a private company. From Fort William to Rat Portage the rails are laid for 171 miles from Thunder Bay. From Keewatin to Red River, 112 miles, the rails are laid over the entire distance. For a distance of sixteen miles, over and beyond Red River up to Victoria Junction, no line has been constructed. From Winnipeg, westward, the line extends past Portage la Prairie, on the Assiniboin, to the western boundary of the Province of Manitoba. The road is now in operation to Portage la Prairie, a point seventy miles west of Winnipeg, and the rails are laid to within a few miles of the western boundary of Manitoba.

Heating Railroad Cars.

Considerable complaint is being made to the Ohio Commissioner of Railroads, in regard to the manner in which the Ohio postal cars are heated. Section 3,351, Revised Statutes, relating to the manner of heating cars, was originally passed in the interest of what is known as the Winslow stove. These stoves are in general use in Ohio upon railroads. They rest upon a tank of water, which is expected to extinguish the fire in case of accident. The postal clerks admit that the principal of this stove is good, but assert that in practice it is not likely to work well, because no instance was ever known of any water being put in one of the tanks except for experimental purposes. The law compels railroad companies to invest in an expensive patent stove. But no provision is made for compelling the car porter to keep the reservoirs supplied with porter. In this way an additional expense is caused to the companies and no additional security furnished passengers. In fact if but a small quantity of water be placed in the tank its existence there is liable to prove a source of danger. If thrown upon a hot fire a large body of steam would arise which is more dangerous than the fire itself in a close car. It is suggested that the railroad companies should water their stock less and their stoves more if they are bound to carry the Winslow stoves any way. There was quite a racket in the Legislature over this matter last winter and the useless sections were repealed, but the stoves are still in use.—[Ohio State Journal.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for December, 1880, as compared with the same month in 1879, shows

An increase in gross earnings of	$93,903
An increase in expenses of	479,705
A decrease in net earnings of.....	$385,802

The twelve months of 1880, as compared with the same period in 1879, show

An increase in gross earnings of	$6,639,793
An increase in expenses of....	4,242,307
An increase in net earnings of....	$2,397,486

All lines west of Pittsburg and Erie for the twelve months of 1880 show a surplus over liabilities of $3,046,510, being a gain over the same period in 1879 of $1,422,870.

Philadelphia and Reading Railroad.

At a meeting of the Board of Managers of the Philadelphia and Reading Railroad Company, held in Philadelphia on the 29th ult., resolutions were adopted to the effect that, as the Musical Fund Hall cannot be engaged for the 14th of March next, and the Assembly Buildings can, it is resolved that the meeting of stockholders, to receive the annual report of the President and managers, to take such action in reference to the affairs of the company as may seem advisable, and to elect a President, six managers, Treasurer and Secretary, shall be held on Monday, March 14, at noon, at the Assembly Buildings, in that city, instead of the 7th of March, as fixed heretofore. In the notice of the call for the meeting the Secretary says: "With a view to avoiding all doubt, it is advisable that proxies shall be dated within three months of the date of meeting."

How to Preserve Your Paper.

With the opening of the year and the commencement of new volumes of periodicals considerable inquiry is made concerning the best way of preserving publications. A long felt want in this respect is met in Von Laer's Perfect Binder, which is equally well adapted to use as a temporary file or a permanent binding. By a very simple device requiring no needles and avoiding any mutilation of the sheet, each paper can be securely and readily fastened and as readily removed when desired without disturbing other copies. On the library shelf the binder has the appearance of a solid bound volume, and on the table or desk, for constant use, its compactness and convenience is equally shown. We have never found a more substantial and in all respects satisfactory method of preserving our paper for ready reference. The manufacturer of the binder is Mr. E. L. Lambie, 626 E Street, N. W., Washington, D. C.

The gross earnings of the Philadelphia and Erie Railroad Company for the month of December, 1880, were $281,918 73, the expenses, $168,510 63, and the net earnings, $113,408 10. The net earnings for the year 1880 were $1,869,379 35; for 1879, $961 549 74—increase, $407,829 61.

The Oregon and California Railroad commenced running regular passenger trains on the 24th ult.; and on the same day the narrow gauge railroad commenced running regular passenger and freight trains from Bay's Landing to Silverton and North Santiam.

Railroad Law.

CONTRACTS FOR LOCATION OF RAILWAYS AND STATIONS.

In a new country like ours, in which railways are every day being constructed, it is a very common thing for an individual to offer a company, projecting a new railway, a grant of land or a donation of money to induce a particular location of the route or of a station, and for the railway to accept the benefit subject to the condition. The public policy of such contracts has been considerably discussed in the courts. These contracts sometimes contain a condition prohibiting the company from erecting any other station within certain limits. The decisions are therefore to be ranked under two heads, first, those containing such restriction, and second, those not containing it.

In regard to the first we are not aware that there is any conflict of opinion. In Marsh v. Fairbury & Northwestern Ry. Co., 64 Ill. 414; S. C., 16 Am. Rep. 564, A. D. 1872, it was held that specific performance of a contract to locate a railway depot on plaintiff's land and at no other point in the town, would not be enforced. The court said: "The location of railroad depots has much to do with the accommodation of the wants of the public. And when once established, a change of affairs may require a change of location, in order to suit public convenience. We cannot admit that an individual is entitled to call for the interference of a court of equity to compel a railroad company to locate unchangeably its depot at a particular spot to subserve the private advantage of such individual. Railroad companies, in order to fulfill one of the ends of their creation—the promotion of the public welfare—should be left free to establish and re-establish their depots wheresoever the accommodation of the wants of the public may require." The plaintiff "must be left, for whatever remedy he may have, to his suit at law for damages."

In St. Louis, Jacksonville & Chicago Railroad Co. v. Mathers, 71 Ill. 592; S. C., 22 Am. Rep. 122, A. D. 1874, the same doctrine was applied in a suit to compel the reconveyance of land granted on condition that no stations should be built within three miles of a certain place.

In St. Joseph & Denver City Railroad Co. v. Ryan, 11 Kans. 602; S. C., 15 Am. Rep., 357, A. D. 1873, the agreement was to construct and maintain a station on the granted lands, and not have any other within three miles. It was held that an action for breach of this contract would not lie. The court say, among other things: "The public have a right to say that railroad companies shall not be permitted, though private corporations, to make any contracts which would prevent them from accommodating the public in the matter of transportation and travel. * * * Railroad corporations are, as we have seen, public agencies and perform a public duty. They are agencies created by the public with certain privileges and subject to certain obligations. A contract that they will not discharge, or by which they cannot discharge those obligations, is a breach of that public duty and cannot be enforced. * * * The number and location of the depots, so as to constitute reasonable depot facilities, vary with the changes and amount of population and business. A contract to leave a certain distance along the line of the road destitute of depots is in contravention of this duty." State v. Hartford & N. H. R. Co., 29 Conn. 538, cited in this case, is not in point, for that was a case where the road had been constructed to the terminus directed by the charter, namely, the navigable waters of New Haven harbor, and subsequently by agreement with another road its terminus had been removed from those waters and located a mile and a half distant at the station of the other road in New Haven. Mandamus issued to compel the running of trains to the original terminus.

The doctrine of the Ryan case was held, in such an action, in Williamson v. Chicago, Rock Island & Pacific Ry. Co., Iowa Supreme Court, March, 1880, 22 Alb. L. J. 29.

Second: But some courts have gone much beyond the doctrine of these cases, and have held that an agreement between an individual and a railroad company for the location of a depot at a particular place, in consideration of money or property, and without any restrictive provision, is against public policy, and void. Pacific R. Co. v. Seeley, 45 Mo. 212; Bestor v. Wathen, 60 Ill. 138; Fuller v. Dame, 18 Pick. 472.

The leading case seems to be Fuller v. Dame, 18 Pick. 472. This was an action on a note given in consideration of an agreement to locate a station on certain lands of the payee. The station was built accordingly, but the court held the note not enforceable because the agreement was against public policy. The court, by Shaw, C. J., said: "The work is a public work, and the public accommodation is the ultimate object. In doing this a confidence was reposed in them, acting as agents for the public—a confidence which it seems could be safely so reposed, when it is considered that the interests of the corporation as a company of passenger and freight carriers was identical with the interests of those who were to be carried—that is with the public interest. This confidence, however, could only be safely so reposed under the belief that all the directors and members of the company should exercise their best and their unbiased judgment upon the question of such fitness without being influenced by distinct and extraneous interests, having no connection with the accommodation of the public or the interests of the company. Any attempt, therefore, to create and bring into efficient operation such undue influence has all the injurious effects of a fraud upon the public, by causing a question which ought to be decided with a sole and single regard to the public interests to be affected and controlled by considerations having no regard to such interests. * * * It is obvious that if one large land-holder may may make a valid conditional promise to pay a large sum of money to a stockholder, or influential citizen, on condition that a work of great public improvement may be so fixed as to enhance the value of his estate, all other great land-holders may make like promises, on similar conditions, and great public works, which should be conducted with a view to the public interest, and to the just rights of those who make advances for the public benefit, would be in danger of being overlooked and sacrificed in a mercenary conflict of separate local and private interests."

In Bestor v. Wathen, 60 Ill. 138, the agreement was to build a station on some vacant lots where there was no town, with a view to building up a town there. The court said: "Rendered into plain English, the contract in this case was a bribe on the part of Wathen and Gibson to the president and other officers of the railway company, and to the contractors who were building the road, of an undivided half of one hundred and sixty acres of land, in consideration of which the road was to be constructed on a certain line and a depot built at a certain point. Now, if this was the best line for crossing the Illinois Central, considered with reference to the interests of the stockholders and of the public, then it was the duty of the officers of the company to establish it there; and if they intended so to do because it was the proper line, but professed to be hesitating between this and another line in order to secure for themselves the contract under consideration, as is somewhat indicated by the evidence, then they were practicing a species of fraud upon the defendants and using a false pretext in order to acquire defendants' property without consideration. If, on the other hand, this line was not the best, but was adopted because of this contract, the case is still stronger against complainants. If such was the fact, they are asking the court to enforce the payment of a bribe, the promise of which induced them to sacrifice their official duty to their private gain. If, as a third contingency, the choice lay between this line and another equally good, but not better, and they were influenced by this contract to adopt this line, then, although neither the company nor the public has been injured, yet the defendants have made their official power an instrument of private emolument in a manner which no court of equity can sanction. In this particular case no wrong may have been done, and yet public policy plainly forbids the sanction of such contracts because of the great temptation they would offer to official faithlessness and corruption." "The defendants in the court below filed a cross-bill, asking the court to cancel this contract as a cloud upon their title, and this was done. In the view we have taken of the case, the contract should be regarded as so far against public policy that neither party is entitled to the aid of the court. The defendants have entered into a contract, the effect, or at least the tendency of which, was to induce the complainants to commit a breach of duty." And it was held that it made no difference that a town was subsequently built up there.

In Pacific R. Co. vs. Seeley, 45 Mo. 212, Seeley agreed with the Pacific Railroad Company to deed it a certain lot of ground for purposes of speculation in consideration that the company would locate a freight and passenger depot on his land. The Massachusetts case was approved, and the court held that although in one sense the company was a private corporation, yet its chartered privileges were granted, in part, to subserve the public interests; that such an agreement might be superinduced by a prospect of mere gain, and thus the general welfare and good of the public might be sacrificed to subserve mere

private interests ; that for this reason such an agreement was against public policy and void.

Up to this point we conceive that there can be no difference of opinion. The first class of cases are clearly impolitic, and the second hardly less so. Indeed, the Massachusetts case is cited and approved in the Kansas case in the first class.

But there is a third class of cases, of which we have not spoken, namely, where a grant or donation is made to induce the location of the route or station at a particular city, town, or village, with no restriction, of course, against running to other like places. This is said by some to be distinguishable from the subservience of mere private and individual interests. Accordingly, contracts involving such circumstances have sometimes been upheld.

Thus, in C. B. R. Co. vs. Baab, 9 Watts, 458, it was held that "an agreement to pay an incorporated railway company a certain sum to induce the location of their route at a particular place is valid and binding, and may be enforced by action." The court there said: "To be allowed to do the best for the company's welfare by the use of every means not expressly interdicted is one of the conditions on which the stockholders subscribed their money, and it is one by which the public will not be found to suffer, for managers will doubtless have sufficient sagacity to see that the location which best serves the public is that which will give the company the greatest run of customers. It is most politic therefore to let such a company manage its affairs according to the dictates of its interests." The action was on a subscription paper signed by many inhabitants of Harrisburg to induce the company to cross the river at a certain part of the town.

In New Albany, etc., R. Co. v. McCormick, 10 Ind. 499, the action was on a subscription of stock conditioned that the railway should be located through Lafayette, and cross the Wabash river north of Brown street in that town. This was held valid.

In Jewett v. Lawrenceburgh, etc., R. Co., 10 Ind. 539, there was a subscription of stock conditioned that the road should be located within twenty rods of St. Omer. The subscription having been paid, and the condition not complied with, it was held that the money might be recovered.

In First National Bank of Cedar Rapids v. Hendrie, 49 Iowa, 402; S. C. 31 Am. Rep. 153, it was held that notes given in consideration that a projected railroad should be built to Council Bluffs rather than another place, were enforceable. The court said: "This court has sustained statutes authorizing taxes in aid of railroad corporations to be voted by the people, on condition that their roads were built through the town or township where the vote was had. Notes and contracts conditioned for the payment of money upon the completion of railroads to points indicated have been held to be supported by sufficient consideration." Citing two Iowa cases. This case was distinguished in the Williamson case, supra. The court admit that Holladay v. Davis, 5 Or. 40, is opposed to their view, but they are mistaken in the concession, for the court in that case expressly declined to give any opinion on the question, and based their decision on another point, namely, that the consideration moved to an agent and not to the principal.

We are inclined to think that the third class of contracts are not against public policy. They involve no sacrifice of public or private interests as do the first two classes. They simply involve a choice between two or more rival or conflicting public interests, and in making such a choice we can see no immorality in the acceptance of a benefit as the consideration of the decision.—[Albany Law Journal.

THE COMMISSIONER of Patents has submitted to Congress his annual report of the operations of the Patent Office for the year ending December 31, 1880, from which it appears that there was received during the year for patents copies of records or drawings, and from other sources, an aggregate of $749,685.32. The total amount expended was $538,865.17, leaving a balance of $210,820.15. On January 1, 1880, there remained $1,420,806.56 to the credit of the Patent Fund, which, added to the surplus of 1880, makes the amount to the credit of the Patent Fund on January 1, 1881, $1,631,626.71. The business of the office for the year is summarized as follows: Applications for patents for inventions, 21,761 ; applications for patents for designs, 634 ; applications for reissues of patents, 617 ; total, 23,012. Patents issued, 13,441 ; patents reissued, 506 ; patents expired, 3,781 ; trade-marks and labels registered, 533.

Of the 13,441 patents issued during the year 12,655 were to citizens of the United States, and 786 to foreigners. The comparatively small expenditure made necessary by the appropriations made by Congress has greatly embarrassed the proper and prompt dispatch of business.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending January 22d, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad ...	163,910	886,528	1,011,461
Schuylkill Canal....	.....	.....	38,041
Lehigh Valley	141,984	668,774	617 096
Del., Lack. & Western.	81,772	186.102	151.577
Shamokin Valley	19,409	51,972	49,488
Central New Jersey..	74,784	167,184	213,600
United R. R. of New Jersey	34,177	81,809	57,938
Pennsylvania Coal ..	18,475	50,346	36,218
Delaware and Hudson	67,007	150,120	228,240
Huntingdon & Broad Top Mt.....	7,018	26,177	22,300
Penn. and New York.	27,095	165,899	156.106
Clearfield, Pa.....	33,013	98,366	147,184

The Schuylkill Canal is closed for the season. The total tonnage of anthracite coal from all the regions for the week ending Jan. 22, as reported by the several carrying companies, amounted to 546,150 tons, against 424,510 tons in the corresponding week last year, an increase of 121,640 tons. The total amount of anthracite mined for the year is 1,222,432 tons, against 1,207,171 tons for the same period last year, an increase of 15,261 tons. The quantity of bituminous coal sent to market for the week amounted to 65,700 tons, against 87,146 tons in corresponding week last year, a decrease of 21,446 tons. The total amount of bituminous mined for the year is 215,596 tons, against 263,400 tons for the corresponding period last year, a decrease of 47,804 tons. The total tonnage of all kinds of coal for the week is 611,850 tons, against 511,656 tons in corresponding week last year, an increase of 100,194 tons, and the total tonnage for the coal year is 1,438,028 tons, against 1,470,571 tons to same date last year, a decrease of 32,543 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of January was 163,618 tons, of which 115,998 tons were coal and 47,620 tons coke. The total tonnage for the year thus far has been 329,478 tons, of which 230,045 tons were coal and 99,373 tons coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended January 22 were 20,275 tons, and for the year 79,172 tons—a decrease of 31,314 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 17,096 tons, year, 68,408 tons; decrease as compared with 1880, 31,265 tons. Chesapeake and Ohio Canal, none; decrease as compared with 1880, 2,584 tons. Pennsylvania Railroad—week, 3 179 tons; year, 10,764 tons; increase over 1880, 4,534 tons.—[Phila. Ledger, Jan. 31.

Interest and Dividends.

The Chicago and West Michigan Railroad Company has declared its first dividend of 2½ per cent, payable on the 15th of February.

The Columbus and Hocking Valley Railroad Company have declared a semi-annual dividend of 4 per cent, payable on the 10th of February.

The Pullman Palace Car Co. have declared a quarterly dividend of 2 per cent, payable on the 15th of February.

The Middlesex Central Railroad Company has declared a semi-annual dividend of $3 per share, payable on the 1st of February.

The New York, Providence and Boston Railroad Co (Stonington Railroad) has declared a quarterly dividend of 2 per cent, payable Feb. 10 at the office of Messrs. M. Morgan's Sons, 39 William street.

The Middletown, Unionville and Watergap (Penn.) Railroad Company has declared a dividend of 2½ per cent, making 6 per cent for the past year.

The thirty-seventh semi-annual cash dividend (3½ per cent) of the Illinois Central Railroad Company will be paid by the treasurer on and after March 1.

The general activity in American railroad enterprises and in Mexican railroad construction is giving the leading manufacturers of rolling stock and equipment about as much work as they can easily handle, and Philadelphia seems to be getting her full share of it. The extensive car wheel works of A. Whitney & Sons, of that city, in addition to their other important work under way, are busy upon a very large order for car wheels and axles for the Mexican National Railroad Company.

The stockholders of the Kentucky Central Railroad Company at their meeting on the 25th ult., authorized the directors to extend the road to connect with the Knoxville branch of the Louisville and Nashville railroad. It is proposed to extend the line either to Paris or Lexington. If

from Paris, 71 miles of new road would have to be built, at an estimated cost, including equipment, of $2,250,000. If from Lexington, the distance will be 53.3 miles, costing $2,100,000.

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of January, were:

ENTERED FOR CONSUMPTION.

	1880.	1881.

The figures given above represent the net gold value of the goods as invoiced, without the addition of freight or duty. The total, it will be noticed, is nearly $6,000,000 above that of last year.

Intercolonial Railway.

The report of the Canadian Minister of Railways for the year 1879-'80 contains the following information concerning the Intercolonial Railway:

The total length of the Intercolonial, including extensions and local branches, is 846½ miles. The purchase of the Riviere du Loup branch was effected on August 1, 1879, on the terms and conditions stated in last year's annual report. The purchase money—$1,500,000—has been paid to the Grand Trunk Railway Company, and by them has been applied, in accordance with the conditions of the purchase, towards the establishment of independent railway connection between Sarnia and Chicago. Works of repair were commenced on the Riviere du Loup section as soon as the transfer to the Government was made, and the expenditure for these repairs and improvements, up to June 30 last, amounted to $389,575 48. The total capital account at the close of the year 1879-80, in connection with the Intercolonial, amounted to $38,865 719 64, compared with $36,-317 705 04 for the year 1878-9. The expenditure on capital account, during the fiscal year ended June 30 last, was:

Halifax extension	$7,164 02
St. John Deep Water terminus.....	94,545 65
Construction of railway, old accounts.	23,931 67
Purchase of Riviere du Loup branch	1,500,000 00
Repairs and improvements on Riviere du Loup branch	369,799 00
Rolling stock on Riviere du Loup branch.....	19,795 47
Nut locks	32,797 83
Total	$2,048,014 60

The gross earnings for the year have been $1,506,298 48, being an increase of $212,198 79 as compared with last year's receipts, which were $1,294,099 69. The receipts from passenger traffic show an increase of $48,445 57 over those of last year. The returns of the freight traffic show an increase in the receipts of $161,995 65 over those of last year and an increase of 51,063 tons in the amount carried. The working expenses and receipts for the year ended the 30th June last were:

Total cost of working	$1,603,429 71
Total receipts.....	1,506 298 48
Loss on the year's operation...	$97,131 23
The cost of working the railway during the fiscal year 1879-80, inclusive of the Riviere du Loup branch, from August 13, 1879, making in all 840 miles, was.	$1,603,429 71
In 1878 79 the cost of working the 714 miles then in operation was $2,010,183 82, less $163 396 08, the balance at debit of steel rails renewals, suspense account, 1878.	1,841,787 19
Showing a difference in favor of working the longer line in 1879-80 over cost of working the shorter line in 1878-79 of....	$238,357 48

Of the McCalmont brothers, who own so much Reading stock, and who are now carrying on proceedings in the Philadelphia courts, there are two: Robert, who must be near eighty years of age, and Hugh, some eight years younger. They are of Irish extraction. The founder of the family, the father of Robert and Hugh, was a poor County Antrim boy who went out to the West Indies and there, by contracts during the war, acquired a large fortune. Returning to his native county, he built the family seat of Abbeylands, within a few miles of Belfast, on the Lough. Robert married the sister of Earl Cairns, the late Lord Chancellor, and has no children. When Disraeli became Premier in 1868, on the retirement of Lord Derby, he at once offered the great seal, held by Lord Chelmsford, to Sir Hugh Cairns, then Lord Justice of Appeal, who declined it on the ground that he had not sufficient fortune to support a peerage. Hearing this, his brother-in-law, McCalmont, sent for him and, saying "Let that be no obstacle," settled on him £30,000 a year. Hugh is unmarried. There was a third brother, James, much younger than either, who died in 1849, and left two sons: Hugh, a distinguished young officer, a major of the 7th Hussars, late military attachee to the English embassy at Constantinople and A. D. C. to Sir Garnet Wolseley in the Zulu war; and James, late a captain in the 8th Hussars, who is A. D. C. to Earl Cowper, Lord Lieutenant of Ireland. They are both heavy holders of Reading. The McCalmonts had a first cousin in this city, a linen agent, Hugh Barklie, who married a daughter of Mrs. Washington Costa and died a few years since.—[The Hour.

Track laying has commenced on the Cincinnati Southern extension from Boyce Station to Chattanooga. It is believed that the company will be able to run their trains from Cincinnati to Chattanooga over their own line in a few weeks. It now uses the Western and Atlantic line from Boyce to reach Chattanooga. Track laying has also commenced on the Cincinnati Southern railroad extension to the Tennessee river, where a wharf and movable platform is being built.

The Denver and New Orleans Railroad Company have filed articles of incorporation, their object being the construction of a railroad from Denver to connect with the Texas Pacific, Houston and Texas Central and Rio Grande extension of the Missouri, Kansas and Texas Railroads in Texas. The capital stock is $10,000,000.

NEW YORK, February 1, 1881.

THE THIRTY-SEVENTH SEMI-ANNUAL CASH dividend of the Illinois Central Railroad Company, on its entire share capital, being THREE AND A HALF (3½) PER CENT thereon, will be paid by the undersigned March 1, 1881, to shareholders as registered at 2 p. m. on the 11th inst., after which and until the 4th March, the transfer books will be closed.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

ESTABLISHED IN 1831.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

The First Successful Railroad Projector.

COL. JOHN STEVENS AND HIS EFFORTS TO INTRODUCE RAILROADS SEVENTY-FIVE YEARS AGO—THE OPPOSITION ENCOUNTERED AND SUCCESS ACHIEVED—HIS REMARKABLE ESTIMATES AND PROPHECIES AND THEIR WONDERFUL FULFILLMENT.

While the idea of introducing railroads for general transportation purposes was first being conceived many sore disappointments were experienced by those venturesome enough to advance their theories in opposition to the prejudice of the time. The few advocates of railroads seventy-five years ago were ranked among the wildest of visionaries, and their theories fell upon closed ears or indifferent minds. Mr. Oliver Ames of Philadelphia, who nearly a hundred years ago conceived the idea of applying steam power to carriages, met with the most discouraging rebuffs in trying to advance his theories, and after most valuable service in paving the way for others received but a meagre reward for his untiring labors in behalf of public interests, for in his own day there seemed but faint promise of the practical utilization of his ideas that the world has since witnessed.

Following Mr. Ames came others working for a similar purpose, but without the power or enterprise to awaken a general public interest in the matter, and it was left to Colonel John Stevens, a resident of Hoboken, N. J., to prove himself, what may be called, our first successful railroad projector. At least this little can be given him from the standpoint of his being the first man interested in railroads to have the rare privilege of living to witness the realization of his plans and the fulfillment of his prophecies. In such a marked degree was this true that of him more rightly perhaps than of any other man could it be said that he was the father of our railroad system. While it cannot be said of him that he was the first one to suggest the use of steam power upon railroads, to his sagacity and enterprise can be attributed the first correct estimate of the advantages of railroads and the adoption of means to demonstrate the same.

Col. Stevens after having given much time to the study of the subject, in the gathering of statistics concerning inland transportation and facts in regard to construction expenses, about the year 1810 presented the subject of constructing railroads in this State to the people of New York. Of course with him the matter was all a theory, but it was a theory founded on close observation and sound reasoning, and abundant objections were found to it by such prominent men as Gouverneur Morris, Robert L. Livingston and DeWitt Clinton. He failed to gain the approval of the State Commissioners of internal improvements but felt by no means discouraged respecting the final success of the project. His chief desire was to have the National Government interested in the matter, and he considered it, in every point of view, so exclusively an object of national concern that he would give no encouragement to the embarking of capital in it by private enterprises, until after he had ascertained that Congress was not disposed to give much attention to it. His request for Government assistance was the first appeal that had been made to the National Treasury in behalf of railroads, and in its modesty probably set the example which has been so peculiarly followed in kindred appeals of later date. He wanted two or three thousand dollars to try the experiment either in Washington or in New York.

He addressed a circular to the public in 1812 to prove the superiority of railroads and steam carriages over canal navigation, and in it he quoted a short passage from President Madison's message to the Senate and House of Representatives which may be considered perhaps as the first public recognition ever given by a President to railroads. But President Madison was very cautious in the matter and alluded to improved facilities for internal communication as being worthy of consideration. Some of the prophecies made in this circular, in as much as they were wholly based on theory, are remarkable. In regard to the rate of speed possible of attainment Col. Stevens said: "It is probable that it may not in practice be convenient to exceed twenty or thirty miles per hour. Actual experiments however can alone determine the matter and I should not be surprised at seeing steam carriages propelled at the rate of forty or fifty miles per hour." Among his many other suggestions was the one that sails might be used to advantage on the cars at certain times if desired, an idea which had evidently occured to him from reading accounts of the Chinese applying sails to their wheel barrows when the wind was favorable, to assist them in carrying farm products to market. It was from this suggestion that sails were actually used on cars in the early days of the Baltimore and Ohio railroad.

About 1820 Col. Stevens addressed a memorial to the Pennsylvania Legislature recommending a communication between the waters of the Ohio and those of the Delaware by a railroad from Pittsburg to Philadelphia. Though no immediate effect came from this yet it was not long before he saw several railroad projects started and with them the coming of his reward. We have not the date of Col. Stevens death, but in 1832 he was living in New Jersey, a venerable gentleman then, but much interested in railroads still. He did much to encourage the construction of street railroads in this city at that time and the early files of the JOURNAL contain valuable correspondence from him on this and other subjects. One of his great desires had been to see America adopt railroads, with steam locomotion, before England should take the matter up. In this he was disappointed but in every other respect he enjoyed the height of a successful projector's pleasure in seeing in his own country, in his ripe old age, the realization of his ideas and the vindication of his long labored for theories.

The Government and the Pacific Railroads.

Ex-Governor Leland Stanford in his recent letter on Railroad Regulation, says: So far from the aid of the Government being sufficient to build the Central Pacific Railroad, I can say, because I know whereof I speak, that every dollar derived from the loan of the Government credit went into the construction of the railroad, together with a large amount derived from the other resources of the company, and had the company developed and created no more business than existed when the roads

were commenced, we would never have heard of such wild statements as those of Judge Black, because the roads would long since have passed into the hands of their creditors. It is susceptible of easy demonstration that the work of grading the first 150 miles of the Central Pacific Railroad from Sacramento eastward was more than would suffice to grade the road for a single track from the Rocky Mountains to the Hudson river. These Pacific roads have, in their construction and in their operation, redeemed every promise and every hope that the public entertained. Never have they failed in a single obligation to the Government, and they have done their business at rates far below those which at their inauguration were thought possible. They have largely opened up to settlement and development the greater portion of the territory of the United States. They have created vast property interests for others, and in doing so they have found their own benefit. They are prosperous roads, and their stockholders are in possession of a valuable property which has been created by their construction, and which had no prior existence. In conclusion, gentlemen, allow me to say that maximum rates determine the possibilities of minimum rates; that maximum rates have enabled railroads to develop to the extent that they have the vast resources of the country; that the railroads, in opening up new countries, adding new industries, conferring additional facilities for the interchange of commodities, and bringing the buyer and seller close together, have furnished and do furnish labor for the common welfare far beyond other agencies. The reduction of rates under the plea of regulation is a great blow to the laboring man who produces, and to the laboring man who consumes. In my opinion any reduction scarcely goes to the benefit of the many, but to that of the comparatively few and comparatively wealthy, who occupy the positions of middlemen between the producer and the consumer. This question of transportation is of an importance that prevents its being settled excepting upon just and correct principles.

English Railroads.

Since 1874 the net earnings of the five great passenger lines of England have advanced from 3.41 to 3.97 on the aggregate capital, while on principal mineral lines these earnings have decreased from 5.34 to an average of 4.82 per cent. As to the deaths of passengers, these have been reduced by one half, the number of accidents having been diminished by one-third, while the number of trains have increased 11 per cent since 1874. "Fraser's Magazine," in reviewing the whole problem of railway safety, insists that this can be solved only in one way, by means of the staff or permit, which insures that only one engine shall be on the same section of a line at a given time. But by this method the amount of work is very small. "For the passage of trains over the same line, in the same direction, at a different rate of speed, no absolute rule of safety exists, although the efficient working of the block system produces an approach to safety." The danger incurred depends on the ratio between the different rates of speed. Forty miles an hour is the time on the London and Northwestern Railway, with mineral trains running at 15 miles. As the latter must get out of the way of the former there are sidings every 7½ miles. When, in 1840, the London and Birmingham Road was opened, 28 trains daily were all that were required. The load of the passenger train was 40 tons, and the merchandise train 98 to 99 tons. The passenger speed was 25 miles an hour, the merchandise 20. Since 1875 over this same road 127 trains ran, passenger trains being of 257 tons, speed from 25 to 40 miles an hour, while the mineral or merchandise trains are of 540 tons, with a speed from 15 to 20 miles. Of course this work is now done partly on three and four lines. As is well known, the profits of a road carrying passengers is much larger than that derived from an exclusive mineral or merchandise road. For instance, the Metropolitan Railway carries a traffic of £36,600 per mile, and the Metropolitan District of £34,000, which makes each engine on the respective lines earn in the one case £12,000 and in the other £10,000, while on some roads, doing exclusively a freight business, the annual earning of an engine is only £2,000.

Northern Pacific Railroad.

General Adna Anderson, chief engineer of the Northern Pacific Railroad, is reported by the St. Paul Pioneer Press as saying that, all things considered, the trip he recently made over the line of that road was not an unpleasant one. He started with a squad of six men from the end of the track of the Missouri division September 3, which at that time was 21 miles beyond Green river, and just seven weeks thereafter reached the end of the track of the Pen d'Oreille division, which was then 25 miles east of the mouth of Smoke river. The road was then graded 130 miles further east or about 50 miles from Lake Pen d'Oreille. The last 300 miles he made on horseback, being accompanied by three men.

General Anderson said that he found the line a good deal better than he anticipated. He explored a new pass called Priest's Pass, which had lately been discovered, and found it to be a most favorable one for crossing the mountains. He has now three surveying parties in the field—one about 350 miles west of Glendive Creek, another 50 miles west of Helena, and the third seeking a route across Bitter Root Mountains. He said that through Montana there was a good agricultural country, but that irrigation would have to be employed in its cultivation. In Washington Territory there is a large area of country never visited by rain or snow, where excellent crops of grain are raised without resort to irrigation. The grading of the Yellowstone division west of Glendive Creek is being energetically pushed, there having been little interruption on account of cold weather, and he feels confident that the road will reach Miles City by next July, and that the entire line will be completed in three years.

General Manager Sargent states that the first installment of the 500 tons of new rail to be delivered this winter has arrived and been sent to the front, as will the remainder as soon as it comes forward, and that track laying will be vigorously resumed as soon as spring opens. The company has increased its orders for equipment to be delivered in the spring to 800 new freight cars.

Land Commissioner Powers states that already he is receiving daily applications for lands in Montana, both from persons living in that Territory and others intending to become colonists. The company has contracted with Mr. Hamilton, of St. Louis, for a new large ferry boat, to cost $20,000, and to be completed by April 15, 1881. This boat will be employed in the transferring of construction material across the Missouri river at Bismarck. Although track laying on the extension of the road west of the Missouri is now suspended, a sufficient amount of construction material has been delivered at the end of the track to give employment to the working force for a month or two next spring, should there be any interruption in the forwarding of additional material in the meantime. The end o the track is less than 40 miles from the Yellowstone river, and the line will be completed to that stream as soon as the weather will permit in the early spring. One hundred thousand ties, which were cut at the headwaters of the Little Missouri, have been purchased by the company. Five thousand tons of rails are now being delivered along the line of the extension.

Duluth and Vermillion Railroad.

Articles of incorporation of the Duluth and Vermillion Railroad Company were filed with the Secretary of State of Minnesota on the 28th of January. The object of this company is the construction of a standard-gauge railroad from Duluth, thence to some convenient point on or near Vermillion Lake, and thence to some convenient point at or near the northern boundary of Minnesota. The amount of capital stock is $1,500,000, in 15,000 shares of $100 each, to be paid in from time to time upon instalments of not less than 5 per cent. upon calls authorized by the Board of Directors. The indebtedness is limited to $1,500,000. The members of the corporation are Geo. C. Stone, R. C. Mitchell, Wm. R. Stone, J. E. Knowlton and T. L. Blood, of Duluth, and A. De Graff and C. A. De Graff, of St. Paul, who are also the Board of Directors. The road is intended to develop the iron interests of the country it will penetrate. Parties are now engaged in making a thorough exploration of the territory to be reached by the road. The distance from Duluth to Vermillion Lake northward is eighty miles on an air line, but by road it will be about one hundred miles. The articles of incorporation were filed for the purpose of applying to the Legislature for a grant of swamp lands in aid of the construction of the road, which latter will depend entirely upon the result of investigations that will be made and concluded during this and the next year.

According to the Report of the Commissioners of Railroads and Telegraphs of the State of Ohio, the number of miles of single track railroad in the State on the 30th of June, 1880, was: main line 5,256.10, branches 392.52—total, 5,648.62; double track 244.76, third rail 31.84, sidings 1,117.13—total rail in Ohio, 7,102.35 miles. The increase of main line, including branches, over 1879 is 877.58 miles. The increase of sidings is 89.92 miles. The total increase of rail laid during the year in Ohio is 1,045.83 miles.

New York, Saturday, February 12, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

GOVERNOR JARVIS and the State Geologist of North Carolina have astonished people who seem not to have given the subject much thought heretofore, by facts concerning the ores of that State. It is not a little astonishing that while thousands of tons of iron ore are brought from Africa every year, and carried inland by rail to furnaces 450 miles from the coast, so little has been done to utilize the almost inexhaustible quantities of better or equally valuable ores to be found in several counties of North Carolina.

A SYNDICATE represented by General Burt has been formed in Boston which, it is said, will use $35,000,000 in securing a through line from Boston to Oswego and Buffalo, via the Hoosac Tunnel. A controlling interest in the Boston, Hoosac Tunnel and Western Railway and the consolidation of that road into one corporation with the Syracuse, Chenango and New York Railroad, the Mohawk and Lake Erie Railroad and the Troy and Saratoga Springs Railway, will form an independent through line to the Lakes. A construction company with a capital of $10,000,000 has been formed to carry out the enterprise.

AN illustration of what railroads have done to reduce the prices of necessaries of life and to establish a uniformity of valuation in our various market centres, can be found by a glance at the widely differing prices of articles fifty years ago in cities where now the quotations of one are almost identical with those of another. In the winter of 1832, New York and Philadelphia, having no railroad facilities, were paying twelve and sixteen dollars a cord for wood for fuel, while in Baltimore the prices quoted were five and six dollars; an advantage given to Baltimore by the opening of the Baltimore and Ohio Railroad a year and a half before.

A SYNDICATE is announced as having agreed to advance $3,000,000 to pay the Atlantic, Mississippi and Ohio Railroad Company's defaulted interest provided the different towns through which the road passes give up one half of the stock held by them, which proposition has been accepted. Messrs. Jay Gould and R. T. Wilson are mentioned among the prominent members of the syndicate. The importance of the movement will be appreciated when it is remembered that this road in connection with the Selma, Rome and Dalton Railroad and the Vicksburg and Meridian Railroad will form a through line from Shreveport, La, to Norfolk, Va., that Shreveport is the terminus of the Texas Pacific Railroad and that Mr. Gould has recently purchased the Vicksburg, Shreveport and Texas Railroad.

THE consolidation of the Western Union, the American Union and the Atlantic and Pacific Telegraph Companies which has been the engrossing subject of discussion for the past three weeks in financial circles has been completed. Messrs. Hamilton McK. Twombly and C. W. Chapin have retired from the Western Union directory; Gen. Eckert has been made general manager in the place of Gen. Anson Stager, who retired after a long service and Messrs. Jay Gould, Russell Sage and Gen. Eckert have been elected directors. Mr. Gould announces that the new company has now under contract through the new cable company recently organized at Albany, the laying of two cables between this country and England early in the coming summer. It is planned, also, to lay cables, connecting at Cuba with the present system, to other West India Islands and to Brazil and other parts of South America, as well as from San Francisco to China, Japan, Oceanica and Australia with a northern line by way of Puget's Sound to Alaska and Northern Asia, connecting in Kamschatka with the Russian system. It is said that since the consolidation was effected $10,000,000 have been subscribed to carry the new cable connections into effect.

JUST what the theory which prevents the New York pilots from using steam in their boats consists of is hard to comprehend, but the elements of a ridiculous prejudice and an exasperating old fogyism are evident enough in it. The legal power of the commissioners to suspend the licenses of five pilots who were enterprising enough to introduce into our pilot system the use of a steam pilot boat seems to have been strongly supported by the decisions of two of our Judges, but this fact makes the theory involved seem none the less detrimental to commercial interests. There was a time fifty years ago when much arguing was necessary to convince fossilized and bigoted minds that some advantage might accrue from substituting steam for horse power on railroads. It would seem, though, that there ought to be no need of presenting arguments to-day concerning the desirability of at least allowing pilots an opportunity for demonstrating here, as it has been plainly demonstrated abroad and at some points on our own coast, that steam can be used to advantage in the peculiar requirements of their branch of navigation. The reliability of the power, the speed to be attained by it and the accuracy made possible by it for estimating capacity for reaching certain points in certain periods of time would seem alone to be sufficient to place steam power for pilot boats in the position of a necessity. Reasons could be multiplied to an unlimited extent for removing any prejudice the tendency of which is to check the natural advancement in methods of navigation and the operations of which cannot be favorable to securing the highest safety in ocean travel or the perfection of pilotage demanded by those who carry large marine risks and by general commerce. The Pilot Commissioners may be acting justly under the law and light afforded them; but if that is the case then they seem to be burdened with a decidedly queer law and a very inferior light for this kind of a century.

The First Southern Railroad.

A charter was granted for the Charleston & Hamburg Railroad in January, 1828, and the books opened in the following March, and though but a small portion of the stock was taken the company was organized at that time and measures were taken for commencing work upon the undertaking. In the winter of 1828–'29 an experimental line of survey was executed and in the winter of 1829–'30 the route was fixed under the engineering management of Mr. Horatio Allen. In the meantime a section of three or four miles was constructed and put into operation. Gradually more confidence was felt in the enterprise as doubts and fears previously existing were overcome by demonstrations in England of the feasibility of railroads, but it was only by the greatest exertion that the subscription to the capital stock was increased in August, 1830, to $600,000. The affairs of the company then assumed a promising aspect and the work of construction was rapidly pushed. In the construction of this road wood alone was used, with the exception of a flat bar of iron which was fastened to the surface of the rails, in accordance with a method of rail making just gaining popularity

at that time. Piles were driven into the ground on each side of the path, for what we now call a road bed was then simply a path for the horses which furnished the motive power, and on the top of the piles and at right angles with the path were placed sleepers. The rail of wood with the iron surface was six by ten inches square. It was considered a desirable method of construction at the time but the builders must be credited with realizing its temporary character, for it was a part of the plan to rebuild at a future period using more permanent materials at a much less expense. At the opening of the year 1832 the Charleston and Hamburg Railroad Company had about twenty miles of its proposed one hundred and thirty five in operation, and later in the same year was offering inducements to American inventors to supply locomotives of home manufacture.

Massachusetts Railroads.

From the report of the Massachusetts Railroad Commissioners for the year ending September 30, 1880, we learn that the aggregate capital stock was $118,736,871 58, a net increase, compared with the previous year, of $347,932 70; resulting from the increase of the Old Colony of $400,000, the Massachusetts Central of $359,366 80, the Nantasket Beach, $79,689 62, and the Boston, Revere Beach and Lynn of $800; being a gross increase of $839,856 42; and from the decrease of the Lee and New Haven—dropped from the list—of $86,923 72 and of the Springfield and Northeastern, consolidated with the Boston and Albany, of $405,000, making a total decrease of $491,923 72.

The net debt of the companies—the gross debt less cash assets—amounts to $59,172,620 25; an increase of $3,417,102 19.

The following additions, in round numbers, have been made to the gross debt: New York and New England, $3,700,000; Fitchburg, $590,000; Massachusetts Central, $480,000; New Haven and Northampton, $500,000; and New London Northern, $750,000. On the other hand, the cash assets of all the railroad companies of the State have increased to the amount of $1,545,403 43.

The total gross income of the year of all these corporations is $35,140,374 77, an increase of $4,827,410 23; being an increase of over 15 per cent, equalling the net decrease for six years ending with 1879.

The total expenses—including rents paid—of all the corporations amounted to $23,948,559 24, an increase of $3,789,608 56.

The net income was $11,191,815 53, making an increase of $1,037,801 67, or over 10 per cent. The average amount earned per mile on the eight roads of standard gauge terminating in Boston was $12,079 70. The cost of operating per mile of road is, with two exceptions, the lowest for the last eight years, and only one year has a lower percentage of operating expenses to gross receipts.

The total amount of dividends paid amounted to $5,987,718 64. The amount paid last year was $5,254,431 78, an increase of $723,286 80. Of the sixty-three corporations thirty-two paid dividends varying from 1 to 10 per cent.

During the year 284,698 miles of steel rails were laid, against 179,840 miles last year. The increase in the number of locomotives has been 33 during the year, of passenger cars 61, and of mail and baggage cars 2,477.

Organization.

The Virginia Midland Railroad Company was organized at Alexandria, Va., on the 1st inst., by the election of J. S. Barbour as President and the following Board of Directors: C. G. Holland, of Danville; Charles M. Blackford, of Lynchburg; R. A. Coghill, of Amherst; William H. Payne, of Fauquier; John T. Lovell, of Warren; John W Burke, of Alexandria; Robert T. Baldwin, J. Wilcox Brown, Robert Garrett, Osmun Latrobe, James Sloan, Jr., F. M. Keyser, John K. Cowen, and William F. Ferick, Baltimore.

Articles of incorporation of the American Cable Construction Company were filed at Trenton, N. J., on the 1st inst. The incorporators are: Denis Doren, Wager Swayne, Solon Humphreys, G. P. Morosini and A. F. Calif. The capital of the company is fixed at $1,000,000, and the company is empowered to lay ocean cables around the world. The officers are: Denis Doren, president; G. P. Morosini, treasurer; and A. F. Calif, secretary.

The directors of the Huntingdon and Broad Top Mountain Railroad Company, elected on the 1st inst., are: President, B. A. Knight; Directors, R. Wilson, I. Devereux, J. V. Williamson, J. Long, James Whittaker, J. H. Trotter, D. J. Morrell, W. P. Jenks, C. W. Wharton, S. Field, Thomas R. Patton and Jacob Naylor.

At the annual meeting of the Providence, Warren and Bristol Railroad Company, held at Providence, R. I., on the 31 ult., the following directors were chosen: Samuel W. Church, T. P. J Goddard, William Robeson, Henry A. Whitney, William Goddard, Francis M. Weld and A. E. Burnside.

Telegraphs.

The Central and South American Telegraph Co. filed articles of incorporation at Albany, N. Y., on the 1st inst. Capital, $5,000,000. Their lines are to run from New York to Texas, thence to Mexico, and thence to South America. Jonathan Edwards, Jas. A. Scrymser and Alfred Pell, all of New York, are the stockholders.

The International Telegraph Company held their annual meeting at St. Johnsbury, Vt., on the 1st inst., and re-elected their old board of officers, as follows: Franklin Fairbanks, President; W. P. Fairbanks, Treasurer; J. W. Henderson, Clerk; Horace Fairbanks, Franklin Fairbanks, W. P. Fairbanks, Calvin Morrill, George W. Henderson, Waldo Brigham and O. S. Bickford, Directors.

The Central America Submarine Telegraph Company has been organized in Paris to connect Central America with the United States and Europe, with tributary land lines from Balize to Cuba, Spain having granted concession therefor. England offers to guarantee for twenty years the payment of £1,000 annually as the proceeds of Government telegrams to and from British Honduras. The capital of the company is £120,000.

A charter was issued on the 1st inst. at the State Department, Harrisburg, Penn., to the Mutual Union Telegraph Company, formed for the purpose of doing a telegraphic business in that and other States. The capital stock for Pennsylvania is $50,000.

Telegrams has been received in this City announcing the completion of the Texas-Tampico section of the Mexican Telegraph Company's cable. It is expected that the Vera Cruz section will be laid in a few days.

Trademarks.

By direction of the Secretary of the Interior, the Commissioner of Patents issued, on the 4th inst., an order annulling all interference proceedings in trade-mark cases, and directing all applications for registering lawful trademarks to be granted in the order in which they are filed. This decision grew out of an application of J. B. Braun & Co., of Baltimore, to register the picture of a bull as a trademark for smoking tobacco. The registration was opposed by Blackwell & Co., of North Carolina, who claimed the exclusive right to the trademark and denied the jurisdiction of the Commissioner of Patents. The Commissioner decided that he had jurisdiction to declare an interference between the parties, and Blackwell appealed to the Secretary, who decided that the Commissioner of Patents had no jurisdiction in the premises, and directed him to annul the interference proceedings. The Secretary gave the Commissioner directions, however, to continue to receive trademarks for registration on a fair notice to parties that certificates issued therefor convey no legal rights.

The Eames Vacuum Brake Co. have issued a pamphlet which will be of great interest to railroad men, as it gives a detailed history of the long contested suit of Westinghouse against Eames for alleged infringement of air brake patents. The effect of giving to the public so authoritative an account of the suit will do much to establish among the patrons of the Eames Vacuum Brake Company the strength of the position held by the proprietors of this valuable brake. The pamphlet can be obtained at the New York office of the company, 15 Gold St. The motive for its publication is given in the pamphlet as follows: "We think it only just to ourselves and of the greatest possible interest to the railroad public, to make known the fact, that the Westinghouse Air Brake Company's claim to a monopoly in the use of pressure brakes, is not supported by any final decision of the Courts, notwithstanding the number of suits brought to sustain the patents on which the supposed monopoly is based."

The Lake Shore and Michigan Southern Railway Company have contracted for 55 new locomotives, 1,750 cars and a large number of passenger coaches, involving the expenditure of $2,000,000. The company will also construct a second track on the Western division of its road.

It is stated that a survey is being made of a route for a railroad from Point Pleasant Station on the West Jersey Railroad, to Ocean City. The crossing of the thoroughfare will, it is said, be between the mainland and beach.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

Counterfeit Note List.

HOW TO USE THE LIST.

All paper money in the United States is printed in sheets of four notes of one denomination on each sheet. Each bill bears a letter called the check letter, usually A, B, C or D, which appears on its upper left hand, and lower right hand corner. The notes are always numbered in their order on the sheets; thus all notes lettered A, will bear the number 1 or a number which divided by 4 will leave 1 remainder; the number accompanying B divided by 4 will leave 2 remainder, C, 3 remainder, D, no remainder. All genuine notes with letters A and C will have odd numbers, and all with B and D even numbers.

The counterfeiter makes his plate commonly from one bill and rarely prints more than one of the four letters. As soon as a spurious bill is discovered measures are taken to redeem all good bills of that denomination, bearing the same letter. This leaves the counterfeit alone in the field.

All bills bearing the letters given in the foregoing list should be refused by all non-experts.

We can assure our subscribers that there are no counterfeit bills on paper currency of the United States, which are known to the Secret Service Division at Washington at this date.

The National Bank notes printed in Italics are stolen and are worthless.

Banks starred do not exist, and the whole issue is fraudulent.

Production and Coinage of the Precious Metals.

The production of the United States for 1880, including about $3,000,000 from Mexico and British Columbia, amounted to $80,167,936, a gain of $4,818,435 over 1879. The production of gold aggregated $38,522,182 in 1880, against $32,539,920 in 1879, and of silver $40,005,364 against $38,623,812.

Colorado leads the list as a producer, advancing in the past four years from fourth to first place, and producing in 1880 $21,284,989 against $14,418,515 in 1879.

There has been very little variation in the production of California for the past four years, the aggregate never falling below $18,000,000 and never reaching $19,000,000. Last year the production aggregated $18,276 166, an increase of $75,193 over 1879.

Nevada's production has fallen off until it is little more than one-quarter of what it was in 1877, declining from $51,580 290 in 1877 to $15,031,621 in 1880.

Utah makes a record of $6,459,956, about $1,000,000 more than in 1879, and is fourth on the list of producers.

Arizona is fifth, its actual yield being about $1 500,000, against $1,900 000 in 1879.

Dakota produced in 1880 $4,123,081; Montana $3,822,379; Idaho, $894,747; Oregon, $1,059,641; New Mexico, $711,300; and Washington, $105,104.

The world's stock of gold in 1492, when America was discovered, is estimated at 26,500,000 ounces, of silver at 326,000,000.

A summary of the world's production from 1492 to 1848 shows a total of 160,000,000 ounces gold and 4,800,000,000 ounces silver; and, from 1849 to 1880 there were produced 171,443,750 ounces gold and 2,293,290,000 ounces silver. Estimating the annual loss from abrasion and total destruction at one tenth of one per cent, the present stock amounts to 318 443,750 ounces gold and 6,667,290,000 ounces silver.

Of the total production of the world to 1848, the United States contributed 1,000,000 ounces gold, or less than 1 per cent of the world's supply at that date. The production of gold in the United States from 1848 to date aggregates 75,127,587 ounces, or 44 per cent of the world's production during this period, and the production of silver aggregates 340,310,545 ounces, or 14 per cent of the world's production.

The stock of gold and silver in the United States at the close of 1880 was $650,543,682, of which $486,683,049 was gold, and $163,860,632 silver.

The total coinage executed in the United States from the organization of the mint (1793) to the close of the fiscal year ended June 30, 1880, was: Gold, $1,133,103,322; silver, $292,333,486 90; minor, $13,283,167 05. The coinage executed at the mints of the United States during 1830 was: Gold, $62,283,279; silver, $27,409,706 75; minor, $391,895 95; total, $90,084,881 70. The coinage of gold in the United States reached its maximum in 1851, when $62,613,492 50 was coined. The average coinage of gold during the past ten years was $39,000,000 per annum. The coinage of silver reached its maximum in 1877, when $28,549,935 was coined. The silver coinage during the past six years amounted to $141 207,951, or nearly one-half of the entire amount turned out since the mints were organized.—[Bullion Annual for 1880.

Indiana, Bloomington and Western Railway.

In answer to inquiries from stockholders the Secretary of the Indiana, Bloomington and Western Railway Company says:

It is proposed in the consolidation, which will be effected March 15, that the present stockholders shall receive two shares of the new company's stock for each one of the old. It is intended to have the new road finished by Oct. 1, in time for the fall business.

The earnings and expenses of the road for the calendar year, Jan. 1, 1880, to Jan. 1, 1881, are as follows:

Gross earnings		$1,196,418 58
Operating expenses, taxes and rentals		669,053 36
Net earnings		$527,363 22
Interest charges	$192,000	
Six per cent on income bonds	90,000	
		282,000 00
Net surplus		$245,363 22

—or 9¾ per cent on the $2,500,000 of capital stock.

With the large through business accruing from the completion of the new road, and the lease of the Cincinnati, Sandusky and Cleveland Railroad, it is believed that the net earnings will be largely increased.

THE Secretary of the Treasury on the 7th inst. issued a circular suspending for the present the decision made some time ago by the Treasury Department to the effect that plate-iron, imported from foreign countries, in which holes were wrought or punched, shall be appraised as a manufacture of iron not otherwise provided for in the tariff laws, and pay a duty of 35 per cent ad valorem. On plate iron without being thus prepared with holes the prescribed duty is $25 per ton, which is equivalent to about 60 per cent ad valorem. Manufacturers and dealers in iron have frequently protested against the ruling of the department on this subject as being unjust and inconsistent. They have repeatedly directed attention to the act that, under this decision, foreign manufacturers of plate-iron have been enabled to evade the higher rate of duty, the application of a little labor prior to exportation thus depriving the Government of the proper rate of duty, and at the same time withholding from American mechanics a certain amount of labor that would otherwise come to them in the preparation of iron plates for riveting.

Philadelphia and Long Branch Railroad.

This road, which will be operated under the auspices of the Pennsylvania Railroad Company, commences at Whitings, and runs due east, on the south side of Toms River, direct to Barnegat Bay, across which it will pass on a trestle bridge, 7,000 feet long, to Sea Side Park; thence north along the beach to Manasquan (Squan) Inlet, twelve miles below Long Branch. The new road will be thirty miles in length. Trains from Philadelphia will pass over the Camden and Burlington county road to Pemberton, and the Pemberton and Sea Shore to Whitings, at which point the new road begins, the entire distance from Philadelphia to Manasquan Beach being 55 miles, and over which it is said express trains will run in one hour and forty minutes. The new road will pass Bay Head, Point Pleasant and one or two other less prominent watering places on the Atlantic coast. The road, it is expected, will be completed in time for the coming summer travel.

Delaware and Hudson Canal.

The following is an official statement of the profit and loss account of the Delaware and Hudson Canal Company for the year 1880:

Receipts from coal		$7,402,543 39
Receipts from railroads		4,679,485 90
Miscellaneous and interest		448,569 89
		$12,524,549 68
Less expense of all kinds		7,913,507 04
Gross profits		$4,611,042 64
Taxes, interest and rentals		3,259,619 93
Net earnings		$1,351,422 71

Or 6¾ per cent on capital, as against a deficit of $630,643 28 in 1879.

It is expected that the New York and New England Railroad Company will have its extension from Waterbury, Conn., to Brewsters and connection with the New York and Harlem Railroad completed by March 1st. It will reach the Hudson River at Fishkill about two months later completing the line from Boston to New York by way of Providence, Waterbury and Brewsters. The road will prove of great value to certain parts of Connecticut where travel has been heretofore largely dependent upon stage lines. Mr. C. P. Clark, now in Europe, who was formerly general manager, has been invited to that position again.

The Phœnix Packing and Rubber Company, 112 Liberty street, this city, are having a large demand for their rubber packing, the merits of which have been fully demonstrated by a great variety of uses to which it has been put. It is adapted to all kinds of engines and both hot and cold water pumps, and other points of superiority are found in its being self-lubricating, non-frictionable, very pliable and durable. It is manufactured in all sizes, in rope form, from 1-16 inch to 3 inches, varying by 1-16 inch, and is put up in coils of 25 to 150 lbs. for shipment.

Contracts have been let for the construction of 84 miles of the Denver, Western and Pacific Railway, commencing at Denver.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Personal.

—General Grant is about starting on another extended trip through Mexico.

—Mr. Charles Francis Adams is going to Arkansas Hot Springs, for treatment for rheumatism.

—Mr. C. W. Sturtevant, Commissioner of the Board of Trade of San Francisco, has gone to Mazatlan to study Mexican commerce.

—Mr. Henry McFarland, treasurer of the Union Pacific Railroad Company, thirty years ago was assistant to the chief clerk of the Concord Railroad Company at a salary of $340.

—General Malone, president of the Atlantic, Mississippi and Ohio Railroad Company has been in New York during the past week or ten days, negotiating in behalf of that road.

—General Manager D. W. Caldwell of the Terre Haute and Indianapolis Railroad Company has issued the following order: The road from Richmond to Logansport, and Bradford Junction to Logansport, will be under the supervision of Mr. J. F. Miller, Superintendent of First Columbus, Chicago and Indiana Central division, from this date. Mr. Ralph Peters is appointed Superintendent, vice Mr. J. Hill. He will have charge of the road from Logansport to Chicago, and to State line.

—General Anson Stager in his letter of resignation as Vice President of the Western Union Telegraph Company says: "My official connection with this company commenced in the year 1851, when its capital was $300,000, operating 600 miles of wire and but twenty offices. I have been in service without interruption to the present time, and I now retire with the highest regard and personal esteem for its executive officers." In accepting this resignation, the Executive Committee passed resolutions complimentary to General Stager, and continuing his salary for the term for which he was elected, which expires next October.

Chesapeake and Ohio Railway.

We have it from a reliable source that Hon. C. P. Huntington, President of the Chesapeake and Ohio Railway Company, has agreed upon the terms and conditions for the construction of the extension of that road from Richmond to Newport News, a distance of sixty-five miles, with Mason, Shanahan & Hoge, and McMahon & Green, the well known Virginia contractors. It is the purpose of the contractors to at once commence operations, and push the work to completion by the first of July, the time stipulated. By that time the western connections of this great improvement will have been finished, and the way opened for direct communication between the seacoast over the Chesapeake and Ohio Railway to the West, Northwest, Southwest, and Pacific slope, constituting one of the great continental lines of American. At Newport News extensive arrangements are making for the improvement of that terminal point on the road—the plot of a city is being perfected; the wharves are being constructed in the most comprehensive and durable manner, and everything that large experience, sagacity, and ample means can do is being done preparatory for the immense business that it is expected will be accommodated when the connections east and west have been consummated.—[Valley Virginian.

Pacific Railroad Land Grants.

The Auditor of Railroad Accounts has submitted to the House of Representatives at Washington, through Mr. McLane, of Maryland, for the use of the Committee on Pacific Railroads, an elaborate report showing the quantity and value of the public lands heretofore granted by Congress to aid in the construction of the Pacific Railroads which have not vested in said roads by the terms of the several laws granting such lands, and the quantity and value of said lands which have vested in said roads, how the same have been disposed of, at what price, and also, how the proceeds of the same have been disposed of; also, the cost (in detail) of the construction of completed road, and the estimated cost (in detail) of the construction of road necessary to be built in order to complete the said railroads in accordance with the requirements of law; also the cost, or estimated cost, of construction of any and all railroads built, or proposed to be built, parallel or adjacent to the said railroads, whether or not the same are located on the line or lands reserved by any of the said granting acts of Congress, etc., etc. After quoting the laws relative to the respective roads and referring to their present status, the report concludes with the following recapitulation:

Items.	Northern Pacific.	Union Cent. Routes.	Atlantic & Pacific.	Southern Pacific.	Texas Pacific.	Total.
Acres land granted if all received	57,920,000	41,458,924	51,840,000	11,967,486	18,000,000	181,196,412

* Also 1061 miles unsubsidized.

From the recapitulation it will be seen that there remain "unvested," by reason of non-construction of the respective railroads for which grants were made, the following lands: Northern Pacific, 27,500,000 acres; California and Oregon, 1,781,632 acres; Atlantic and Pacific, 15,868,150 acres; Southern Pacific, 4,757,824 acres; Texas and Pacific, 12,000,000 acres.

A Board of Commerce has been organized at Denver, Col., and will at once urge making Denver a port of entry, and the building of the Denver and New Orleans railway. The Denver Western and Pacific railway, it is expected, will be open to Longmont by July 1.

The surveyors of the new railroad, which it is proposed to construct between Buffalo and Toledo, have reached Conneaut, Ohio.

American Railroad Journal.

Financial and Commercial Review.

The money market is easy with 5 per cent the ruling rate for call loan on stocks, and 3@4 per cent on United States bonds. Time loans are 3 to 5 per cent. Prime mercantile paper is 4@5 per cent.

The posted rates for prime bankers' sterling are respectively 4.82½@4.83 and 4.85½@4.86. The actual rates are 4.82@¼ and 4.85¼. Cable transfers are 4.85½@4.86. Prime commercial bills are 4.80½@¾

The authorities of the Stock Exchange have listed the following additional securities: $564,000 7 per cent first mortgage bonds of the St. Louis, Jacksonville and Chicago Railroad Company, and $360,000 second mortgage 7 per cent bonds, and $188,000 second mortgage 7 per cent bonds, guaranteed, of the same company; $1,000,000 6 per cent bonds of the Chicago, Milwaukee and St. Paul Railroad Company, Chicago and Pacific Division; $450,000 7 per cent bonds, the same railroad, of the Hastings and Dakota Division; $6,000,000 6 per cent general mortgage bonds of the Wabash, St. Louis and Pacific Railroad Company, and $960,000 6 per cent coupon bonds of the State of Alabama, of the issue of February, 1879; $3,000,000 of new 6 per cent sinking fund subsidy gold bonds of the Panama Railroad Company.

In the Massachusetts House of Representatives on the 7th inst., Dan. A. Gleason, Treasurer, and Charles R. Ladd, Auditor Commissioners of the Boston, Hartford and Erie Sinking Fund, submitted their annual report. The amount of the

fund, as stated by the report for 1879, was $1,141,991 31; its amount at the end of the year 1880 was $1,231,677 85. Except $245,827 85 in cash this sum is invested in city, town and State bonds.

The closing quotations on Thursday were: Adams Express, 128@130; American Express, 69@70; American District Telegraph, 70¼@70½; American Union Telegraph, 79@80; Atlantic and Pacific Telegraph, 47⅛@47¾; Canada Southern, 84⅛@84¼; Central of New Jersey 96@96¼; Central Pacific, 89⅛@89⅜; Chicago and Northwestern, 129⅜@129⅝; do. pref., 142⅛@142¾; Chicago and Alton, 149@150; Chicago, Burlington and Quincy, 173@178½; Chicago, Milwaukee and St. Paul, 114⅝@114¾; do. pref., 124¼@125½; Chicago, Rock Island and Pacific, 185½@186; Columbus, Chicago and Indiana Central, 25⅝@26⅞; Cleveland, Columbus, Cincinnati and Indianapolis, 86@86½; Hannibal and St. Joseph, 52⅝@53; do. pref., 105¼@105½; Illinois Central, 135½@135¾; Lake Erie and Western, 57⅛@57¼; Lake Shore and Michigan Southern, 129⅛@129⅝; Michigan Central, 119@119¼; Metropolitan Elevated, 120¼@120½; Manhattan Elevated, 42⅛@42⅜; New York Elevated, 127¾@128; New York, Lake Erie and Western, 48⅛@48¾; New York, Ontario and Western, 42⅝@42¾; New York Central and Hudson River, 147⅛@147⅜; Ohio and Miss., 44⅛@44⅝; do. pref., 103@106; Pacific Mail, 56⅛@56⅝; St. Louis, Iron Mountain and Southern, 60⅞@61; St. Louis, Alton and Terre Haute, 47⅛@48; do. pref., 130½@131; Union Pacific 119¾@120; United States Express, 57@58; Wells Fargo Express, 117@118½; Western Union Telegraph, 117⅞@118; Wabash, St. Louis and Pacific, 48@48¼; do. pref., 88⅛@88¼.

New York Canals.

The Canal question in New York would be, in the absence of the speculative mania, almost a National question to-day. It is exciting the Legislature, and taking up the more thoughtful part of the press. The New York canals brought seventy millions of bushels of grain from the West to New York last year, and five thousand boats, employing fifty thousand men, equipped these canals. The railroads, however, hate the Erie Canal, because it lowers their tolls. Horatio Seymour's son is the State Engineer, and he is following the policy of De Witt Clinton—to deepen and enlarge the Erie Canal and make it a steamship water course.

The Canadians are spending $30,000,000 to complete their steamship canal system, in addition to $20,000,000 formerly spent, and by 1884, vessels of 1,800 tons can go from Chicago to Montreal and Europe without breaking bulk, an advantage of four hundred miles over New York. Engineer Seymour wants the banks of the Erie Canal raised one foot, which would give another foot depth of water, and allow each boat to carry fifty tons of wheat or cattle more than now, at a cost of only $1,000,000. By supplying steam to the locks there will be a saving of thirty seven hours in passing through the canal, which would give one round trip the season more to each boat. He also proposes to charge nothing to boats carrying their westward freight of merchandise, etc., so that they can take that reduction off the price of transportation for wheat eastward. By the Constitution of New York, however, no more money can be spent on the canal in any one year than the receipts were the year preceding, and tolls last year were less than $1,200,000.—[Gath to Cincinnati Enquirer.

Chicago, St. Paul, Minneapolis and Omaha Railway.

The following is an official statement of the mileage of the different divisions of the road of this company:

Eastern Division—Elroy to St. Paul, 198 miles; River Falls branch, 12 miles; Menominee Railroad, 3 miles; Stillwater branch, 4 miles.

Northern Division—N. Wis. Junction to Cable, 120 miles.

St. Paul Division—St. Paul to St. James, 122 miles; Blue Earth branch, 44 miles.

Sioux City Division—St. James to Sioux City, 148 miles; Sioux Falls branch, 98 miles; Black Hill branch, 44 miles; Rock River branch, 28 miles.

Nebraska Division—Covington to Omaha, 126 miles; Niobrara branch, 16 miles.

Total, 953 miles.

The bonds of the different divisions are as follows: Chicago, St. Paul and Minneapolis 1st mortgage, $3,000,000; Chicago, St. Paul and Minneapolis land grant, $118,000; North Wisconsin 1st mortgage, $800,000; St. Paul and Sioux City 1st mortgage, $6,100,000; Hudson and River Falls 1st mortgage, $125,000; St. Paul, Stillwater and Taylors' Falls 1st mortgage, $334,800; Chicago, St. Paul, M. & O. Consol 1st mortgage, $4,185,000—total, $14,662,000.

The capital stock of the company is as follows: common, $13,565,200; preferred, $9,615,600—total, $23,180,800.

Northern Minnesota Railroad.

The charter of this company is an old one, and has only recently passed into the hands of New York capitalists. At a meeting of the executive committee held at No. 23 Fifth Avenue on the 4th inst., B. S. Henning was authorized to contract for the necessary ties for the first hundred miles of the road, and also steel rails for the same. It is the intention of the management to push the road as rapidly as possible from a point on the Northern Pacific Railroad west through Dakota Territory to the Black Hills, making, when completed, a line of road about 600 miles in length. The proposed line is looked upon as one of the best of the new lines of the North-west, passing through Otter Tail, one of the most productive counties of Minnesota, and then west through the celebrated wheat district of Dakota. The following is the list of Directors: Frederick Billings, Hugh J. Jewett, Austin Corbin, A. B. Cornell, A. H. Barney, Johnstone Livingstone, B. P. Cheney, Robert Harris, and B. S. Henning.

—The New York, New Haven and Hartford Railroad Co., is testing the Eames patent brake and coupler on one of its fast trains. The large locomotive owned by the company which manufactures the brake will be used one way, while another engine which is being fitted with the necessary machinery will be used to take the train back. The peculiar feature of the brake is that if one or more cars become detached from a train while in motion it acts automatically and stops the detached cars. It is also claimed that in case of an accident the Eames brake will prevent the telescoping of cars, because the brake, whether connected with the engine or disconnected, acts on each car separately and independently.

Railroads of Maine.

The Commissioners of the State of Maine, in their 22d Annual Report, about to be issued, say that all the railroads are not only safe but that most of them have been greatly improved. On the main line progress seems to have been the order of the day. The continued remarkable exemption from serious accident bears unmistakable evidence of the ability and efficiency of the management.

One new road (Old Orchard Beach) has been built during the year, from the Old Orchard Depot on the line of the Boston and Maine Railroad, to the Saco River, a distance of three miles. The total number of miles of railroad now operated in Maine is 1,030.08.

The New Brunswick Railway has changed ownership during the year and the company intends to change the gauge from 3½ feet to the standard gauge of 4 feet 8½ inches, fully repair the road and extend it to a connection with the Riviere du Loup Railway, and thus open a line to Quebec. Of the Bangor and Piscataquis Railroad, as the distance from its present terminus to Moosehead Lake is only thirteen miles, the Commissioners hope to see it completed to that point at an early day.

The faulty construction of the European and North American Railroad has been considerably improved. This road has the advantage of being the only railroad communication between the East and West, and its usefulness must increase with the facilities it offers for transportation.

The Maine Central Railroad company designs to put their road in the best possible condition to secure the safe and rapid transit of passengers and freight, and to fully provide for the constantly increasing traffic. The past season has taxed the resources of this road to the utmost. During the year 2,000 tons of steel rails and 45,000 ties or sleepers have been laid upon the road. Twenty miles of track have been ballasted and raised, and two and one-half miles of new side track built.

While criticising the manner in which the Sandy River Narrow Gauge Railroad was constructed, they do not want to be understood as considering the road unsafe, "as it is not, the company having made marked improvement since they received it from the contractors."

The Indianapolis and Ohio State Line and the Indianapolis and Eastern Railroad Companies have completed their organization. The former elected C. W. Fairbanks President, C. E. Henderson Treasurer, and Henry Diehl Secretary. The Indiana and Eastern elected J. D. Campbell President, C. W. Fairbanks Treasurer and H. C. Diehl Secretary.

Mr. Wm. H. Vanderbilt has purchased the Manhattan market property in New York, which was burned a short time ago, ostensibly for railroad purposes. The price paid was $37[illegible],000.

Lehigh and Wilkesbarre Coal Co.

The large interest held by the Lehigh Coal and Navigation Co. in the stock and securities of the Lehigh and Wilkesbarre Coal Co. will cause the following statement of the financial condition of the latter company to be read with interest. It comes from a reliable source:

Total capital stock outstanding		$8,700,000
Prior lien bonds (bearing 6 per cent interest—$264,000)	$4,400,000	
Prior lien bonds (bearing 7 per ct. interest—$22,400).	320,000	
Consolidated bonds (bearing 7 p. ct. interest—$805,000)	11,500,000	
Income bonds (bearing 7 per cent interest—$248,710)	3,553,000	
Total interest, $1,340,110, and bonded debt		19,773,000
Total debt and capital		$28,473,000

Connecticut and Passumpsic Rivers R. R.

The earnings of this road for the years ending June 30, 1879 and 1880, were:

	1879.	1880.

From which has been paid—		
Interest on bonds	$130,610	
Dividend February, 1880	38,592	
Dividend August, 1880	51,456	
	220,658 00	
	$5,481 81	
Interest received by treasurer	16,100 02	
Leaving a balance of	$21,581 83	
Add surplus from previous year	105,398 34	
Making a total of	$126,980 17	
Paid for 200 freight cars	118,150 00	
Leaving a surplus of	$8,830 17	

Compared with the previous year the gross earnings show an increase of $118,405 95, with an increase in the expenses of $106,960 66, making an increase in net earnings of $6,445 29. The report says:

There has been laid in the track during the year, 1,600 tons of steel rails, 412 tons of new iron rails, and 40,920 new sleepers; 5,856 rails have been repaired and relaid.

The track is greatly improved from last year, and is now in better condition than ever before.

One thousand four hundred tons of steel rails, and eight tons of iron rails more than last year have been laid in the track, and all charged to current expenses.

We think that a liberal amount of steel rails for the year, chargeable to current expenses, would have been 1,000 tons. The extra 600 tons of steel rails, the forty new cars built at shops, and the six iron cars purchased, cost about $51,825, which, taken from the amount charged to expenses, would leave the net earnings $277,964 81, instead of $226,139 81 as the account is made up, and is equivalent to two per cent on the stock.

The opening up of business on completion of the Montreal, Portland and Boston Railroad to Longueil, and the completion of the South-Eastern Railroad to Sorel, together with the contract made with the Portland and Ogdensburg Railroad (Vermont division) in October last, rendered it imperative on us to make a large increase to our freight cars, in order to accommodate the increase of business; and in addition to the forty cars built at our shops, we purchased two hundred freight box cars of the Wason Manufacturing Company of Springfield.

These cars have all been delivered, and are in service. We now find that our supply of cars is not up to the requirements of the road. These two hundred cars cost $118,150, and have been paid for from the former surplus of earnings, $105,898 34, added to this year's surplus of $21,581 83, leaving the surplus of earnings now on hand, $8,830 17.

You will see from this that we have been able to add two hundred and forty new freight cars to our equipment without increasing our construction account or incurring a debt. Our present floating debt is entirely for amount expended in obtaining and completing the Montreal, Portland and Boston Railway, which is now operated and controlled by the South-Eastern Railway, and we are now receiving interest monthly on all the money expended in that road. The present floating debt is $313,008 57; to offset which we have good notes on which we are receiving interest at six per cent, $319,006 86.

There have been built at the company's shops at Lyndonville, 35 box and 5 butter cars at a cost of $20,825, and 6 second hand iron freight cars purchased at a cost of $2,100, also one first class passenger car at a cost of $3,500—all of which has been charged to the current expenses for operating the road. The equipment of the road now consists of 28 locomotives, 14 passenger, 9 mail and baggage, 440 box, 380 platform, 100 stock, 9 saloon, 2 boarding house and 3 crane cars, besides the necessary number of snow ploughs, gougers, gravel, wood, push and hand cars.

The number of miles run by passenger trains was 259,643; by freight trains, 184,858; by wood and gravel trains, 5,077—total, 449,078, against 422,076 in 1879.

The number of passengers carried in 1880 was 156,934, against 135,494 in 1879; and the number carried one mile 6,174,878, against 4,400,575.

Tons of freight carried, 219,604, against 136,115; tons carried one mile, 13,670,452, against 8,574,448.

BALANCES, August 25, 1880.

New York, Lake Erie and Western R. R.

The gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of December, 1879 and 1880 were:

	1879.	1880.
Gross earnings	$1,398,244 55	$1,726,788 16
Working expenses	1,048,476 65	1,229,605 55
Net earnings	$349,767 90	$497,182 61

—showing an increase in gross earnings of $328,543 61, in working expenses of $181,128 90, and in net earnings of $147,414 71.

From October 1 to December 31, inclusive, the gross earnings, working expenses and net earnings were:

	1879.	1880.
Gross earnings	$4,627,777 06	$5 424,035 90
Working expenses	3,004,085 32	3 294,743 86
Net earnings	$1,623,687 74	$2,129 292 04

—showing an increase in gross earnings of $396,258 84, in working expenses of $290,654 54, and in net earnings of $505,604 30.

Interest and Dividends.

The North Pennsylvania Railroad Co. have declared a quarterly dividend of 1½ per cent (less five per cent for the contingent fund), payable February 25.

The Delaware Division Canal Company has declared a dividend of one dollar per share, payable February 15.

The St. Louis, Alton and Terre Haute Railroad Company have declared a dividend of 3 per cent on the preferred stock, payable February 19.

The Chicago and Alton Railroad Company have declared a semi annual dividend of 4 per cent on the preferred and common stock, payable March 1.

The Detroit, Lansing and Northern Railroad Company has declared a dividend of 3½ per cent, payable Feb. 15.

The Ontario Silver Mining Company has declared its regular monthly dividend of fifty cents per share for January, payable Feb. 15 at the office of Wells, Fargo & Co., No. 65 Broadway.

Railroad Law.

COTTER VS. THE FRANKFORD AND SOUTHWARK RAILWAY CO.

A failure of a railway train to stop on signal does not justify a boy of twelve years of age in jumping upon the cars while in motion.

An invitation to jump upon the train by one not in charge of the train, or authorized by the company, does not render the company liable.

Sur rule for new trial.

Opinion by ELCOCK, J. January 22d, 1881.

This action was to recover damages for injuries sustained by a boy aged twelve years, by the alleged negligence of the defendants. The plaintiff resided at Frankford, 23d Ward, and was in the habit of riding on the defendants' road each morning by a six o'clock train to Bromley's Mills, at Germantown avenue and York street, at which place he was employed. The defendants' use in that section of the city a dummy engine and two of the ordinary passenger street cars as a train. The defendants' train had stopped at Unity street, Frankford, to take on passengers, and had started again, when the plaintiff states he signalled the engineer to stop, and as he did not stop, he ran towards the train, and in attempting to get on the platform of the middle car his foot slipped and he fell under the wheel, and his leg was so crushed and injured that it had to be amputated. As an excuse for attempting to get on the car the plaintiff testified that on a former occasion one of his fellow workmen at Bromley's Mills, who was allowed by the company defendant to act as brakesman on the six o'clock train in the morning, in consideration of a free ride, said to him as he got on the car that he was young, and should run and jump on the car. This was denied by the witness on the other side, and witnesses were also produced who testified that they had warned the boy against jumping on the car while in motion.

All the facts were left to the jury, who found in favor of the plaintiff, $4,500.

The degree of care required of a child of tender years is always a question of fact for the jury, and what is negligence per se in an adult, might not be so in one of tender years. But an important question in this case is, what duty was owing by the defendant to the plaintiff. The train was bound to stop on his signal, and on failure to do so, the defendant would be liable in damages resulting therefrom, if loss of employment or otherwise; but it would be irrational to say that a failure on the part of those in charge of the train to stop would justify any one old enough to travel alone in attempting to get on a moving train as a passenger. The duty to the plaintiff did not, therefore, extend to his personal safety when not on the train as a passenger, nor to his safely getting on, unless the train had stopped. The question, therefore, whether an invitation was given by the officers or agents of the company to the boy to get on became the turning point of the case. If, on the occasion in question, the agent of the defendants, having charge of the train, had invited the boy to get on while the train was in motion, it would be a fair question for the jury whether he was justified in taking such a risk.

But here the statement made to the boy, that he was young, and could run and jump, was made at a different time, and possibly under different circumstances. It can hardly be supposed that such an invitation would extend to getting on the cars without regard to the rate of speed, or the time or place.

But was the invitation given by any one having authority to bind the company? The brakeman, who is said to have given the instruction alluded to by the plaintiff, was not a regular brakeman on the cars, but was a fellow employee in the mill with the plaintiff, and well known to him. By the ordinary duties of brakeman he has no authority over the management of the train, or to regulate the loading or unloading of the train, or to direct the conduct or ingress or egress of the passengers. His simple duty is to attend to the brake. To permit the idle remarks of one without authority, or a mere volunteer, to bind the company would be unreasonable. Thus, in Flower vs. Penna. R. R., 69 Penna. St. 210, a fireman who had invited a boy of tender years to get on the tender of the engine at a station, and who was killed while thus acting, by the negligence of the employees of the road, in allowing the balance of the train to run into the engine, it was held that the engineer or fireman had no authority to invite any one on the engine, and that the company consequently was not liable.

This brakeman had no authority to change any rule of the company or to waive any legal rights they may have in regard to regulating their mode of receiving or discharging their passengers. It was not within the scope of his authority. The train was in charge of a regular conductor and engineer, who had the lawful control of it. The question was not raised upon the trial, and the whole subject went to the jury upon the question whether any invitation was given by the brakeman. The jury, therefore, we think had too much latitude, and as the evidence does not establish a case of negligence on the part of defendants, a new trial must be granted. Rule absolute.—[Legal Intelligencer.

NEGLIGENCE—BY RAILWAY COMPANY IN NOT MAINTAINING WATCHMAN AT LEVEL CROSSING—ENGLISH HIGH COURT OF JUSTICE, EXCHEQUER DIVISION, JUNE 12, 1880—CLARKE V. MIDLAND RAILWAY COMPANY.

The defendants' railway crossed a level crossing which was some twenty yards distant from a foot bridge. Both the crossing and the bridge were private crossings intended for the use of persons employed in a neighboring manufactory. About thirty yards from the crossing was a box where a railway man was commonly stationed, who was sometimes shouted to by persons wishing to pass the level crossing with carts, and answered "All right." The plaintiff, a boy of eleven years of age, who was employed at the manufactory, having occasion to go over the line, was waiting at the level crossing until one train had passed, but was knocked down and severely injured when in the act of crossing by another train, which he had not observed, and which was passing in the opposite direction immediately afterward. At the trial there was evidence that the bridge was dirty and not lighted at the time of the accident; that the train did not whistle; that the plaintiff knew the bridge, having crossed it several times; and that the man at the box used to bring out a stick to stop him from going over the bridge, but that when the accident happened he was not present. There was no evidence to show what the man's special duties were, or whether he had any duties in respect to foot-passengers. Upon this evidence the judge was asked to nonsuit the plaintiff, but held, on further consideration, that there was evidence of negligence to go to the jury, and that the conduct of the railway man was a distinct breach of duty which amounted to negligence and contributed to the accident.

This case, which was tried before Stephen, J., and a jury, was reserved for further consideration upon the question as to whether or not the plaintiff ought to have been nonsuited at the trial on the ground that there was no evidence to go to the jury of negligence on the part of the defendants, and was argued on the 10th of May by Harris and Stanger, for the plaintiff, and by Mellor, Q. C., and Carter, on behalf of the defendants. The facts of the case fully appear in the written judgment which was now (June 12) delivered by

STEPHEN, J.—This was an action for personal injury caused to the plaintiff by the alleged negligence of the defendants. The plaintiff was a little boy in the employ of Mr. Cox, a manufacturer near Nottingham. The Midland Railway ran in the neighborhood of Mr. Cox's manufactory, and upon it were a level crossing and a foot-bridge at a distance of twenty-nine yards from each other, both being private crossings intended for the use of the persons employed in Mr. Cox's manufactory. At the time of the accident the bridge was in a dirty state, and was not lighted. There was a box thirty yards from the gate, but it did not appear how far it was from the bridge. A man was commonly stationed there, who, when a cart had to pass at the level crossing, was sometimes shouted to by the carters, and replied "All right." There was no evidence to show what his special duties were, or whether he had any duties with respect to foot-passengers, but there was evidence that at the time of the accident he was not there. The plaintiff was sent by a carter, also in Mr. Cox's service, and who had first crossed the line, to look for some sacks which had dropped from the cart on the other side of the line. He crossed at the level crossing and was returning by it. As he came back he saw a train coming, and waited until it had passed. He then went on to the line and was knocked down and severely injured by another train which he had not observed, and which was coming from the other direction. There was some evidence that the train did not whistle. The boy said: "I know the bridge; I had been across the bridge several times. A railway man in the box sent us back. I don't know his name; he used to bring a stick out." In cross-examination he said: "It was to stop us from going over the bridge, not to stop us from playing on the line, that he brought the stick out." No witnesses were called on behalf of the railway company. Upon this evidence I was asked to nonsuit the plaintiff, and I reserved for further consideration the question whether I ought to do so, but at the request of the plaintiff's counsel, I asked the jury the following questions, and received from them the following answers: 1. Was there negligence on the part of the railway in not whistling and not lighting the lamps on the bridge, and by the man's neglecting duty specially imposed on him? Answer—Yes. 2. Was there contributory negligence on the part of the boy in going on the line rashly? Answer—No. 3. Could the railway company have avoided

the accident which happened by the exercise of ordinary care and diligence? Answer—Yes. 4. What are the damages? Answer—£300. The question is whether I was warranted in leaving these questions to the jury by the evidence in the case, or whether I ought to have decided myself that there were no facts in the case from which they could properly infer negligence. This I think is the effect of Bridges v. The North London Railway Company, L. Rep., 7 H. L. 218; 30 L. T. Rep. (N. S.) 844. Many cases were referred to in the course of the argument before me. Nearly all that bear upon the subject are cited in The Dublin, Wicklow and Wexford Railway Company v. Slattery, 3 App. Cas. 1155; 39 L. T. Rep. (N. S.) 365. I do not think it necessary to say more on the subject than that the cases of Stubley v. London and Northwestern Railway Company, L. Rep., 1 Ex. 13; 13 L. T. Rep. (N. S.) 376; Walker v. Midland Railway Company, 14 L. T. Rep. (N. S.) 793; Cliff v. Midland Railway Company, L. Rep., 5 Q. B. 258; 22 L. T. Rep. (N. S.) 382, and Ellis v. Great Western Railway Company, L. Rep., 9 C. P. 551; 30 L. T. Rep. (N. S.) 874, seem to me to establish that mere absence of warning at a level crossing, whether in the shape of the presence of a watchman or in the shape of whistling, are not in themselves either negligence or evidence of negligence, unless there are circumstances of special danger, as in the case of Bilbee v. London and Brighton Railway Company, 18 C. B. (N. S.) 584; 13 L. T. Rep. (N. S.) 146, or in the case of The Dublin, Wicklow and Wexford Railway Company v. Slattery (sup.). If, therefore, the absence of whistling and the absence of the watchman were the only points in the case, I think the plaintiff ought to be nonsuited. I am of the same opinion as to the absence of lights from the bridge. I see no evidence that either that fact or the dirty condition of the bridge in any way contributed to the accident, nor do I see that any means were suggested by which the railway might, by the exercise of ordinary care, have avoided the accident. The only point on which I think the verdict can be supported is the evidence that the man at the box frightened the boys away from the bridge. This would amount to a distinct breach of duty, that is to say, to negligence and something more; and though it is true that I did not put, and was not asked to put, to the jury any specific questions on the subject, I think that as it was uncontradicted, the jury might reasonably infer from it that the man had misconducted himself, and did contribute to the accident by frightening the little boy (who was only eleven years old) into crossing the railway at a dangerous place. There will, therefore, be judgment for the plaintiff for £300 damages with costs.

Judgment for the plaintiff.—[Albany Law Journal.

Another California Railroad.

The Sierra Iron Company having a capital of $1,200,000, of which $250,000 has been subscribed, and more than $30,000 paid in, filed in the office of the county clerk at San Francisco on the 25th ult. a declaration of its intention to proceed immediately to survey a railroad route, and to build and equip a two-foot gauge railroad from Oroville along the Feather river, through American valley, Mohawk valley, Sierra valley and Beckwith Pass to the State line, there to connect with a railroad now being constructed from Reno, and following a route in the direction of Beckwith Pass, Long valley, Honey lake valley, to the State of Oregon. This declaration includes the privilege of constructing a branch line of railroad from the Middle Fork of Feather river, near Eagle creek, by Jamison creek to the Sierra iron mines, and thence to Downieville, Sierra county, distance 25 miles; also, privilege of constructing a branch railroad from Oroville to the Sacramento river, via Chico, distance 28 miles.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending January 29, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad ...	88,966	975,495	1,187,806
Schuylkill Canal....	.....	.....	38,041
Lehigh Valley	59,721	728,495	704,621
Del., Lack. & Western.	61,114	247,216	215,744
Shamokin Valley	17,402	69,374	68,064
Central New Jersey .	80,649	247,833	283,779
United R. R. of New Jersey	26,057	107,366	81,961
Pennsylvania Coal ..	17,598	67,945	43,279
Delaware and Hudson	48,151	198,572	303,810
Huntingdon & Broad Top Mt.....	9,770	35,888	31,847
Penn. and New York.	18.264	183,664	186.665
Clearfield, Pa.....	32,379	130,745	198,548

The total tonnage of anthracite coal rom all the regions for the week ending Jan. 29, as reported by the several carrying companies, amounted to 301 270 tons, against 364,223 tons in the corresponding week last year, a decrease of 62,953 tons. The total amount of anthracite mined for the year is 1,524,704 tons, against 1,569,395 tons for the same period last year, a decrease of 44,691 tons. The quantity of bituminous coal sent to market for the week amounted to 65,627 tons, against 93,329 tons in corresponding week last year, a decrease of 30,702 tons. The total amount of bituminous mined for the year is 281,122 tons, against 364,125 tons for the corresponding period last year, a decrease of 83,003 tons. The total tonnage of all kinds of coal for the week is 363,897 tons, against 457,552 tons in corresponding week last year, a decrease of 93,655 tons, and the total tonnage for the coal year is 1,805,826 tons, against 1,933,520 tons to same date last year, a decrease of 127,694 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of January was 165,665 tons, of which 117,225 tons were coal and 48,448 tons coke. The total tonnage for the year thus far has been 495,083 tons, of which 347,270 tons were coal and 147,813 tons coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended January 29 were 20,116 tons, and for the year 99,287 tons—a decrease of 44,198 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 16,743 tons, year, 85,151 tons; decrease as compared with 1880, 44,623 tons. Chesapeake and Ohio Canal, none; decrease as compared with 1880, 2,584 tons. Pennsylvania Railroad—week, 3 373 tons; year, 14,136 tons; increase over 1880, 3,069 tons. The annual official report of the output of the mines of the Cumberland region shows that the total during 1880 was 2,136,160 tons, an increase of 405,499 tons over the previous year, and the heaviest output since 1875.—[Phila. Ledger, Feb. 7.

The extension of the Scioto Valley Railroad from Portsmouth to Ironton, Ohio, was opened for business on the 7th inst.

The New Fuel.

A new liquid fuel for generating steam an exhibition of which was recently given in Jersey City, has attracted a great deal of attention. It is claimed for it that it will so reduce the expense of generating steam as to make it possible to run a locomotive from New York to Philadelphia for $1 instead of $25, as now, with coal. It is described as follows: To produce combustion nothing more is necessary than by means of an atomizer to unite dry steam and crude petroleum, only a common inch pipe being used for this purpose, one for steam and the other for oil, with cocks to regulate the flow. Junction is made within six inches of the perforated brick retort, which a nozzle closes instantly. On a match being applied, the whole interior furnace, an ordinary reverberating smelting furnace, becomes intensely heated, so much so that all exposed surfaces may be easily fused. If applied to a steam boiler on a locomotive or on ship board, it is only necessary to place retorts, made of fire clay, on grate bars, thus protecting the boiler plates from injury.

OFFICE OF THE ONTARIO SILVER MINING CO.,
No. 18 WALL ST., NEW YORK, Feb. 5, 1881.

DIVIDEND NO. 64.

THE REGULAR MONTHLY DIVIDEND OF Fifty Cents per share has been declared for January, payable at the office of the Transfer Agents, Wells, Fargo & Co., No. 65 Broadway, on the 15th inst.

Transfer-books close on the 10th inst.

H. B. PARSONS, Assistant Secretary.

NEW YORK, February 1, 1881.

THE THIRTY-SEVENTH SEMI-ANNUAL CASH dividend of the Illinois Central Railroad Company, on its entire share capital, being THREE AND A HALF (3½) PER CENT thereon, will be paid by the undersigned March 1, 1881, to shareholders as registered at 2 p. m. on the 11th inst., after which and until the 4th March, the transfer books will be closed.

ESTABLISHED IN 1831.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

The Growth of Manufacturing in the South.

IS THE CENTER OF MANUFACTURING BEING DRAWN SOUTHWARD?—INFLUENCES TENDING TO THAT RESULT—GEORGIA AND THE ADVANTAGES OFFERED TO INDUSTRIAL ENTERPRISE BY HER NATURAL RESOURCES AND INCREASING RAILROAD FACILITIES.

We have been so accustomed to think of New England as the centre of our great manufacturing industries, and the natural place to which manufacturers of textile fabrics should look for encouragement and stimulus for the employment of their capital and skill, that it is not customary to think of other localities as holding out inducements tending to draw from the supremacy in manufacturing, held for so many years, almost undisputed, by Massachusetts and her neighboring States. But such inducements are being held out, and enterprising projectors of railroads, as well as far-seeing manufacturers and producers, are justified in studying the question and basing action upon the indications which support the belief that within the next ten years a great change in the center of manufacturing is likely to be witnessed. The tendency of this movement in certain important departments of manufacturing is undoubtedly Southward.

New England for the past few years has held its manufacturing supremacy not so much from natural facilities of water power, climate, fuel, transportation, etc., as from the character of its population. In the thriving New England manufacturing towns are a class of operatives who are ranked among the oldest residents and in many cases form one of the most substantial and permanent elements of the business prosperity of the community. In frequent cases they are living in homes which their ancestors established before them, and where they have accumulated properties that are now to be found, in some instances, invested in the enterprises where their labor is employed. In this way strong communities of the best kind of operatives are permanently established. To lead them to abandon these localities for others strong inducements indeed must be offered, and it will be found as a rule that those operatives willing to change their work and places of abode for new fields and new enterprises are of the floating, adventuresome element; by no means the best for employment in starting manufactories in new localities. This is probably the strongest force that has held so long the center of manufacturing in New England.

Other influences are at work now which threaten to overbalance this power. Looked at from a broad and unprejudiced standpoint, it must seem not a little strange that this power of association of skilled labor and its congregation in certain localities should have so long been able to limit the work of the loom and the shuttle to certain sections. Cotton is transported from the far South to New York, and after passing through the market is reshipped, in most cases, to localities from 150 to 300 miles North, there to be worked up by machinery, the motive power of which is furnished largely from fuel brought by water and rail hundreds of miles from the coal fields of Pennsylvania. Then the cotton, in the form of manufactured fabrics, is brought again to this market, and from here distributed widespread throughout the country, much of it, however, returning to the Southern States from which it first started.

One of the chief inducements in the earlier days of cotton factories in New England for their location there was, of course, found in the water privileges afforded. But the growth of manufacturing has been so rapid that today in but few towns of that section can the water power be estimated as furnishing more than a minor part of the power required. Very rarely can a factory be found which relies wholly upon water, while in the majority of cases the chief reliance is of necessity in the use of large quantities of coal. It is an apparent fact also that the flow of mountain streams of that as of other sections where the demands of increasing population and traffic in lumber are rapidly cutting away the forests, has been for the past few years considerably decreased.

It is a question worthy the study and consideration of projectors and others, whether the natural tendency of these influences will be to draw manufacturing from the North toward the South, with its cotton fields and neighboring coal mines. Much attention has been turned to Georgia, as promising to be a future manufacturing locality of importance. The State presents a remarkable variety of surface as well as resource. From the low and swampy lands of the Atlantic coast and Florida line, extending inland perhaps twenty miles, the elevation increases toward the north, until at a distance of 150 miles from the sea an elevation of about 600 feet is reached. Northward from the central portion of the State the surface grows more and more rapidly, until a hilly and mountainous region is reached, where elevations of from 1,500 to 4,000 feet are found, much resembling the Blue Mountain sections of New England.

Georgia furnishes some of the finest water privileges to be found in the country. A few of them, of course, have been utilized for many years for a variety of manufacturing purposes, chiefly by flouring and cotton mills, but never to the extent that it would seem natural they should have been through their favorable location. The $3,000,000 which was found to be in use in the manufacture of cotton goods in 25 mills in Georgia, by the census of 1870, has grown into a much larger sum of late years, as the present census will show, but there are single New England villages which exhibit the use of more capital in that department of manufacture, than that entire State with its splendid natural facilities. Ranking among the first cotton-producing States, rich in its variety of soil and products, and so fortunate in being able to present attractions to such a diversified number of industrial enterprises, it will not be surprising to see a rapid increase of manufacturing at an early day in Georgia; a prospect which seems plainly to stimulate, and with good reason, the projectors and managers of the railroads aiding in the development of the magnificent resources of this State.

It is said that the Sonora Railway is almost completed from Guaymas to Hermosillo.

New York, New Haven and Hartford R. R.

The income of the New York, New Haven and Hartford Railroad Company for the years ending September 30, 1879 and 1880, was as follows:

	1879.	1880.
From passengers	$2,150,552 08	$2,347,565 47
" freight	1,492,261 88	1,634,092 08
" mail & express	269,929 29	271,156 89
" interest	20,852 39	41,421 45
	$3,933,595 14	$4,294,235 89
Expenses, viz:		
Repairs of road	$140,868 26	$206,314 47
" bridges	32,129 36	20,759 41
" buildings	48,156 25	70,302 53
" fences	1,730 59	4,247 93
" engines	80,918 52	93,279 86

Balance cash assets Oct. 1	1,632,476 35	1,694,965 26
Total, as above.	$5,971,333 55	$6,423,347 68

The following is a detailed statement of items of cash assets:

	1879.	1880.
Due from agents	$118,409 86	$163,286 17
Due from connecting roads	104,999 21	60,194 60
Advances to H. R. & P. C. R. R.	521,643 21	530,468 21
Loans and bills receivable	361,086 46	398,586 46
Cash	526,337 61	542,429 82
	$1,632,476 35	$1,694,965 26

Miles run—	1879.	1880.
By passenger trains	1,386 964	1,441,628
By freight trains	843,736	949,853
By gravel trains	59,571	71,351
Total	2,290,271	2,462,832
	1879.	1880.
Number of passengers.	3,587,899	4,600,507
Do. moved one mile	103,113,443	125,200,345
Tons of freight	1,209,630	1,348,687
Do. moved one mile	63,187,473	78,372,866
Number of engines	94	97
Passenger cars	202	204
Mail and baggage cars.	60	60
Freight cars	1,478	1,687

The receipts of the Shore Line Division for the year ending September 30, 1879, were $299,086 01, and the expenses (including $100,000 for rent) were $255,915 18, making the gain for the year $43,170 83. For the year ending September 30, 1880, the receipts were $349,111 58, the expenses and rent $294,625 13, and the gain for the year $54,486 45. The President, in his report says:

It is gratifying to this board, as it no doubt is also to you, that the receipts of the company for the fiscal year ending October 1st, 1880, are considerably in excess of those of the previous year though that excess is not in proportion to the increase in the volume of business done over our road. In other words, as will be learned from the foregoing figures, we have done a good deal more work this year than last and have got some more pay for it, while the gain is not in the same ratio as the increase in tonnage or number of passengers.

Our expenses also show an increase over last year resulting from the increase of work done and the advanced cost of labor and supplies.

During the year various additions have been made to our rolling stock and depot facilities. About 184 feet of bulkhead and water front have been purchased adjoining our freight depot at Pier 50, on the East River, and a new and commodious freight house has been erected thereon. This has fully doubled our capacity to receive and deliver freight at that important station. The increase of our freighting business in New York City, as was stated in our report of last year would probably be the case, has made this investment, in the judgment of the board, a necessity. The total cost of this enlargement was about sixty thousand dollars.

Our equipment for floating cars between Pier 50 and Harlem River Station has also been doubled during the past year, by the purchase of our new steam tug and four new ten car barges or floats at a further cost of sixty-two thousand dollars.

Since our last report the new freight house at Meriden has been completed at an expense, coming into the accounts of this year, of about twelve thousand dollars. It was partly paid for last year.

A substantial addition to our passenger accommodations in Bridgeport is now being made at an expense of several thousand dollars.

Our roadway, motive power and rolling stock in the passenger service are all in as good condition as last year, while two hundred new coal cars have already been, and four hundred new house cars are now being, added to our freighting equipment. There has been expended on these freight cars during the year about $150,000, which is more than half of their entire cost.

These additions to our freighting facilities have all been rendered necessary by the increase of traffic on our line. Whether this traffic shall ultimately out-grow those enlarged facilities we will not attempt to predict; though we hope it may.

The revival of business throughout the country and the consequent growth of our passenger and freight traffic have enabled us to meet all these expenses, together with the increased expense of keeping up and operating the road and rolling stock and to pay the customary dividend, notwithstanding the large reduction made in our passenger rates in the Spring of 1880. But for this growth contemporaneous with, but not, to any great extent certainly, caused by, such reduction of fares, our passenger receipts would have fallen off approximately in the proportion of that reduction.

Some other improvements are yet needed on our road, and, if our earnings will justify the expenditure, we trust some of them may be made during the coming year. Particularly should a new passenger station be built at Meriden in keeping with the freight house recently erected there, and with the wants of that thriving city. A new station should also be erected in Milford at an early day.

Our Shore Line Division is now in first class condition. It will be seen from the foregoing figures that this Division is gradually extinguishing the debt contracted to bring it up from the poor condition in which it was at the time the lease to this company was made; thus justifying the expectation that ere long it will at least cease to be a burden, and perhaps become a source of profit, to this company. However this may be, your Board are confirmed in the belief that the leasing of that road, as also the leasing of the Harlem River and Port Chester road has already proved to be of substantial advantage to this company.

Condensed Balance Sheet Oct. 1,

	1879.	1880.
Cost of railroad	$12,889,584 40	$12,889,584 40

New York, Saturday, February 19, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

WHILE Boston is trying to make up her mind whether she wants elevated railroads or not, she is studying closely the system of rapid transit as presented in this city. Of course the rapid transit needs of the two cities are in no respects parallel, the motive found in the shape of our island for the construction of these roads here not existing in Boston, where numerous surface roads, with branches to accomodate local travel, run within half a mile of the center of the city, in all directions. No city could be more favorably formed for displaying the best points of elevated railroads than New York, and other cities watching their successful workings here must bear in mind that under even slightly different conditions vastly different results might follow expensive experimenting in this direction.

A NEW NATIONAL BANK, in which are interested a number of prominent public men, including General Grant and several gentlemen widely known in railroad and financial circles, will probably be opened for business in this city, March 1st. An organization was effected on Monday under the name of the United States National Bank, with the following directors: General U. S. Grant, Mr. H. Victor Newcomb, ex-President of the Louisville and Nashville Railroad; Mr. H. F. Vail, President of the National Bank of Commerce; Mr. Morris K. Jesup, Mr. Henry B. Hyde, President of the Equitable Life Insurance Company; Mr. Logan C. Murray, ex-President of the Kentucky National Bank; Mr. William R. Travers and Mr. John J. McCook, of the law firm of Alexander & Green. Mr. Newcomb was elected President and Mr. Logan C. Murray Cashier.

A HAPPY state of affairs certainly must exist between the railroads and the people in certain sections of Connecticut, notably in the Naugatuck Valley, as is shown from the fact that the total expenses incurred by the Naugatuck Railroad Company for legal services last year was only $185, and this with a class of patrons who are generally considered quite up to the average in ability to work up fine points in the way of legal rights. Of course judicious management had much to do with this as is substantiated by a glance at the last annual report of the company. The earnings of the road for 1880 amounted to $572,389 59; expenses, including $70,481 for improvement of road, $330,326 51—making the net earnings $242,063 08, which notwithstanding increased expenses were 14 per cent above the net earnings of the previous year and warranted a declaration of a dividend of 10 per cent. Among the improvements which have been made in the road are the thorough ballasting of the road-bed and the laying of steel rails the entire length of the line, including the Watertown Branch, a total of sixty-one miles.

FEW men have been so blessed in living to see the works of their hands and the generosity of their hearts so warmly appreciated, and few men have witnessed so many of their own and younger generations being practically benefitted by those works and by that generosity, as the venerable philanthropist, Peter Cooper, who has just celebrated his ninetieth birthday. The latest exhibition of his benevolence was given at this birthday anniversary last week, when he presented to the trustees of Cooper Union a check of $10,000 to be added to the $10,000 of the Golden Wedding Fund established by him seventeen years ago, another check of $30,000 and receipts in full for $70,000 expended by him during the past year in alterations and additions to the building. That magnificent Institute with its open doors and liberal features, which has opened to hundreds of worthy men and women grand fields for development and usefulness, will stand for many years as one of the best types that can be given by an inanimate object of the breadth of heart and the diversity of works of its generous founder. But a never fading testimonial to his practical goodness and unstinted bounty will remain in the hearts of his fellowmen, who have gathered inspiration and strength from him, long after this grand monument of stone with its wealth of educational resource may have crumbled away.

THE SENATE at Albany has passed a resolution recommending the Canal Board to abolish tolls on westward bound freight on the Erie canal. One of the results professedly aimed at in this resolution is the increase of eastward bound canal freights. Just how this result is to be effected through the passage of any such resolution is by no means clearly evident; in fact not nearly as evident as that its effect would be to deprive the State of one of its most legitimate and natural sources of revenue, to be made up by the general taxpayer. New York as a State is pretty liberal and it can probably afford to throw this little gift to a few shippers who would be the sole recipients of its benefits, but there is considerable doubt as to whether the average taxpayer feels disposed to make such a gift even to those philanthropists who are so demonstrative just now in their sympathy for "The People," and antipathy to transportation companies, which will not play wholly into their hands or connive at their mercantile schemes for increasing the number of high priced monopolized articles needed by this self same people. To decrease the ill savor of the resolution, in the nostrils of certain persons peculiarly sensitive to undue freshness, a little salt was added to it, and its savoring and character were pronounced acceptable and healthful. The added clause placing domestic salt on the list of articles to be carried free both ways on the canal is probably what carried the resolution through. It will create a lively discussion in the Assembly. The State is probably not quite ready to take such a decided first step toward a free canal, and is not likely to be for many years to come.

Atlantic, Mississippi and Ohio Railroad.

The Atlantic, Mississippi and Ohio Railroad was sold at public auction in Richmond, Va., on the 10th inst., under decree of the United States Circuit Court, Clarence H. Clark, of Philadelphia, becoming the purchaser for himself and associates for $3,605,000. Mr. Clark states that it is the expectation and intention of the new owners of the road to reorganize the company, by which it is proposed to make a reasonable and proper provision for the old stockholders and unsecured creditors. The road will be run on strict business principles, and in the interest of the section of the State it traverses, and the cities through which it passes.

The interests of the road are identical with its customers and patrons, and it will be managed so as to secure to them the best service, and to the road their good-will and co-operation. Mr. Clark further states that the purchasers are representative men of capital in New York, Philadelphia and London, some of whom are already interested in other public works in Virginia, and the development of her material resources, and they propose, in conjunction with existing and connecting lines, to form a grand trunk between

the seaboard and the West and Southwest. The number of miles of railroad sold comprises a total of 428 miles, resulting from the consolidation of the road from Norfolk to Petersburg, Va., 81 miles; Petersburg to Lynchburg, 123 miles; Lynchburg to Bristol, 204 miles; Petersburg to City Point, 10 miles, and Junction to Saltville, 10 miles; total, 428 miles. This consolidation was effected November 12, 1870, the original roads being the Norfolk and Petersburg, the Southside and the Virginia and Tennessee. In all these roads the State of Virginia held the controlling interest, but, when the consolidation was effected, sold out to the managers of the consolidation all its interest in them for $4,000,000 of second mortgage bonds, which were not to draw interest until July 1, 1880. The bonds of the consolidated road defaulted on interest as early as July 1, 1873, and the road went into the hands of receivers on June 6, 1876. Since that date the proceedings looking to the sale have been slowly maturing. Prior to the consolidation of the other roads constituting the Atlantic, Mississippi and Ohio road, there were existing mortgages on the Norfolk and Petersburg Railroad (now with accrued interest) of $967,000, on the Southside Railroad $1,738,500, on the Virginia and Tennessee Railroad $2,395,590, with interest funding 8 per cent notes since Jan. 1, 1874, $134,584. The total of these amounts is about $5,235,674, which are understood to have precedence and remain an obligation upon the road as far as they are still outstanding. It is not likely that the road will pay anything to the State or other creditors under the present sale, since the proceeds realized are not more than $500,000 in excess of the bids made in behalf of the foreign bondholders.

Active Progress of the Southern Pacific and Santa Fe Extensions.

The *Atchison* (Kan.) *Patriot* of the 5th inst. gives the following interesting news concerning the progress of the new through line in the Southwest: Col. W. L. Gordon, a prominent railroad contractor, has returned from the Santa Fe extension, and brings most encouraging reports of the progress of the work. He left the end of the line last Wednesday, and at that time the Southern Pacific was but 27 miles distant, and "to-day," said he, "the two roads are not more than 25 miles apart, and the connection will be made by March 1st. The place where the two roads will be joined is called Florida Pass, in the Florida mountains. The Southern Pacific is now past that point, working south for El Paso. Rincon, where the El Paso branch of the Santa Fe leaves the main California line, is ninety-five miles from El Paso, and the grading contracts are all let. It is expected," continued Col. Gordon, "that the line will be in operation by the last day of June or the first of July. The weather has been all that could have been desired, and work, consequently, has been pushed forward as rapidly as possible. In northern New Mexico there has been a little snow, but where the track-layers are there has been no severe weather." Col. Gordon is here after more track-layers, and will leave with fifty Thursday night.

Personal.

—President Hayes justly ranks the railroad among the greatest of educators.

—Hon. Fernando Wood, of New York, died at Hot Springs, Arkansas, the 13th inst., aged 69 years.

—Major James S. Yard, of Monmouth County, New Jersey, was re-appointed State Commissioner of Railroads on the 8th inst. by Governor Ludlow.

—General Robert Thompson, President of the Philadelphia and Erie Railroad Company, died at his residence in Philadelphia, on the 13th inst., aged 53 years.

—Mr. C. S. Turner, for many years Superintendent of the Worcester and Nashua Railroad, has been chosen to fill the position of its President and General Manager.

—Mr. A. A. Gaddis, the General Manager of the Boston, Hoosac Tunnel and Western Railway, has been appointed Grand Manager of the Ogdenburg and Lake Champlain Railroad. He will assume the office on the 1st of March.

—Mr. David Dudley Field has just celebrated his seventy-sixth birth-day, and, in speaking of him, the Herald says: He was born, as we learn by the Cyclopœdias, on February 13, 1805, so that now he is entitled to rank as "a veteran of seventy-six," as they used to call the old soldiers of the Revolution. He has been in this city over fifty-two years and is the oldest member of the New York bar in full practice. Charles O'Conor is a year older, but has been for some time retired from his profession, and is now living very quietly at Nantucket, Mass., while Mr. Field still carries on an immense practice. He seems as vigorous as he was twenty years ago, and walks up Broadway every afternoon as erect as a grenadier.

Peter Cooper's Railroad and Telegraph Work.

At the celebration of Peter Cooper's birthday at Cooper Union on last Saturday night a very interesting sketch of his life was given in a lecture by Rev. H. L. Singleton, of Baltimore, in which was the following account of Mr. Cooper's work in behalf of the railroad and the telegraph:

In 1828 he went to Baltimore, set the Canton Iron Works on foot, and made the first successful locomotive on the Baltimore and Ohio Railroad. "In 1826 George Brown the founder of the present house of Brown Bros. then in Baltimore, called a meeting to do something to save the trade of Baltimore, then being diverted to New York by the opening of the Erie Canal, and on February 28, 1827, the first railroad company in the United States was organized. Horse-cars were first proposed and then a car to be driven by wind sails, and at the critical hour, when everything else had failed, Mr. Cooper promised to build a locomotive that would run on the road, and produced the "Tom Thumb," with a boiler half as big as that of a kitchen range and other parts in proportion. On the day of trial Mr. Cooper, acting as his own engineer, opened the throttle-valve, and the engine drew the car with twenty-six directors to Ellicott City, thirteen miles, in fifty-seven minutes. On the return trip, however, a steam-cock blew off and the engine was beaten by a horse-car on the adjoining track. But the victory was with Mr. Cooper. An inventor himself, he has been the friend of inventors all his life. He was the President of the North American Telegraph Company twenty-six years ago, and it is due to his enterprise that we have to-day the railroad and the telegraph. He took up the invention of Morse and carried the wires from city to city and under the waters of the ocean. His works at Canton, opposite Baltimore, support a population of 100,000 souls. The success of the Baltimore and Ohio road was the salvation of the city of Baltimore, and that is due to Mr. Cooper.

Dominion Telegraph Co.

At a meeting of the Dominion Telegraph Co., held at Toronto on the 9th inst., the report of the directors was presented, from which we extract the following:

The directors report that for the year 1880 the lessees the American Union Telegraph Company have fulfilled the terms of their lease by the payment of the interest upon the £60,000 sterling six per cent bonds of the company and by the payment also of the guaranteed interest of 5 per cent per annum upon the paid up capital of the company of $1,000,000.

This interest has been duly paid by the directors to the bondholders and shareholders of the company.

The gross earnings of the company for the year 1880 amounted to $229,194 16, showing an increase in 1880 of $31,455 03, or 15.39 per cent.

The directors have also to report that a very satisfactory arrangement for the purchase of its telephone lines by the Bell Telephone Company of Canada has been effected, the sale of which realized the sum of $69,500. This amount has been duly placed to the credit of construction account and not included in the revenue of the company.

The following is the general capital and construction account of the company 31st December, 1880:

LIABILITIES.

Share capital paid up	$1,000 000 00
Mortgage bonds, £60,000 sterling	292 000 00
Dividends unclaimed	960 26
Balance at credit of profit and loss carried to year 1881	2,005 59
Total	$1,294,965 85

ASSETS.

Capital expenditure	$1,257,857 27
Outstanding accounts due from offices, railways and governments	12,856 19
Real estate	6 244 96
Cash on hand and in bank	18,007 43
Total	$1,294,965 85

The stockholders unanimously passed a resolution transferring the lease to the Western Union Telegraph Company, as consolidated.

The Tehuantepec Railroad.

Mr. Edward Learned, President of the Tehuantepec Railroad Company, under date February 7th, contradicts a statement purporting to come from Mexico saying that work has been suspended on the Tehuantepec Railroad pending the fate of Mr. Eads' project now before Congress, and then adds:

There has been no suspension, nor will there be any; on the contrary the Tehuantepec Interocean Railroad Company is pushing forward its work with the utmost vigor, and the recent loan placed on the market assures the early completion of the road. William J. McAlpine, consulting engineer, with a party of assistants leaves to-day via San Francisco to commence work on the Pacific side.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Organization.

—Articles of association of the Toledo, Cincinnati and St. Louis Railroad Co. were filed in the office of the Secretary of State at Indianapolis on Monday. The road is to run from the State line between Ohio and Indiana in Adams county to the State line between Indiana and Illinois in Vermillion county, a distance of 175 miles in Indiana, and is the extension of the Toledo, Delphos and Burlington Railroad. The capital stock is $3,000,000.

—Articles of incorporation have been filed at Albany, N. Y., of the Rochester, New York and Pennsylvania Railroad Company, with a capital of $1,000,000. The road is to run from Mount Morris, Livingston County, to Ross Junction, upon the Buffalo Division of the New York, Lake Erie and Western Railroad. Among the incorporators are William B. Isham, Archer N. Martin, and Hamilton Odell.

—The directors of the Memphis and Little Rock Railroad Company, elected on the 15th inst., are: R. A. Edgerton and B. C. Brown, of Little Rock; H. G. Marquand and D. W. Williams, of New York, and B. C. Black, of Brinkley. The officers are: H. G. Marquand, president; S. W. Goodwin, secretary and treasurer, and E. K. Sibley, general manager. The road will be put in good condition at once. Mr. Sibley is expected to take charge on the 21st inst.

Southern Railroad Men in New York.

A correspondent of the Philadelphia *Times* rattles on in the following gossippy way about some of the wealthy railroad men of the South now in New York: Mr. R. T. Wilson is perhaps the richest Southern railroad man in New York. He is a Georgian, who was born and raised in the "cracker" country, and has all the shrewdness that is ascribed to that people, to which is added unusual sagacity, broad liberal views and an iron will. He is now in absolute control of about two thousand miles of railroad in the South and is just about building two more connections. He is president and leading owner of the Memphis and Charleston line, which has a capital record, and the stock of which is rapidly appreciating. Mr. Wilson's wealth is estimated at about $3,000,000, and it is all held well in hand—perhaps more closely than any prominent railroad man in the city. Mr. Wilson relies upon earnings rather than speculation, and puts his faith in dividends rather than in "turns." He is the very type of prudence, and commands a large following of business investors. He thoroughly believes in the future of the South, and is heavily interested in its development. His son has just married into the rich Goelet family. Mr. C. C. Baldwin, vice-president of the Louisville and Nashville railroad and director in the Hanover National and Continental banks, is one of the rich men of Gotham. A Marylander by birth and education, he has the charming heartiness and cordiality that is blown up by the breezes of the Chesapeake, and is a great favorite. He is worth at least two and a half millions, and many estimate his wealth at a million more. He cleared $750,000 on a single "turn" in stock last year. He was a large owner of Nashville and Chattanooga stock, being the leader of the pool of four who sold the controlling interest in the stock of that company to the Louisville and Nashville company at $1 19 when the stock was really worth about 50 cents, and had probably cost Mr. Baldwin less than that. The profits taken out of this "turn" and those that followed by Mr. Baldwin were $1,400,000, but he was carrying nearly half of this for his friends. He lives in fine style, but without ostentation, swears by Tom Bayard, moves rapidly and audaciously, bleeds for the democratic party, and is lightning on the street. Two of his partners in the Nashvill and Chattanooga deal are Southern men, and are very rich. V. K. Stevenson is a Tennesseean who gave his early life to railroad development in his native State. He built the Nashville and Chattanooga road, and made a great deal of money out of it. He is worth possibly upwards of $2,000,000, and is a careful and successful investor. He rarely speculates, but is rather a believer in real estate. Mr. Thomas W. Evans, another one of the pool, whose profit is put at $280,000, was a small merchant at Atlanta, a better merchant in Nashville, and as the head of Evans, Gardner & Co., is still better in New York. He is a millionaire in a free sense of the word, and knows how to save money as well as how to make it.

Manufacturing.

—A new theory of the conversion of bar-iron into steel by the cementation process has been advanced by Mr. R. S. Marsden. He attributes the result to the diffusion of the carbon in the condition of an impalpable powder into the heated iron, and he believes that silicon can diffuse itself in a similar way through iron. This action of the carbon in iron is analagous to the penetration of a red-hot porcelain crucible by carbon, a phenomenon which was observed and commented upon by the author some time ago.

—About the end of last month the largest crucible steel castings hitherto made was effected in the works of a firm in Sheffield, England. It was a spur rim, 29 feet in diameter and cast whole. To cast it 270 pots, each holding 80 pounds of molten steel, were used. Steel wheels are likely to supersede the cast-iron wheels now in general use in the Lancashire mills.

—The main features of the Cope car-coupler which is attracting much attention are described as follows: First, its simple adaptability to freight cars; second, the coupling or uncoupling of cars from the top or side of the car, thus obviating the going between cars for that purpose, by which so many lives are annually sacrificed; third, its easy adjustment to stray cars from other roads which may not be provided with the Cope coupler, whether higher or lower than the car to which it is attached, and fourth, the certainty of uncoupling from the balance of the train when one car is derailed. The patents are said to be controlled by St. Louis parties.

Construction.

—It is said that Mr. Walter Shanly, C. E., has entered into a contract with the Canada Atlantic Railway Company, for the construction of that part of the road from Coteau Landing station to Ottawa city, and that the contract was executed on the 10th inst.

—The Lexington and Southern branch of the Missouri Pacific, now completed to Nevada, Vernon county, is being pushed rapidly through to Carthage, in Jasper county, and they expect to have it finished by the first of June.

—The extension of the New Haven and Northampton Railroad from Northampton to Turner's Falls and to Bardwell's, to connect with the Hoosac Tunnel route, is nearly completed, and will be opened for traffic in the spring; cars for that line in all their new splendor, marked "Hoosac Tunnel Route," stand on the side track at Northampton, an advertisement of what is coming.

—The Secretary of State of Ohio has issued a certificate of incorporation for the Huron branch of the Wheeling and Lake Erie Railway Company from Milan to Government pier at Huron, Erie county.

The number of miles of railroad in France at the close of 1879 was 14,150, and the cost of construction $1,976,275,500—an average of $139,650 per mile.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, February 17, 1881.

Five per cent is the ruling rate for call loans on stocks, the exceptional rates being 4 and 6 per cent. On United States bonds the quotation is 3@4 per cent. Time loans range from 3 to 5 per cent. Prime mercantile paper is 4@5 per cent, few names, however, passing below 4½ per cent.

The posted rates for prime bankers' sterling are now 4.84 and 4.86½, some of the prime drawers, however, still keeping 4.87 as their posted figures. The actual rates are 4.83@½ and 4.85@¾@4 86¾. Prime commercial bills are 4.81½@4.82.

As stated by us in this column last week, the stock and bonds of the St. Louis, Jacksonville and Chicago Railroad Company have been placed on call at the New York Stock Exchange. The main line of this road extends from Bloomington to Godfrey, Ill., a distance of 150.6 miles, and is leased in perpetuity to the Chicago and Alton Railroad Company on terms that virtually guarantee the interest on all the bonds issued by the Company. The bonds and stock issued are as follows: first mortgage bonds, $2,365,000; second mortgage bonds, $360,000; preferred stock, $1,034,000; common stock, $1,298,000. The first mortgage bonds of the company are already on the regular list. The second mortgage bonds are dated July 1, 1868, and were issued under a deed of trust which authorizes an issue of $5,000 per mile of completed road, but only $360,000 bonds were disposed of when the road was leased

to the Chicago and Alton Railroad Company, and that is the amount now outstanding on the main line between Bloomington and Godfrey. The bonds are payable July 1, 1898, with interest at seven per cent. The committee recommended that they be placed on the regular list and called first mortgage bonds guaranteed, second mortgage bonds, second mortgage bonds guaranteed, to be a good delivery only after registry by the transfer agent of the company in New York, and that the common and preferred stock be placed on the free list.

The stock of the Danbury and Norwalk Railroad Company has also been admitted to dealings at the Board. This road extends from Danbury, Conn., to South Norwalk, Conn., and with branches comprises thirty-four miles of road. The mortgages amount to $500,000, or $14,440 per mile, and the capital stock is $600,000, or $17,000 per mile. It is stated that the company is earning more than 5 per cent per annum on its stock, but its last dividend of 1¼ per cent was paid in June, 1880.

Philadelphia and Reading Railroad.

In the United States Circuit Court, Philadelphia, on the 14th inst., Judge McKennan made the following order in the revocation proceedings of McCalmont Bros. & Co. against the Philadelphia and Reading Railroad Company:

And now, February 14, 1881, this motion having been fully argued by counsel and duly considered by the Court, it is now ordered that such part of said order of November 18, 1880, as purports to confer authority by this Court upon the Philadelphia and Reading Railroad Company to adopt and carry into effect the deferred bond plan, which is generally described in said order, be and the same is hereby revoked; and that said order shall be construed and taken only as relieving said company from the effect of the injunction order made by this Court, when the receivers of the property of the said company were appointed, by permitting it to exercise upon its own responsibility and according to its own legal discretion such power as its charter conferred upon it in providing means for the payment of its debts in the mode proposed.

The following order was also entered:

And now, February 14, 1881, the further hearing of the motion for a preliminary injunction in this case is continued until the 25th day of March next; and it is ordered that until the decision of said motion by the Court, the respondents be and they are hereby restrained from making any agreement or doing any act by which the Philadelphia and Reading Railroad may be definitely bound touching the deferred bond plan or the proposed mortgage loan of $150,000,000; that neither the respondents nor the receiver appointed by this Court shall declare to be forfeited any rights acquired by the subscribers to said deferred bond plan by reason of the non-payment of instalments to their subscriptions; that the said receiver have power to receive from any of said subscribers the amounts of the several instalments of their subscriptions as deposits and to give receipts therefor as such, and that a separate account of such payments shall be opened by the receiver, and the same shall be so kept as that the money paid by each subscriber can be traced, identified and returned to him if the Court shall hereafter so order.

Judge Butler read an opinion concurring in both orders, and Judge McKennan, in making his rulings, declared that all things must be kept in their present position until a time arrives for the stockholders to express their judgment, not only on what has been done by the managers of the company, but as to what shall be done hereafter.

Lumber Trade of the Northwest.

The St. Paul Pioneer Press gives the following resume of the Northwestern lumber trade for the year 1880, showing a total of 8,129 men employed, 907,261,095 feet of lumber, 402,354,125 shingles and 194,775,200 laths manufactured in 1880, against 587,411,900 feet of lumber, 124,635,456 shingles and 100,723,552 laths manufactured in 1879, in the Mississippi Valley. The totals from the Chippewa and Wisconsin rivers make the aggregate totals 12,741 men employed, 1,353,116,465 feet of lumber, 558,678,625 shingles and 288,971,525 laths manufactured in 1880, against 927,501,303 feet of lumber, 208,232,206 shingles and 129,779,902 laths in 1879. The stock on hand is summed up as 442,901,954 feet of lumber, 99,922,316 shingles and 65,172,095 laths. A total of 562,000,000 logs held over owing to the early freeze would have increased the manufacture of 1880 materially.

Interest and Dividends.

The Chicago, Burlington and Quincy Railroad Company have declared a quarterly dividend of $2 per share, payable March 15th to stockholders of record March 1.

The Homestake Mining Company has declared its regular monthly dividend of 30 cents per share for January, payable Feb. 25, at the office of Messrs. Wells, Fargo & Co., No. 65 Broadway.

The Railroad Equipment Company has declared its regular quarterly dividend of 2½ per cent., payable at the offices of Messrs. Clark, Post & Martin, of this city, and E. W. Clark & Co., at Philadelphia.

Riehle Bros. of Philadelphia are busy on orders for scales from leading iron works in Pennsylvania, among others the Lackawanna Coal and Iron Company who are to use four of their celebrated Furnace Charging Scales in addition to eight ordered sometime since. They are also working on orders from the Conewango Iron Company, Brock Bro., Crane Iron Company, and on scales for the United States Mint, Philadelphia, and Testing Machines for the Harrisburg Car Works. The spring outlook for their branch of manufacturing is reported as very promising.

At a meeting of the New York and Brooklyn Bridge Co., held on the 7th inst., a letter from Col. Paine, the engineer, was read, in which it was stated that the total amount of steel received up to February 1st was 342.77 tons, it being now delivered at the rate of 8 to 10 tons per day. The report of the treasurer was also received and accepted, showing the total receipts to have been $12,646,722 83, and the expenditures $12,622,325 56, while the present cash liabilities are $48,629 64. During January, 1881, the receipts were $1,877 30, and the expenditures for the same period $46,918 42.

Colonel Talmage, general manager of the Missouri Pacific Railroad, says Jay Gould will add about 900 miles of new road to the Missouri Pacific system during the present year. The extension will embrace about 450 miles in Missouri and Kansas, and an equal mileage in Texas, carrying the system to the Rio Grande at Laredo. To meet the requirements of these extensions 50,000 tons of steel rails have been ordered; also 40 locomotives, 3,000 freight cars, 20 passenger cars and 6 baggage cars.

Messrs. Robbins & Appleton, of this city, general agents for the American Watch Company, Waltham, Mass., have been notified that their watches have received the highest award at the Melbourne International Exhibition, and that they are the only individual exhibitors who have received the first prize there for watches.

The Denver, Western and Pacific Railway Company have let contracts to Given, Abbot & Co. for grading thirty-four miles of their road from Denver. This company should not be confounded with the Denver, Utah and Pacific, who have not yet made any demonstrations toward building their road.

Western Union Telegraph.

While so much attention is being drawn to the affairs of the Western Union Telegraph Company, it will be of interest to glance again at the annual report of the President for the year ending June 30th, 1880, the principal part of which is given below:

The capital stock of the Company is $41,073,410, of which there is in the treasury, belonging to the Company, $58,855 50, leaving the amount outstanding on the 30th of June, 1880, $41,014,554 50.

The bonded debt at the close of the year was as follows:

Bonds due March 1, 1900, 6 per cent. (Sterling Bonds)		$961,308 00
Bonds due May 1, 1900, 7 per cent		3,920,000 00
Bonds due May 1, 1902, 7 per cent		1,373,090 00
		$6,254,308 00
Less amount of Sinking Funds and accrued interest thereon, held by the Union Trust Company Trustees		158,078 36
		$6,096,229 64

During the year £2,100 of the Sterling Bonds, due March 1, 1900, were redeemed by the Trustees of the Sinking Funds.

BUSINESS OF THE YEAR.

Surplus July 1, 1879.		$772,469 91
The revenues, expenses and profits of the year ending June 30, 1880 (after reserving am't sufficient to meet the claims of the Atlantic and Pacific Telegraph Company under existing agreements), were as follows:		
Revenues accruing to this Company	$11,738,094 87	
Expenses chargeable to this Company	6,591,455 42	
Net profits		5,146,639 45
		$5,919,109 36
From which there was applied:		
For dividends (8 per cent.)		$3,280,276 25
For interest on bonds		428,516 93
For Sinking Funds appropriations		40,000 20
		$3,748,793 38
Surplus of net revenue for the year, over dividends, interest and Sinking Funds appropriations, was	$1,397,846 07	
For new property there was appropriated:		
For construction of new lines and erection of additional wires	$1,123,584 09	
For purchase of sundry Telegraph Stocks, patents, real estate, etc	643,476 75	
		1,767,060 84
Surplus July 1, 1880		408,255 14
		$5,919,109 36

GENERAL STATEMENT.

The following exhibits shows the profits and disbursements of the Company, for fourteen years, from the date of the general consolidation, July 1, 1866:

The surplus of Income account, July 1, 1866, was		$275,357 24
The net profits for fourteen years, from July 1, 1866, to June 30, 1880, were		45,350,241 48
Making an aggregate, June 30, 1880, of		$45,625,598 72
During this period, there was applied—		
For dividends to Stockholders (including dividends payable July 15, 1880)	$23,103,492 99	
For interest on Company's bonds	5,447,015 54	
For amount reserved for Sinking Funds, and for interest on bonds, accrued to June 30, but not yet payable	106,086 64	
		28,656,595 17
Leaving a surplus of		$16,969,003 55
which is represented as follows:		
Construction of new lines, erection of additional wires, patents, etc		$8,012,576 95
Purchase of telegraph lines, and stocks of companies controled by the Western Union Company, upon which interest or dividends are paid as rental		1,653,114 12
Western Union Telegraph Company's Stock (588½ shares)		33,681 04
Atlantic and Pacific Telegraph Company's Stock (72,010 shares)		1,806,250 00
Gold and Stock Telegraph Company's Stock (47,810 shares)		1,176,009 00
International Ocean Telegraph Company's Stock (10,885 shares)		961,606 42
Brooks Underground Telegraph Company's Stock (1,000 shares)		95,000 00
Southern Bell Telephone and Telegraph Company's Stock (843¼ shares)		84,325 00
Sundry other stocks and bonds		93,944 05
Western Electric Manufacturing Company's Stock (500 shares)		50,000 00
Western Union bonds, redeemed and cancelled		1,339,691 96
Sinking Funds (portion not yet used for redemption of bonds, exclusive of interest allowed by Trustees)		140,579 80
B'dway and Dey St., building	$2,345,639 52	
Less amount provided from the proceeds of bonds	1,802,202 00	
		$543,437 52
Real estate other than above		387,142 47
Supplies and material on hand unissued		182,290 08
Surplus June 30, 1880		403,255 14
		$16,969,003 55

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending February 5, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad	127,653	1,103,148	1,228,090
Schuylkill Canal	.....	.....	38,041
Lehigh Valley	91,958	820,454	772,313
Del., Lack. & Western.	63,935	311,151	278 904
Shamokin Valley	.....	69,374	68,064
Central New Jersey	28,604	276,438	306,497
United R. R. of New Jersey	21,710	129,077	99,672
Pennsylvania Coal	13.392	81,337	52,061
Delaware and Hudson	68,452	267,624	362,111
Huntingdon & Broad Top Mt	6,186	42 074	38,733
Penn. and New York.	21.670	205,335	213,582
Clearfield, Pa.	24,643	155,288	236,791

The total tonnage of anthracite coal rom all the regions for the week ending Feb. 5, as reported by the several carrying companies, amounted to 428,679 tons, against 339,179 tons in the corresponding week last year, an increase of 89,500 tons. The total amount of anthracite mined for the year is 1,952,383 tons, against 1,897,624 tons for the same period last year, an increase of 54,759 tons. The quantity of bituminous coal sent to market for the week amounted to 62,891 tons, against 81,989 tons in corresponding week last year, a decrease of 19,598 tons. The total amount of bituminous mined for the year is 845,967 tons, against 443,696 tons for the corresponding period last year, a decrease of 97,729 tons. The total tonnage of all kinds of coal for the week is 491.070 tons, against 421,168 tons in corresponding week last year, an increase of 69,902 tons, and the total tonnage for the coal year is 2,298,350 tons, against 2,341,320 tons to same date last year, a decrease of 42,970 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending February 5 was 130,007 tons, of which 103,197 tons were coal and 26,810 tons coke. The total tonnage for the year thus far has been 782,389 tons, of which 560,695 tons were coal and 221,694 tons coke. These figures embrace all the coal and coke carried over the road, east and west.—[Phila. Ledger, Feb. 14.

At a meeting of the stockholders of the Virginia Midland Railroad Company, in Alexandria, Va., on the 1st inst., resolutions were adopted giving the directors power to cause to be made any branch road authorized by law for the benefit of the main road; extending the time for the exchange of stocks and bonds into the new organization, and authorizing the Board of Directors to execute the mortgages on the road according to the scheme of organization.

The receipts of the Huntingdon and Broad Top Mountain Railroad for the year 1880 were $312,491 10, and the colliery and coal land receipts, $821 35; total, $313,312 45. The road expenses were $160,928 14, making the receipts $152,384 31.

1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

Counterfeit Note List.

HOW TO USE THE LIST.

All paper money in the United States is printed in sheets of four notes of one denomination on each sheet. Each bill bears a letter called the check letter, usually A, B, C or D, which appears on its upper left hand, and lower right hand corner. The notes are always numbered in their order on the sheets; thus all notes lettered A, will bear the number 1 or a number which divided by 4 will leave 1 remainder; the number accompanying B divided by 4 will leave 2 remainder, C, 3 remainder, D, no remainder. All genuine notes with letters A and C will have odd numbers, and all with B and D even numbers.

The counterfeiter makes his plate commonly from one bill and rarely prints more than one of the four letters. As soon as a spurious bill is discovered measures are taken to redeem all good bills of that denomination, bearing the same letter. This leaves the counterfeit alone in the field.

All bills bearing the letters given in the foregoing list should be refused by all non-experts.

We can assure our subscribers that there are no counterfeit bills on paper currency of the United States, which are known to the Secret Service Division at Washington at this date.

The National Bank notes printed in Italics are stolen and are worthless.

Banks starred do not exist, and the whole issue is fraudulent.

Railroad Law.

BOARDING AND LEAVING RAILWAY CARS IN MOTION.

Three recent cases on this subject deserve notice. In Cotter vs. Frankford and Southwark Ry. Co., Pennsylvania Common Pleas, January 22, 1881, the facts were as follows: The plaintiff resided at Frankford, 23d ward, Philadelphia, and was in the habit of riding on the defendants' road each morning by a six o'clock train to Bromley's mills, at Germantown avenue and York street, at which place he was employed. The defendants use in that section of the city a dummy engine and two of the ordinary passenger street cars as a train. The defendants' train had stopped at Unity street, Frankford, to take on passengers, and had started again, when the plaintiff signalled the engineer to stop, and as he did not stop, he ran toward the train, and in attempting to get on the platform of the middle car his foot slipped and he fell under the wheel, and his leg was so crushed and injured that it had to be amputated. As an excuse for attempting to get on the car the plaintiff testified that on a former occasion one of his fellow-workmen at Bromley's mills, who was allowed by the company defendant to act as brakeman on the six o'clock train in the morning, in consideration of a free ride, said to him as he got on the car that he was young, and should run and jump on the car. This was denied by the witness on the other side, and witnesses were also produced who testified that they had warned the boy against jumping on the car while in motion. The jury found in favor of the plaintiff. The court said: "The degree of care required of a child of tender years is always a question of fact for the jury, and what is negligence per se in an adult, might not be so in one of tender years. But an important question in this case is, what duty was owing by the defendant to the plaintiff? The train was bound to stop on his signal, and on failure to do so, the defendant would be liable in damages resulting therefrom, if loss of employment or otherwise; but it would be irrational to say that a failure on the part of those in charge of the train to stop would justify any one old enough to travel alone in attempting to get on a moving train as a passenger. The duty to the plaintiff did not, therefore, extend to his personal safety when not on the train as a passenger, nor to his safety getting on, unless the train had stopped." The court also held that the invitation on the former occasion did not bind the company, because outside the scope of the servant's authority, and not contemporaneous. To same effect, Phillips vs. Rens., etc., R. Co., 49 N. Y. 177; Huebner vs. N. O. & C. R. Co., 23 La. Ann. 492.

The next case, Kelly vs. Hannibal and St. Joseph Railroad Co., 70 Mo. 604, was the converse of the above in its circumstances. The plaintiff in the latter case was a passenger who was injured in trying to leave a train under slow motion, having been negligently carried past his destination. The court below nonsuited the plaintiff, and this was reversed, the court holding that the question of negligence was one for the jury. The court said: "In the case of Doss vs. M., K. & T. R. R. Co., 59 Mo. 27; S. C., 21 Am. Rep. 371, it was held that whether the attempt of plaintiff to step from the cars while the train was in motion, was, under all the circumstances of the case, such negligence as would relieve defendant of all liability for accident, was a question of fact for the jury. For a person to jump from a car propelled by steam while in rapid motion, is mere recklessness, and the leap must be made at his peril; but to step from a car not beyond the platform when its motion is slight or almost imperceptible may or may not be negligence, and of this the jury are to decide from all the attending circumstances. The following cases are to the same effect: Wyatt vs. Citizens' R. R. Co., 55 Mo. 485; Karle vs. K. C., St. J. & C. B. R. R. Co., 55 id. 476; Lloyd vs. H. & St J. R. R. Co., 53 id. 509; 56 id. 338. 'These are risks which the most prudent men take, and plaintiff will not be barred of a recovery if he adopted that course which the most prudent men would take under the circumstances.' Smith vs. Union R. R. Co., 61 Mo. 588; Meyer vs. Pacific R. R. Co., 40 id. 151." 'If a passenger be negligently carried beyond his stopping place, and where he had a right to be let off, he can recover for the inconvenience, loss of time, and expense of travelling back. But when he jumps or leaves the train, under circumstances which prudence would forbid, he does it at his own risk and assumes the consequences of his own act." To the same effect, Damont vs. New Orleans and Carrollton Ry. Co., 9 La. Ann. 441. In the Doss case the plaintiff was not a passenger, but had gone into the car to attend some friends, and the train was started without reasonable notice. The leading case to the same effect, is Railroad Co. vs. Aspell, 23 Penn. St. 147; Thomp. on Carr. Pass. 252. To same effect, Jeffersonville, etc., R Co. vs. Jefferson's Adm'r, 26 Ind. 228; Morrison vs. Erie Ry. Co., 56 N. Y. 302; Burrows vs. Same, 63 id. 556; Dougherty vs. Chicago, etc., R. Co., 86 Ill. 467; Lucas vs. New Bedford, etc., R. Co., 6 Gray, 64.—[Albany Law Journal.

Railroad Enterprises in Mexico.

The official Gazette, published at the city of Mexico, says that the Sullivan Company have purchased the Zacatecas and Guadaloupe Railroad, and purpose to make it part of their great trunk inter-oceanic line. The Simon Company have begun work on the road between Queratero and Celaya.

Many engineers have arrived, and a large quantity of materials has been landed for the American companies.

The Merida and Progreso Railroad will be completed in a few months.

A mortgage for $45,000,000, covering all the property of the Missouri, Kansas and Texas Railway, including the second mortgage bonds of the company, and the last of the extension of the road through Texas to the Rio Grande and the City of Mexico, with provisions for the exchange of what are called the underlined bonds, is in the course of preparation by the attorney of the road, and will be recorded in each county in Missouri, Kansas and Texas through which the road runs.

OFFICE OF THE HOMESTAKE MINING COMPANY,
18 WALL-ST., NEW YORK, Feb. 14, 1881.

DIVIDEND NO. 30.

THE REGULAR MONTHLY DIVIDEND OF Thirty Cents per share has been declared for January, payable at the office of the Transfer Agents, Wells, Fargo & Co., No. 65 Broadway, on the 25th inst. Transfers close on the 19th inst.

H. B. PARSONS, Assistant Secretary.

NEW YORK, February 1, 1881.

THE THIRTY-SEVENTH SEMI-ANNUAL CASH dividend of the Illinois Central Railroad Company, on its entire share capital, being THREE AND A HALF (3½) PER CENT thereon, will be paid by the undersigned March 1, 1881, to shareholders as registered at 2 p. m. on the 11th inst., after which and until the 4th March, the transfer books will be closed.

Papers can be removed and replaced, at PLEASURE, WITHOUT INJURY.

UNIVERSALLY PRONOUNCED THE

BEST BINDER EVER PRODUCED.

Specially Adapted for the

AMERICAN RAILROAD JOURNAL.

Binder for one Vol. (26 numbers) with title in gold leaf, also name of subscriber, $1.42,

Address,

E. L. LAMBIE,

Lock-box 500, Washington, D. C

The first 100 miles of the Texas and Pacific Railway extension was permanently accepted by Vice president Brown, at Abilene, last week, and thirty additional miles of new track, from Baird to Tebo, received from the construction company at the same time. Tebo is 201 miles west of Dallas, and the track is at another station, as yet unnamed beyond Tebo.

The Directors of the Providence and Worcester Railroad to day elected George A. Leete, President; John R. Balch, Treasurer, and William E. Chamberlain, Superintendent.

LOVELL'S

PROVINCE OF ONTARIO DIRECTORY

FOR 1881-2.

TO BE PUBLISHED IN NOVEMBER, 1881,

Price $5.00.

MR. LOVELL, at the request of several Merchants and others of the Province of Ontario, of the City of Montreal, &c., begs to announce that his firm will publish a PROVINCE OF ONTARIO DIRECTORY, in November next containing an

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

SECOND QUARTO SERIES, VOL. XXXVII., No. 9.] NEW YORK, FEBRUARY 26, 1881. [WHOLE No. 2,340, VOL. LIV.

Origin of the Most Important of Early American Railroads.

EARLY HISTORY OF THE BALTIMORE AND OHIO RAILROAD—IMPORTANCE OF THE RAILROAD TO EASTERN COMMERCE AND NATIONAL UNITY—STONE AND WOODEN RAILS—COST OF CONSTRUCTION — EARNINGS AND EXPENSES FIFTY YEARS AGO.

Maryland has the honor of being the first State in the Union to incorporate a company for building a railroad. The establishment of improved means of intercommunication between the different sections of our country was beginning to be regarded as a matter of importance on our side of the water about the time that the railroad question began to be agitated in England, as the first quarter of this century was drawing to a close. It began to be apparent then, as it has been so conclusively demonstrated since, that the very existence of the Union of States and harmony of action and purpose in so vast a territory as that covered by our Union were dependent upon efficient and speedy means of transportation. The question soon grew out of sectional limits and developed into one of a national character, though while it was discussed, in many localities awakening interest and a hearty opposition wherever it penetrated, it remained, as is usual in all important enterprises and advancement, for a local interest and need to turn theories into practice and to force action and life into measures, which needed the sharp spur of necessity for their development.

Baltimore was suffering in 1825 a considerable loss in western trade, which had been diverted from her by steam navigation on the Mississippi and the increase of the flow of trade that was seeking the Gulf through that channel. The restoration of this trade or of a part of it to the Atlantic coast was appreciated then as of the most vital importance, not only to Baltimore but to the entire East. The King of Rivers was threatening to rule the commerce of that vast section of agricultural wealth embraced in the valley of the Mississippi. And here it may be remarked that from the light and experience our Government now has, it can be seen that had the introduction of the railroad been long postponed, our Union would have been ruptured by sectional jealousies and strifes for the control of commerce. Geographical laws and influences of resource were tending naturally to divide our country into two or more separate divisions, and the railroad may be justly placed among the strongest bonds that have preserved and strengthened our unity.

Being deeply sensible of this truth, and desiring to receive the benefits that would be derived by their city from a participation in the commerce of the valleys of the Ohio and Upper Mississippi, the enterprising and public spirited citizens of Baltimore took practical measures for securing better means of communication with those fertile regions. They had awaited with much interest a report of United States Engineers upon the subject of a proposed canal between the waters of the Ohio river and the Chesapeake bay. The report was by no means encouraging, and it was evident that other means of communication must be sought. Abandoning the idea of a canal, a number of Baltimore's leading citizens held a meeting February 12th, 1827, for the purpose of discussing the situation. On this occasion a number of documents were presented, advancing theories concerning the efficiency of railroads, and the matter was placed in the hands of a committee for investigation. The committee, after a thorough investigation of the subject, reported in favor of "A direct railroad from Baltimore to some eligible point upon the Ohio river." The report was unanimously approved, and application was at once made to the Maryland Legislature for an act incorporating a joint stock company, with a capital of $5,000,000, to be called "The Baltimore and Ohio Railway Company."

Application was made to the legislatures of the several States through which the railroad was to pass for acts of incorporation authorizing the construction of the road. The legislatures of Maryland and Virginia, in session at the time, promptly concurred in such an act, and when the Pennsylvania legislators met they also adopted the same measure. A provision made by the State of Maryland concerning the location of the road was "that it shall go to or strike the Potomac river at some point between the mouth of the Monocacy river and the town of Cumberland, in Alleghany county, and that it shall go into Frederick, Washington and Alleghany counties," and the route was located accordingly. Commissioners were appointed who opened subscriptions for the stock, and the amount required by the charter was promptly subscribed for. A board of directors was elected, and the company being duly organized proceeded at once to take measures for the necessary examination and surveys for the route.

The engineers who had been appointed for the purpose made a report of their surveys, in April, 1828, only a little more than a year after the first meeting of the projectors. During 1828 a route was secured from Baltimore to the Potomac river, a distance of sixty-six miles. On the 4th of July of that year the ceremony of laying the first stone was performed at the then southwest boundary of the city of Baltimore, but it was not until the following autumn that active construction work was commenced, when it was pushed with great zeal and energy; as is shown from the fact that within a year twenty-five miles of the road were ready for the reception of rails. Much of this work was attended with great expense for cutting and embankments, at some parts of the Patapsco Valley it being necessary to carry the road through extensive beds of hard granite, and at "Buzzard Rock" an expensive cut having to be made through a solid mass of rock rising fifty-eight feet above the surface. The quantity of excavation between the city of Baltimore and the Patapsco valley, a distance of about seven miles, was 655,568 cubic yards, which added to an embankment of 628,629, made a total of 1,284,107 cubic yards to be handled, and with no very skillful or well-tried methods to aid in the work. Some of the most expensive work was done in what were known as the "City" and "First" divisions. These two divisions embraced a distance of thirteen miles, covering the ground from Pratt street, Baltimore, to

Ellicott's Mills, on the northern edge of the old Frederick turnpike road. The second annual report of the chief engineer of the road, made Oct. 1, 1831, shows that the cost of grading these divisions was $29,193 92 per mile, and of the masonry $17,160 64, there being in these divisions a large number of bridges and culverts. To obtain as much information as possible concerning railroad construction, the company sent to Europe a party consisting of Jonathan Knight, civil engineer, Captain Wm. Gibbs McNeill, of the U. S. Engineer Corps, and Lieut. George W. Whistler, of the U. S. Army, who examined minutely every railroad of consequence in England, and returned with much valuable information, which was employed to good advantage in future construction work here.

Both wooden and stone rails were used on the Baltimore and Ohio railroad in its earliest days. The company largely depended upon the resources of the different localities through which the road passed for rails, and those resources chiefly decided of what material the rails should consist. Stone was the first choice, but in those districts where stone of a suitable kind could not be obtained wood of the best and most durable quality the country afforded was used. The first division of the road was opened in May, 1830, to Ellicott's Mills, and before the close of 1831 sixty miles were being operated, and at this time locomotives were being introduced. Mr. Philip E. Thomas, president, in his report of October 1, 1831, congratulated the company upon the amount of business being done, saying that since the previous January, over this thirteen miles of road, 81,905 passengers and 5,931 tons of freight had been transported, yielding an income of $31,405 24, and involving an expenditure of $10,994 87; a proportion of expenses to earnings that was by no means discreditable to the management of the first important American railroad in its earliest days.

An Interesting Exhibition of the New Petroleum Fuel.

The new petroleum fuel of which we recently gave a brief description, have attracted a great deal of attention and practical tests are being made with it, which develop much of interest especially in railroad and manufacturing circles. The Commercial Advertiser describes as follows an exhibition that was given of the atomized petroleum and super-heated steam in use, at the Belleville Water Works, New Jersey:

The spectacle presented was an enormous Cornish engine of 400 horse power pumping 7,000,000 gallons a day, or 586 gallons at every stroke, running with the use of only one-half the furnaces usually employed and at one-fourth the cost, to say nothing of the saving in labor by dispensing with firemen and coalheavers. The oil and steam were conducted to the mouth of the furnace by common inch pipes and injected through a small opening in the furnace door which had been nearly filled with brick. The commingled steam and oil rushed out with a roaring sound, reminding one of a powerful blowpipe, and the interior of the furnace glowed with an intense heat. The inflammable vapor first expended itself inside of a perforated brick retort placed on the grate bars to shield the boiler plates from possible injury. From thence the heat was diffused more uniformly, but attention was called to the fact that the space between the retort and the boiler plates showed little more than a faint purplish light, indicating the presence of carbonic oxide. The inventor, Alderman Mackey, a practical smelter, explained that the oil and steam were mixed in an incandescent state, the oxygen combined with the carbon of the oil forming the carbonic oxide, from which the intense heat was generated—capable of melting a ton of iron ore in an hour and a half, as proven by former experiments.

The engine was started with twenty-five pounds of pressure, but under great disadvantages. The circumstance was mentioned that the boilers were of unusual size, 8 by 34 feet, and with their connections presented a very large surface to the external atmosphere. Moreover, and chiefly, the trial was with "wet steam;" whereas the highest efficiency could be developed only with very dry steam, say at seventy-five pounds pressure. The dryer the steam the more perfect the combustion. As time passed the gauge gradually ran down from twenty-five to nineteen pounds, from which the conclusion was derived that an additional furnace was needed—i. e., three out of the four ordinarily used. "But even with this allowance," said the engineer in charge, "see the difference."

Three furnaces would burn 2,000 pounds of coal an hour, while of oil the consumption would be only thirty-six gallons, the former costing $5, the latter $1 08, at three cents a gallon. In addition is the saving of labor. We now have two men on duty, in watches of eight hours each; whereas with oil one man would be enough, in the same number of watches—a saving of one-half.

Mr. Thomas, Superintendent of the People's Gas Works, Jersey City, said they had been using tar for benches of retorts in various ways, but the results bore no comparison to the new method. He was a full believer in coming revolution. Mr. M. M. Overatt, Superintending Engineer of the New Brunswick Public Works, said: "They are here running a 6,000,000 engine (i. e., pumping six million gallons per day) at a cost of fifty cents an hour for fuel, while it costs us, with a much smaller engine, $1 50 per hour. I am satisfied that we can do the same work with this system for one-quarter the cost. It hardly seems possible, but it can be done." Mr. A. G. Ogilby, Secretary of the Board of Public Works in New Brunswick, expressed himself with equal confidence. Mr. D. C. Dougherty, well known among engineers, said: "What we want is a boiler pressure of seventy-five pounds; then the steam can go in dry." Mr. Kearney, Chief Engineer of the Belleville Water Works, who may be taken as a true type of mechanical engineers, believed that the use of petroleum as a fuel is yet in its infancy. There are many details yet to be perfected, many tests to be applied. There was great trouble with anthracite in the beginning, and it is not to be expected that complete success will be realized at once, in the present instance. Mayor Taussing, of Jersey City, intimated that the battle to be fought was a labor question. The thousands who find employment in burning anthracite would not readily yield to sweeping innovations. Nevertheless, great changes were possible.

Colonel Rose, of the Pennsylvania Railroad Company, said that petroleum could be applied to locomotive boilers by a very simple apparatus, as little more is necessary than to place an earthen retort on the grate bars. Practical tests soon to be made would settle every question. He believed we shall soon witness important movements looking to the introduction of the new fuel, with economic results affecting the whole range of mechanic arts and industries, wherever steam is employed. The company dispersed apparently of one mind as regarded the essential facts.

The Niagara Suspension Bridge.

The Niagara Falls Gazette gives the following sketch of the history of the great suspension bridges: "In 1848 Charles Ellet, a brilliant rather than a profound engineer, built the first suspension bridge over the Niagara, on the site of the present railroad bridge. The bridge was only for carriages and foot passengers. The towers were of wood, and the roadway was only about six feet in width, just wide enough for one team. Mr. Ellet in the beginning had offered a reward of $5 to the first person who should get a string over the river. The next windy day a large number of boys assembled on the bank with kites, and before night one of them, Homan J. Walsh, then a boy of 13 years of age, landed his kite on the Canada side and received the promised reward. By means of this string larger cords, then ropes, and then iron cables, small at first, but increasing in size, were drawn across, until the large cables were thus stretched. This structure served as a most excellent auxiliary in the construction of the present bridge. This was built by America's great engineer, John A. Roebling, and has always been considered one of the greatest of his works. It was commenced in 1852, and the first locomotive crossed it in 1854. The iron basket now hanging under the railroad track near the American end of the bridge was first used by Mr. Ellet, and in it the first person who ever crossed the chasm alive, and of his own free will, was then crossed over. There is an old Indian tradition that a resisting chief was once carried to the opposite side by a large bald-headed eagle, who swooped down on the great warrior, as he lay in ambush on the ground, and bore him over. Ladies have crossed in this basket. The suspension bridge by Brock's monument was built in 1856 by T. E. Serret. The ice jam of 1866 tore the guys from the rocks to which they were fastened and before they were replaced, a terrific gale broke the roadway, severed the suspenders, and left the structure dangling in the air. The new suspension bridge, as it is called, was built in 1868, the cables being carried over in the Winter on the ice-bridge. Its length is over 1,200 feet, or a full quarter of a mile, from outside to outside of the towers, and is the longest suspension bridge in the world."

New York, Saturday, February 26, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

REFUNDING and Cabinet uncertainties and surmises have kept things in a somewhat unsettled state during the past few weeks, wherever those influences reach, and it would be hard to find a point in our financial matters that they do not reach more or less directly. But the unsatisfactory suspense is drawing to an end, and its departure, whatever may be its direction if within the reasonable limits which merited confidence in the wisdom of our outgoing and in-coming Executives warrants financial circles to expect, will be a source of congratulation to the general public.

BY the purchase of a controlling interest in the Philadelphia, Wilmington and Baltimore Railroad, announced on Wednesday, the Baltimore and Ohio Railroad Company secures an outlet to the seaboard at New York, the Philadelphia and Reading Railroad and the Central of New Jersey furnishing the needed link. The stock bought to obtain the control is said to be that of Mr. Nathaniel Thayer of Boston, 60,000 shares at $70 per share, the offer being made to buy of other holders at the same price until March 15th. It is understood that the general offices of the Philadelphia, Wilmington and Baltimore Railroad will be brought to New York, and that Messrs Jay Gould, Robert Garrett and John Lowber will be included in the board of directors.

MEASURES for developing our trade with Mexico will undoubtedly occupy a prominent part in the work of the next Congress. The inducements offered for the use of American enterprise and capital in facilitating intercommunication between the two Republics, are of the most promising character, and the fact that they are being so appreciated is demonstrated by the rapidity with which railroad projectors are pushing construction work toward the rich fields welcoming them in Mexico. With the wonderful variety and wealth of her agricultural and mineral resources the one great need from which much suffering Mexico has suffered the most of late years has been that of railroads. That she appreciates it now and is eager to remedy the evil is evident from the liberal concessions she is offering for American capital and skill to come to her assistance in the effort to place herself in connection with the most desirable markets of the world. The liberality of Mexico in encouraging railroad construction is shown in a valuable work on Railroads in Mexico recently published by the eminent engineer Mr. Robert B. Gorsuch, who has passed many years in Mexico, and has made careful and scientific study of her resources and needs. He says that since the re-establishment of the Republic in 1867, Mexico has passed one hundred and one important acts for the encouragement of railroad construction, representing 14,530 miles of road, and that subsidies amounting in the aggregate to $171,478,500 have been granted by her Federal authorities. This liberality would seem alarmingly extravagant were it not for the fact, that many of these grants have been forfeited by limitation, and that enough more of them are likely so to expire to reduce the liability incurred by the Mexican Government in her subsidies to about $69,000,000, for a large part of which provision is made from customs to be collected and other sources, leaving about $28,000,000 to be paid direct from the Federal Treasury. Mexico sees enough of increase of wealth to be derived by her from railroads to warrant the assuming of these obligations and our projectors evidently see sufficient encouragement to eagerly undertake to do for her development what no other agencies could possibly do.

CONGRESSIONAL and State interference with the control and management of railroads is receiving about as much of weak and ill-considered discussion as any question could be expected to endure and maintain anything like a dignified appearance in the estimation of a thinking public. There is no lack of alleged wise men and philanthropists just now who are willing to ventilate their ideas liberally for the enlightenment of "The People" and the benefit of their own individual pockets, in a manner that borders dangerously near to the worst phases of insidious communistic workings. An opinion from a source representing in a conservative way some of the most important manufacturing industries of the country is of great value, manufacturing or industrial papers generally, and notably the one from which we quote, not being inclined to give other than thoughtful and cautious suggestions on topics so directly connected with the interests they represent. We quote the following from *The Manufacturer*, Springfield, Mass.: "We have the best reasons for asserting that the very first step towards the right solution of this railroad and telegraph problem is to prevent, if possible, all legislative meddling with it. If Congress and State legislatures can be persuaded to keep their blundering hands off, it is as certain as anything in nature that the sufferers themselves will, in time, provide from their own resources and in their own way, legitimate, effective and permanent means of relief. State interference, on the contrary, can only work mischief. If government buys up the stocks of the companies, and assumes the management of their affairs, as has been done in England and on the continent, we simply get a State monopoly in place of a private one, which is jumping from the frying-pan into the fire. * * * * * Backed by the taxing power, the system can be kept alive forever, whether worth its cost or not. Invention is discouraged and enterprise killed. If, on the other hand, leaving the lines where they are, in private hands, the State undertakes merely to audit accounts and supervise dealings, endless complications are at once introduced. Judging from past experiences, we need not hesitate to say that every opportunity to falsify figures and mislead committees would be improved; that lobbying and bribery would receive an unprecedented impetus, and that legislatures become dens of thieves that would laugh to scorn the civil service reformer and his whip of small cords."

Ohio and Mississippi Railroad.

The fifth report of John King, Jr., Receiver of the Ohio and Mississippi Railroad, to the Circuit Courts of the United States for the several districts of Indiana, Southern Illinois, Southern Ohio, Eastern Missouri, and the Chancery Court of Kentucky, which has just been made public, shows the condition of the road for the year ending Dec. 31, 1880. From this we learn that the floating debt has been reduced during the year $115,600, and since the beginning of the receivership it has been reduced $1,231,840. The total receipts, including cash on hand at the beginning of the year, were $6,757,265. The total payments were $6,493,569; cash on hand at the end of the year, $264,000. A comparative statement of the net earnings of the main line and the branches and the Springfield division is made, showing, for 1877, $690,299; for 1878, $864,547; for 1879, $1,051,418; for 1880, $1,256,709. Included in the expenses of the present year were improvements aggregating $531,236, there being at the

close of the year but five miles of iron on the main line, which will soon be replaced with steel.

Referring to the facts which may operate to delay the extrication of the road from the hands of the receiver, Mr. King cites the suit of George Henry Warner and others, holders of preferred stock, to have such stock declared a prior lien upon the second consolidated mortgage, although decided adversely to Warner et al. by Judge Drummond. An appeal has been taken to the United States Supreme Court. He also cites the suit of the sale of the Springfield division, also pending in the United States Court, and says:

"While it is not probable that in the first case the decision of Judge Drummond will be reversed, or in the second case that a sale will be ordered, still, as no one can predict the result of litigation, it would not be safe for the owners of the Ohio and Mississippi railway to calculate upon the future without reference to its possibilities."

Marietta and Cincinnati Railroad.

At the annual meeting of the stockholders of the Marietta and Cincinnati Railroad Company, held in Cincinnati on the 17th inst., Mr. John King, Jr., presented his report of the operations of the road for the fourteen months ending December 31, 1880, from which we learn that the gross earnings from November 1, 1879, to December 31, 1879, were $345,915 27; and from December 31, 1879, to December 31, 1880, $2,101,719 43—making total gross earnings for the fourteen months $2,447,634 70, derived from the following sources: passengers, $482,333 52; freight, $1,794,742 58; mail, $67,492 14; express, $84,693 21; telegraph, $11,432 68; miscellaneous, $7,540 27; total, $2,447,634 70. Expenses: machinery department, $597,761 15; road department, maintenance of way and structures, $324,988 78; steel and iron rails, $380,706 63; joint fixtures and angle plates, $25,411 60; lumber, spikes, and track material, $54,537 96; cross ties, $66,227 51; total, $860,872 48. Transportation department, $471,638 93; mileage of cars, $65,546 97; total, $537,185 90. Telegraph department, $38,457 08; general expenses, $85,224 41; total, $2,119,501 02. Earnings more than expenses, $328,133 68.

The amounts paid for taxes, rents, etc., not included in the above, are as follows: taxes, $82,813 31; rent of Cincinnati and Baltimore railroad, $184,020 66; less amount received from the Cincinnati and Springfield railroad for use of the Cincinnati and Baltimore railroad, $40,846 61; total, $143,174 05. Rent of Baltimore Short Line railroad, $228,526 50; rent of Indianapolis Cincinnati and Lafayette tracks, $7,495; rent of depots and grounds leased at Cincinnati, $40,666 88; coupons of the Scioto and Hocking Valley railroad, (Portsmouth branch,) $31,615; rent of land elsewhere than Cincinnati upon the line of road and miscellaneous, $1,192 11; total, $538,512 79, showing a deficit of $210,379 11.

The bonded debt of the company, as now established is stated to be "far beyond the company's ability to pay. The arrearages on account of interest during the receivership are as follows: coupons—six first mortgage at $122,500, total $735,000; seven second mortgage at $87,500, total $612,500; eight third-mortgage at $120,000, total $960,000; seven fourth mortgage at $160,000, total $1,120,000, or an aggregate of $3,427,500. It cannot be expected that these arrearages can ever be paid, or that the company will, in the future, ever be able to pay the excessive rates of interest accruing upon its present funded debt and the fixed rentals and other charges now existing."

Car Couplers.

The report of the Massachusetts Railroad Commissioners for the past year contains a special report on "Freight Coupler and Draw Bars, a subject which the Legislature instructed them to investigate and report upon.

The Commissioners state that the subject is important, and has for years received the attention of inventors and of railroad managers. The inventions patented are numbered by hundreds. During the last year the number of persons killed in this State while coupling or uncoupling cars was 9, and the whole number injured, including the killed, was 43. In nine years the number of persons so injured was 211. In New York the number of persons so killed in the year ending Sept. 30, 1879, was 13, and the number injured was 251. Daily reports of accidents in various parts of the country show the need of some action in the matter.

The expense and annoyance arising from the loss of pins is a matter of small consequence as compared with the danger arising from the usual method of coupling by link and pin; but it is of some consequence, as appears from the fact that the loss on one road (not in this State) amounted to $60,000 in one year.

In the opinion of the board the use of automatic couplers is the only safeguard. But in order to use them they must be fitted to connect with draw bars varying in elevation, and this is where the principal difficulty arises. Since at the present time there is a wide difference in the height of freight cars, and a law in our State compelling one height of cars or the use of one peculiar kind of automatic coupler would not be binding upon the roads of other States whose cars are constantly interchanging with our own roads, any action hindering the free exchange of freight cars would be a great injury to business.

The board came to the conclusion that every railroad providing itself with new freight cars should adopt some automatic coupler for those cars.

Among the appliances that have been exhibited to the board, Safford's draw bar, including the latest improvements, is pre-eminent. In coming to this conclusion the board refers not only to the intrinsic merits of the device, which are unsurpassed, but to the fact that it is in such general use.

The board would not recommend the compulsory use of this coupler, but "following the precedent of the Switch act, chap. 24, 1871, a bill is recommended which shall require for cars newly bought or constructed by Massachusetts railroad corporations for use in this State the Safford draw bar, or some other automatic coupler."

Upon some roads the brakemen use sticks to couple cars.

Two Indianapolis roads have a rule obliging trainmen to do this, and the rule is a humane one on the part of any road which adopts and enforces it, and should be adopted by all roads. This rule has just been adopted by the Kansas Pacific Railroad, the Superintendent of which issues an order, that is to be stringently enforced, stating that "a supply of sticks for coupling cars, and belts for carrying the same, have been furnished, and all trainmen, yardmen, and others, required to make couplings, must forthwith provide themselves with the same, and use them at all times when making couplings, in accordance with rule 28. Employes must be furnished with belts and sticks before put to work, and will be required to return them on leaving the service of the company. Failing to do so, the sum of $1 will be deducted from their pay." The business of making up freight trains, where old-fashioned link and pins are used to connect two cars, is dangerous, and yet, notwithstanding this danger, it is a curious fact that the position of brakeman is most eagerly sought for by young men, and for every vacancy there are numerous applicants.—[Boston Journal.

Pennsylvania Inventors.

In a lecture recently delivered before the Franklin Institute, Philadelphia, Mr. Hector Orr spoke as follows of several Pennsylvania inventors: Oliver Evans, who propelled a wagon by steam through the streets of Philadelphia, was the real inventor of the high pressure engine. At the age of 22 he invented a machine for making woolen and cotton cards, to supersede the old hand methods of carding. He devised a machine which would make 500 card teeth per minute, and this he soon improved, so that it would make 3,000 teeth per minute. He also made various improvements in milling, and in 1789 he was reduced to almost abject poverty.

In 1803 he built a steam engine which drove 12 saws for cutting stone. He built for the Board of Health a steam machine for dredging docks, which machine moved out Market street by its own power as a steam wagon, and then, having a paddle wheel affixed, went down the Schuylkill and up the Delaware to the front of the city. Afterwards, discouraged on the decision of a court, he burned the drawings and plans of 80 of his own inventions.

It has been proved that the plans and specifications of Evans were copied and sent to England, and that Robert Stephenson, who is claimed to be the inventor of the locomotive, got possession of them. He died in his sixty-fourth year, shortly after his factory on Ridge road had been set on fire and been destroyed.

John Fitch, in 1784, conceived the idea of propelling vessels by steam, and on May 1st, 1787, his boat in the Delaware obtained a speed of three miles an hour. It is said that Fitch was induced to leave this city by a serious misunderstanding with Franklin.

Fulton stands near to Fitch as an inventor, but, while the latter confined his ideas to navigating our great rivers, the former wished to navigate the ocean by means of steam. Rittenhouse was one of the chosen observers of the transit of Venus in 1769, and succeeded Franklin as President of the American Philosophical Society. He died in 1796, after a few days' illness. These are the men who helped at the foundation of Philadelphia's prosperity. The beginning and the end of 70 years of progress in this city are the blind horse moving a spinning jinny on Arch street, and our product last year of $600,000,000 of manufactures.

Engineers engaged in surveying the proposed line of the Dayton, Seymour and Evansville Railroad have reached Salem, Ind. The company promises to have the whole road, 207 miles, completed in 18 months.

Lehigh Coal and Navigation Company.

The report of the Lehigh Coal and Navigation Company for the year ending December 31, 1880, is as follows:

Revenue from railroads and Nesquehoning Tunnel	$1,157,909 22
Revenue from Lehigh Canal	108,666 10
Revenue from water powers Lehigh Canal	19,755 72
Revenue from Delaware Division Canal	90,176 38
Net profit on Lehigh Coal	185,626 14
Royalty on coal mined by lessees	6,076 96
Revenues from rents	33,728 34
Miscellaneous receipts	7,737 66
Total	$1,609,676 52

And the disbursements were:

General and legal exp.	$51,792 62	
Rent and taxes Nesquehoning Valley Railroad	97,050 00	
Rent and taxes Delaware Division Canal	125,438 03	
Taxes chargeable to canals	2,568 07	
Taxes chargeable to coal and coal lands	42,983 29	
Taxes on capital stock	22,725 04	
Taxes on landed property and improvements	12,876 40	
Interest account	932,231 11	
		1,287,664 56
Earnings		$332,011 96
Less depreciation on coal improvements	$53,867 54	
Less sinking fund of 10 cents per ton on 553,170 tons of coal	55,317 00	
Restored to old profit and loss account the encroachment in 1879	18,591 04	
		127,775 58
Surplus for the year		$194,236 38

The coal tonnage on the Lehigh and Susquehanna Railroad and Lehigh Canal, compared with that for 1879, was as follows:

	1879. Tons.	1880. Tons.
From the Wyoming region	2,002,907	1,841,163
From the Upper Lehigh region, Nescopec Branch	420,108	448,323
From the Hazleton region, via L. V. R. R.	58,496	55,351
From the Black Creek region, Drifton Branch	389,473	401,943
From the Beaver Meadow region, via Nesquehoning Valley R. R.	495,500	501,076
From the Beaver Meadow region, via L. V. R. R.	6,794	1,894
From the Mahanoy region, via L. V. R. R.	7,176	8,330
From the Lehigh region, L. C. and Nav. Co.'s lands	698,131	545,161
From sundry shippers	79,449	102,152
Total	4,158,034	3,905,393
Distributed as follows:		
Delivered east of Mauch Chunk by rail	3,510,061	3,255,194
Delivered east of Mauch Chunk by canal	456,031	431,913
Consumed along the line, above Mauch Chunk	99,170	98,654
Delivered to connecting lines, above Mauch Chunk	90,870	119,537
Delivered to Lehigh Valley R. R. at Packerton	1,902	95
Total, as above	4,158,034	3,905,393

—showing a decrease of 252,641 tons.

The gross receipts of the company's railroads during 1880, as compared with 1879, were as follows:

	1879.	1880.
Passengers and mails	$118,658 73	$144,375 65
Freight and express	341,771 02	465,397 76
Coal	1,953,332 14	2,804,272 00
Total	$2,413,761 89	$3,414,045 41
L. C. and Nav. Co's. proportion	$804,587 27	$1,138,015 13

—showing an increase in passengers and mails of $25,716 92; in freight and express of $123,626 74; and in coal of $850,939 86, a total increase of $1,000,283 52, of which the Lehigh Coal and Navigation Company's proportion is $333,427 86.

The report says:

The gross receipts of our railroads were $1,000,283 52 more than during the previous year, showing an increase of 41 4-10 per cent, passenger earnings gained 22 per cent, freight and express 36 per cent, and coal earnings 43½ per cent.

The amount of coal transported was 3,843,209 tons or 6 per cent less than in 1879, but transportation rates were more remunerative than in that year.

Our railroads have been well maintained by our lessee, and large additions have been made to equipment during the past two years. Further purchases of cars and engines are about being made, and it is the aim of the Receiver of the New Jersey Central Railroad Company, to maintain both road and equipment in a thorough state of efficiency and ready for any demands that may be made upon them by the increasing activity in all branches of trade.

Our total net revenue for 1880, from all sources, was $1,609,676 52, showing a gain of $425,827 59 over 1879.

The decreased expenses, $21,947 74, added to this make a total gain of $447,775 33 over the previous year.

Canal navigation opened March 22d, and was closed by ice on November 20th. The net revenue of both canals, after paying rent and taxes of Delaware Division Canal, was $90,592 10, against a loss of $1,246 94 in 1879. This improvement is due entirely to more remunerative rates of toll, as 24,118 tons less coal were transported than in the previous year. Had the canals remained open as usual till two weeks later, there would have been no loss in tonnage, but owing to the early cold weather, this was unavoidable.

The canals are in very good condition and require a smaller amount of renewals and repairs this winter than usual. We increased our equipment during the year, and at the close of the season owned 309 boats, of which all but two were in good condition, being an increase of 52 boats. We have contracted for 25 additional boats, and are building six at the company's yards.

The production of coal during the year was 554,937 tons of prepared sizes, against 700,761 tons in 1879, a decrease of 145,824 tons. The profit was $185,626 14; compared with $190,622 83 in the previous year.

The overproduction of anthracite coal in 1879, followed by a mild winter, rendered frequent suspensions of mining necessary to reduce the output during the past year. These suspensions materially increased the cost of producing our own coal, which, together with an advance in transportation, wages and supplies, consumed a large part of the increased price at which we were able to sell.

The five Collieries which were operated continuously during 1879 averaged in that year 271 days' work, and, in 1880, 185 days. We averaged at our whole seven Collieries 174 full days' work, and their aggregate production was 3,143 tons per day, against 2,975 tons in 1879, a daily average of 449 tons to each breaker, compared with 425 tons, an increase per Colliery of 24 tons per day. The average daily aggregate product and that of each breaker were the largest in the history of the Company, and our aim is to make a further increase in this direction. Colliery No. 4, in which there was a fire in 1877, has been undergoing extensive repairs, and the breaker is being remodeled and improved, and will be ready to commence operations about the 1st of April. Extensive developments, including sinking the slope another lift, are about completed at No. 10 Colliery, and a new breaker will be ready to replace the old one by 1st March. We have also made changes in No. 11 breaker, increasing its efficiency, and we expect to have, with the opening of spring, eight Collieries in full operation and all in good condition, with a large quantity of coal opened. We expended for coal improvement account $79,916 90 during the year, and charged off $53,867 54 for depreciation of same. We have also charged off $55,317, being 10 cents per ton on coal mined from the property. Our mines have never been in as promising a condition as at the present moment, as appears from the detailed report of W. D. Zebner, our superintendent.

We are thus particular and emphatic in our statements, because rumors have been circulated that our mines were in bad condition, and also that the coal was nearly worked out from our property. This last was an inference from a reference to our coal lands in Mr. J. S. Harris' report on the Reading Company's coal lands. We published, in December last, a letter from him, showing that the inference from his language was entirely erroneous, and that he estimated the future yield of the property at 138,649,688 tons; so that we can mine a million of tons a year for over a century. This estimate is certainly moderate, as the quantity stated is much less than the estimates of other mining engineers. In view of these estimates we need not fear to increase our product beyond 1,000,000 tons a year, when coal is in steady demand at remunerative prices. We can, at moderate cost, open a large amount of red ash coal, and, as the supply of such coal is hardly equal to the demand, it may be expedient to commence preparations for a colliery on that vein at an early day. We have on the Greenwood property an immense deposit of both red and white ash coal of the very best quality, and we shall probably during this year expend a moderate sum of money in preparing for a large colliery there. As it is a work of two or three years to put a large colliery in operation, and the expenditure during the first year is but a small part of the total cost, it would be wise to commence operations as soon as the prosperity of the coal trade is fully assured.

Mr. J. S. Harris was relieved on Sept. 1st, at his own request, from the active management of our coal mines, in order to accept the position of General Manager of the Central Railroad of New Jersey, and was succeeded by his assistant, Mr. W. D. Zebner. Mr. Harris remains in our service, as consulting engineer.

The second instalment of our extended debenture loan matured on 10th December, and was promptly paid. The amount outstanding is now $212,381 51, maturing one-half each in 1881 and 1882.

The floating debt, less cash assets, was about $800,000 at the close of the year. This includes the cost of Delaware Division bonds purchased during the past year by agreement with that Company, and of which we now hold $306,000, bearing six per cent. interest. The company also owns $740,000 of its seven per cent. consolidated bonds, and 18,900 shares of its own stock.

It is said that the Sioux City and Pacific Railroad Company will build 120 miles of an extension the coming summer, which will advance the termious (now at O'Neill City) to a point within 100 miles of Custer and 175 miles of Deadwood.

It is said the new purchasers of the Atlantic, Mississippi and Ohio railroad have determined to change its name to the Norfolk and Western railroad.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

Personal.

—Mr. A. D. Briggs, one of the Massachusetts Railroad Commissioners, died at Springfield, on the 20th inst. He was 61 years of age, had been twice Mayor of Springfield, and was a prominent and respected citizen of Western Massachusetts.

—Mr. Wm. H. Vanderbilt has not been at his office for the past week or so, being confined to his house by a temporary ailment. He is expected to be out again within a few days.

—That the superintendent and other officers of the Housatonic Railroad are very popular with the people along the line of the route, is evident from expressions of the local press like the following:

The Housatonic Railroad, in fact, has the best corps of conductors, of any road in New England, at least. They make conducting a business, and conduct well. —[Berkshire Courier.

The proverbial courtesy of the superientendent, and other officers of the Housatonic Railroad is one of the many causes that makes it the most popular thoroughfare for passengers in the country.—[Housac Valley News.

—Hon. H. Hosford, manager of the Boston and Lowell Railroad has been dangerously ill, but the latest reports give hopes of his recovery.

Organization.

—J H. Deveren. H. J. Jewett, S. Burk, George B. Roberts, J. N. McCullough and T. D. Messler have been elected directors of the Indianapolis and St. Louis Railway Company. The officers are: J. H. Deveren president, Edward King secretary and treasurer, and Russell Elliott auditor.

—At the annual meeting of the stockholders and bondholders of the Marietta and Cincinnati Railroad Company, held in Cincinnati on the 16th inst. the old board of directors was re-elected, except that Theo ore Cook was elected in place of Larz Anderson, and W. W. Peabody in place of Thos. Whitredge. The board re-elected its old officers.

—At a meeting of the Delaware, Lackawanna and Western Railroad Company on the 22d inst., Jay Gould, Sidney Dillon and Russell Sage were chosen directors in place of Alfred L. Dennis, S. B. Chittenden and William Ryle. The board now consists of William E. Dodge, Moses Taylor, Jay Gould, George Bulkley, John I. Blair, George Bliss, Percy R. Pyne, Sidney Dillon, William Walter Phelps, Wilson G. Hunt, Russell Sage, Benjamin G. Clarke, E. W. Holbrook and E. S. Higgins.

—Articles of consolidation of the Chicago and Milwaukee Railway Company and the Northwestern Union Railway Company have been filed in the Recorder's office at Chicago. The directors are Albert Keep, Marshall M. Kirkman, Martin L. Sykes, Augustus Schell, Marvin Hughitt, Joseph B. Redfield, William L. Scott, Charles C. Wheeler and James H. Howe, to hold their office until their successors are duly elected and qualified.

—The Moorhead, McCauleyville and Breckenridge Railroad Company was organized at Moorhead, Minn., on the 16th inst. The first board of directors are: A. A. White, S. G. Comstock, F. J. Boomham and John Erickson, all of Moorhead; Messrs. McCauley and Harris of McCauleyville; Messrs. Hanson and Brandrup, of Breckenridge. The road will run from Moorhead to Breckenridge. The work is to be commenced as soon as the weather will allow.

—Articles of association of the Brazil and Chicago Air-line Railroad Company, were filed in the office of the Secretary of State of Indiana on the 18th inst. The capital stock is fixed at $500,000, divided into 5,000 shares of $100 each. The road will be about 100 miles in length, extending from Brazil to Rensselaer, and running through the counties of Clay, Park, Fountain, Warren, Benton and Jasper. The directors are: Hiram Liter, Thomas Watson, William B. Zimmerman, Ensign Bennett, W. M. Ridpath, Donald B. McCrimmon and Dillon W. Bridges.

—Articles of incorporation of the Colorado and Pacific R. R. Co. have been filed with the Secretary of State of Colorado. The capital is $12,000,000, in shares of $100 each. The directors for the first year are James T. Briggs, Henry J. Chase, C. W. Wright, Norris H. Cone and John F. Degnon. The road and its branches, according to the terms of its articles, will run into or through the counties of Pueblo, Ouray, Custer, Costilla, Saguache, Gunnison, Rio Grande and Hinsdale, in which counties the business of the company is to be conducted, with the privilege of extension into Utah. The road is to have several branches: The Rio Grande branch, the Gunnison branch, the Lake City branch and the Ouray branch. The construction company for this road also filed articles, with a capital stock of $1,000,000. The directors are Charles W. Tankersley, John W. Jenkins and Henry Ford.

Commerce of New York.

The foreign imports at New York for the month of January, 1881, are officially stated as follows:

	1880.	1881.
Entered for consumpt'n.	$20,094,865	$15,361,813
Do. for warehousing ...	7,283,376	5 740,490
Free goods	12,643,875	10,259,629
Specie and bullion	875,038	4,723,427
Total entered at port...	$40,897,154	$36,085,359
Withdrawn fr. wareh'use	7,087 326	7,852,224

The foreign imports at New York for seven months ending January 31, were:

	1880.	1881.
Entered for consumpt'n.	$111,345,914	$117,044,725
Do. for warehouseing..	42,581,638	51,198,571
Free goods.....	73,579,994	73,294,615
Specie and bullion....	79,618,209	75,317,963
Total entered at port..	$307,125,755	$316,855,874
Withdrawn fr. wareh'se	43,457,614	60,763,735

The duties received at New York for the seven months ending with January were:

	1879-'80.	1880-'81.
July.....	$9,329,895 17	$13,360,394 37
August	10,562,188 82	14,412,261 87
September	11,790,902 26	12,856,636 10
October	10,952,554 48	10,574,383 53
November	8,460,050 08	9,079,082 36
December.....	8,175,540 13	9,230,734 57
January	11,960,677 78	10,672,559 15
Total	$71,231,758 72	$80,166,101 95

The exports from New York to foreign ports in the month of January, were:

	1880	1881.
Domestic produce.....	$24,668,691	$28,526,320
For free goods.....	370,357	1,308,767
Do. dutiable.....	377,518	420,832
Specie and bullion.....	819,919	1,034,514

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, February 24, 1881.

The quotation for call loans at the Stock Exchange this afternoon is 6 per cent, plus a commission of ⅛ of one per cent per day.

The posted rates for sterling exchange is 4.83 @4.85½. The actual rates this morning were 4.81⅛@4.82 and 4.83@4.83⅛; cables, 4.84@4.84¾; and prime commercial 4.79¼@4.79½.

A despatch was received in this city a little before noon to-day from Secretary Sherman stating that the Treasury Department will redeem the bonds embraced within the one hundred and first call upon their presentation at this department (Washington), with interest to the date of presentation.

The Secretary of the Treasury issued on the 21st inst. the 101st call for bonds for the sinking fund. The bonds named are the Five per cent Bonds of the Funded Loan of 1881. The bonds are as follows, and the principal and accrued interest will be paid at the Treasury, in this city, on and after May 21, and the interest will cease on that day:

Coupon bonds,—Fifty dollars—No. 27,001 to 28,115, both inclusive; $100—No. 86,001 to No. 39,961, both inclusive; $500—No. 49,001, to No. 54,768, both inclusive; $1,000—No. 293,801 to No. 316,855, both inclusive. Total coupon, $8,337,300.

Registered Bonds.—Fifty dollars—No. 2,744 to No. 2,778, both inclusive; $100—No. 17,175 to No. 17,361, both inclusive; $500—No. 9,049 to No. 9 141, both inclusive; $1,000—No. 32,732 to No. 33,068 both inclusive; $5,000—No. 13,461 to No. 13,620, both inclusive; $10,000—No. 80,854 to No. 31,350, both inclusive; $20,000—No.

1,614 to No. 1,658, both inclusive; $50,000—No. 3,031 to No. 3,217, both inclusive. Total registered, $16,662,700. Aggregate, $25,000,000.

The bonds described above are those last dated and numbered, as required by section 3 of the act of July 14, 1870. Many of the bonds originally included in the above numbers have been redeemed or cancelled, leaving outstanding the amount above stated. All bonds forwarded for redemption, should be addressed to the "Secretary of the Treasury, Loan Division, Washington, D. C.," and all registered bonds should be assigned to the "Secretary of the Treasury for redemption." Where persons desire checks in payment for registered bonds, drawn to the order of any one but the payee, they should assign them to the "Secretary of the Treasury for redemption for account of," the person or persons to whose order the check should be made payable.

The closing quotations on Thursday were: Adams Express, 130 @135; American Express, 67@68½; American District Telegraph, 70@70½; American Union Telegraph, 76¼@77; Atlantic and Pacific Telegraph, 45@46; Canada Southern, 82¼@82⅝; Central Pacific, 87¼@87½; Chicago and Northwestern, [illegible]26½@126¾; do. pref., 138½@139½; Chicago and Alton, 138½@142; Chicago, Burlington and Quincy, 169@170; Chicago, Milwaukee and St. Paul, [illegible]93¾@10[illegible]; do. pref., 121½@122; Chicago, Rock Island and Pacific, 134@135; Columbus, Chicago and Indiana Central, 23½@23⅝; Cleveland, Columbus, Cincinnati and Indianapolis, 87½@88½; Hannibal and St. Joseph, 57@57¼; do. pref., 102¾@103; Illinois Central, 130¾@131; Lake Erie and Western, 54@54¾; Lake Shore and Michigan Southern, 127⅜@127⅝; Metropolitan Elevated, 118@118¾; Manhattan Elevated, 38½@38¾; New York, Lake Erie and Western, 48⅛@48¼; New York, Ontario and Western, 34⅞@35; New York Central and Hudson River, 146@146½; Ohio and Miss., 42⅝@42⅞; do. pref., 105¼@—; Pacific Mail, 55¼@55¾; St. Louis, Iron Mountain and Southern, 60⅛@60⅜; St. Louis, Alton and Terre Haute, 41@42¾; do. pref, 116@117; Texas and Pacific, 54¼@54⅝; Union Pacific, 118¾@119; United States Express, 52@55; Wells Fargo Express, 118@119½; Western Union Telegraph, 115@115¼; Wabash, St. Louis and Pacific, 46⅛@46½; do. pref., 87¾@88.

Dangerous Counterfeits.

Underwood's Counterfeit Detector announces that dangerous $50 notes are in circulation on the National Broadway Bank and Tradesman's National Bank of New York city of the old series. All notes bearing the old star pointed seal and F. E. Spinner as Treasurer should be handled with great care. Any notes on these banks bearing any other Treasurer's name than Spinner's are good. On the genuine, above the words "with the," under United, there is a flourish ; on the counterfeit there is none ; on the genuine the end of the oar in the hand of the soldier in the bow of the boat touches the circle surrounding "50" in border of note ; on the counterfeit it does not touch the border of the note, and is quite a distance below the circle. On the counterfeit the left hand of the central figure of Victory in the upper right end of note is without thumb or fingers. On the back of the note the bandage does not cover the eyes of the figure of Justice in the State coat of arms. Signatures of bank officers are written. All notes having checkletters B, C or D are counterfeit. The points of difference can be applied to all the following banks having counterfeits of the $50 denomination : Third National Bank of Buffalo, Central National Bank, Mechanics' National, Metropolitan, National Bank of Commerce, National Broadway Bank, Tradesman's National Bank and Union, all of New York city.

Plans of the Long Island Railroad Company.

In answer to a recent enquiry from a Flushing gentleman concerning the character of the accommodations that Long Island residents might expect during the coming season from the new management of the Long Island Railroad, Mr. Austin Corbin gives the following information about what the company is doing and is planning to do :

I can, at least, promise that the trains on Long Island will be better than they ever have been. All the rolling stock is now being thoroughly overhauled and put in order, and we have already contracted for steel rails to relay the entire track between Pearsalls and Babylon. We shall also relay that between Babylon and Patchogue, and extend the South Side Road (with steel rails) along the South Shore to some point on the Sag Harbor Road, so that from Long Island City over this line we shall have a first-class road, and on this will be as good an equipment as on any road leaving New York City. We shall also relay so much of the track on the north side as may be necessary to put the road in thoroughly good condition and give it a first-rate equipment. We have contracted for 20 new drawing-room cars, which are now being built by the Woodruff Parlor Car Company, and to all prominent points on the island expect to run express trains, with parlor cars attached, so that parties who desire to go from and come to the city daily will be able to do so as quickly as on any other road leading out of New York. In addition, we shall have a sufficient number of local trains to fully accommodate travel, so that persons living permanently or temporarily on the island will have no reason to complain either of trains or character of accommodations. We shall continue the annex boat from Pier No. 17 East River, notwithstanding, as a separate branch of the service, it entails a heavy loss upon the company.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending February 12, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad ...	143,292	1,246,441	1,339,202
Schuylkill Canal....	.....	.....	38,041
Lehigh Valley	112,922	933,366	859,106
Del., Lack. & Western	101,381	412,532	338,868
Shamokin Valley	20,246	108,688	87,578
Central New Jersey .	93,728	370,166	348,040
United R. R. of New Jersey	35,933	165,010	120,670
Pennsylvania Coal ..	22,589	103,926	62,905
Delaware and Hudson	77,897	344,921	428,615
Huntingdon & Broad Top Mt.....	7,782	49,856	45,886
Penn. and New York.	26,409	231,744	240,298
Clearfield, Pa.....	36,416	191,804	271,677

The total tonnage of anthracite coal from all the regions for the week ending February 12, as reported by the several carrying companies, amounted to 583,997 tons, against 401,519 tons in the corresponding week last year, an increase of 182,478 tons. The total amount of anthracite mined for the year is 2,468,000 tons, against 2,411,736 tons for the same period last year, an increase of 56,264 tons. The quantity of bituminous coal sent to market for the week amounted to 72,226 tons, against 75,250 tons in corresponding week last year, a decrease of 3,024 tons. The total amount of bituminous mined for the year is 408,969 tons, against 512,340 tons for the corresponding period last year, a decrease of 103,371 tons. The total tonnage of all kinds of coal for the week is 656,228 tons, against 476,769 tons in corresponding week last year, an increase of 179,454 tons, and the total tonnage for the coal year is 2,876,969 tons, against 2,924,076 tons to same date last year, a decrease of 47,107 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending February 12 was 171,688 tons, of which 127,894 tons were coal and 43,794 tons coke. The total tonnage for the year thus far has been 954,077 tons, of which 688,589 tons were coal and 265,488 tons coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended February 12 were 19,696 tons, and for the year 143,940 tons—a decrease of 54,506 tons as compared with the corresponding period of last year. The coal was carried as follows : Baltimore and Ohio Railroad—week 16,301 tons, year, 123,717 tons ; decrease as compared with 1880, 53,711 tons. Chesapeake and Ohio Canal, none ; decrease as compared with 1880, 2,584 tons. Pennsylvania Railroad—week, 3 394 tons ; year, 20,283 tons ; increase over 1880, 1,789 tons.—[Phila. Ledger, Feb. 21.

Western Union Telegraph.

The certificate of the increase of the capital stock of the Western Union Telegraph Company from $41,073,410 to $80,000,000 was filed in the office of the County Clerk on the 19th inst. The certificate, which is signed by Norvin Green, E. D. Morgan, Augustus Schell, H. Durkee, Samuel F. Barger, Joseph Harker, A. P. Cornell, Russell Sage, John Van Horne, Cornelius Vanderbilt, Wilson G. Hunt, E. S. Sanford, Thomas T. Eckert, D. O. Mills, O. H. Palmer, Samuel A. Munson, Jay Gould, Anson Stager, E. D. Worcester and William D. Bishop, recites that it was filed "because of questions that have been made as to whether the articles of association under which said company is organized have provided for the increase aforesaid, and to exclude all possible pretext for doubt respecting the same. But said company also claims that said articles do provide for such increase, and that it has already been authorized and made." A special train was dispatched the same day for Albany carrying a copy of the certificate to be filed in the office of the Secretary of State.

At a meeting of the directors of the Central Railroad Company of New Jersey, held in this city on the 17th inst. E. C. Knight, of Philadelphia, and Edward Clark of New York resigned as directors, and Jay Gould and Sidney Dillon were elected in their stead. Subsequently, Francis S. Lathrop was elected President in the place of E. C. Knight, and a committee of five, consisting of Francis S. Lathrop, Sidney Dillon, Jay Gould, G. G. Haven and F. A. Potts were appointed to consider the extension and improvement of the property.

At the annual meeting of the Lehigh Coal and Navigation Company, held in Philadelphia on the 21st inst., it was resolved to take 18,900 shares which the company now holds of its own capital stock and offer them to the stockholders at not less than par value for the purpose of paying off the entire floating debt of the company.

Railroad Law.

BOARDING AND LEAVING RAILROAD CARS WHILE IN MOTION.

In Commonwealth vs. Boston & Maine R. Co., Massachusetts Supreme Court, October, 1880, the circumstances were similar to those in the Missouri case. The action was for a statute penalty for killing one H., who claimed to be a passenger upon defendant's railroad. It appeared that the deceased, who was traveling on defendant's train, left it while it was in motion, slowly passing a station where he intended to alight, and was struck by a train passing on another track, and killed. Held, that deceased was not a passenger after he had left the moving train, and was not entitled to protection by defendant as such. The court said: "It is true that one who has bought a ticket of a railroad corporation is ordinarily a passenger of the corporation from the time he reasonably and properly starts from the ticket office or waiting-room in the station to take his seat in a car of the train, until he has reached the station to which he is entitled to be carried, and has had an opportunity by safe and convenient means to leave the train and roadway of the corporation at that station. Warren vs. Fitchburg Railroad Co., 8 Allen, 227. The duty of the corporation toward him is to furnish a well constructed and safe road, suitable engine and cars, competent and careful engine men, conductors, and other necessary laborers, in order that all injuries which human foresight can guard against may be prevented. But this duty rests on the corporation only so long as the passenger sees fit to be carried by it; and if he chooses to abandon his journey at any point before reaching the place to which he is entitled to be carried, the corporation ceases to be under any obligation to provide him with the means of traveling further. And while it is true that if he leaves the train while it is at rest at a station, he is entitled to an opportunity to do so in safety, it is equally true that the corporation is not under any obligation to make it safe for him to leave the train while it is in motion, and that if he does so he assumes all risk of injury. Gavett vs. Manchester & Lawrence Railroad Co., 16 Gray, 501. In the case at bar, so long as the train was in motion, H. could not leave it and still retain his right to protection until he had left the roadway of the corporation. By leaving the train while in motion, he ceased to be a passenger and to have the rights of a passenger as completely, though the train was moving slowly and was near by the station, as if he had left it while moving at full speed between stations. Hickey vs. Boston & Lowell Railroad Co, 14 Allen, 429. The fact that the car in which H. was had passed the platform of the station to which he was entitled to be carried, did not give him the right to leave the train at the risk of the company." In Harvey vs. Eastern R. Co., 116 Mass., 269, it was held that the attempt to get on a moving train was prima facie contributory negligence. In Illinois Cent. R. Co. vs. Statton, 54 Ill. 133; S. C., id. 109, the train stopped and remained a reasonable time, but the decedent waited until it began to move, and was killed in attempting to get off. It was held that there was no ground of recovery.

The case is different if the passenger acts under the instructions of the company's employees. Thus, in Chicago & Alton Railroad Co. v. Randolph, 53 Illinois, 510; S. C., 5 Am. Rep. 60, the plaintiff purchased a ticket and got on a freight train. The train not stopping at his station (and not being advertised to stop there), he jumped on it while it was moving slowly, and was injured. There was conflicting evidence whether the conductor suggested to him to jump. It was held that it was a question for the jury whether the plaintiff acted prudently.

In Lambeth vs. North Carolina R. Co., 66 N. C. 794; S. C., 8 Am. Rep. 508, the decedent was killed in attempting to leave a train moving from two to four miles an hour. The conductor went out on the platform to help him alight. It was held that if without direction from the conductor he voluntarily incurred danger by jumping off, there could be no recovery; but otherwise if the motion was so slow that the danger was not apparent to a reasonably prudent person, and the decedent acted under the conductor's instructions. The circumstances and holding were substantially like this case in Filer vs. N. Y. C. R. Co., 49 N. Y. 47; S. C., 10 Am. Rep. 327, where the train was advertised to stop; and Georgia R. Co. vs. McCurdy, 45 Ga. 288; S. C., 12 Am. Rep. 577. In the latter case the conductor agreed to let the passenger off at a stopping place for wood and water only. The court indulged in the following graphic language: "Who that has seen much railroad travel can fail to see in his mind the picture of this scene? The conductor in a pet; his train bound to slack up its speed at an unusual point; the passenger conscious that he was giving unusual trouble; the train slacks its speed; he stands ready, the conductor ready also, to give the word—now jump! None but a timid and yet resolute man would fail, and jump he did."

In Loyd vs. Hannibal & St. Joseph R. Co., 53 Mo. 509, the train stopped at the station only a minute; during that time plaintiff's little child alighted; plaintiff followed without delay, but after the train was in motion, and received her injuries in consequence of jumping from the train. Held, that plaintiff would not be barred of recovery by the fact that she jumped from the train while in motion. See, also, Penn. R. Co. vs. Kilgore, 32 Penn. St. 292, where the circumstances were precisely similar.

In Texas & Pacific Ry. Co. vs. Murphy, 46 Tex. 356; S. C., 26 Am. Rep. 272, the court charged that starting the train on the instant of the signal was negligent, and that while attempting to board a train moving rapidly would be negligent, such an attempt, if the train were moving slowly, would not be negligent. Held, error, and that this was a question of fact. See, also, Johnson vs. Westchester R. Co., 70 Penn., St. 357.

In Eppendorf vs. Brooklyn City, etc., R. Co. 69 N. Y. 195; S. C., 25 Am. Rep. 171, the plaintiff signalled a street car to stop; the car was open, with a side step or rail; the driver applied the brake, and while the car was moving slowly, the plaintiff undertook to board it, when the driver started suddenly, and he was injured. Held, a proper case for the jury. The court said: "Ordinarily it is perfectly safe to get upon a street car moving slowly, and thousands of people do it every day with perfect safety." And so it is not negligent per se to leap from a street car in motion, when it has not stopped on request. Wyatt vs. Citizens' R. Co., 55 Mo. 485; Crissey vs. Hestonville, etc., R. Co., 75 Penn. St. 367. But contra (obiter), Nichols vs. Sixth Ave. R. Co., 38 N. Y. 131.—[Albany Law Journal.

Fitchburg Railroad.

The Fitchburg Railroad has received several new freight engines lately, and expect several more of the mogul and consolidation type within a few days:

To show the improvements recently made in the different classes of engines, it may be stated that the old freight engines of the style in use when the road leased the Vermont and Massachusetts Road, are now hauling a train of 14 cars between Greenfield and Fitchburg, upon a consumption of 65 pounds coal per mile run. The moguls, which were introduced a few years since, take 22 cars over the same road, upon a consumption of 75 to 80 pounds of coal per mile, while the 50-ton, eight wheel consolidation introduced last year, take 30 cars, with a consumption of only 10 pounds of coal per mile more than the moguls. The number of train hands is the same in each case.

The management of this road has within a day or two ordered five passenger engines of the most powerful description from the Mason Machine Works at Taunton, to be delivered the coming summer. By the recent purchase of a portion of the State Prison lands this railway secures room for several tracks, some 600 feet in length, upon which passenger cars will be stored when not in use. Piles are being driven to increase the yard room for freight cars near Warren Bridge.—[Boston Journal, Feb. 19.

NEW YORK, February 1, 1881.

THE THIRTY-SEVENTH SEMI-ANNUAL CASH dividend of the Illinois Central Railroad Company, on its entire share capital, being THREE AND A HALF (3½) PER CENT thereon, will be paid by the undersigned March 1, 1881, to shareholders as registered at 2 p. m. on the 11th inst., after which and until the 4th March, the transfer books will be closed.

Lock-box 500, Washington, D. C

The new 300-foot draw of the iron bridge now building over the Harlem River near Macomb's Dam bridge, and to be used for the joining of the New York City and Northern Railroad with the Metropolitan Elevated, was swung into position on the 19th inst. for the first time, joining both sides of the river.

The Cincinnati Enquirer says it is "advised that a readjustment of the difficulties of the Marietta and Cincinnati Railroad on a basis as suggested in the recent report of Mr. John King, Jr., will take place ere long."

ESTABLISHED IN 1831.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Weekly Boston Letter, a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

SECOND QUARTO SERIES, VOL. XXXVII., No. 10.] NEW YORK, MARCH 5, 1881. [WHOLE No. 2,341, VOL. LIV.

The London Stock Exchange.

ENTRANCE FEES AND ANNUAL DUES—CONTANGOES AND BACK WARDATIONS—TICKET DAY AND ACCOUNT DAY—HOW BUSINESS IS TRANSACTED—AMERICAN SECURITIES AND HOW THEY ARE LISTED—WHY NEW YORK PRICES ARE ALWAYS BELOW LONDON QUOTATIONS—RATES OF COMMISSION IN LONDON—THE MEN WHO HAVE NO SEATS IN THE BOARD.

[Special correspondence of Am. Railroad Journal.]

London, Feb. 19, 1881.

The points of divergence between the modes of procedure on the London and New York Stock Exchanges resemble in one respect the differences existing between the various denominations of Christianity; namely, that they are often more apparent than real. When one enters the sacred precincts of the Throgmorton St. Bourse and sees a broker offering a jobber 10,000 or 20,000 Erie, one is apt to wonder how a man who always seems to keep his book open for the purchase or sale of any quantity of speculative shares, can be esteemed to be of equal responsibility with one who confines himself to a strictly commission business. Nor is it likely that his surprise will be greatly diminished when the stranger is informed that all these apparently bulky transactions are "for the account," viz., the fortnightly settlement at the middle and close of each month, so that our friend the jobber may have time to buy and sell half the capital stock of any company before the day of cheque giving or receiving arrives.

And yet after all the broker is running no very serious risk, for although the initiation fees into the Stock Exchange are only 150 guineas ($785), and the annual dues but 21 guineas ($110), yet each candidate for admission is required to furnish three sureties in the sum of £500 each, who in the event of a default during the term of four years succeeding the candidate's admittance are required to make good the deficiency up to the amount stated.

As the fact of any consideration being given the bondsmen for their suretyship would at once prove fatal, not only to the candidate but also possibly to his sureties, who must in all cases be members, it will be readily understood that no person not fully responsible is likely to gain admission to the London Stock Exchange. Only in the case of clerks who have been in one Stock Exchange house for four years are two sureties each in the sum of £300 deemed sufficient. Even after being admitted to membership the clerk if in a jobber's service is prohibited from dealing in any other securities than those in which his employer is known to deal, and very frequently a jobber makes a specialty of one or two securities. Without the consent of his sureties a member cannot even apply for his clerk's admission, nor can a member enter into partnership with a non-member, and even partnerships between brokers and dealers are prohibited. Then again no foreigner is eligible for membership until at least two years after his naturalization, and no member can be surety for two persons at once. Moreover even if our friend the jobber were disposed to take advantage of any slip on the broker's part, it would be impossible for him to do so, in view of the rule which provides that where a member shall have bought or sold an unnamed quantity he shall only be bound to the extent of ten shares, francs 750 of French Rentes or £1,000 of stock or scrip. For these various extracts from the rules I am indebted to the courtesy of Mr. John Taylor the well known broker of Tokenhouse Yard, and I also take this opportunity of acknowledging the kindness of Mr. White, the assistant secretary of the Exchange.

There are now nearly 5,000 persons having the right of entry to the Board room. This includes some 3,000 clerks. The right of membership does not carry with it any insurance fund privileges nor any proprietary right in the building. As a matter of fact however, very many of the members also own proprietary stock in the building and said stock is now quoted at £420. Professional etiquette forbids any member of the Board, or as it is commonly called "The House," advertising his business by means of circulars showing how large profits may be made at small risk, so that the chance reader of any advertisement of such a nature in the "Times," "Standard" or "Daily News," will at once understand that the alluring bait set before him does not emanate from any of the above 5,000 gentlemen. The brokers do not exact margin—here called cover—from the jobbers to whom they sell or buy. From customers a cover ranging from 5 to 10 per cent is always expected. Fluctuations exceeding the latter figure are unusual within the fortnight, especially in the regular dividend paying securities. The "regular" commission on Governments is $\frac{1}{8}$th of one per cent, on foreign securities $\frac{1}{16}$th and on all others $\frac{1}{8}$th of one per cent. It is a very common thing however for a customer to liquidate his purchase or sale before the settlement day arrives, and hence it is quite usual to add $\frac{1}{4}$ per cent to the account opening each transaction.

Many bulls, or buyers for the rise, prefer when the day of settlement comes round to carry over the transaction to the next fortnightly settling day, and the interest they pay for this accommodation varying from $\frac{1}{64}$th to $\frac{1}{2}$ per cent is called a *contango*. In the same way bears, or operators for the fall, are frequently desirous to postpone their deliveries until the next settlement day, and for the loan of the securities due to their purchasers they pay what is called a *backwardation*. Both the rate of contango and backwardation are fixed by the jobber on "making up day," viz., the day immediately preceding the fortnightly "ticket day," when the brokers and jobbers after pairing off all transactions capable of settlement in the clearing house, and determining the difference due to or from each party to such transactions, make out tickets bearing the names of the parties to whom registered stocks are to be transferred. Ten days are allowed for the effectuation of such transfers—entailing an expense of $\frac{1}{2}$ per cent in stamps, and a fee of 2s. 6d. per transfer and if at the expiration of this period, the selling broker has failed to deliver, the purchaser is authorized to buy in the stock, the days regularly fixed by the committee for that purpose being designated "Buying in days." The day after "ticket day" is "account day" when all

cheques are passed in and the fortnightly settlements accomplished. Thus as has been shown each of these periodical settlements occupies three days and frequently an obstinate bull or bear unwilling to pay the heavier contango or backwardation demanded on the first day waits till the last day of settlement and going further fares worse. For such carrying over or backward bringing a broker charges one-half the ordinary buying or selling commission and he also charges one-half commission on all puts or calls, here termed options, he may buy or sell for his clients. These options form a perfectly legitimate and recognized branch of stock exchange business.

Of late the trading has been large here in American securities listed on this Exchange, and the official list of February 1st, records transactions in the following stocks and bonds: Albany and Susquehanna, Atlantic, Miss. and Ohio, Cairo and Vincennes, Central of New Jersey, Central Pacific, Cleveland and Pittsburg, Illinois Central, Missouri, Kansas and Texas, New York Central, Erie, Ontario and Western, New York, Pennsylvania and Ohio, Ohio and Mississippi, Pennsylvania, Reading, St. Louis and San Francisco, Atlantic and Gt. Western, Chicago and Alton and Philadelphia and Erie. The listing of any American security by the committee here costs nothing. Those proposing the listing of any such stock or bonds have to present to the committee the report of the New York Stock Exchange committee when the security in question was first listed there, and they have also to show that the transactions in the stock in question in London are of sufficient importance to warrant its occupying a place on the regular list. Transatlantic readers know enough about the machinery of making stocks active to render superfluous any explanations on this subject, but as a matter of fact one of the American securities most actively traded in here, viz., Lake Shore, has never been listed on the Stock Exchange at all. Mr. Vanderbilt has always insisted that in the case of his securities, the signatures to transfers be witnessed by Consular certificates, and as each such attestation costs 10s. 6d. the brokers have manifested no particular anxiety to have the transactions in "Vanderbilts" officially recognized by the Board. Most of the American securities listed here now are not registered so that transactions therein are unattended by any heavy expenses.

Of course the difference between London and New York quotations is due to the fact of all calculations here being based on one pound sterling, being the equivalent of $5. Supposing exchange in New York to be $4.81 this would involve London figures being about 4 per cent above those current on your side of the ocean in order to bring about the inevitable parity in prices, and hence were a New York broker to receive a London order to sell 100 Central and Hudson at market he would think himself fortunate in being able to sell there at 146, after having had the cable quotations of 151 here.

Brokers here are accustomed to occupy offices one-fourth or one-sixth the size of their New York compeers, and for that matter they are willing to take orders for 10 or even 5 shares of stock. Being allowed to charge what they please provided the scale does not exceed the rates fixed by the committee, commissions are apt to vary from 3d. to 6d. per share where the selling price is under £2, from 6d. to 9d. per share, between £2 and £5, from 1s. to 1s. 3d. per share up to £10, and from 2s. to 2s. 6d. per share up to £25. These rates cover both buying and selling. C. H. H.

Production of Pig Iron in the United States.

The last number of the Bulletin of the American Iron and Steel Association, published at Philadelphia, contains some highly interesting statistics of the production of pig iron in the United States in 1880, compiled from returns from manufacturers in all the States and Territories. Of these statistics the following summary is given showing the amount and increase of production in the various States:

The production of pig iron in the United States in 1880 was 4,295,414 net tons, or 3,835,191 gross tons. The production in 1879 was 3,070,875 net tons, or 2,741,853 gross tons. The increase in 1880 over 1879 was, therefore, 1,224,539 net tons, or 1,093,338 gross tons, or 40 per cent. The production of 1879 was larger than that of any preceding year, but the production of 1880 was not only 40 per cent larger than that of 1879, but it was 50 per cent larger than that of the two preceding most active years, 1872 and 1873, and it was double that of the Centennial year, 1876, when the production of pig iron during the panic years reached its lowest point. The following figures, in net tons, will make these extraordinary facts plain to the eye. Production:

1872	2,854,558	1877	2,314,585
1873	2,868,278	1878	2,577,361
1874	2,689,413	1879	3,070,875
1875	2,266,581	1880	4,295,414
1876	2,093,236		

Of the total production of pig iron in 1880, 1,807,651 net tons were made with anthracite coal; 1,950,205 tons with bituminous coal and coke; and 537,558 tons with charcoal. The increased production of the year over the product of 1879 was very evenly divided among the different fuels. It is, however, worthy of notice that the production of charcoal pig iron has increased pari passu with that of anthracite and bituminous pig iron. In the four years preceding 1880 it had declined relatively as compared with its two rivals. The charcoal iron product of 1880 has only twice been exceeded in our history—in 1873 and 1874, when the production was respectively 577,620 and 576,557 net tons. As has heretofore been the case, some of the anthracite furnaces used more or less coke in 1880 as a mixture, and a smaller number of bituminous furnaces used anthracite as a mixture. The exact quantity of pig iron produced in 1880 with this mixed fuel was 714,631 net tons.

Twenty-three States made pig iron in 1880, one more than in 1879, Minnesota entering the list for the first time with her Duluth charcoal furnace—the pioneer, we have no doubt, of many other iron enterprises within her borders. North Carolina has not made any pig iron since 1877. Oregon, with her Oswego charcoal furnace, doubled in 1880 her production of 1879. Another State, Colorado, has its first furnace, at South Pueblo, ready to be put in blast. California and Washington Territory are getting ready to make pig iron, a furnace in each being well under way. Utah Territory has made no pig iron since 1876, but the largest and best of its two furnaces, the one at Ogden, is likely to be blown in this year.

Every State in the Union which made pig iron in 1879, except one, increased its production in 1880. The exception was West Virginia, which made 70,801 net tons in 1879, and 70,838 tons in 1880. In 1879 Pennsylvania made 52⅓ per cent of the total production; in 1880 her reduction declined relatively to 48⅓ per cent. Ohio made a very sharp advance in 1880 upon her record of 1879. In 1879, with a product of 447,751 net tons, her percentage of the total product of the country was 14.6; in 1880, with a product of 674,207 net tons, her percentage was 15.7. The States which ranked next to Pennsylvania and Ohio in production in 1880, and which produced over 100,000 tons each, were New York, New Jersey, Michigan, Illinois and Missouri, in the order named.

There was a gratifying increase in 1880 in the production of spiegeleisen. The product was 19,603 net tons, against 13,931 tons in 1879, 10,574 tons in 1878, 8,845 tons in 1877, 6,616 tons in 1876, and 7,832 tons in 1875. The product of 1880 was made by the New Jersey Zinc Company and the Oxford Iron Company, in New Jersey, and by the Bethlehem Iron Company, the Cambria Iron Company and the Edgar Thomson Steel Company, in Pennsylvania.

The stocks of domestic pig iron on hand and unsold in the hands of makers or their agents at the close of 1880 aggregated 456,658 net tons, against 141,674 tons in 1879, 574,565 tons in 1878, 642,351 tons in 1877, 686,798 tons in 1876, 760,908 tons in 1875 and 795,784 tons in 1874.

The consumption of pig iron in 1880 can only be approximated. We produced 3,835,191 gross tons, and imported, as nearly as can now be ascertained, 700,000 tons, giving a total supply of 4,535,191 gross tons. We increased the stocks of domestic pig iron during the year the difference between 126,494 gross tons held at the close of 1879 and 407,780 gross tons held at the close of 1880, or 281,286 tons. There also remained in warehouse at the close of 1880 164,404 gross tons of imported pig iron. Adding the increase of domestic stocks to the warehouse stocks we have 445 640 gross tons to be deducted from the total supply, which gives us 4,089,551 gross tons as the probable consumption of the year.

Quicksilver Mining Co.

At the annual meeting of the stockholders of the Quicksilver Mining Company, held in this city on the 23d ult. the following directors were chosen: A. B. Baylis, David Mahany, James H. Banker, S. W. Boocock, James D. Smith, George W. Butts, Edward Brandon, Charles Fries, George G. Hoven, Frank K. Sturgis and F. N. Lawrence. Subsequently the following officers were chosen for the ensuing year: David Mahany, president; George W. Butts, Vice President; Abram B. Baylis, Treasurer; M. M. Weed, Secretary. The annual report of the company shows that the total product of the mine for the year 1880 amounted to 23,465 flasks. The net profits amounted to $225,779 28. The company has on hand in cash and quicksilver $591,321 08; also ore and materials amounting to $119,742 81.

The earnings of the Philadelphia and Erie Railroad for the month of January, 1881, were $224,303 34, the expenses $164,234 68, and the net earnings $60,068 66.

The Baltimore and Delta Narrow Gauge Railroad Company expect to be running their cars between Baltimore and Townsontown by July 1.

New York, Saturday, March 5, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

THE uncertainty concerning the fate of the Funding Bill, which has seriously disturbed financial circles for the past few weeks, was brought to an end Thursday morning, when President Hayes sent a message to the House of Representatives vetoing the bill.

THE BILL which has just established a railroad commission in Alabama provides that a salary of $3,500 shall be paid to the chief commissioner, and $3,000 to each of his associates. Alabama is not only liberal in regard to the pay of her commissioners, but also in her selection of them, as she places no limit upon their professions or business. The rule adopted by Georgia, however, seems quite as wise as the liberality of Alabama in her choice of commissioners. In Georgia it is required that the commission include a lawyer, a railroad man, and one acquainted with general business.

SECRETARY SHERMAN has prepared a valuable statement of the financial and economic transactions of the United States during the four years ending March 1st, from which it is shown that the Treasury receipts for the past year were nearly $48,000,000 in excess of the previous year, while the expenditures were $23,000,000 less for the year just ending than for the year ending March 1, 1880. The total reduction of the national debt during the past four years has been $208,824,730 27. During the past year our export of live stock has been larger than that of the previous year by $8,616,279, of other food larger by $81,675,769, while of general merchandise the increase was nearly $150,000,000. Our country produced 687,721 more bales of cotton last year than for the year ending March 1st, 1880, 31,500,000 more lbs. of wool, 32,093,093 more bushels of wheat, while the production of corn last year was about 10,000,000 bushels short. About half a million tons more of pig iron and over three million tons more of coal were produced by the United States last year than the year previous.

"IN good faith on the best materials I had," is what is given, in an apologetical way, as the foundation of some of Judge Black's remarkable statements concerning railroads, to the erratic character of which statements his attention has been promptly and emphatically called. A broad latitude for theorizing and surmising is generally supposed by laymen to be taken by the members of the legal profession when addressing their proper tribunals, but when they step out of their legitimate occupation in attempts to lead the public to worthy or unworthy action that latitude is narrowed, and the public demands that there shall be no careless treatment or overlooking of facts. "In good faith" may be very reassuring and refreshing, but when it comes to a description of the materials used the public is not satisfied until it is assured that it has been and is going to be given not only the best materials that the instructor may have happened to have had, but the very best that could possibly be obtained by honest, careful and unprejudiced study.

THE London Stock Exchange has many features in its workings somewhat peculiar to itself, and of which those outside of its precincts have generally but little knowledge, for it is composed of a body of men who by habit are as reticent as they are conservative in the matter of their business routine. Through an interesting letter which our foreign correspondent, after much inquiry and careful investigation, has prepared on the subject, we this week present to our readers an accurate and authoritative account of the most important principles and rules by which the operations of that great financial body are regulated. The peculiarities of the London Stock Exchange, however, are not so marked as to give rise to any question as to the parentage of our own New York Stock Exchange, the workings of which, while based on the conservative principles that are so manifest in its original model on the other side of the water, seems to differ chiefly through the same principles having become Americanized by use over here, until to us they naturally appear as better adapted to the modern requirements of these days of rapid transfer and transit of stocks, money and people.

COTTON manufacturing enterprises are being received with much enthusiasm and practical encouragement in the South Atlantic States, particularly in South Carolina and Georgia. In corroboration of the views expressed more at length recently by the JOURNAL on the growth of manufacturing in the South, we are receiving many reports of the starting of new enterprises in this direction, and, what is still more suggestive, reports of the enlargement of Southern cotton mills that have been in operation for several years. At a recent meeting of the directors of the Enterprise Factory, Augusta, Ga., after a ten per cent dividend from the earnings was declared, it was decided to enlarge the mill and increase its capacity over 125 per cent. The extension will make the building 550 feet long, and the proposed increase of capacity will raise the number of spindles to 33,000. Subscription books are opened in several places in these States for new cotton factories, and we are hearing surprising stories of the popularity of these enterprises. But the healthiest indications are found in the fact that much of the capital that is being used in the development of this branch of manufacturing there comes from the accumulated earnings of the mills under their successful and encouraging working of the past few years. From other parts of the South, also, come reports of similar activity. Two cotton mills at Natchez are said to be doing a very successful business, one of them being so crowded with orders that it has been thought advisable to stop even in the midst of its driving business to enlarge the capacity of the mill more than 100 per cent and to put in improved machinery. With plenty of labor and an abundance of natural resources at command, this awakening of interest in the matter gives a most promising outlook for manufacturing in the South.

RAILROAD men, as a rule, are men of action, and their activity is of a kind that doesn't expend itself in developing vocal muscles and exhibiting their braying powers to the sacrifice of their good common sense and at other people's expense; so that when their silence is assumed by men of words to be an admission of some alleged conviction of error, it seems about as consistent as the average of the many ill-considered and unfounded accusations that these agitators are trying to create ill wind enough to float. We hear of combinations formed for almost every conceivable purpose where favorable legislation is sought, but we hear of nothing that the railroads have done toward combining for the protection of their interests, against which such so-called

strong attacks are being made. The fact is that while all this talking is going on the managers of railroads are absorbed in pushing their enterprises and perfecting the workings of the same to the point of obtaining for themselves and the public the greatest benefit possible. When the people stop to consider a moment, they see the soundness of the principle of action which moves railroad men. It does not take them long to see that the hundreds of railroad companies in this country, having hundreds of local and general interests to consider, do the best work for themselves and their patrons in proportion as they devote their energies to their own legitimate business—railroading. There may come a time when their attention may be turned from this work to that of combining for the protection of their rights and property, and a combination of these many railroad companies for self-protection would mean a sad blow to the prosperity of our country. But so long as the present mutual confidence exists between the railroads and the most influential and practical of the people, the railroad men will not be driven from their natural work to the deplorable occupation of combination-making for legislative purposes, the result of which must inevitably be the demoralization of our most important productive and commercial interests.

Personal.

—D. Coldwell, father of D. W. Coldwell, General Manager of the Pittsburg, Cincinnati and St. Louis Railway Company, died at Zanesville, Ohio, last Saturday, at the age of 85 years.

—Alabama has established a Railroad Commission consisting of three members. The first President is W. L. Brigg, and his associates are Charles P. Ball and Joseph Crook.

—Logan C. Murray has removed from Louisville, Ky., to New York, where he is connected with the United States National Bank, recently organized. In Louisville he was president of the Kentucky National Bank.

—John C. Gault, general manager of the Wabash, St. Louis and Pacific Railway, who early in the season went to Florida for the benefit of his health, is said to be improving under the influences of the much-needed rest he is obtaining there and the congenial climate of his winter quarters.

—General J. S. Robinson having resigned the office of State Commissioner of Railroads and Telegraphs, of Ohio, to take his seat in Congress, Hon. Hylas Sabine, of Richwood, Union County, has been appointed as his successor. Mr. Sabine received the compliment from the Senate of having his nomination confirmed by that body unanimously, at once upon the receipt of the nomination from the Governor, without referring it to the committee.

—On the 1st of March the following appointments went into effect on the Louisville and Nashville Railroad: Geo. Nason, superintendent of the Pensacola Railroad, the Pensacola and Selma Railroad extension, and the Pensacola Steamship Company, with headquarters at Pensacola, vice W. D. Chipley; W. D. Chipley, superintendent of the Mobile and Montgomery, Selma division, Western Railroad of Alabama, and Pensacola and Selma Railroad, Pineapple division, with headquarters at Montgomery, vice B. Dunham, resigned. E. Marsh is appointed acting superintendent, with headquarters at Birmingham.

—Some of Jay Gould's personal experiences and theories about investments are given in an interview reported in the Herald as follows: "I have got some money. My theory is this: To go into everything that promises a profit. For me business possesses a very great fascination. I believe in this country; in its future. I have great faith in its possibilities; in its almost boundless resources. To use the slang of the street, and of the day and the time, 'I go into almost everything,' that promises a return; but at the same time I am as careful as pos ible to make my gains exceed my losses. Unfortunately I do not always succeed. I have been in a score, a hundred speculations, from which almost as soon as I was in I would have gladly withdrawn. But once in an enterprise it is very hard to leave it. To give you an illustration: I endeavored to get out of Union Pacific long before I did. I spoke to Mr. Sidney Dillon about it, and he almost begged me to remain in. In all these great enterprises there are ties of friendship as well as ties of business. We are all slaves, and the man who owns a million dollars is the greatest slave of all, save and except he who owns two millions."

—H. Victor Newcomb, formerly President of the Louisville and Nashville Railroad, is to make New York his permanent place of residence. A correspondent of the Philadelphia Times speaks of him as being probably the richest Southerner in New York, and gossips about him as follows: "He took charge of the Louisville and Nashville property when it was a single line of road and its stock was worth about thirty cents and he was about thirty-four years of age. It is said that he held about $2,000,000 worth of the stock of his company, which averaged him 50 cents. It is said that he, Mr. George Clark, of Clark, Dodge & Co., and two other persons, held a controlling interest in the road, which would have necessitated their holding over $4,500,000 of stock. This did not average over fifty cents to the purchasers. In a little over one year, by a series of exploits that were dazzling and brilliant, he had consolidated into practically one system about four thousand miles of road that took its place among the finest systems of the country. The stock ran up to 185, and paying about 14 per cent. on its capital, was doubled, and now ranges at about 93. Newcomb then retired from the presidency on account of ill-health, taking, it is said, over $2,000,000 clear profit on his investment, besides having added enormously to his fortune by incidental investment in stocks. His fortune is now put at from six to eight millions—a very pretty figure for a man who is just turning thirty-seven years of age. Mr. Newcomb has a home in Louisville and a place at Long Branch, and is now looking for a house in New York, which he will make his permanent residence. He is said to be largely interested in the Mexican railway scheme, deals liberally in stocks, is a "bull" in his sentiment, and is classed among the most skilful and successful operators in the city."

—Over the signature of "Johnny Bouquet," some one is serving up a queer Sunday morning dish of chit-chat to the readers of the Tribune, concerning prominent characters in New York society, political and business circles. This is what he says about some of the men conspicuously interested in Oregon railroads: "Mr. Montgomery has just built about 90 miles of railroad in Oregon up the Willamette Valley. Henry Villard, who is making quite a figure in finance, is also building a railroad in Oregon, and he and Montgomery were both newspaper correspondents in earlier years. It is a tradition in Washington that old Vice-President Henry Wilson, who never could make a cent for himself, but wanted to see the boys in the newspapers pay their board bills and feel independent, used to tell Henry Villard, Adam Hill, Horace White, Sam Wilkinson and others about the taxes to be imposed under the war tariff, and several of those young men, taking the hint, capitalized the information with men of means, and came out with $100,000 apiece. Villard married the daughter of William Lloyd Garrison. He is a native of Alsace, and a linguist. He went to Holland and made a negotiation in Kansas Pacific bonds, which brought him prominently forward as a financial manager. He then devised the extension of the Oregon Railroad, and has given hard work to it, until the young company, with a fleet of steamers and nearly 600 miles of road, has finally absorbed the Northern Pacific Railroad, nearly on the very day poor Henry D. Cooke, who was ruined in its behalf, gave up his kindly life in Washington City."

Organization.

—E. McGillivray, of Ottawa, has been elected President, A. McNab, Vice-President, and Mr. Perley, of Ottawa, second Vice-President of the Canada and Atlantic Railway Company.

—F. S. Lathrop has been elected president, and F. A. Potts, G. G. Haven, Chas. Parrish, J. N. A. Griswold, John Kean and John S. Barnes, directors of the Lehigh and Wilkesbarre Coal Co.

—The first board of directors of the St. Louis and Eastern Railroad is composed of Horace A. Stephens, Andrew Donnan, Eber Peacock, Victor Sherman, J. C. Sinclair, Henry Sutton and S. H. Parker. Horace A. Stephens is president of the company.

—The Jemez Valley Hot Springs Railroad Company was recently organized at Santa Fe, New Mexico. The road will run from Bernalillo to the Jemez Hot Springs, a distance of about 30 miles. This is the first railroad company ever organized by the people of that territory.

—The Louisville and Nashville Railroad Company's Directors held a meeting Feb. 26, and accepted the resignation of E. H. Green as President. C. C. Baldwin was elected to fill the vacancy, and George A. Washington, of Tennessee, was chosen Second Vice-President.

—The new Rapid Transit Commission, composed of Isaac Henderson, Samuel Hatton, Alanson Tredwell, Daniel T. Walden, and Aaron B. Cohn, met on the 1st inst., and organized by electing Mr. Henderson permanent President and Mr. Walden Treasurer. Nathan Comstock was appointed Secretary.

—C. K. Garrison, Arthur Leary, J. P. Kennedy, George G. Forrest, and Calvin Goddard have been elected Directors of the New York City and Northern Railroad Company. The other directors are William R. Garrison, Charles F. Woerishoffer, R. M. Galloway, Horace May, Jose F. De Navarro, J. P. Lowrey, and A. Heggerish.

—The following gentlemen have been elected directors of the Philadelphia and Erie Railroad for the ensuing year: Wistar Morris, John P. Wetherill, Strickland Kneass, Henry M. Phillips, J. N. DuBarry, N. Parker Shortridge, William J. Howard, Samuel Gustine Thompson, Henry D. Welsh, W. L. Elkins.

—Rufus Hatch, Joseph U. Orvis, S. D. Sewards, Charles E. Quincey, K. Simon, Hiram Pool, Charles Cahn, Charles A. Hammond and J. H. Drew are the trustees of the New York and Western Cattle Company, the object of which is to raise and feed cattle in Southwestern Kansas. The company has been organized by electing Rufus Hatch president, S. D. Sewards vice-president, Joseph U. Orvis treasurer, and K. Simon, secretary. The capital stock is fixed

at $250,000. The company has taken a temporary office at No. 181 Broadway.

—The Terre Haute and Mississippi Railway Company was incorporated at Indianapolis, Ind., on the 25th ult., by E. B. McClure, Herman Hulman, Robert S. Cox, Theo. Hodnut, R. L. Thompson, Willard Kidder and G. Ehrman. The length of the road will be 20 miles, and the capital stock $200,000. This is simply an extension of the Terre Haute and Southeastern Railway, with a view of reaching Sullivan County.

—Articles of incorporation have been filed with the Secretary of State of Illinois of the St. Louis and Eastern Railroad Company. The capital stock is $400,000. The incorporators are: Victor Sherman, J. C. Sinclair, Henry Sutton and S. H. Parker, of St. Clair County, and Andrew Donnan, Horace A. Stephens and Eber Peacock, of St. Louis. The object is to construct and operate a road from East Carondelet in a southeasterly direction to Georgetown, in the county of St. Clair.

—The Utah and Nevada Railway Co. (successors to the Utah Western Railroad Co.) has been incorporated under the laws af Utah Territory. The capital stock is put at $2,000,000, of which 2,690 shares were subscribed by the incorporators. The directors named in the articles of association are: E. F. Bishop, of Bridgeport, Conn.; R. M. Bassett, of Birmingham, Conn.; T. L. Watson, of Bridgeport, Conn.; Cyrus W. Field and Benjamin Richardson, of New York City; P. L. Williams, W. W. Riter, LeGrand Young, Abram Gould, James Sharp and Bolivar Roberts, of Salt Lake City.

—At a meeting of the stockholders of the Memphis, Pine Bluff and Texas Railroad Company, held at Little Rock, Ark., on the 25th ult., the number of directors was increased to eleven, and the following gentlemen were elected: W. M. Parrington, J W. Clapp and J. R. Goodwin, of Memphis, Tenn., and W. M. Harrison and E. W. Taylor, of Jefferson, Texas. R. W. Martin was elected President; W. M. Parrington, Vice-President; G. P. C. Rumbough, Secretary, and W. J. Thomson, Treasurer. The above road is designed to extend from Hopefield, opposite Memphis, along the west side of the Mississippi River and through Mariana in Lee Connty, Pine Bluff and Camden to a point on the Southern boundary of Columbia County, and to be extended thence through Louisiana to Jefferson.

—Articles of incorporation of the Sauk Centre and Northern Railway Company were filed in the office of the Secretary of State of Minnesota on the 25th ult. The capital stock is $1,000,000, in 10,000 shares of $100 each, payable in instalments not exceeding 20 per cent each. The incorporators are J. V. Brower and C. A. Gilman, of St. Cloud; J. R. Howard and Alexander Moore, of Sauk Centre, and Edward Sawyer, of St. Paul, who constitute the first Board of Directors. An election of a Board of Directors to succeed the first board is to be held on the first Monday in May, 1881. The number of directors may be increased by the vote ot the stockholders at any meeting of said corporation. The road is to extend from Sauk Centre northerly to some point on the Northern Pacific Railroad between Motley and Perham.

—The charter of the Kansas, Arizona and Pacific Railroad Company has been filed in the office of the Secretary of State of Kansas. The incorporators and directors are: A. A. Talmage, James A. Hill, Charles G. Warner, Thomas J. Portis, S. T. Emerson and Charles M. Hays, of St. Louis; Alfred Ennis, of Topeka; William Spriggs and W. A. Johnson, of Garnett, Kan., all connected with the Missouri Pacific Railroad, for which the new line is designed as a feeder. The capital stock is $10,000,000. The proposed route is from Leroy, Coffey County, running in a southwesterly direction through the counties of Coffey, Woodson, Greenwood, Butler, Sedgwick, Kingman, Horner, Barbour, Comanche, Clarke, Mead and Seward, to the west line of the State, a distance of 400 miles. The business of the new corporation is to be transacted at Leroy, Ossawatomie or Wichita, Kansas, and it is said the work of construction will be pushed with all possible speed.

Railroad Law.

CIRCUIT COURT OF U. S.—EASTERN DISTRICT OF PENNA.

Moses Taylor, a citizen of the State of New York, v. The Philadelphia and Reading Railroad Company, a corporation created by and existing under the laws of the State of Pennsylvania; the Philadelphia and Reading Coal and Iron Company, a corporation created by and existing under the laws of the State of Pennsylvania; George De B. Keim, a citizen of the State of Pennsylvania, and Edwin M. Lewis, a citizen of the State of Pennsylvania.

A railroad after having made default and being insolvent will be placed in the hands of Receivers on the application of its creditors secured by mortgage.

Held, after a railroad has been placed in the hands of Receivers that on a bill in equity filed by a mortgage creditor secured by mortgage made prior to the one on which the road was placed in the hands of Receivers, the original appointment of Receivers may be extended to cover the prior mortgage creditors' application.

Receivers may be authorized to borrow money and issue certificates therefor.

Receivers may issue certificates in payment of claims for materials and supplies furnished the company not more than five months before it was placed in the hands of the Receivers.

Thomas Hart, Jr., John G. Johnson, and James E. Gowen, Esqs., for petitioners.

John J. McCook, Ashbel Green, and John C. Bullitt, Esqs., for McCalmont Brothers & Co.

Lake St. John Railway.

The annual general meeting of the shareholders and bondholders of the Quebec and Lake St. John Railway Company was held in Quebec on the 3d ult. The annual report was submitted, which stated that work had been pushed forward by the contractors on the first section, from Quebec to St Raymond. The track having been laid into the last-named place, and arrangements have been made to run regular trains as far as St. Catharine by the 1st of June, and to St. Raymond by the 1st of July next. The road being built with its stone culverts, steel rails, and iron bridges, is better than any road in the Province, with the exception of the Government line. Surveys proved that the route via St. Raymond and the Batiscan was the best, being 1,000 feet lower in elevation than the other. Official information from the Crown Land Department establishes that within a radius of about forty miles from the proposed location of the road, and around Lake St. John, there are 6,000,000 acres of land, of which 3,000,000 are chiefly formed of an alluvial deposit, well adapted for colonization and farming, and the balance of great value for lumbering purposes. The Quebec Legislature last session adopted a bill, permitting changes in the location of the road and limiting the time for the completion of the road to the foot of the Island of Lake Edward, 45 miles, to 31st December, 1882, or in default thereof canceling the charter of the Company for the balance of the road. The city of Quebec subscription has thus far only been voted as far as St. Raymond, and a further subscription is recommended. The Federal Government has been asked to guarantee interest upon the Company's debentures. Delegates were sent to London and Paris to arrange for capital, who received hopeful assurances of getting it as soon as the subsidies above described were forthcoming. As to traffic, some 20,000 cords of firewood for the Quebec and Montreal markets are being got out, and considerable quantities of other descriptions of lumber are being made. Directors were elected as follows: Messrs. T. LeDroit, President, Frank Ross, Hon. D. A. Ross, S. Peters, T. A. Piddington, R. P. Vallee, M. P.; Lt.-Col. M. W. Baby, and the Mayor of Quebec, J. D. Brousseau, Vice President.—[Monetary Times, Toronto.

Railroads of Rhode Island.

The report of Mr. Henry Staples, Railroad Commissioner, states that during the year ending September 30, 1880, there have been constructed only two miles of track in the State, but that there are indications of a considerable extension during the present year. The Warwick Railroad has been purchased by the New York, Providence and Boston Railroad Company, who have equipped and operated it for some time. The capital stock of the sixteen railroads of the State actually paid in is $25 981,237: total indebtedness, $20,535,631; total receipts, $9,997,843; expenses, $8,135,442; net earnings, $1,805,110; surplus, after paying dividends, $2,383,178; surplus at commencement of year, $1,743,456; the net increased receipts over 1879 were $1,562,844; net increased expenses, $966,126; net increase in net earnings, $628,800; the increase in number of passengers carried, 3,849,618; of tons of merchandise, 534,479; the total number of passengers carried during the year was 28,893,482; of merchandise, 4,251,997 tons; total miles of track, 250.8.

From the report of the Railroad Commissioner of South Carolina it appears that there are seventeen railroads in operation in that State with a total length, exclusive of sidings, of 1,407½ miles. The total expense of running these roads for 1880 was $3,585,766. The total income was $4,943,074. Net earnings, $1,357,307. Last year the total expense was $3,098,346. Gross income, $4,008,802. Net earnings, $910,456. Thus showing not only an increase of business amounting to nearly 25 per cent, but an increase of profit of nearly 50 per cent.

The receipts of the Ohio and Mississippi Railroad for the month of January, 1881, (including $263,696 24 on hand at the commencement of the month) were $741,482 83, and the disbursements $728,819 18, leaving cash on hand at the close of the month $18,063 65. The disbursements were for vouchers paid to Nov. 18, 1876, $500; do. subsequent to that date, $340,887 62; pay rolls, $149,831 56; coupons consolidated mortgage bonds, $235,000; do. 1st mort., Springfield Division bonds, $2,000—total, as above $728,819 18.

The Georgia Railroad Companies have submitted to the requirements of the State Commissioners, and have reduced their passenger fares to three cents per mile, the new schedules having gone into operation throughout the State.

The gap between Little Rock and Pine Bluff, on the Little Rock, Mississippi River and Texas railway, was closed on the 25th ult., and the first passenger train passed through to Pine Bluff. Regular trains to Arkansas City and Monticello will be put on immediately.

The Morgan Company has transferred to the New Orleans Pacific Railway Company the bed, rolling stock, real estate, etc., of the railroad running between New Orleans and Donaldsonville, La., for $745 110.

Statement of the Public Debt of the United States, March 1, 1881.

DEBT BEARING INTEREST.

Totals	$64,623,512 00	$646,235 12

Interest paid by United States, $49,528,566 66; interest repaid by transportation of mails, &c., $14,079,707 39; interest repaid by cash payments: 5 per cent net earnings, $655,193 87; balance of interest paid by United States, $34,793,660 40.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, February 28, 1881.

JOHN SHERMAN,
Secretary of the Treasury.

General E. P. Alexander, of the Louisville and Nashville Railroad Company, says that while his company was not the purchaser of the Atlantic, Mississippi and Ohio road, it was purchased by gentlemen having large interests in the Louisville and Nashville road, and that his company expects valuable results from having Norfolk, Va., as a port of entry and delivery for their lines, which now permeate throughout the South and Southwest. In other words the line simply secures an additional outlet at Norfolk.

The gross earnings of the Prince Edward Island Railway for the year 1880 were $113,851 11, a decrease of $12,004 when compared with that of the previous year. The working expenses of the road were $164,640 55, being above the receipts by $50,789 44. The working expenses of the previous year were $223,313 12.

A mortgage has been filed in the office of the Circuit Court for Talbot county, Maryland, from the Chesapeake and Delaware Railroad Company to Chauncey Smith and W. T. Hart of Boston, for $100,000 to secure bonds which the company propose to issue.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, March 3, 1881.

During the day the rate for call loans was 6 per cent, to 6 per cent plus 1 32@1 16 of 1 per cent per day. Holders of securities were willing to pay 6 per cent for money for 60 days on Government bonds, and for six months on other good Stock Exchange collateral. Very little was done in mercantile paper, and that at about 6 per cent for prime names. In the last hour the rate for call loans to the stock brokers declined to 4 per cent.

The posted rates for prime bankers' sterling are 4.81 and 4.83½. The actual rates are 4.79¾@4.80⅛ and 4.81¼@4.82¾. Cables are 4.82@4.83, and prime commercial bills 4.77½@4.78½. At the close foreign exchange was quiet and steady.

The public debt statement given on another page shows that the decrease of the debt during the month of February was $11,843,155 59. The cash in the Treasury at the close of the month amounted to $238,208,176 69; gold certificates, $6,541,480; silver certificates, $47,842,260; certificates of deposit outstanding $7,965,000; refunding certificates, $780,750; legal tenders outstanding, $347,681,016; fractional currency outstanding ($15,520,347 92 less amount estimated as lost or destroyed in accordance with the act of June 21st 1879, $8,376,934) $7,144,413 92.

The payments made from the Treasury by warrants during the month of February, 1881, were as follows: On account of civil and miscellaneous expenses, $5,280,038 03; War, $2,558,-

338 99; Navy, $942,586 51; Interior Department—Indians, $244,194 93; Interior—pensions, $1,062,675; total, $10,087,832 51. The above does not include payments made on account of the interest or principal of the public debt of the United States.

A circular was issued from the Treasury Department at Washington on the 1st inst. which embodies the following changes in the regulations governing the issue and redemption of currency and coins of the United States and the redemption of national bank notes.

First, Standard silver dollars and fractional silver coin will be forwarded by the Treasurer, by registered mail, for deposits of gold coin or currency or remittance to his office.

Second, Standard silver dollars will be forwarded directly from the mints in New Orleans, Philadelphia and San Francisco for deposits with the Assistant Treasurers in these cities.

Third, Drafts on New York will be received in payment, for standard silver dollars and fractional silver coin only when collectable through the Clearing House.

Fourth, Returns for minor coin sent to the Mint in Philadelphia will be made only in other minor coin.

Fifth, Returns for national bank notes redeemed will be made by transfer check, or, if so required, in United States notes or fractional silver coin at the consignee's expense.

Sixth, The express charges on national bank notes sent to the Treasurer for redemption in even thousands of dollars will be paid by the Government.

Seventh, The express charges at Government contract rates will be deducted by the Treasurer on United States notes returned for national bank notes redeemed.

Pennsylvania Railroad.

From the report of this company for the year ending December 31, 1880, prepared for presentation at the annual meeting of the stockholders to be held in Philadelphia on the 8th inst., we learn that the gross receipts of the main line and branches—Philadelphia to Pittsburg—were $25,987,657 62, the working expenses $14,051,485 78, and the net earnings $11,936,171 84, to which is to be added interest from investments, rental from equipments, coal royalties and Empire Line earnings, $3,805,751 10, making a total of $15,741,922 94. From this are to be deducted rentals paid branch roads, interest on bonded debt, State taxes, interest on purchase of the main line from Pennsylvania, and interest on Car Trusts, in all amounting to $5,690,437 78, leaving net income on Pennsylvania Railroad Division, $10,051,485 16. From which deduct the net loss in working the New Jersey Division, from Philadelphia to New York, $1,035,308 87, leavvig a balance of $9,016,176 29. From this deduct the payments into the trust fund, $600,000; the payments into the sinking fund for the consolidated mortgage, $291,000; and the deficiencies in meeting interest of various guaranteed companies, $486,607 28; in all amounting to $1,377,607 28; and a balance is left to credit of income account, after deducting all payments for which the Pennsylvania Railroad Co. is responsible, of $7,688,569 01. Of this $4,820,914 were paid for 7 per cent dividends during the year, leaving a balance of $2,817,655 01; to this balance is added $795,220 37, realized from old accounts, and the amount to the credit of profit and loss at the beginning of the year, $4,181,073 33, making a total credit balance of $7,793,948 71 at the close of 4880. The railways west of Pittsburg, after providing for all liabilities, made a net profit of $3,158,041 41. Both the lines east and west of Pittsburg are free of floating debt. The trust fund now contains $1,401,850 of securities guaranteed by the Pennsylvania Railroad Co. The capital account was increased for construction, equipment and real estate during the year $3,505,168 19, the funds for which were realized from the sale of securities belonging to the company. The gross earnings of all the lines east and west of Pittsburg amounted to $70,764,062 25, the expenses (including rentals, dividends, etc.,) to $42,179,485 63, and the net earnings to $28,584,576 62, an increase over the previous year of $3,861,795 94.

Delaware, Lackawanna and Western R. R.

The income account of the Delaware, Lackawanna and Western Railroad Company for the years 1879 and 1880 is as follows:

Earnings:	1879.	1880.
Transportation and coal	$19,050,469 39	$21,257,891 35
Miscellaneous	1,176,238 65	398,713 34
Total	$20,226,708 04	$21,656,604 69
Expenses:		
Transportation and coal	$15,598,498 99	$15,437,060 64
Miscellaneous	817,757 32	316,073 00
Total	$16,416,256 31	$15,573,133 64
Balance net earnings	$3,810,451 73	$5,903,471 05
Deduct interest and rentals, including payments due Jan. 1	3,624,430 66	3,627,381 16
Profit for year	$186,021 07	$2,276,089 89
Capital stock	$26,200,000 00	$26,200,000 00
Bonds	5,887,100 00	5,677,900 09

The executive officers of the company for the ensuing year are: President, Samuel Sloan; Secretary, Fred. F. Chambers; Treasurer, Fred. H Gibbens.

Canadian Pacific Railway.

At a meeting of the Board of Directors of the Canadian Pacific Railway Company, held in Montreal on the 17th ult. the $5,000,000 of stock required to be subscribed by the terms of the charter were immediately taken by the contractors and their friends in London and Paris, and 30 per cent thereof paid in, and $1,000,000, required to be paid to the Government as security for the performance of the contract, was deposited in the Bank of Montreal to the credit of the Finance Minister at Ottawa. The company was fully organized by the appointment of George Stephen of Montreal, President; Duncan McIntyre of Montreal, Vice President; Hon. J. J. C. Abbott, Q. C, M. P., counsel; Messrs. Stephen, McIntyre, Augus and Hill as Executive Committee; Charles Drinkwater Secretary and Treasurer, and A. B. Stickney General Superintendent of the Western Division. Arrangements were made for the immediate and rapid prosecution of the work of construction. Contracts for ties, which had already been made in anticipation, were ratified by the board.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for January, 1881, as compared with the same month in 1880, shows

An increase in gross earnings of..... $105,664
An increase in expenses of..... 265,101

A decrease in net earnings of..... $159,437

All lines west of Pittsburg and Erie for the month of January, 1881, show a surplus over liabilities of $481,539, being a gain over the same month in 1880 of $80,712.

Northern Central Railway.

The Northern Central Railway Company furnishes the following comparative statement of the gross earnings and operating expenses for the month of January:

	1881.	1880.
Gross earnings	$386,156 41	$334,494 86
Operating expenses	245,970 66	214,060 90
Net earnings	$140,185 75	$120,433 46

—showing an increase in gross earnings of $51,662 05, in expenses of $31,909 76, and in net earnings of $19,752 29.

At the annual meeting of the Kingston and Pembroke Railway Company, held on the 8th ult., C. F. Gildersleeve, was elected President; Colonel G. W. Flower, Vice President; B. W. Folger, Superintendent; George Osborne, Secretary and Treasurer. The report of the directors which was presented, states that the work has been commenced on the portion of the line north o' the Mississippi River. It is expected traffic will be opened to the Clyde River before the end of this year. The traffic earnings for 1880 were: passengers and mails, $12,726 80; freight, $38,277 29; total, $50,933 09. Expenditure on running account for same period, $43,488 30.

It is reported that the Union Pacific Railway company will during the coming summer push forward the construction of the Ogden and Oregon railroad, which branch has already been surveyed. It will start from Ogden, Utah, and run to Baker City, Oregon, and make a connection with the railway of the Oregon Steamship and Railroad line. The length of this new road will be about five hundred miles, and the greater portion of it will be built this year. Grading will begin early in the spring, or as soon as the weather will permit.

The Denver and New Orleans Railroad Co. have filed articles of incorporation at Denver, Col., the object being the construction of a railroad from Denver to connect with the Texas Pacific, Houston and Texas Central and the Rio Grande extension of the Missouri, Kansas and Texas Railroads in Texas. The capital stock is $10,000,000.

The earnings of the Columbus, Chicago and Indiana Central Railway for the month of December, 1880, were $110,089 58, the expenses $392,861 35, and the net earnings $17,278 23.

The California railroad commissioners have reduced the railroad freights in the State 25 per cent and fixed second and third class passenger fares at 60 per cent of first class fares.

Taxes Kankakee and Southwestern R. R.	5,085 83	
Taxes leased lines in Iowa	60 774 81	
Rental, leased lines in Iowa	708,702 57	
		1,152,828 02
Net receipts		$3,479,012 61

The total receipts, as stated above, were $8,804,811 81, against $7,234,464 06 in 1879, an increase of $1,070,347 75; the operation expenses, including taxes and rentals, were $4,825,799 20, against $4,037,543 21 in 1879, an increase of $788,255 99; and the net receipts were $3,479,012 61, against $3,196,920 85 in 1879, an increase of $282,091 76.

By referring to the accompanying abstracts, it will be seen that in addition to the net returns from traffic in 1880, as noted above, of $3,479,012 61, the receipts from land office were $156,520 36, and from interest on bonds $112,000, making a total of $3,747,532 97. From this sum, besides paying interest on debt and dividends on shares, permanent improvements were made to the extent of $842,823 56, including the relaying of 115 miles of track in steel, the construction of 3 iron bridges, 9 heavy freight engines and 227 cars; also additional double tracks at the entrance to Chicago, and a new dock, and there was still remaining a balance from the year's operations of $501,641 14.

The Kankakee and Southwestern Branch lines (operated as the Middle division) were completed, one to Colfax, 19½ miles northeast of Bloomington, and the other to a junction with the Northern division, near Minonk. The branches comprise 101.22 miles, of which 33.63 miles were built in 1880. The construction account was closed at $583,000, of which $207,222 30 were expended last year.

The length of road operated is 918 19 miles in Illinois (64.46 more than in 1879) and 402.16 in Iowa, making 1,320 35 miles in all. There are in addition 193 62 miles of side tracks, and 29.68 miles of second, third and fourth tracks, making an aggregate of 1,543.65 miles of tracks, of which 659.73 are in steel. The new passenger tracks between Weldon and Parkside Junction, 6 565 miles (equal to 13.13 miles of single track) were opened for traffic on the 1st of April last.

The company have 213 engines. The car equipment of the road is as follows: 91 passenger, 12 smoking, 17 sleeping, 12 baggage and smoking, 9 baggage, 4 express, 8 baggage and express, 12 mail and express, 4 baggage, mail and express, 10 postal, 1 pay, 2 officers', 10 old passenger cars, not numbered, 2,939 box, 5 Blue Line, 110 caboose, 583 stock, 111 stock and grain combined, 51 fruit, 45 refrigerator, 278 flat, 1,197 coal, 4 powder and 18 derrick and tool cars and snow plows. Repairs of passenger cars were 0.87 cent, sleeping cars 0.40 cent, and freight cars 0.32 cent per mile run.

The total number of passengers carried was 2,753,544. Number carried one mile, 63,306,528. Av. number of miles traveled by each passenger, 22.99. Av. fare of each passenger, 57.80 cents Revenue received per mile of road, $1,205 81.

Tons of freight transported, 2,705,582; of which 2,240,368 were local, and 463,214 through. Tons carried one mile, 381,288,482. Tons carried one mile north, 182,920,966; do. south, 198,367,516. Tons of local freight carried one mile, 267, 223,705; do. through do., 81,064,777. Av. distance each ton was carried, 141 03 miles. Revenue per ton per mile, 1.54 cents. Av. revenue per ton, $2 17.60. Revenue per mile of road, $1,455 73.

The number of miles run by engines with passenger trains, 1,717,501; with freight trains, 3,459,069; with construction trains, 191,301; switching, 1,145,737; total, 6,513,611. Pounds of waste used, 46,389. Gallons of oil, 50,704. Cords of wood, 3,986. Tons of coal, 200,224. Total cost for repairs, including fuel, wages of engineers and firemen, waste, tallow, oil, and cleaning engines, $973,848 31. Total cost per mile, 14.95 cents. Average miles to pint of oil, 16.01; do. to ton of coal, 32.53.

In the report of the Traffic Manager the earnings of the road for the year 1880, (including $34,328 40 gross earnings of T., P. & W. R. W.,) are stated at $3,822,126 01, against $7,249,182 46 for the year 1879—an increase of $1,072,943 55. The operation expenses are given in the report of the Superintendent at $3,672,971 18, against $3,026,700 20 for the year 1879—an increase of $646,270 98. The proportion of operation expenses to earnings, excluding taxes and rental of leased lines, was 44.13 per cent, being 2.38 per cent more than for 1879. There was an increase in the number of passengers carried of 945,800, with an increase in the revenue therefrom of $222,902 88. The increase in tonnage of freight transported was 370,097, with an increase in revenue therefrom of $766,160 68. There was

an increase in the number of passengers carried one mile of 18,719,556, and an increase in the number of tons of freight carried one mile of 45,-817,622, The average fare of each passenger was 57.80 cents, against 75.70 in 1879. The revenue per ton per mile was 1.54 cent, against 1.52 cent in 1879.

President.—W. K. ACKERMAN.

Directors.—His Excellency, Shelby M. Cullom, Governor of Illinois, Ex-Officio; W. K. Ackerman, James C. Clarke, B. F. Ayer, until May, 1881; W. H. Gebhard, A. R. Van Nest, John Elliott, until May, 1882; A. G. Dulman, Stuyvesant Fish, W. Bayard Cutting, until May, 1883; William Tracy, L. V. F. Randolph, Frederick Sturges, until May 1884.

Traffic Manager.—JOSEPH F. TUCKER.

Secretary.—L A. CATLIN.

Treasurer.—L V. F. RANDOLPH.

Superintendent.—EDWARD F. JEFFERY.

Auditor.—J. C. WELLING.

The Eastern (Mass.) Railroad Company now has a party of engineers at work on the line of their proposed extension from Pigeon Cove to Ocean View Point. Its construction will not only enhance the value of real estate, increase the business of the hotels, and make the place even more popular than ever as a summer resort, but more than that will also secure to the road a large freight business from the quarries in the vicinity, and put them in direct communication with the Boston, New York and Western markets.

Railroads of Minnesota.

According to the report of the Railroad Commissioner the total amount of capital stock of all the lines of railroads in the State of Minnesota at the close of the year ending June 30, 1880, was $51,778,144, and the total debt $18,391,888—the average stock and debt per mile of road being $33,532. The gross earnings of all the roads for the year ending June 30, 1879, were $8,047,-834; operating expenses, $5,106,422; net earnings, $2,941,412. For the year ending June 30, 1880, the gross earnings were $10,774,826; the operating expenses $6,604,400, and the net earnings $4,170,425. The movement of freight of all kinds in reported year 1880 was 3,934,380 tons against 2,893,940 tons in reported year 1879, showing an increase of traffic of nearly one third. The grain carried in reported year 1880 was 1,-056,895 tons. The passengers carried in the year ending June 30, 1880, were 1,934,406, against the number of 1,809,380 in corresponding year 1879. The railroad lands sold in the year ending June 30, 1880, amounted to 506,961 acres, and the receipts on account of lands, $1,175,368; while for corresponding year ending 1879, the lands sold were 710,595 acres, and the receipts, $3,046,130. The Commissioner says:

I have believed it was the true policy of our State to give assurance of security and fair treatment to capital that might seek investment in railroads. The multiplication of roads and competing lines is the chief remedy for high rates. This policy has been maintained by the Legislature, and has secured the grand system that we now have of over 3,000 miles of railroad, giving the State a revenue of nearly $300,000 a year. It is but to continue it to insure branches and intermediate lines that shall bring railroad facilities within short haul of every farmer in the State, and with the competition of rival systems of roads the minimum rates of transportation will be secured.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending February 19, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad	140,172	1,386,613	1,414,238
Schuylkill Canal	.....	.....	38,041
Lehigh Valley	125,056	1,059,023	909,545
Del., Lack. & Western.	92,025	504,558	407,271
Shamokin Valley	20,000	128,688	102,386
Central New Jersey.	91,300	461,466	396,052
United R. R. of New Jersey	33,688	198,699	138,542
Pennsylvania Coal	22,805	126,731	75,837
Delaware and Hudson	81,971	426,893	462,610
Huntingdon & Broad Top Mt.	10,360	60,216	52,162
Penn. and New York.	28,156	259,900	258,500
Clearfield, Pa.	44,416	236,220	315,680

The total tonnage of anthracite coal from all the regions for the week ending February 19, as reported by the several carrying companies, amounted to 574,350 tons, against 291,138 tons in the corresponding week last year, an increase of 283,212 tons. The total amount of anthracite mined for the year is 3,079 795 tons, against 2,-706,180 tons for the same period last year, an increase of 373,615 tons. The quantity of bituminous coal sent to market for the week amounted to 88,907 tons, against 70,749 tons in corresponding week last year, an increase of 18,158 tons. The total amount of bituminous mined for the year is 502,976 tons, against 626,987 tons for the corresponding period last year, a decrease of 124,011 tons. The total tonnage of all kinds of coal for the week is 636,257 tons, against 361,887 tons in corresponding week last year, an increase of 301,-370 tons, and the total tonnage for the coal year is 3,582,771 tons, against 3,333,167 tons to same date last year, an increase of 249,604 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending February 19 was 182,925 tons, of which 135,981 tons were coal and 46,944 tons coke. The total tonnage for the year thus far has been 1,137,002 tons, of which 824,570 tons were coal and 312,432 tons coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended February 19 were 26,535 tons, and for the year 170,475 tons—a decrease of 61,146 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 24,874 tons, year, 148,591 tons; decrease as compared with 1880, 58,647 tons. Chesapeake and Ohio Canal, none; decrease as compared with 1880, 2,584 tons. Pennsylvania Railroad—week, 1 661 tons; year, 21,884 tons; increase over 1880, 85 tons.—[Phila. Ledger, Feb. 28.

Philadelphia and Erie Railroad.

From the report of this company, which was presented at the annual meeting of the stockholders held in Philadelphia on the 14th ult., we learn that the gross earnings for the year ending December 31, 1880, were; from passengers, $460,-755 59; from freight, $2,130,835 28; from express, $31,582 68; from mails, $26,481 45; and from miscellaneous $108,078 03—making a total of $3,727,733 13; from which deduct ordinary operating expenses, $2,358,353 78, leaving net earnings from operating, $1,369,379 35; add net receipts from rents, $1,839 84—total, $1,374,219 19. Less extraordinary operating expenses, $106,567 68. Actual net earnings, $1,267,652 11. Receipts per mile of road $12,943 51. Net earnings per mile of road, $4,754 79. Actual cost of working in 1880, 63.2 per cent; in 1879, 68.9; decrease, 1880, 5.7 per cent. There was a net increase of revenue in 1880, of $635,925 32, and of expenses, $228,095 71. The net earnings in 1880 were $1,-369,379 35; in 1879, $961,549 74; increase 1880, $107,829 61. Net revenue applicable for interest on bonded debt, &c., $1,068,145 19; interest on Sunbury and Erie and Philadelphia and Erie 6 and 7 per cent bonds, $1,093,720. Deficiency, after charging all expenses, interest and obligations, except interest on special stock, for which no settlement has been made for 1880, $25,574 81. Passengers carried in 1880, 598,570; in 1879, 449,102; increase, 149,468. Tons of freight moved in 1880, 4,861,463; in 1879, 4,130,126; increase in 1880, 731,337. The report says:

The sum of $106,567 08, which appears under the head of extraordinary operating expenses, was an outlay made to provide additional siding room and facilities for the repair of cars, both of which were very much needed to give proper facilities for the economical handling of the increased traffic of the road. These items were not chargeable to operating expenses, but have been so charged, as it was thought best not to charge the expenditure to capital account. The total amount charged to construction during the

year was $13,597. There have been issued 19,200 shares of the common stock, at par.

In anticipation of the maturity of the first mortgage of your company securing an issue of $2,000,000 currency bonds and £600,000 sterling bonds, the principal of which becomes due and payable on March 31, 1881, your Board would report that they have provided for the payment and retirement of the bonds by negotiating the sale of a sufficient number of the bonds of the company secured by the general mortgage of date July 1, 1869, which was created partly for the purpose of retiring all the then outstanding indebtedness of the company as the same became due.

To meet this maturing obligation the company has issued $5,263,000 of the bonds of $1,000 each, in registered form, bearing interest at the rate of five per cent per annum.

Bridges.

The Jeffersonville, Madison and Indianapolis people are replacing their wooden bridges over all streams of any importance with iron ones.

Another bridge across the Niagara river will be commenced in the spring, it is said. It is to be built for the Canada Southern railway at Tonawanda, New York, a few miles north of Buffalo.

The New York, Pennsylvania and Ohio Company will rebuild sixteen of their bridges on the third division in the spring.

Negotiations have been concluded by which the Dayton and Southeastern Narrow gauge Railroad goes virtually under control of the Toledo, Delphos and Burlington Railroad Company. President Corse, of the last named road having subscribed to 8,000 shares of Dayton and Southeastern Railroad stock, which gives him control.

At a meeting of the directors of the St. Louis Central Railway company, held in St. Louis on the 21th ult., the contract was signed by G. W. Andrews, president of the company, and by A. C. Bryden, president of the Mound City Construction company, letting to the latter company the contract to build and equip the road. The company receiving the contract are to begin the work of construction immediately.

At a meeting of the directors of the Canada and Atlantic Railway Co., held in Ottawa on the 26th ult. the contract for the construction of the road was finally signed by D. C. Lindsey, of Burlington, Vt., who guaranteed to build the entire road by 1883, a distance of 122 miles, thus insuring the completion of the route from Ottawa to Boston in three years.

The Baltimore and Ohio Railroad Company having purchased the controlling interest in the Columbus and Maysville Railroad, a bridge will be constructed across the Ohio river at Aberdeen, connecting the Kentucky Central with the Baltimore and Ohio's Western combination.

The annual meeting of the United States Rolling Stock Company was held in this city on the 1st ult., when a dividend was declared of 12s (twelve shillings) per share, which, with the interim dividends paid in September last, makes 5 per cent for the year 1880.

Four new sleeping cars for the Chicago, Milwaukee and St. Paul Railway Company, were shipped from the Works of the Harlan & Hollingsworth Company, Wilmington, Delaware, on the 26th ult.

The Court of Appeals has decided that the Sea View Elevated Railroad Company have a right to cross the Ocean Boulevard on a bridge within a few hundred yards of Coney Island.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

Railroads in Connecticut.

While the Western railroads had such a remarkable increase in business last year, which is certainly not abating in any respect this year, the Eastern railroads also had their proportionate share in the good results of the general revival in business activity. Among the Eastern States whose railroad earnings were vastly increased last year Connecticut was conspicuously fortunate. The gross railroad income in that State in the year 1880, amounted to $12,390,878 51, an increase of $1,378,627 94 over that of the previous year. For the first time in five years last year the passenger earnings showed an increase over the preceding year, though they were still about $840,000 behind those of 1873. Meanwhile the freight earnings of 1880 exceeded those of 1879 by over $1,000,000. There has been a remarkable change within the past year or two in the relative position of freight receipts to passenger receipts on the Connecticut roads. Up to last year the passenger receipts had always exceeded the freight receipts, but last year the balance was turned in favor of freight receipts until they were placed in excess of the former to the amount of about 20 per cent. This is a strong illustration of the great increase in the products of her manufactories that Connecticut experienced last year, for a large proportion of this increase of traffic comes from local business and industrial activity, for Connecticut with the Sound and river facilities for transportation to draw from her railroads, is prominently a locality where railroad earnings are more dependent upon local causes than upon conditions, chiefly effecting through freight. So railroad earnings are good indicators of the condition of manufacturing in that New England State of many and widely varied industries.

The total length of the railroads in Connecticut is 953 miles and with double track and sidings the entire length of single track in the State is 1,248. Of this amount 613 miles are laid with steel rails and the per centage of steel is being rapidly increased. The Railroad Commissioners, Messrs. Geo. M. Woodruff, John W. Bacon and William H. Hayward, in their annual report just published, give much interesting information concerning the workings of the roads of that State, and many valuable suggestions of interest to railroad men and the public generally, especially in regard to the question of color blindness upon which so much of careful study and investigation has been recently made under their direction. They give the opinions of many oculists and expert examiners as drawn out from examinations in various parts of the country. The result of the examinations made in Connecticut showed that the total average of color blindness among their engineers was only about three per cent.

While the gross income of the Connecticut railroads was largely increased last year as mentioned, there was also a marked increase in expenses, the expenditures being $7,686,414 20 an increase over the previous year of nearly $967,408 53, the proportion of expenses to earnings being 62 per cent, a little over one per cent more than last year. This is a fact, however, for congratulation rather than for much surprise, as the increased expenditure has been made largely in perfecting roads and rolling stock, and also in keeping up the quality of the railroad employees, in which respect Connecticut is conspicuously wise, both as to railroad and other employees, as is shown in her comparative freedom from all kinds of labor disturbances. The dividends paid by nine companies amounted to $2,539,295 70, the rates varying from 2½ to 10 per cent. From the detailed and tabulated statements made by the Commissioners concerning the improvements made last year, and the general management and workings of the Connecticut railroads a flattering showing in the way of dividends from several of them can be prophesied for the present year.

American and European Railways.

In none of the commercial countries of the world has railway building taken so exalted a position as a means for developing internal resources and advancing trade as in the United States. Perhaps in no other country has the need of means for extended internal communication been so great as in this. The geographical bearings of the principal interior rivers are at right angles to the main current of traffic, which, being from and towards the Atlantic seaboard, causes artificial means of communication to be a work of necessity. Railway building in this country is also prompted by an additional motive than those that usually obtain in the countries of Europe. Here we build roads in advance of population as a means of developing the resources of the country and extending the area of trade; there, roads are constructed to meet the demands of an existing population and an established trade. The methods of construction in Europe are consequently more conservative and take on less of that speculative element that accompanies much of the work here. There, trade revulsion caused by railway building is a rare event; here, unfortunately, it is one of too frequent recurrence. Here indeed it has come to be looked for as an inevitable incident of active railway progress, which for the time may cause far-reaching disaster to individual fortunes. Yet our almost periodical trade panics, usually of moderate duration, when they pass by find the country as a whole in an advanced condition for more extended prosperity. Disaster may come to the individual, but the roads remain—a monument, may be, of personal enterprise and perhaps ruin—as so much additional wealth of the State, and to accomplish the purposes for which they were designed.

In comparing the progress made here in railway building and in the several countries of Europe it will be seen that our advance is not unreasonable ground for self-congratulation. As early as 1830 the total length of the railroads in Europe was 196 miles, and in the United States there were at that period but 40 miles; in 1850 the countries of Europe had 14,335 miles, of which 6,617 were in Great Britain and 3,516 miles in Germany, while in United States the construction had reached 9,021 miles, while France at this period had 1,912 miles. From 1850 to 1870 railway construction went forward rapidly on both sides of the Atlantic and especially in France. In the latter year the roads of Europe had reached

a total length of 64,659 miles, of which Great Britain had 15,525, nearly one-fourth of the whole; Germany 11,526, and France 11,131 miles. During this period the roads of the United States had extended to 52,914 miles. During the next years up to 1878, according to the statistics published in that year by the French minister of public works, the railway systems of Europe were extended 50 per cent, or to about 97,000 miles, while in the United States the mileage in that year had increased to 81,776 miles. A portion of this time was a period of great depression in railway building in this country. Since the latter year the amount of road built in the United States has been proportionately greater than on the other side of the Atlantic.

In comparing length of roads with population; Sweden is the best provided of any of the European States, having 6.4 miles of road for every 10,000 inhabitants. Taking the mean in Europe it is 3.3 miles for every 10,000 inhabitants. The United States is prodigal with her railroads, having 23 miles to every 10,000 people, seven times more than the European mean. In comparison of miles of road to area of surface Belgium has 8.38 miles of road to each square mile of territory; Germany, 3.5; France, 2.85; the mean of Europe being 1.05. The mean in the United States was about the same as that of Europe, but in this there is nothing remarkable when the amount of new and unsettled territory is taken into account. In this country railway building may be considered as only fairly under way. There are large sections of new territory yet to be developed, and the facilities of trade still demand very considerable additions to the mileage of the Eastern, Southern and Valley States.

This leads to the reflection that the facilities for internal commerce in this country are being secured on a more extended and comprehensive scale than will exist in any other commercial country on the globe. The extent of territory to be provided with means of transit is such as favors numerous and great lines of road, and the nature of its products—agricultural, mineral and manufactured—are such as to provide a correspondingly great traffic. In fact, the physical features and geopraphical extent of the country demands lines of road commensurate with the vastness of the traffic. —[Missouri Republican.

Delaware Western Railroad.

The Delaware Western Railroad bill, recently passed by the Legislature of Delaware, authorizes the Delaware and Western Railroad Company to locate and construct a railroad or railroads, beginning at the most favorable point on the present line of its road, extending southwest to within half a mile of the town of Newark on the north side, and passing out of Delaware at some point on the boundary line of that State north of where the Philadelphia, Wilmington and Baltimore Railroad crosses the line, in a northeasterly direction to or into the State of Pennsylvania. For these purposes the company is given all the usual powers to enter on lands, locate and lay out its roads, erect stations, shops, &c., procure material and obtain title in the same manner as is provided for in other specified charters; provided, however, that the powers, rights and privileges here granted shall become null and void unless the specified extension be begun within one year and completed in three years, time lost in litigation to obstruct the work not to be counted. Passenger rates shall not exceed three cents per mile, but no single fare need be less than fifteen cents; freight charges by carload for distances over ten miles not to be more than five cents per ton per mile, and the whole charge for freight between any two points shall not exceed the whole charge for the same kind and amount of freight between more distant points.

Section 2 authorizes the company to increase its stock to pay for cost of the proposed extension according to the usual terms of such charters in Delaware, but three of the directors of the company must reside in that State. The Delaware Western Company is authorized to operate the proposed extension as its main line, the present line to Landenburg being treated as a branch, and to construct other branches and take leases of other roads, or lease all or any part of its own railroad upon such terms as may be mutually agreed upon between the parties.

Section 3 authorizes said corporation to make connections with any railroads incorporated in Delaware, Maryland or Pennsylvania, and at any time to merge its stock, franchises and property with those of such other corporations, such consolidation to be made according to the terms of the original charter of the Wilmington and Western road, but no such consolidation shall be made with any railroad passing entirely across the State.

Section 4. Whenever any such consolidation shall be effected the Delaware Western Company or its representatives are required to pay into the treasury of Delaware, in semi-annual installments, a gross annual sum of money, in lieu of other taxes, which annual payment shall bear the same proportion to the $40,000 now annually paid by the Philadelphia, Wilmington and Baltimore Railroad; that the length of the Delaware Western in Delaware bears to the length of the Philadelphia, Wilmington and Baltimore within the State; provided that this does not impair the State's right at another time to fix a different gross annual sum in lieu of all other taxes.

Northern Central Railway.

At the annual meeting of the stockholders of this company, held in Baltimore on the 24th ult. the report of the directors for the fiscal year ending December 31, 1880, was presented, from which we learn that the total revenue for the year amounted to $5,050,887 29, of which $695,490 28 were from passengers, $4,181,006 16 from freight, $68,565 56 from express, $42,741 20 from mails, and $117,642 09 from miscellaneous sources. The total running expenses were $3,255,238 45, of which $1,121,252 02 were for conducting transportation, $934,167 36 for motive power, $698,295 50 for maintenance of way, $437,736 62 for maintenance of cars, and $63,816 95 for general expenses. Deducting the expenses from the receipts as given, the net earnings were $1,795,118 84. In comparison with 1879 there was an increase in gross earnings of $942,438 47, equal to 22 94 per cent., and increase in expenses of $393,323 48, showing an increase in net earnings of $549,111 99, or 44.07 per cent.

In addition to the net earnings as above stated, there was received from dividends and interest $132,512 06; contribution for operating Elmira, Chemung and Canandaigua Divisions, (from Pennsylvania Railroad Co.) $27,423 37; royalty on coal mined, Shamokin Division, $88,580 22 making total net receipts, $2,043,634 49. Out of these net receipts $1,417,790 67 was applied to the payment of interest on the mortgage indebtedness of the company, rentals, taxes, &c., leaving a balance of net income for 1880 of $625,843,820. Of this latter sum, after meeting a guarantee of the company of the bonds of the Baltimore and Potomac Railroad, and a dividend upon the capital stock of 2½ per cent there remains a total net credit Dec. 31, 1880, of $187,708 45.

The total number of passengers carried in 1880 was 1,918,784, an increase of 382,855, or 25 per cent over the preceding year, and the increase in the amount of money derived from the same source was $67,503 45, or 10.75 per cent. The total tonnage of the year was 9,460,229, an increase of 1,539,363 over 1879. The coal tonnage of the main line in 1879 was 1,185,145 tons, and in 1880, 1,875,792 tons. There was an increase in the trade going on to the Pennsylvania Railroad at Marysville of 101,601 tons; also an increase of 1,789 tons to points on the Cumberland Valley Railroad. The total tonnage to Baltimore was 333,667 tons, a decrease of 34,670 tons in 1880. While the tonnage mileage shows an increase of 14.278 per cent., the gross receipts increased 26 242 per cent.

The terminal facilities at Baltimore were improved during the year by the construction of a pier at Canton 200 feet long and 120 feet wide, which will be used for transferring iron ore and other bulk freight from vessels to cars. It cost $40,000. The company is now entirely free from a floating debt.

Value of Foreign Coins.

A circular has recently been issued from the Treasury Department at Washington proclaiming the estimation made by the Director of the Mint of values of standard coins in circulation in the various nations of the world, changing the values of the following coins from those proclaimed by the circular of 1880, as follows:

Florin, of Austria, is reduced from 41.8 cents to 40.7 cents; boliviano, of Bolivia, from 83.6 cents to 82.3 cents; milries, of Brazil, increased from 54.5 cents to 54.6 cents; peso, of Ecuador, reduced from 83.6 cents to 82.3 cents; rupee, of India, from 39.7 cents to 39 cents; Japan having adopted the free coinage system for silver, the yen, which was formerly given as 99.7 cents in gold, is now 88.8 cents in silver; the Mexican dollar from 90.9 cents to 89.4 cents; the sol, of Peru from 83.6 cents to 82.3 cents; the rouble of Russia, from 66.9 to 65.8 cents; the mahbub, of Tripoli, from 74.8 cents to 74 3 cents; the peso, of Colombia, from 83.6 cents to 82.3 cents; the peso, of Cuba, is given at 93.2 cents, and the bolivar, of Venezuela, at 19.3 cents. The monetary and, of Egypt, which formerly was stated as the pound at $4 97.4, is now fixed as the piastre. 04.9.

The St. Johns and Sorel Railway project will it is said, be soon put into execution. The provisional officers of the company are Duncan Macdonald, President, E. R. Smith, Secretary, and Charles Arpin, Treasurer. The amount of $50,000 required by law has been subscribed and 10 per cent has been paid in.

New York, Saturday, March 12, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

THIS WEEK witnesses the opening of the new route to the Pacific, an event which is probably of as much significance in our railroad history as anything which has occurred in railroad construction since the opening of our first transcontinental line twelve years ago. The junction of the Southern Pacific Railroad and the Atchison, Topeka and Santa Fe was completed on Tuesday at a point in New Mexico called Deming, and through trains will be running over the line within a few days. The opening of the new route, while being of great value to general commerce, has as one of its chief points of significance that of the establishment of a most powerful agent for the development of that vast region of our Southwest and the Pacific coast, and the opening up of Mexico's magnificent resources and rich fields for American commercial enterprises.

ONE of the surprises this week in railroad circles was the announcement that the Pennsylvania Railroad Company had secured a controlling interest in the capital stock of the much-coveted Philadelphia, Wilmington and Baltimore Railroad Company. It had been generally supposed that the negotiation with Boston parties in the interest of the Baltimore and Ohio Railroad Company for this control were virtually completed, and the announcement made at the annual meeting of the Pennsylvania Railroad Company, Tuesday, that the controlling interest had been secured for that company was a complete surprise in all directions. The amount of the purchase is said to be 116,000 shares, at a cost of about $8,500,000, $78 per share having been paid for a portion of the stock, while some of it is reported to have been bought in New York of Boston parties for $70 and $75 per share. This makes it necessary for the Boston and Ohio Railroad Company to adopt other measures for reaching New York, which are said to be already under way.

PHILADELPHIA is likely to be favored with a considerable improvement in her street railroad system during the next few months, one feature of which will be a further introduction of five per cent fares. William Wharton, Jr., in obtaining control of the Lombard and South streets line of street cars is placed in a position where he can do for Philadelphia what he has done in New York in the way of perfecting street railroads. Mr. Wharton is president of the West End, Angora and Park Passenger Railway Company and the recent purchase in the Lombard and South street line will place the two lines under one management, a junction of the two roads being effected by the proposed laying of a double track over the South street bridge across the Schuylkill. While it is intended to considerably extend the termini of the united lines, the fare will be fixed at five cents, a result of which will be to stimulate improvements in other of Philadelphia's street railroads. Wilmington, Del., is also making important additions to her street car facilities, a contract having just been closed between the City Railway Company and Mr. Wharton for building a road for that company down Fourth street from Market to Third street bridge. The opening of spring will witness a considerable activity in street railroad enterprise in many other cities as well as the great activity under way in general railroad construction.

AN IMPORTANT move in the direction of establishing regular second-class rates for general travel on the trunk lines was made at the first day's session of the National Passenger and Ticket Agents' Association, which opened its semi-annual meeting at the Windsor Hotel Tuesday morning. A resolution was passed which provides that hereafter all tickets other than first class tickets, on all lines, shall be printed uniformly as "second class" tickets. It was said to be the intention of the trunk lines to confine the use of "emigrant tickets" to regular emigrant trains, for the foreign emigrant business. There is a probability that it may be so arranged that American emigrants going from the Eastern to the Western States will receive the same rates as foreign emigrants, but if so they will be strictly limited to the regular emigrant trains. The main idea of this move is evidently to establish on the trunk lines a fixed second-class rate for those who are willing to take second-class accommodations upon express trains. There has been developed within the last few years a custom of permitting travel upon the express trains at the very low emigrant rates which have prevailed, and this travel has increased until it has reached very large and annoying proportions. A just rule which shall draw marked lines between the rates of first class, second class and emigrant tickets, will prove very desirable, not only to the railroads but also to the general traveling public.

SPRING trade has undoubtedly been much delayed by the severity of the weather, which has seriously interfered with transportation throughout most of the long winter. But with the very first opening of spring the railroads are promptly freeing themselves of the blockades which have filled the side tracks with cars for many weeks, all the way through from the Atlantic coast to the far West. Every day now adds to the probability that transportation will receive but slight further hindrance from snow this season. There is a great demand in the West for empty freight cars, and as they are being dug out and thawed out from their winter blockades they are hurried on to the shipping points where cargoes are awaiting them; at the same time there is a liberal amount of westward-bound freight seeking transportation in our Eastern commercial centres. There is no doubt that the uncertainty which previous to the first of the month prevailed about the action of Congress on the funding question had indirectly a retarding effect upon general trade, as it certainly most seriously affected financial circles. The melting away alike of the snow and anxiety about disturbance of financial matters being created at Washington hastens the opening of spring trade, which has been retarded beyond general expectation, and the unlocking of the rivers and the railroads is likely to be accompanied by a marked activity in general business.

CONSIDERABLE interest is being centered in the quaint old town of San Diego, the most southerly seaport of California, on account of the renewal of efforts to make it a somewhat important railroad terminus. A number of Boston capitalists are reported as being interested in a scheme to connect that port with the Mexican and southwest system of railroads. It has been prophesied that the carrying out of this plan would greatly affect San Francisco, drawing from her commerce; but while a certain amount of traffic might be diverted from San Francisco by rejuvenating the ancient city which has threatened before to take the position of a rival, and by improving her approaches, still San Francisco has little reason to

fear losing much of her supremacy on the Pacific coast. The most important result for California of the carrying out of this reported scheme would be an agricultural development in that little corner of her territory similar to that which the Southern Pacific Railroad and the extended enterprises connected with that great system have given to the entire State. The opening of a road to San Diego would tend to increase the local traffic through the State, and San Francisco would reap a benefit in this direction which would probably more than compensate for anything she might lose through having San Diego, now a forlorn and isolated town, converted into something of a railroad terminus. It would be about as difficult to draw the Pacific coast supremacy from San Francisco in this way as it would be to draw from New York her supremacy as a shipping point and give it to some obscure seaport 400 miles down the Atlantic coast.

Pennsylvania Railroad.

The following is an abstract of the Thirty-fourth Annual Report of the President and Directors of the Pennsylvania Railroad Company—being for the year ending December 31, 1880—which was presented to the stockholders at their annual meeting in Musical Fund Hall, Philadelphia, on Tuesday last:

The gross earnings on the Pennsylvania Division, Main Line and Branches, Pittsburg to Philadelphia, for the year ending December 31, 1880, were $25,987,657 61, the operating expenses $14,051,485 78, and the net earnings $11,936,171 84; to which add interest on investments, etc., $3,805,751 10, making a total of $15,741,922 94; from which deduct payments for leases and rentals, interest on bonded debt, etc., $5,690,437 78, leaving as net earnings the sum of $10,051,485 16. Compared with the year 1879, there is an increase in gross earnings of $4,244,029 31, with an increase in expenses of $2,299,865 23, making the increase in net earnings $1,944,164 08. There was an increase in interest from investments, etc., of $1,292,552 89, and an increase in interest on bonded debt, etc., of $667 712 29—making the increase in the net income of the company over 1879, $2,569,004 68.

The gross earnings of the United New Jersey Railroad and Canal Company, including the Belvidere Delaware Railroad and Flemington Branch, during the year 1880, were $11,544,681 74, the expenses $8,215,208 01, and the net earnings $3,329,473 73; to which add interest from investments, $192,384 24—making the total net earnings $3,521,857 97. The amount disbursed for interest, dividends, etc., was $4,557,166 84—showing a net loss of $1,035,308 87. Compared with the year 1879, the gross earnings show an increase of $1,759,888 69, with an increase in expenses of $1,714,346 48, making the increase in net earnings $45,492 21; from which deduct decrease in interest received from investments, $18,855 30, making the total increase $26,636 91. There was an increase in payments on account of dividends, interest, etc., of $122,056 69—making the net loss in operating the New Jersey Division $95,419 78 more than in 1879.

Deducting the net loss from operating the New Jersey Division from the net income of the Pennsylvania Division, as shown above, leaves a balance of $9,016,176 29; from which deduct payments to the fund for the purchase of securities guaranteed by the Pennsylvania Railroad Company, under trust created Oct. 9, 1878, $600,000 Pennsylvania Railroad Company's consolidated mortgage bonds redeemed by sinking fund, $291,000, one-half loss in operating the Elmira, Chemung and Canandaigua Divisions of the Northern Central Railway Co., (divided equally with that company) $27,423 37, deficiency in meeting interest guaranteed by the Pennsylvania Railroad Company on bonds of the Baltimore and Potomac Railroad Company, Shamokin Coal Co., Philadelphia and Erie Railroad Co., Allegheny Valley Railroad Co., Sunbury, Hazleton and Wilkesbarre Railway Co., and Frederick and Pennsylvania Line Railroad Co., $459,183 91—in all, $1,377,607 28—leaving balance to credit of income account $7,638,569 01; out of which was paid dividends of seven per cent, amounting to $4,820,914—leaving amount to be transferred to credit of profit and loss account for 1880, of $2,817,655 01; to this is added $4,181,078 88 to credit of that account December 31, 1879, and $795,220 37 realized from settlements of old accounts and profit on sale of securities—leaving $7,793,948 71 to credit of profit and loss December 31, 1880, a gain during the year of $3,612,875 88.

The gross earnings of the Philadelphia and Erie Railroad in 1880 were $3,727,733 13, the expenses $2,358,353 78, and the net earnings $1,369,379 35. Deduct interest charged for the use of equipment, etc., $268,767 55, leaves net amount applicable to payment of interest, etc., $1,100,611 80, which amount was paid to the Philadelphia and Erie Railroad Company as rental. Compared with 1879, the gross earnings show an increase of $635,925 32, the expenses an increase of $228,095 71, and the net earnings an increase of $407,829 61. The amount applicable to the payment of interest shows an increase of $302,111 10.

The gross earnings of all the lines east of Pittsburg and Erie for the year 1880 were $41,260,072 49, the expenses $24,625,047 57, rental and interest on equipment $2,738,562 13, and the net earnings $13,906,462 79; for the year 1879 the gross earnings were $34,620,279 17, expenses $20,382,740 15, rental and interest on equipment, $2,129,010 50, and net earnings $12,108,528 52—showing an increase in gross earnings of $6,639,793 32, an increase in expenses, etc., of $4 841,859 05, and an increase in net earnings of $1,797,934 27.

The number of tons of freight moved over the lines east of Pittsburg and Erie in 1880 was 27,899,173, against 24,970,672 in 1879, an increase of 2,428,501. The number of tons carried one mile in 1880 was 3,292,991,330, against 3,061,478,249 in 1879, an increase of 231,513,081.

The number of tons of freight moved in 1880 over the main line and branches, including 976,780 tons of fuel and other materials for the company's use, was 16,341,588, embracing 7,494,728 tons of coal and coke. For the previous year 14,457,502 tons were moved, showing an increase of 1,884,066 tons, or 13.03 per cent, while the increase in coal tonnage was 1,114,728 tons. Of the 15,364,788 tons of individual freight moved on the main line and branches in 1880, 2,067,360 were through and 13,297,428 local freight.

The number of passengers carried on all lines east of Pittsburg and Erie for the year 1880 was 16,575,042, against 13,602,401 in 1879, an increase of 2,972,641. The total mileage of passengers was 882,787,186, against 814,260,989 in 1879, an increase of 68,526,197.

The total earnings of the lines owned or controlled by the Pennsylvania Railroad Company west of Pittsburg, and operated by the Pennsylvania Company and the Pittsburg, Cincinnati and St. Louis Railway Company, in 1880, were $29,503,989 76, the expenses $17,554 438 06, and the net earnings $11,949,551 70; in 1879, the earnings were $25,742,296 50, the expenses $15,305,533 56, and the net earnings $10,436,762 94—showing an increase in earnings of $3,761,693 26, with an increase in expenses of $2,248,904 50, making the increase in net earnings $1,512,788 76. From the net earnings of 1880 $8,791,510 29 is deducted for rentals, interest, and liabilities of all kinds chargeable thereto, leaving a net profit of $3,158,041 41. The deduction for like purposes in 1879, of $3,612,674 54, leaves a net profit of $1,824,088 36.

The other lines west of Pittsburg in which the Pennsylvania Railroad Company has an interest, but which are worked through their own individual organizations, show a loss after the payment of interest and rental of $346,662 67, of which this company is responsible for $86,644 66, which deducted from the net earnings, as stated above, leaves a net profit on all the lines west of Pittsburg of $3,076,396 85, against $1,682,326 12 in 1879, showing a gain of $1,889,070 73.

The number of tons moved on all lines west of Pittsburg in 1880 was 22,302,291; do. moved one mile, 2,426,038,735. In 1879 the number of tons moved was 20,166,334, and the number moved one mile 2,272,716,185.

The number of passengers carried on all lines west of Pittsburg in 1880 was 9,665,994; do. carried one mile, 321,783,885. In 1879 the number of passengers carried was 8,261,565, and the number carried one mile 269,515,697.

The gross earnings of all lines operated east and west of Pittsburg in 1880 were $70,764,062 25; and the gross expenses, excluding rentals, interest, dividends, etc., were $12,179,485 65—showing net earnings $28,584,576 62; in 1879 the gross earnings were $60,362,575 67, the expenses $35,639,794 99, and the net earnings $24,722,780 68—showing an increase in earnings of $10,401,486 58, in expenses of $6,539,690 64, and in net earnings of $3,861,795 94.

The number of tons of freight moved on all the lines east and west of Pittsburg in 1880 was 49,701,464; and the number moved one mile, 5,719,030,065. In 1879 the number of tons moved was 45,187,006, and the number moved one mile 5,334,194,434.

The number of passengers carried on all lines east and west of Pittsburg in 1880 was 26,241,036; and the number carried one mile 704,571,071. In 1879 the number carried was 21,863,966, and the number carried one mile 583,776,686.

The amount expended for construction, equipment and real estate during the year was $4,877,-953 79; against which there are credits for property sold, value of united company's stock received on account of Harsimus improvement, and amount charged to branch roads, in all $1,-372,785 60—making the net expenditure $3,505,-168 19. During the year 1881 the outlay for new construction and equipment will probably be quite as large as for the past year.

The debt due the State of Pennsylvania on account of the purchase of the Main Line was reduced during the year by the payment of $258,-608 92 which was charged to capital account; the balance of the annual payment of $460,000, amounting to $201,301 08, representing the interest, was charged directly to income account.

Consolidated mortgage bonds due 1905, to the par value of $291,000 were redeemed during the year; the total amount purchased to date of the report is $639,460.

Of the $4,970,000 first mortgage bonds of the company, due December 31, 1880, $2,867,000 were paid off and canceled, leaving $2,103,000 then outstanding, which amount has since been reduced to $253,000. The money for the payment of the remainder is held as a special fund by the treasurer. Provision was made for the retirement of these bonds by the issue of $5,000,-000 of consolidated mortgage 5 per cent bonds to become due in 1919, which were disposed of on favorable terms.

The $10,000,000 six per cent Navy Yard bonds due Jan. 1, 1881, have been extended for a period of 20 years from that date at five per cent interest.

In order to enable the Philadelphia and Erie Railroad Co. to provide for the payment and cancellation of $5,000,000 of six per cent bonds of that company, maturing March 30, 1881, guaranteed principal and interest by the Pennsylvania Railroad Co, this company purchased of the Philadelphia and Erie Railroad Co. a certain amount of the bonds secured by its general mortgage, the interest thereon being reduced from six to five per cent per annum. Of these bonds, $5,000,000 were guaranteed, principal and interest, by the Pennsylvania Railroad Co., and disposed of on satisfactory terms.

There are now in the sinking fund for the redemption of the obligations of the various companies forming the United New Jersey Railroad and Canal Co., securities to the par value of $1,-479,000. There is also a cash balance, uninvested by the Trustees, of $42,629 64. The Pennsylvania Railroad Co. also holds an additional amount of $124,000 of bonds, which have been redeemed, making an aggregate investment of $1,645,629 64, for which it will in the future, in accordance with the terms of the lease, receive bonds to be issued under the General Mortgage of that company.

The General account of the Treasurer at the close of the year will be found on another page.

According to the report of the Masters of the Philadelphia and Reading Railroad the balance on hand January 1 was $71 957 78. The receipts during that month were $2,418,744 44, and the payments were $2,168,274 91, leaving a balance on February 1 of $217,457 31. The sum of $156,136 paid as instalments on deferred income bonds was put under a separate account. The balance credited to the coal and iron company for the month is $146,792 85.

Railroad Earnings.

—The approximate earnings of the Flint and Pere Marquette Railroad Company for the first two months of 1881 were $255,261 25 as compared with $228,016 65 for the same period last year.

—The approximate earnings of the Denver and Rio Grande Railway Company for the first week of March are given as amounting to $32,359 as compared with $35,590 for the corresponding week last year. The number of miles operated this year is 551; last year the number of miles operated was 347.

—The approximate earnings of St. Paul, Minneapolis and Manitoba Railway Company for four weeks, ending Feb. 28th, were $151,482 20. For the same period last year the earnings were $137,644 69. For the two months of January the earnings were as follows: 1881, $413,669 20; 1880, $317,883 55.

—The earnings of the Central Pacific Railroad Company for the month of February were $1,400,000. The earnings for the month of February, 1880, were $1,070,487. The approximate earnings for the month of January, as announced by telegraph, were previously given as being $1,498,000. The official returns received on the 9th inst. show that the actual earnings for January were $1,602,907 52, making the earnings for the first two months of 1881 $3,002,907 52. The earnings for the first two months of 1880 were $2,271,101.

Personal.

—General Grant will make his headquarters at his Long Branch Cottage this summer.

—A. W. Sofer has been promoted to the office of general manager of the Iron Mountain Railroad.

—Wayne MacVeagh, the newly-appointed Attorney-General, has of late years acted as counsel for the Pennsylvania Railroad Company.

—Levi P. Morton has been appointed Minister to France, a position for which he is eminently qualified by his long experience in public life, and his ability as financier and statesman.

—Franklin B. Gowen, President of the Philadelphia and Reading Railroad Company, arrived in New York from Liverpool last week Saturday, and went to Philadelphia the same day.

—The three commissioners who are to represent the United States in the International Monetary Conference at Paris are William M. Evarts, of New York, Allen G. Thurman, of Ohio, and Timothy O. Howe, of Wisconsin.

—Arthur A. Hobart has resigned the position of superintendent of the Boston and Lowell Railroad, and it is said that the vacancy occurring by his resignation will not be filled at present. J. F. Crockett has been appointed master of transportation and repairs.

—Mr. Gaddis has assumed the duties of general manager of the Ogdensburg and Lake Champlain Railroad. He has not yet resigned the position of general manager of Boston and Hoosac Tunnel Railway, and it is said that he will continue to look after the interests of that line until it is transferred to its recent purchasers, the Burt Syndicate.

—The Philadelphia Stock Exchange has elected the following officers: President, George Gilpin; Chairman, Joseph R. Wilkins; Vice-Chairman, Jos. H. Seaver; Secretary and Treasurer, John C. Johnson. Members of Governing Committee, to serve for three years—Abraham Barker, Wm. J. Morris, D. C. W. Smith, George S. Fox, John Markoe, Jr., Wm. N. Whelen. To serve for two years to fill vacancies, George C. Thomas, Wm. G. Huey. Mr. Wilkins received the high compliment of being re-elected to the responsible position of chairman by a unanimous vote.

—L. B. Boomer, of Chicago, widely known as a bridge-builder and President of the American Bridge Company, died suddenly at the Windsor Hotel, this city, last Sunday. A correspondent of the Evening Post says of Mr. Boomer:—"He went from his native State of Massachusetts, and settled in Chicago about thirty years ago, and from that time on he has been extensively engaged in bridge building in all parts of this country, but chiefly in the Western and Northwestern States. Many of the largest railway bridges spanning the Mississippi, Missouri and other great rivers were built by him. Possessed of a noble, brave, and generous heart, he was ever a kind, loving and sympathizing friend to all who needed friends. Prosperity or adversity made no change in him. The sweetness of his character always remained the same. He loved his fellow men, and in turn he won their love and confidence to a degree far beyond ordinary experiences."

Manufacturing.

—It is announced by cable that the four highest awards for scales at the International Exhibition at Melbourne, Australia, have been awarded to Fairbanks & Co. Last year, at the Sydney Exhibition, they received an award of special distinction, in addition to the leading prize open to general competition.

—The Globe Company, of Boston, are bringing out many inventions of special value for railroad use. It is claimed that a saving of half a ton of coal a day, on each locomotive, can be made by the use of their spark consumer, and that their anthracite waste-consuming patents will reduce the cost for fuel to about one-half the present average.

—The English silicate white paint is very highly recommended, for its cheapness, covering 20 per cent better than white lead, and for its durability, as it is unfailing and does not chalk or crack off. It is especially adapted to freight cars, and is growing very popular for that and kindred purposes, where the merits of paint are put to secure tests. Howard Fleming, 23 Liberty street, is the American agent for this paint. Mr. Fleming is also agent for J. B. White & Bro., manufacturers of the famous English Portland cement.

—A new ferry company has been organized and incorporated by the Legislature of this State called the Brooklyn Ferry Company. The incorporators are Capt. Ambrose Snow, the Pilot Commissioner; Capt. Jeremiah Darling, Benjamin Flint, George W. Roosevelt, Robert Sullivan, Nelson Edwards, E. McLaughlin, and W. C. Bassett. Capt. Snow is the treasurer of the company, and Daniel S. Remsen is secretary and counsel. The capital is nominally fixed at $75,-000, with the privilege of increasing it to $1,000,000. The object is to establish another ferry in the Eastern District, near the foot of Broadway, to some point between Fourteenth and Twenty-third streets.

—At a meeting of the directors of the Memphis and Kansas City Railway Company, at Hopefield, Ark., on the 2d inst., the following officers were elected: President, Louis Hanauer, Memphis; vice-president, John A. Lindsay, Arkansas; secretary, R. F. Patterson, Memphis; treasurer, Henry Bons, Arkansas.
